(b) Is no longer in business;

(c) Knowingly fails to perform or supervise an inspection or test, or both, as required in an applicable subpart;

(d) Knowingly attests to the lack of errors, omissions, or false statement of an approval test report that contains errors omissions, or false statements;

(e) Does not meet the requirements of § 159.010–3(a);

(f) Does not comply with § 159.010–11;

(g) Contracts or transfers the performance or supervision of required inspections or tests to another laboratory or person without the approval of the Commandant; or

(h) Fails to, or in the opinion of the Commandant is unable to, carry out its responsibilities under an MOU required by § 159.010–7.

§ 159.010–21 [Redesignated as § 159.010–19]

41. Section 159.010–21 is redesignated 159.010–19, and revised to read as follows:

§ 159.010–19 Termination of acceptance or recognition: Procedure.

(a) If the Coast Guard receives evidence of grounds for termination of acceptance or recognition of an independent laboratory under § 159.010–17, the Commandant will notify the laboratory that termination is under consideration. The laboratory may submit written comments to the Commandant within 21 days of receipt of the notification. The Commandant will take all timely written comments into account before taking final action in the matter, and in no case will the Commandant take final action until at least 30 days after the laboratory has received the notification. Any final action taken by the Commandant is final agency action on the matter.

(b) If a deficiency could materially affect the validity of an approval issued under an applicable subpart, the Commandant may temporarily suspend the acceptance of the laboratory and may direct the holder of the certificate of approval to cease claiming that the items tested or inspected by the laboratory are Coast Guard approved, pending a final decision in the matter.

PART 160—LIFESAVING EQUIPMENT

42. The authority citation for Part 160 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703, and 4302; E.O. 12234, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

Subpart 160.021—Hand Red Flare Distress Signals

§ 160.021–9 [Removed]

44. Section 160.021–9 is removed.

Subpart 160.022—Floating Orange Smoke Distress Signals (5 Minutes)

§ 160.022–9 [Removed]

43. Section 160.022–9 is removed.

Subpart 160.023—Hand Combination Flare and Smoke Distress Signals

§ 160.023–9 [Removed]

44. Section 160.023–9 is removed.

Subpart 160.024—Pistol-Projected Parachute Red Flare Distress Signals

§ 160.024–9 [Removed]

45. Section 160.024–9 is removed.

Subpart 160.028—Signal Pistols For Red Flare Distress Signals

§ 160.028–9 [Removed]

46. Section 160.028–9 is removed.

Subpart 160.031—Line-Throwing Appliance, Shoulder Gun Type (And Equipment)

§ 160.031–9 [Removed]

47. Section 160.031–9 is removed.

Subpart 160.036—Hand-Held Rocket-Propelled Parachute Red Flare Distress Signals

§ 160.036–9 [Removed]

48. Section 160.036–9 is removed.

Subpart 160.037—Hand Orange Smoke Distress Signals

§ 160.037–9 [Removed]

49. Section 160.037–9 is removed.

Subpart 160.040—Line-Throwing Appliance, Impulse-Projected Rocket Type (And Equipment)

§ 160.040–9 [Removed]

50. Section 160.040–9 is removed.

Subpart 160.047—Specifications for a Buoyant Vest, Kapok, or Fibrous Glass, Adult and Child

§ 160.047–6a [Removed]

51. Section 160.047–6a is removed.

§ 160.047–6b [Removed]

52. Section 160.047–6b is removed.

§ 160.047–6c [Removed]

53. Section 160.047–6c is removed.

54. Section 160.047—7 is revised to read as follows:

§ 160.047–7 Recognized Laboratory

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.005 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performing production oversight receive training and support equal to that of the laboratory that performed the approval testing.

§ 160.047–9 [Removed]

55. Section 160.047–9 is removed.

§ 160.047–10 [Removed]

56. Section 160.047—10 is removed.

Subpart 160.048—Specification for a Buoyant Cushion, Fibrous Glass

§ 160.048–7 [Amended]

57. Section 160.048–7, removed paragraphs (a) and (b) and redesignate paragraphs (b), (c), and (e) as (a), (b), and (c) respectively.

§ 160.048–7a [Removed]

58. Section 160.048–7a is removed.

59. Section 160.048–8 is revised to read as follows:

§ 160.048–8 Recognized Laboratory.

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.005 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performed production oversight receive training and support equal to that of the laboratory that performed the approval testing.

§ 160.048–9 [Removed]

60. Section 160.048–9 is removed.

§ 160.048–10 [Removed]

61. Section 160.048–10 is removed.

Subpart 160.049—Specification for a Buoyant Cushion, Plastic Foam

62. In § 160.049–7, revise the heading, remove paragraphs (a) and (d) and redesignate paragraphs (b), (c), and (e) as (a), (b), and (c) respectively, to read as follows:

§ 160.049–7 Procedure for approval

§ 160.049–7a [Removed]

63. Section 160.049–7a is removed.

63. Section 160.049–8 is revised to read a follows:

§ 160.049–8 Recognized laboratory.

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.005 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performed production oversight receive training and support equal to that of the laboratory that performed the approval testing.

§ 160.049–9 [Removed]

65. Section 160.049–9 is removed.

§ 160.049–10 [Removed]

66. Section 160.049–10 is removed.

Subpart 160.052—Specification For a Buoyant Vest, Unicelluler Plastic Foam, Adult and Child

§ 160.052–8a [Removed]

67. Section 160.052–8a is removed.

§ 160.052–8b [Removed]

68. Section 160.052–8b is removed.

§ 160.052–8c [Removed]

69. Section 160.052–8c is removed.

70. Section 160.052–9 is revised to read as follows:

§ 160.052–9 Recognized Laboratory.

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.005 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performing production oversight receive training and support equal to that of the laboratory that performed the approval testing.

§ 160.052–11 [Removed]

71. Section 160.052–11 is removed.

§ 160.052–12 [Removed]

72. Section 160.052–12 is removed.

Subpart 160.057—Floating Orange Smoke Distress Signals (15 Minutes)

§ 160.057–9 [Removed]

73. Section 160.057–9 is removed.

Subpart 160.060—Specification For a Buoyant Vest, Unicellular Polyethylene Foam, Adult and Child

§ 160.060–8a [Removed]

74. Section 160.060–8a is removed.

§ 160.060–8b [Removed]

77. Section 160.060–8b is removed.

§ 160.060–8c [Removed]

75. Section 160.060–8c is removed.

76. Section 160.060–9 is revised to read as follows:

§ 160.060–9 Recognized Laboratory.

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.005 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performing production oversight receive training and support equal to that of the laboratory that performed the approval testing.

§ 160.060–11 [Removed]

77. Section 160.060–11 is removed.

§ 160.060–12 [Removed]

78. Section 160.060–12 is removed.

Subpart 160.064—Marine Buoyant Devices

§ 160.064–5 [Removed]

79. Section 160.064–5 is removed.

§ 160.064–5a [Removed]

80. Section 160.064–5a is removed.

§ 160.064–5b [Removed]

81. Section 160.064–5b is removed.

82. Section 160.064–7 is revised to read as follows:

§ 160.064–7 Recognized Laboratory.

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.005 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performing production oversight receive training and support equal to that of the laboratory that performed the approval testing.

§ 160.064–8 [Removed]

83. Section 160.064–8 is removed.

§ 160.064–9 [Removed]

84. Section 160.064–9 is removed.

Subpart 160.066—Distress Signal for Boats, Red Aerial Pyrotechnic Flare

85. In § 160.066–11, paragraph (c) is revised to read as follows:

§ 160.066–11 Approval procedures.

* * * * *

(c) The approval tests must be performed by an independent laboratory accepted by the Commandant under Subpart 159.010 of this chapter.

§ 160.066–18 [Removed]

86. Section 160.066–18 is removed.

Subpart 160.077—Hybrid Inflatable Personal Flotation Devices

87. Section 160.077–9 is revised to read as follows:

§ 160.077–9 Recognized Laboratory.

(a) A manufacturer seeking Coast Guard approval of a product under this subpart shall follow the approval procedures of subpart 159.055 of this chapter, and shall apply for approval directly to a recognized independent laboratory. The following laboratories are recognized under § 159.010–7 of this part, to perform testing and approval functions under this subpart:

Underwriters Laboratories, 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709–3995, (919) 549–1400.

(b) Production oversight must be performed by the same laboratory that performs the approval tests unless, as determined by the Commandant, the employees of the laboratory performing production oversight receive training and support equal to that of the laboratory that performed the approval testing.

Dated: March 20, 1996.

J.C. Card,

Rear Admiral, U.S. Coast Guard Chief, Office of Marine Safety, Security and Environmental Protection.

[CGD 94–110]

RIN 2115–AE96

Recreational Inflatable Personal Flotation Device Standards

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is adopting a final rule that establishes structural and performance standards for inflatable personal flotation devices (PFDs) for recreational boaters, as well as the procedures for Coast Guard approval of inflatable PFDs. These standards allow for approval of inflatable PFDs which are more amendable to continuous wear by recreational boaters than inherently buoyant PFDs, thereby encouraging use of PFDs by the boating public and saving lives.

DATES: This rule is effective on September 24, 1996.

ADDRESSES: Unless otherwise indicated, documents referred to in this preamble are available for inspection or copying at the office of the Executive Secretary, Marine Safety Council (G–LRA/3406), U.S. Coast Guard Headquarters, 2100 Second Street SW., room 3406, Washington, DC 20593–0001, between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert L. Markle, U.S. Coast Guard, Marine Safety and Environmental Protection Directorate, telephone (202) 267–6446, facsimile (202) 267–1069, or electronic mail "mvi–3/G-M18@cgsmtp.uscg.mil". A copy of this final rule may be obtained by calling the Coast Guard's toll-free Customer Infoline, 1–800–368–5647. In Washington, DC, call (202) 267–0780.

SUPPLEMENTARY INFORMATION:

Regulatory History

On November 9, 1993, the Coast Guard published an Advance Notice of Proposed Rulemaking (ANPRM) entitled "Inflatable Personal Flotation Devices" in the **Federal Register** (58 FR 59428). On June 23, 1995, the Coast Guard published an interim rule (IR) entitled "Inflatable Personal Flotation Device Standards" in the **Federal Register** (60 FR 32836). This IR became effective on July 24, 1995. Due to requests, a public meeting, announced in the August 2, 1995, **Federal Register** (60 FR 39268), was held at Coast Guard Headquarters on August 28, 1995. On October 10, 1995, the Coast guard published a notice in the **Federal Register** (60 FR 52631, October 10, 1995) extending the comment period on the IR from October 23, 1995, to November 6, 1995, to allow discussion of the rule at the National Boating Safety Advisory Council (NBSAC) meeting on October 30–31, 1995. Additionally, minor editorial changes reflecting Coast Guard organizational changes were made to the regulations established by the IR by a final rule published September 29, 1995, in the **Federal Register** (60 FR 50455).

In addition to this rulemaking project, a separate rulemaking project (CGD 93–055) resulted in the publication of a Notice of Proposed Rulemaking (NPRM) which proposed complementary rules governing the carriage, use, registration, and defect notification for inflatable PFDs for recreational boats (June 23, 1995), **Federal Register** (60 FR 32861)). Additional procedures for approval of inflatable PFDs, and other types of PFDs, were included in the NPRM. These provisions were proposed separately because they affect other types of PFDs besides inflatables. The Final Rule for this project (CGD 93–055) is being published elsewhere in today's **Federal Register**.

This rule, establishing minimum safety standards for inflatable PFDs, is being made effective 180 days after publication in the **Federal Register** pursuant to 46 U.S.C. 4302(b). Although the IR was effective 30 days after its publication, it provided a new category for approval of PFDs, and did not change any existing approval procedures. Since this Final Rule changes regulations now in effect, it could affect persons who relied upon regulations in the IR which are now being changed. For this reason, the 180 day delay in the effective date under 46 U.S.C. 4302(b) applies. This should not affect the progress of manufacturers' design and testing, and therefore should not result in delay in getting approved devices to market. Manufacturers can proceed with design and testing during this period.

Public Meeting

A number of initial comments to the IR expressed confusion about the basis and applicability of the "Life-Saving Index" (LSI) used in the IR as an alternative path for approval. The LSI is a probability based risk assessment tool designed to evaluate a PFD design's overall lifesaving potential. Based on comments, the Coast Guard held a public meeting and training seminar to aid interested persons in understanding and applying the LSI analysis process. The meeting was attended by six PFD manufacturers, two inflation system manufacturers, an official from a boat owners association, a member of the public from the National Boating Safety Advisory Council (NBSAC), and representatives from Underwriters Laboratories (UL), the only laboratory currently recognized to perform the approval tests for inflatable PFD devices. A summary and video tape of the meeting are available as part of the public docket for inspection and copying where indicated under **ADDRESSES.** During the meeting, Coast Guard personnel discussed the history of this rulemaking, with emphasis on the development of the LSI and its role and usefulness in evaluating the overall lifesaving potential of various PFD designs. There was also a discussion of the PFD information pamphlet which accompanies the sale of inflatable PFDs and provides important information to the potential consumer before a PFD is purchased. Specific details of the meeting are discussed below in the appropriate sections.

Approval History

Under the IR, Coast Guard approval of inflatable PFDs and component materials has been possible since July 24, 1995. To this date, four manufacturers have started the approval process for at least 6 models of inflatable PFDs, but no device has yet received final approval. Additionally, no inflator or inflation chamber material has been completely tested to be accepted by the Coast Guard as meeting the requirements of the UL 1191 consensus standard for component materials incorporated by reference into the Coast Guard regulations. Although a number of manufacturers have completed preliminary testing of prototype designs of PFDs, sample PFDs for final testing have not been constructed. This is due to a lack of accepted component materials since a sample PFD undergoing final testing for Coast Guard approval must be constructed of the same or equivalent materials that will be used in commercially available manufactured products to ensure that the final products meet the approval standards.

Regulatory Information

The two main standards adopted by the IR and retained in this rulemaking are Underwriters Laboratories (UL) standards for inflatable PFDs and PFD components (UL 1180 and 1191, respectively). These standards were developed in accordance with the American National Standards Institute (ANSI) procedure for voluntary industry standards. In accordance with the ANSI procedures, interested parties were provided with an opportunity to participate in the development of the standards. The public was also given an opportunity to comment on the adoption of approval standards for inflatable PFDs in the ANPRM published on November 9, 1993 (58 FR 59428), and the IR published on June 23, 1995 (60 FR 32836). The ANPRM advised of the intention to use an industry consensus standard and encouraged interested, knowledgeable persons to participate in the ANSI standards making process. On February 24, 1994, notice was published in the **Federal Register** (59 FR 9015) of the Coast Guard's participation in the first consensus standards meeting with UL. This notice again invited interested technical experts knowledgeable in the field to participate in the meeting and process. Comments received in response to the ANPRM and IR were generally in favor of development of structural and performance standards for inflatable personal flotation devices and procedures for Coast Guard approval of inflatable PFDs. The UL standard (UL 1180) is complete, with the exception of several reserved sections.

Background and Purpose

The regulations in this final rule are intended to allow approval of PFDs which may be more appealing to recreational boaters than currently approved PFDs, thereby increasing the percentage of PFDs actually used by the boating public and saving lives. However, the Coast Guard notes that the currently approved inherently buoyant PFDs have an excellent lifesaving record. The Coast Guard boating statistics show that while boating activity was increased several fold, the number of fatalities has dropped from about 1,800 to 800 per year over the past 25 years, and this decrease is in part due to use of these inherently buoyant PFDs. The Coast Guard also notes that inherently buoyant PFDs are more appropriate for non-swimmers than inflatable PFDs. Non-swimmers may panic when they enter the water, and may therefore not be able to manually or orally inflate an inflatable PFD. Moreover, there are a number of boating applications for which inflatable PFDs are not suitable, as listed in the PFD information pamphlet. Therefore, inherently buoyant PFDs will continue to play a vital role in boating safety programs for the public.

Advisory Committee and Other Consultations

In developing these regulations the Coast Guard consulted with the National Boating Safety Advisory Council (NBSAC) and the National Association of State Boating Law Administrators (NASBLA). In May 1994, NBSAC passed a resolution recommending approval for Type I, II, III, IV, and V inflatable PFDs. PFDs differ in Type based on the environment in which they are designed to perform and their intended use. The various Types of PFDs are described in more detail in the IR. In 1988, 1993 and 1994, NASBLA also passed resolutions urging that approvals for inflatable PFDs be granted as soon as possible. Additionally, the National Transportation Safety Board has recommended that the Coast Guard approve inflatable PFDs.

NBSAC formed a subcommittee to study the implementation of the various types of approvals that might be granted by the Coast Guard and developed an "inflatable PFD objectives statement" and "performance goals". Copies of these documents are included in the docket file for this rulemaking. The documents identified a number of goals that NBSAC determined to be appropriate in the effort to set standards for the manufacture and approval of inflatable PFDs. In November 1994, the full council passed a resolution supporting the objectives statement and goals.

After publication of the IR, NBSAC and NASBLA again considered the issue of inflatable PFD approval and passed resolutions recommending approval of inflatable PFDs. Both resolutions, though, objected to the modifications to the UL 1180 standard that the Coast Guard included in the IR. The details of the most recent deliberations and the resolutions are discussed with the appropriate comments below and the resolutions are included in the docket file for this rulemaking.

Inflatable PFD Studies

As discussed in the IR, the Coast Guard has sponsored two studies on the suitability of inflatable PFDs in the recreational boating environment: a 1981 Inflatable PFD Field Test, Report No. CG–M–84–1 and a 1993 study conducted by the BOAT/U.S. Foundation for Boating Safety. Each study involved the use of about 500 inflatable PFDs in a recreational boating environment. Copies of these studies are included in the docket file for this rulemaking. Initial review of these studies indicated that inflatable PFDs could not be approved without extensive servicing requirements or conditions on approval. However, as discussed below, developments in inflatable PFDs have allowed the Coast Guard to establish the approval standards for inflatable PFDs adopted in this final rule.

New Developments in Inflatable PFDs and UL Standards

New developments in the manufacture of inflatable PFDs, along with work done by UL in this area since the testing was conducted in the above studies, have improved the chances that inflatable PFDs will work when used and maintained by the average boater. The problems revealed by the two studies discussed above have been addressed in the UL standard. Consequently, PFDs meeting the requirements of the new UL standard, along with certain additional requirements included in this final rule, should not have the problems that prevented the Coast Guard from approving recreational inflatable PFDs in the past.

The Coast Guard is issuing a final rule for approval of inflatable PFDs at this time based on the need for more wearable PFDs, boater demand for alternatives and the development of more "user serviceable" inflatable PFDs. With these user serviceable PFDs there is a good chance that the user of the PFD will (1) recognize when the PFD needs servicing and (2) be able to perform the servicing correctly. These improved PFDs are equipped with inflation mechanisms (inflators) that are more user-friendly than previous models. User-friendly features are often referred to as mechanisms that are designed with "good human factors". Good human factors relate to the ease with which boaters can determine when their inflatable PFD needs rearming and the ease with which they can correctly rearm the PFD. Good human factors design will decrease the incidence of unarmed inflatable PFDs that were evident in the studies discussed above.

The UL standard defines two different performance levels for inflators. For an inflator to meet the requirements of the UL standard, a high percentage of test subjects must be able to correctly identify whether an inflator is properly armed and to be able to rearm the device with no training other than use of the owner's manual provided by the manufacturer and toll-free calls to a manufacturer's help line, if one is available. The performance level assigned is based on the percentage of passing test results. At this time, an inflator capable of being accepted at the highest level is not available at a reasonable cost, but at least one such inflator is under development. The characteristics of the higher performing inflators (use code 1F) are described in item 1 of the discussion of specific comments below. If properly maintained, inflatable PFDs with the lower level performing inflation mechanisms provide high reliability, though the probability of proper maintenance (maintainability) remains a key component of ensuring their effectiveness. The information pamphlet and owner's manual required to accompany the sale of inflatable PFDs will emphasize the need for proper maintenance of these devices. Additionally, the inflatable PFD label will include warnings to check that the unit is fully armed before donning and to perform a service test at least once each year.

Discussion of Comments and Changes

Seventy comments were received from fifty-seven individuals and organizations in response to the interim final rule (IR) published June 23, 1995. Thirty-eight of those commenting were boaters, nine were PFD and component manufacturers or PFD consultants, and seven were from organizations or associations representing manufacturers, boaters, cities or state boating law enforcement. The remaining three groups commenting were laboratories or dealers. A number of manufacturers and organizations commented more than once. The Coast Guard has reviewed all of the comments and revised the rule as appropriate. The comments have been grouped by general and specific issues, and are discussed below:

General Comments

None of the comments opposed Coast Guard approval of inflatable PFDs; 49 comments urged the Coast Guard to approve inflatable PFDs as soon as possible.

Boaters submitted the largest number of comments. Nearly all of their comments supported Coast Guard approval of inflatable PFDs as soon as possible, and many of them indicated that boaters would be inclined to wear an inflatable PFD more frequently than a currently approved PFD. Many of these comments either explicitly or implicitly cited the published views of a boating organization, which opposed many of the IR provisions. Two comments also specifically favored the use of inflatables for Coast Guard Auxiliary patrols because of their increased wearability. Additionally, one comment pointed out the potential increased safety benefit of greater flotation of inflatable PFDs when compared to presently approved inherently buoyant PFDs.

Wear Rates and Wearability: Ten comments noted that they favored the use of inflatable PFDs because of their comfort (i.e., easy to wear, not as hot, less bulky, and greater maneuverability when performing operations aboard a boat). Six commenters indicated that they currently owned yoke style inflatable PFDs that they were pleased with. Eight commenters, including all but one of the above owners, indicated they currently wear a PFD continuously. Eight more comments indicated that the writer would wear an inflatable if approved and available. In addition,

several comments from boaters indicated that they were not opposed to a requirement that inflatables be worn to be considered as approved devices. Approval of a PFD signifies that the PFD can be counted towards the "carriage requirements" (33 CFR 175, Subpart B) which requires boats to have on board specified quantities and Types of approved PFDs. This totals 21 comments whose writers either presently wear or would wear inflatable PFDs if they were approved. Three comments from boaters indicated that they opposed any condition that required PFDs to be worn to meet the carriage requirements.

Four comments indicated the belief that inflatable PFDs would save lives because people would be more apt to wear them. This view was bolstered by two comments which noted that 80 percent of drownings occur as a result of people not wearing PFDs, as opposed to wearing the wrong kind of PFD, and that these accidents were usually sudden events that precluded the donning of a PFD after recognizing the event was about to happen. Five other comments indicated that if an impact on boating accident drownings is expected, there needs to be an incentive to increase wear rate of PFDs, such as requiring that PFDs be worn to count as meeting the carriage requirements, particularly on small boats. The Coast Guard recognizes that increased wear of PFDs is essential to increase the number of lives saved.

Maintainability: Two comments noted that inflatable PFDs have been in military use since the beginning of World War II. One of these comments noted using Navy-issue inflatables in World War II and questioned why the Coast Guard would delay the approval of inflatables for the boating community, when a perfectly satisfactory inflatable PFD was available 50 years ago. The Coast Guard notes that inflatables used by the military both in the past and currently are not maintained by the individual user, but rather by trained professionals. As discussed in the ANPRM and IR, ensuring that inflatable PFDs are maintainable by the user has been one of the key concerns for introduction of inflatables to recreational boating. As previously mentioned, lack of proper maintenance adversely affects reliability due to the probability that some PFDs will not be rearmed or will be rearmed improperly. Due to the importance of this aspect of inflatable PFD use, the Coast Guard emphasizes that users should check their inflation mechanisms frequently.

Non-swimmers and Children: Six comments from boaters expressing support for approval of inflatable PFDs indicated that their support was based on concerns about the safety of family members who were either children or poor swimmers. These comments suggested that children and poor swimmers would be more likely to wear an inflatable PFD than other types of currently approved PFDs due to an inflatable PFD's increased comfort and more desirable appearance. These comments concern the Coast Guard because they suggest that the desire for a more comfortable device may lure people to use inflatable PFDs inappropriately. The Coast Guard notes that the consensus committee preparing the UL 1180 Standard, incorporated into this rule, specifically pointed out that PFDs approved under the standard are not suitable for non-swimmers or children. Additionally, this issue was specifically raised in the ANPRM and IR of this rulemaking. The Coast Guard emphasizes that under this rule, inflatable PFDs cannot be approved for children and that non-swimmers should be strongly discouraged from choosing this type of lifesaving device.

Approval of inflatable PFDs for children is not now considered appropriate by the Coast Guard and UL consensus standard committee due to concerns about a child's ability to take the necessary steps to initiate inflation in an emergency or perform backup inflation in case the primary system fails. The Coast Guard notes that the issue of inflatable devices for children may be revisited after more experience is gained with approval of inflatable PFDs for adults.

As for the use of inflatable PFDs by non-swimmers, as noted in the IR, the Coast Guard acknowledges that there is no practical way that law enforcement officials can conduct a field assessment of swimming abilities, and thus there are no regulations restricting the use of inflatable PFDs by non-swimmers. However, because of the unique risks associated with these devices, the labeling and information pamphlet for these PFDs are required to explicitly state that the devices are not recommended for use by non-swimmers.

Terminology: One comment suggested that the barrier between wearable inflatables and many potential consumers is that the use of the word "approved" by the Coast Guard to denote devices which have met the stated requirements, and that the term "approved" is not the most accurate or effective term. The comment suggested substituting "recognized as a required device" or "meets Coast Guard minimum carriage requirements" for the term "approved". The Coast Guard has not adopted this suggestion. As previously discussed in the IR, the Coast Guard acknowledges that the term "approved" may cause some confusion and misperceptions to the public. However, both the terms suggested by the comment may cause even more confusion. The term "approved" is well recognized by the public and has been used by the Coast Guard for over 50 years to denote that a lifesaving device meets Coast Guard minimum safety standards. The term "recognized as a required device" may confuse the boating public as to the implications of a device being "recognized" versus "approved". As for the phrase "meets the Coast Guard minimum carriage requirements", in addition to possible confusion over the implications of a new term, the phrase is not being adopted because it may cause boaters to mistakenly believe that the carriage requirements are met by merely having that one device. In almost all cases, this is not true and to meet the carriage requirements, boaters may have to have several devices aboard their vessel.

Inflatable PFD Costs/Affordability: Thirteen comments from eleven boaters, one dealer, and a boat club addressed the issue of ensuring the approval of reasonably-priced inflatable PFDs. Comments on this issue were solicited in the initial ANPRM and were discussed in the IR. One comment acknowledged that Coast Guard approval of inflatable PFDs may bring costs down by increasing sales and competition. On the other hand, several of these comments indicated the belief that the Coast Guard's modifications to the UL 1180 standard would substantially increase the cost of approved inflatable PFDs without saving significantly more lives. Five of these comments specifically indicated the view that increased testing costs due to Coast Guard additions to the UL standard would keep manufacturers from seeking approval while another comment was concerned that Coast Guard approval would merely lead to the availability of limited products at high prices. Four comments thought that boaters would be less able to afford the PFDs made under the Coast Guard modifications than inflatable PFDs that only met the UL standard. Several others were simply concerned that the cost of inflatables would deter many boaters from buying an inflatable PFD. Two commenters specifically noted that they have been wearing the yoke style PFD with harness and found that

although many boaters inquired about the devices, the high cost seemed to be a deterrent to most boaters. One of these comments noted also that the rearming kits are fairly expensive.

Four comments urged the Coast Guard to make the regulations for inflatables stringent for safety purposes, but not to the point so as to drive the prices "out of sight". One of these comments expressed concern that the manufacturers would pass on the expense of additional approval requirements to the consumer, making the resultant PFDs unaffordable. The comment stated that safety of the boating public should be a high priority for the government and that the Coast Guard's requirements should result in an easy-to-wear, affordable, and comfortable inflatable lifejacket that meets the carriage requirements.

A number of PFD and component material manufacturers' comments also addressed cost. These comments objected to the IR's required use of use code 1F inflators, in place of the LSI evaluation. The objections centered on the fact that currently, the only use code 1F inflator which could be accepted would be disposable, and therefore prohibitively expensive to maintain. At the time the IR was published, the Coast Guard believed that use code 1F inflators would be available at a reasonable cost. Unfortunately, since that time, no affordable use code 1F inflator has been produced. However, while the IR did encourage use of 1F inflators, it did not require them for approval.

Additionally, several manufacturers objected to some of the costs of testing associated with the requirements added by the Coast Guard to the UL requirements. These objections are discussed further with the specific comments below.

The Coast Guard notes that the lowest priced PFDs permitted by the UL standard are eligible for approval under the IR and this final rule. Less expensive PFDs that differ from UL 1180 may also be approved under the equivalency provisions contained in the IR and which are being retained in the final rule. The additional testing costs imposed by the Coast Guard modifications to the UL standard requirements under the IR are minimal and will decrease under this final rule. In addition, the lifesaving benefits of the additional provisions retained in this final rule outweigh the associated costs as discussed under "Regulatory Evaluation."

Comments on specific requirements are discussed below under "Specific Comments and Major Areas of Revision".

IR Consistency with UL Standards: Nine comments from manufacturers, manufacturing organizations, and boating organizations and various comments from boaters requested that the Coast Guard amend the requirements for approval of inflatable PFDs contained in the IR so as to make them more consistent or, in the case of a few comments, identical with the requirements of UL 1180 and UL 1191 standards.

A number of comments objected to the perceived delay in making Coast Guard-approved inflatable PFDs available to recreational boaters. These comments expressed the opinion that these delays were caused by the Coast Guard requirements contained in the two UL standards adopted, UL 1180 and 1191. The general consensus of these comments was that the increased safety benefits of having approved inflatables available and worn by boaters would outweigh any potential increase in safety benefits resulting from the manufacture of inflatable PFDs that met the IR's additional requirements. One comment suggested that the IR places too much emphasis on ensuring that the vests are 100 percent perfect, and other comments cited overregulation as the major obstacle to having the vests approved.

The Coast Guard notes that though a number of manufacturers have completed preliminary testing of designs, no inflatable PFD has yet been submitted for final testing and approval. This delay has been caused by the lack of accepted component materials (inflators of any use code and inflation chamber material) which are needed to produce any device submitted to the Coast Guard for final approval. The interim rule did not impose any additional requirements to the UL 1191 consensus standard, which sets the acceptance standards for component materials.

Several comments indicated that changes to the UL standard embodied in the IR were not consistent with the promises the Coast Guard made to the industry. The Coast Guard notes the statements in the ANPRM and meeting notice for the first consensus committee meeting which clearly define the Coast Guard's intentions and commitments in entering into the rulemaking process with the aim of using an industry consensus standard. These documents show that the Coast Guard anticipated the possible need for additions or modifications to the consensus standard to meet the minimum level of safety deemed necessary and clearly stated that such modification or additions would be incorporated into the final approval standards if necessary.

Two of the comments discussed above requested that the final rule base Coast Guard approval on the requirements of UL 1180 with additional requirements limited to product marking and point-of-sale consumer information. UL commented that they expected the rule to contain a limited number of requirements supplemental to the UL 1180 and UL 1191 such as a USCG information pamphlet and PFD production quality control related requirements. UL also recommended that the Coast Guard make additional modifications and additions to the first edition of the 1180 standard, such as making trade-offs between requirements for donning and secureness of fit, revising the added visibility looking to the side test, and adding warning markings. The individual changes suggested are discussed below.

Two comments included resolutions requesting that the Coast Guard rescind those portions of the interim rule that impose additional requirements for Coast Guard approval beyond those imposed by UL 1180. As noted above, one of these resolutions was passed by the National Association of State Boating Law Administrators (NASBLA) which noted that its membership is deeply concerned that additional requirements beyond the UL 1180 standard may jeopardize the development and approval of fully inflatable PFDs. NASBLA recommended that the Coast Guard amend the IR to reflect only those standards currently in the incorporated UL standards.

The second resolution was submitted by the PFD Manufacturers Association (PFDMA), which represents manufacturers of PFDs and component materials. PFDMA and supporters commented that the Coast Guard should rescind almost all portions of the IR which impose additional requirements to the UL standards. However, the comments did note that the Coast Guard approval regulations do need to address labeling and information pamphlet requirements, areas which UL 1180 either does not address or does not do so adequately. The Coast Guard notes that two sections of the UL standard are "Reserved", those dealing with production quality control requirements and with the information pamphlet. As a result, the Coast Guard's requirements in these areas are the only requirements for those items.

NBSAC, an advisory committee charged with advising the Coast Guard on boating safety issues, approved a resolution, by a vote of 10 to 8, that

recommended that the Coast Guard requirements for approval of inflatable PFDs congruent with the consensus standard embodied in UL 1180 without exception or additional requirements. However, in a written survey of the NBSAC members, immediately following the meeting which adopted the resolution, many of the members indicated support for the Coast Guard's modifications to the UL standards. The Coast Guard therefore intends to raise some of these issues in the consensus committee when UL reopens UL 1180 and UL 1191 for revision.

Several comments from individuals favored the Coast Guard's modifications to the UL standards. One comment opposed the idea of merely adopting the UL standard by stating that it is not desirable to set a rigid pass/fail criteria for approval of any device in the form of an adopted consensus standard that fixes for a long period requirements based on currently available technology and designs. The comment continued by explaining that the Coast Guard's approval process should encourage and reward improvements in reliability and effectiveness above the level of what is feasible today at a reasonable cost. According to the comment, this approach would lead manufacturers into entering a desirable, continuing race to produce more comfortable and affordable PFDs, and that an industry consensus standard alone cannot provide such an incentive. Additionally, one comment from a PFD design consultant expressed the view that by having a clearly defined alternative to strict compliance with UL 1180, innovative and consumer responsive products would be more likely to make it to market. The Coast Guard notes that both the IR and this final rule allow for the possibility of approval of alternative designs that do not conform to the promulgated standards. As a result, manufacturers have had, and continue to have, the option of receiving approval for innovative inflatable PFD designs. The Coast Guard recognizes that trade-offs must be made between absolute safety and making inflatable PFDs both affordable and available to recreational boaters who would not typically wear currently approved devices and who are prepared to accept the increased care and servicing requirements needed to maintain reliability.

UL Standard Conflicts and Shortcomings: Comments from UL and manufacturers indicated that there were areas in the UL standard that need revisions or improvement as discussed below. Most of these changes are in areas addressed by the IR but some deal with conflicting requirements or requirements that are believed by some manufactures to be set unintentionally too high within the UL standard.

One comment stated that even without the most objectionable provisions of the IR, that is the LSI and "Approved Only When Worn" provisions, the standard as recommended by the consensus standard committee was problematic in many areas. The comment expressed the view that the UL standards were difficult and unrealistic in many areas, but might be "fixable". The commenter also expressed the belief that as large and complex as the UL documents were, they would likely have contradictions or deficiencies requiring correction consistent with the specification's stated goals. The commenter expected that, for example, the sections of the UL standard that conflicted with the use of disposable inflation mechanisms would be modified, and that the goal of having disposable inflators as an option would not be abandoned.

Missing Standards for Wearability and Approval Type: The Coast Guard notes that the UL standard calls for the USCG to set approval type for inflatable PFDs based on a PFD's performance, serviceability, and status indicators, but does not establish how these characteristics are to be used. As discussed at the first consensus standards meeting in March 1994, the Coast Guard indicated that its approval type would be determined after the characteristics of the PFDs were identified by the standards. As stated in the ANPRM "[t]he consensus standard may not address all the issues and characteristics essential to the Coast Guard," and alternatives "remaining unresolved will presented * * * for comment."

As initially drafted, the UL standard had a test for the projected wear rate that a PFD design would provide. This provision, which was referred to as "wearability", was deleted from the standard at the final standards committee meeting. The consensus committee was informed by the Coast Guard that the lack of a wearability standard would have to be justified or otherwise addressed. The committee failed to do so. Therefore, in the IR the Coast Guard provided conditional approval, requiring a device to be worn to meet carriage requirements, in addition to the UL standard as one way to address the lack of a wearability standard. One comment indicated that unconditional approval based on what is available today is undesirable and others supported the IR's conditional approval as discussed above. The lack of a wearability standard within the consensus standard will require the Coast Guard to closely monitor accident statistics and revise the rules if necessary. Conditional approval is discussed further below.

Based on the above comments and on internal discussions within the Coast Guard detailed below, the Coast Guard is minimizing the additions and modifications to UL 1180 required for Coast Guard approval but retaining those which in the Coast Guard's judgment are essential to safety. The Coast Guard is retaining the two provisions of the IR for which the UL standard had reserved sections. These two areas, the PFD information pamphlet and production quality control, as mentioned above, were discussed by several commenters.

Nearly all the provisions being deleted from the IR may, in the future, further the lifesaving goals adopted by NBSAC and the Coast Guard as discussed in the IR. Therefore, those provisions will be proposed by the Coast Guard for inclusion in UL 11180. This will allow the Coast Guard to pursue the incorporation of these changes in concert with the industry and other interested parties, as many comments indicated the desire to proceed.

The Coast Guard notes that the PFDMA had expressed an interest in working with the Coast Guard, Underwriters Laboratories (UL), and others to revise the interim rule based on comments and resolutions which have been forwarded. As mentioned above, the Coast Guard does intend to continue to work with the consensus standards committee with the goal of incorporating as many of the provisions being deleted from the IR by this rulemaking as possible into UL 1180.

The comments on specific provisions of the regulation and the revisions made by this rulemaking are discussed below.

Timeline for approval: Two comments discussed the validity of the stated goal of the Coast Guard in the IR to have significant numbers of approved inflatable PFDs available to the public for the 1996 boating season. One comment noted that for approved inflatables to be available for the 1996 boating season, achievable and well defined requirements needed to be in place well in advance of the October 23, 1995, comment deadline for the IR. Another comment stated that it is highly unlikely that manufacturers will be able to make significant number of inflatable PFDs available to the public in 1996. The comment explained that because of the many unanticipated problems associated with meeting the requirements of the IR, manufacturers would have to return to the design phase to re-engineer their products before submitting them for approval. According to the comment, when this process is completed, 1996 will probably be over. The comment projected that unless requirements are substantially changed, the regulation established by the IR would not result in inflatable PFDs becoming more than 3 percent of the total PFDs sold by the year 2007. The comment also stated that the Coast Guard and NBSAC goal of saving 210 lives by increasing the wear rate to 66 percent is desirable but not a rational projection resulting from the IR.

The Coast Guard shares the concerns regarding making approved inflatable PFDs available as soon as possible, however, it must balance that concern with the need to ensure that Coast Guard standards for approved inflatable PFDs will achieve a reasonable balance between safety and cost. The Coast Guard notes that nothing currently prevents the sale of non-approved inflatable PFDs to the public.

Specific Comments and Major Areas of Revision

The major areas of comment and revision to the IR standard are separated into categories and discussed below. For those areas in which the Coast Guard is deleting requirements from the IR, the Coast Guard intends to suggest that most of the deleted requirements be considered for inclusion in a revised version of the UL 1180 standard. Additionally, the Coast Guard intends to suggest the requirements from the IR which are being retained be considered for inclusion in a revised version of the UL 1180 standard. If the UL 1180 standard is revised to include the changes, the rules will be revised to delete these provisions from the subpart and update the incorporation by reference to cite the revised standard.

1. Lifesaving Index (LSI) and Use Code 1F Inflator [Sections 160.076–5, –7, –9, –13(c)(10), –21(e), –23(a)(1), –27, and –37(b)(4 & 5)]

As the IR's approval requirements concerning use code 1F inflators and the LSI are interdependent, they are being discussed as one category.

IR Requirement: Under the requirements for inflatable PFDs in the IR, the Coast Guard requires that, except for inflatable PFDs equipped with inflators with 1F use codes, an LSI analysis be performed to evaluate the overall lifesaving potential of an inflatable PFD submitted for approval. A use code 1F inflator, which has a cylinder seal indicator, provides a visible indication to the user of the cylinder status. The same readily visible indication of inflation cylinder status is not available with use code 2F and 3F inflators. The LSI analysis, therefore, was provided as an alternative to allow other reliability and wearability factors to compensate for the lack of visible cylinder status indication. Under the IR, the Approval Type (I, II, III, or V) given to any particular PFD design, except for those with 1F inflators, would depend on the results of the LSI analysis. If, as a result of the LSI analysis, it was determined that a conditional approval would be appropriate for a particular PFD, the most likely condition for approval would be the requirement that a PFD would be required to be worn to count toward the PFD carriage requirement.

Comments on Use Code 1F Inflator Requirement: Thirteen commenters specifically discussed the requirements related to inflation system indicators with a 1F use code. Of these, four comments favored the IR's requirements regarding the use of a 1F inflator. One cylinder manufacturer described the IR as a great step towards saving lives and commended the Coast Guard and UL for properly addressing the gas cylinder issue by including indicators within the inflator mechanism. Another comment favoring use code 1F inflator requirements did so by reasoning that the Coast Guard's approval process should encourage and reward improvements in reliability and effectiveness beyond what is feasible today at reasonable cost and therefore should have a built in mechanism, such as the requirement for the LSI analysis and 1F inflators to encourage technological advances. Three comments, including one of the above, expressed hope that the Coast Guard's regulations would require approved PFDs to have an easy way to check the CO_2 cartridge to ensure it was charged, such as fire extinguisher gauges or push-and-release pop-out pins. Use code 1F inflators include indicators that satisfy this need.

The remaining nine commenters that discussed inflators disagreed with the IR's emphasis on cylinder indication to increase operational reliability of inflatable PFDs. Seven comments suggested that the Coast Guard withdraw the requirement to either have a use code 1F inflator or utilize the LSI analysis, for all but Type I inflatable PFDs. Four of these comments indicated that there is lack of current technology to provide full cylinder indication at a reasonable cost. These comments reasoned either that use code 1F inflators remain beyond state-of-the-art and therefore their use should not be required or that the use code 1F requirement may possibly delay the production of Coast Guard approved inflatable PFDs. One comment added that the highest level of cylinder indicator was not necessary because the requirements for redundant inflation systems and for swimming ability, adequately compensates for the remote possibility of primary inflation system failure. The Coast Guard notes that a "recommendation" against use by non-swimmers is not equivalent to a "requirement" and that, as discussed above, any swimming requirement would be unenforceable.

One comment cautioned the Coast guard with regard to drawing conclusions from the informal study at NASBLA's annual meeting discussed in the IR, where only 2 out of 18 participants were able to correctly identify the serviceability of 4 older style inflation mechanisms. The comment remainded the Coast Guard that the newer styles of inflators are designed so that it is easier to determine when an inflator has already been fired. The comment also cautioned the Coast Guard not to presume that all systems were represented in the field study, and that no mechanism is completely foolproof, including one with a cylinder seal indicator.

The Coast Guard remains concerned with the inflation systems used on inflatable PFDs. The design of the inflation mechanism is important because proper maintenance plays a crucial role in ensuring the reliability of an inflatable PFD. If the status of the inflator mechanism is easy to check, then it is more likely that a boater will check the status often and correctly. A recent Coast Guard study of the causes of marine casualties indicated that 80% or more of all marine casualties are caused by human error and that these were often induced by inadequate attention to human factors in the design and performance standards for equipment. The Coast Guard's findings on this subject are reported in the "Prevention Through People" quality action team report, the Notice of Availability of which was published in the February 16, 1996, **Federal Register** (61 FR 6283).

Comments on PFD Life-Saving Index Evaluation: Twelve commenters specifically noted reservations about the "Life-Saving Index" (LSI), while three comments expressed unqualified support of this alternative approval path, generally because of the flexibility and encouragement of improvements thought to be fostered by the LSI requirement. Additionally, the October 30, 1995, NBSAC resolution discussed

above favored continued development of the LSI for possible future use.

The three comments which supported the LSI concept thought that the LSI might be the most potentially beneficial portion of the IR, with one stating that it would "allow approval of unique and novel designs that offer lifesaving potential equal to or greater than that of approved devices * * * these designs may prove to be very comfortable, affordable and popular with the boating public." The comment continued that promoting innovation in design actually allows the end user to have a voice in what can be used to meet Coast Guard requirements.

Another comment which supported the LSI expressed pleasure with the results of the NBSAC member survey for retaining the LSI, in which 9 out of 14 respondents indicated that they favored retaining the LSI as a clearly defined alternative to strict compliance to UL 1180. The comment continued that through the LSI, innovative and consumer responsive products will be able to make it to market, and that without the LSI, inflatable PFDs will be static in design. Also the comment indicated that if the LSI were eliminated, the Coast Guard would be limiting the ability of manufacturers of innovative PFDs to fairly compete with current products. As mentioned above, the Coast Guard notes that both the IR and this final rule allow for the possibility of approval of alternative designs that do not conform to the promulgated standards. As a result, manufacturers have had, and continue to have, the option of receiving approval for innovative inflatable PFD designs.

One comment which supported the overall concept of the LSI objected to the LSI scheme if inflatable PFDs of low reliability or effectiveness receive the same Coast Guard approval status as other PFDs. If this were to occur, the comment continued, the boating public should be notified of the reduced reliability of the device at the point of sale.

On the other hand, most comments received by the Coast Guard expressed reservations about the LSI analysis as presented in the IR. Six of these comments expressing concerns noted that LSI concepts have merit in a broad application, but indicated apprehension about its application to individual items.

Five comments specifically requested that the Coast Guard delete the LSI from the IR. One of these comments also stated that, as opposed to the LSI, what the industry needs is a realistic standard of performance, keyed to individual product types. Another comment stated that the LSI and conditional approval provisions added by the IR to the UL standard will hamper the Coast Guard's desire for a flow of innovative, new products.

Two comments and a number of participants in the public meeting stated that mandating the use of the LSI as an alternative to having the use code 1F inflation mechanism, is unacceptable. These comments criticized the LSI saying the validity of the LSI elements chosen and weights which have been applied, do not appear statistically valid, uniformly applied, or adequately defined. Another comment noted that adequate development of the LSI process would likely require an *ad hoc* committee effort.

A concern expressed at the public meeting on the LSI and in several comments, related to the IR's provisions for an annual review of the LSI. This concern focused on the fear that an annual review could potentially subject manufacturers to revocation of approval and the resulting possible liability. In addition, several other comments and meeting participants cautioned that the LSI factors will become moving targets that will unnecessarily invite litigation against manufacturers as factors and weights are changed.

Two comments noted that approval classification, i.e., the USCG Type designation for a PFD, should coincide directly with UL 1180 "performance type" without requiring an LSI evaluation for approval of any specific PFD model. These comments reasoned that because the performance required by UL 1180 is significantly higher than required for any other recreational use PFD, there is no need to ensure the lifesaving potential of a device through the LSI. The Coast Guard notes that while the UL standard requires in-water performance and other increases, it also permits a decrease in reliability compared to inherently buoyant PFDs. The Coast Guard believes that the increase in wearability expected by many commenters will be needed in addition to the UL performance increases for the lifesaving potential of most inflatable PFDs to equal that of inherently buoyant PFDs.

Final rule requirements: The requirement that a device either have a use code 1F inflator or be subjected to the LSI evaluation for approval was based on two studies, one conducted by BOAT/U.S. from 1990 to 1993 and one conducted by the Coast Guard with the USCG Auxiliary from 1979 to 1981. Both of these studies concluded that inflatable PFDs without visible indicators of the state of inflation cylinder charge would not be properly maintained by a substantial percentage of typical users. The maintenance deficiencies reported in the studies were of such a nature that the devices would not operate as intended. The Coast Guard was concerned that if a substantial percentage of lower-performing inflatables were not properly maintained, as the studies suggest, the widespread use of these types of devices could actually lead to an increase in drowning fatalities. In addition, the Coast Guard was concerned that as the lower-performing devices would be the least expensive, and therefore most accessible to boaters, the risk of improper maintenance would be compounded. The use of the LSI as an approval evaluation tool was intended to ensure that the inherent lesser reliability of inflatable PFDs, coupled with the lower in-water effectiveness and the additional reduction in reliability for lower-performing devices due to human error as observed in the studies, would be offset by other features or approval conditions on the PFD.

Most of the comments received on the IR, as discussed above, opposed the use of the LSI as an approval evaluation tool. The comments cited the untested, and potentially subjective, nature of the LSI. As discussed above, these comments strongly urged the adoption of the UL 1180 consensus standard for approval of inflatable PFDs without any additions or modifications except to address those areas in which UL 1180 is incomplete or inadequate. This view was supported by resolutions of NBSAC, NASBLA, and PFDMA.

After careful review of all of the comments, the Coast Guard has reconsidered its previous interpretation of the study results the NBSAC recommendation, and of the improvements to PFD inflation hardware which occurred as a result of the development of UL 1180 and 1191. Upon reconsideration, the Coast Guard noted that the correlation of the study results to actual use patterns in the market may not be entirely conclusive. In particular, the different methodologies of the Coast Guard Auxiliary and BOAT/U.S. Foundation studies yielded somewhat different results, calling into question the relative validity of those methodologies in assessing the behaviors of the overall boating population. The Coast Guard notes that many comments received from boaters, as discussed below under "Approval Type", suggest that wear rates for approved inflatables would be higher than was observed in the studies. Additionally, the inflators on the PFDs used in the studies did not incorporate

the performance improvements mentioned above. Furthermore, the comments from PFD manufacturers indicated that the IR requirement for conducting an LSI analysis for devices with 2F and 3F inflators, which was based upon the Coast Guard's initial interpretation of the studies, would severely hamper the efforts of PFD manufacturers to bring inflatable PFDs to market thereby delaying the safety gains considered possible as a result of introducing approved inflatable PFDs.

In the absence of conclusive evidence that the use of the LSI to evaluate inflatable PFDs with use code 2F and 3F inflators is necessary to avoid undesirable outcomes as the result of approval of inflatable PFDs for recreational use, the Coast Guard has removed the LSI from this final rule as a required evaluation tool for approval of all PFDs not having a use code 1F inflator. As suggested in many comments, this final rule provides for approval of inflatable PFDs with use code 1F, 2F, or 3F inflators in accordance with the requirements of the UL 1180 consensus standard, supplemented only as needed to address the portions of UL 1180 which are acknowledged as being incomplete or having significant safety implications. The Coast Guard believes that the potential benefit of increased PFD wear as the result of approval of inflatable PFDs for recreational boaters, in conjunction with the inflatable PFD performance improvements established in UL 1180, outweigh the potential risk of PFD failures due to human error. Nevertheless, the Coast Guard is strongly encouraging PFD manufacturers to emphasize the need for proper maintenance in their marketing and instructional materials. As inflatable PFDs are introduced to the recreational boating market, the Coast Guard will carefully monitor casualty data to ensure that appropriate adjustments are made to the UL standards or requirements in the event of negative outcomes.

The Coast Guard notes that it has used the LSI to aid its evaluation and analysis of PFD rulemaking projects since 1985, but this is the first regulatory project in which it was to be used as an approval evaluation tool. The Coast Guard's intent in inserting this requirement was to provide more flexibility for design approval. Although it is no longer required as an approval evaluation tool, the Coast Guard anticipates that the LSI will be used in the future as an evaluation tool for novel designs not specifically covered by UL 1180 and to evaluate rule changes, establish policy, and make equivalency interpretations. Additionally, the Coast Guard will continue development of the LSI as was suggested by a number of the comments discussed above, and the October 30, 1995, NBSAC resolution which favored continued development of the LSI for possible future use. Therefore the following sections are revised or deleted accordingly: §§ 160.076–5, –7(a)(1), –9(b), –13(c)(10), –21(e), –23(a)(1), –27, and –37(b)(4 & 5).

Future action: The uncertainty the LSI caused for manufacturers needs to be addressed in order for the probabilistic risk based assessment embodied in the LSI to be a truly viable alternate approval path. The Coast Guard will propose to develop the LSI as a consensus standard with participation of industry. If the LSI can be developed adequately to be a viable alternative path, it may be proposed as part of the approval process for PFDs in the future. As noted above, the Coast Guard will carefully monitor the effect of deleting the LSI and approving PFDs with either use code 1F, 2F or 3F inflators.

2. Approval Type [Sections 160.076–7, –9, and –39(c)]

IR Requirement: Under the approval requirements for inflatable PFDs in the IR, the Coast Guard provided the option of approving inflatable PFDs as Type V PFDs, which either would require that the PFD be worn to count towards the carriage requirement, or would have other conditions appropriate to their intended use. In the latter case, conditional approvals would be allowed for special PFDs designed for special circumstances, such as those for diving with recreational submersibles. Approval of this special category of devices is not addressed by the UL standard.

Comments on Conditional Approval and Approved Only When Worn:

Five comments indicated the need for an incentive, such as a condition that a PFD only be approved as meeting the carriage requirements if it is worn, to increase PFD wear rates. After noting that 80% of drownings occur because the victim is not wearing a PFD, one of these comments concluded that any regulation relating to PFDs should require that PFDs be worn, particularly on small boats, if the Coast Guard expects to have an impact on boating accident drownings. Several comments from boaters indicated that they were not opposed to a requirement for inflatables to be worn, and as discussed above, there were 21 comments that either favor required wear, presently wear, or would wear inflatable PFDs.

One of the comments requested that approval of all inflatable PFDs be conditional on the PFD being worn and noted that approvals that are contingent on the device being worn may increase use, grant boaters access to approved devices, allow the industry to sell approved devices, and allow price and comfort to drive the market. Another comment from a manufacturer that also favored conditional approval for all inflatable PFDs, not just Type V, noted that the condition would benefit and promote: wear among those who purchase an inflatable PFD, better care and maintenance of the inflation among those who wear it, and redundancy in personal lifesaving equipment aboard vessels where space is not limited.

One comment suggested adding the condition "in presence of perceived danger" to the "approved only when worn" provision to make the conditional approval more acceptable and reasonable. It is the Coast Guard's view that for most accidents danger is often unperceived, and that such a requirement would, instead of encouraging increased wear, result in boaters wearing PFDs less often under the mistaken belief that the need for them was limited to situations when imminent danger is apparent. Additionally, as with a swimming ability requirement, it would not be feasible for law enforcement personnel to enforce such a condition.

Two comments that favored required wear, noted that to get more comfortable PFDs on the market and achieve wider use than currently approved PFDs, it may be necessary for the Coast Guard to relax the standards of reliability and effectiveness. One of these comments indicated that reduced "reliability or effectiveness" in combination with the condition that a PFD is "approved only when worn" should be an available approval option to permit manufacturers to reduce the cost of a device.

On the other hand, several comments from manufacturers and from boaters indicated that they were opposed to any requirement for inflatables to be worn. Three comments from boaters indicated that they opposed any condition that required PFDs to be worn to meet the carriage requirements. One stated that the introduction of the "Approved Only When Worn" concept is curious in light of the results of another Coast Guard interim rule which set approval standards for hybrid inflatable life jackets (50 FR 33923; August 22, 1985) which had adopted the same requirement. A hybrid PFD uses a mixture of inherently buoyant material and inflation to provide flotation. In the commenter's opinion the effect of the action was the "kiss of death" for hybrid

PFDs. In addition, the comment noted that if this requirement was truly justified for inflatables, then it is equally justified for inherently buoyant vests. The Coast Guard notes that there are two significant differences between the hybrid PFDs and inflatables: comfort and price. Hybrid PFDs do not provide as much improvement in comfort, and hence increased wearability, as inflatables because of their greater bulk and body coverage. Additionally, inflatables only have one means of buoyancy, and therefore will be less expensive than hybrids and represent a much smaller incremental increase above the cost of an inherently buoyant PFD. The Coast Guard also notes that the option of approving hybrid PFDs without the requirement that they be worn to be considered approved has been available since February 1995. Since that time only one manufacturer has sought approval without this condition. This fact appears to confirm that the approval condition is not the sole reason for the lack of retail success of hybrid PFDs.

Final rule requirements: The Coast Guard adopted the option of conditional approval in the IR for inflatable PFDs without use code 1F inflators but, as discussed above in the discussion of the use code 1F inflators and the LSI, the Coast Guard is deleting the use code 1F inflator provision as imposing conditional approval from the final rule for PFDs meeting UL 1180 because of the potential impediment that the conditions may have on the sales of devices to recreational boaters.

In this final rule, conditional approval is being used only for PFDs which do not comply with the UL standards and which are intended to be used in some special application or manner, such as diving with a "wet" submersible vessel, i.e., a vessel designed to propel a person using SCUBA, or partially wet submersible vessel. The Coast Guard believes that such designs can provide boaters with an effective lifesaving alternative only if the user understands the PFD's limitations and is used accordingly. Conditional approval serves these ends and may make more affordable alternatives available to users who wish to have an approved supplemental PFD on board for occasional use or who are willing to comply with the approval conditions to have the device count as a replacement PFD to meet the carriage requirements. The lack of a wearability standard within the consensus standard or conditional approval in the regulations will require the Coast Guard to closely monitor accident statistics and revise the rules if necessary. Therefore, the following sections are revised or deleted accordingly: §§ 160.076–7, –9, and –39(c).

3. Repack Evaluation (Section 160.076–25(c)(2))

IR Requirement: UL 1180 does not address repacking. Under the IR, however, an inflatable PFD being tested for approval must pass an evaluation in which test subjects demonstrate that they can repack the PFD, or refold the yoke-style design so that it will function properly when donned and used again. After being repacked the PFD must be ready for donning and manual inflation in or out of the water, and for oral inflation in the water. There is no time limit associated with the test. The test is not required for devices the manufacturer requires to be professionally serviced.

Comments: One manufacturer commented that the requirement for a repack evaluation test is a good improvement, because most designs currently available are very difficult to repack. However, a second comment stated that the requirement that each test subject perform three repack evaluations is excessive and adds expense. The comment noted that a single repack evaluation would adequately address the necessary safety considerations. The Coast Guard notes that as the requirement is written in the IR, the PFD's suitibility for use in the specific test conditions noted above must be assessed after the repacking. The Coast Guard believes that all of these conditions can be properly evaluated after the test subject performs only one repack. Therefore, only one repack evaluation is needed for approval, but a follow-up assessment must be conducted by the test laboratory to ensure that all of the cited UL 1180 conditions are evaluated.

Final rule requirements: The Coast Guard is retaining the repack evaluation requirement in § 160.076–25(c)(2), but is making editorial revisions to clarify that only one repack evaluation is required. Inflatable PFDs that pass this test will have a higher in-service operational reliability than designs not meeting the requirement because they will be less likely to be repacked or refolded such that inflation lanyards and the like are inaccessible for emergency use or unusable without disassembly.

4. 45-Sec. Average Donning Time, Donning Relaxation, and Reporting Subject Disqualification [Section 160.076–25(c)(1)]

IR Requirements: A 45-second average donning time requirement was included in the IR in addition to the UL 1180 imposed 60-second maximum limit for each subject. Additionally, unusual problems with the reference vest used for the donning time test are required to be reported to the Coast Guard, as this is a new reference vest that has not been previously used for testing purposes. A longer donning time is permitted for designs requesting approval with conditions which are not yet addressed in UL 1180.

Comments: Except for the NBSAC survey discussed above, comments on the average donning time test were not favorable and advocated elimination of this requirement. One comment noted that in administering a donning time test, consideration should be given to the trade-off that exists between the simplicity of donning a PFD and the secureness of the device during water entry. The comment suggested that the Coast Guard eliminate the 45-second average donning time requirement and only require the 60-second maximum in UL 1180. Another comment indicated that the average time requirement has reduced the time limit from 60 to 45 seconds, and did not understand why an inflatable PFD should be donned faster than an inherently buoyant PFD. The Coast Guard notes that the 45-second average donning time requirement is actually a second requirement in addition to the UL 1180 60-second maximum donning time requirement. The requirement is not a significant reduction in donning time but a change in the method of evaluating the test results.

Final rule requirements: The average donning requirement was added in the IR as a supplement to the 60-second maximum time requirement contained in the UL 1180 standard, in order to effectively measure donning-time performance of PFDs. Historically, nearly all designs of inherently buoyant and hybrid PFDs that pass a 60-second maximum requirement, have been shown to pass a 45-second average requirement as well. The Coast Guard inserted the average requirement in the IR because, overall it is a better tool for assessing whether designs are improving or whether they are getting more difficult to don. No reasonable PFD design would be denied approval solely as a result of the average requirement. Unless PFDs are required to be worn, donning is a critical part of the survival process.

However, the average donning time test provides limited additional safety and may slow the availability of inflatable PFDs to boaters. Therefore, the Coast Guard is deleting the average donning time test requirements contained in the IR at § 160.076–25(c)(1)

but retaining the requirement that a PFD meet the 60-second maximum donning time requirement in UL 1180.

5. Average Freeboard for Type II and Freeboard Reporting (Section 160.076–25(c)(3)(i) and – 25(c)(4)(i))

IR Requirement: UL 1180 contains both an average and minimum freeboard requirement for performance types I and III PFDs, but only contains a minimum freeboard requirement for performance type II PFDs. To make the requirements consistent for all types of PFDs, the IR contained an average freeboard requirement for approval Type II PFDs. As part of the IR, freeboard is required to be measured and reported in order that PFD performance trends can be effectively monitored by the Coast Guard.

Comments: One comment stated that the 4.25 inch average freeboard requirements for Type II PFDs contained in the IR is excessive based on the 3.25 inch per subject minimum freeboard requirement, contained in UL 1180. The commenter informed the Coast Guard that they had never seen an average freeboard requirement applied and were not aware of any body of data to support its use. As mentioned above, the Coast Guard notes that the UL 1180 standard has both minimum and average freeboard requirements already in place for performance type I and III PFDs and that the performance type II requirements are the exception.

Final rule requirements: Although UL 1180 contains both average and minimum freeboard requirements for type I and II PFDs, the UL standards committee could not come to an agreement on the average requirement for performance type II PFDs and therefore omitted the average requirement for type IIs only. As a result, UL 1180 only contains a minimum freeboard requirement for Type II PFDs and no average requirement. Although adequate for safety, a minimum requirement is not conducive to monitoring trends, comparing performance, or promoting continuous improvement.

The Coast Guard is deleting the average freeboard requirement for Type II PFDs as well as the freeboard reporting requirement, and will ask UL to voluntarily measure and calculate average freeboard and report the results to the Coast Guard. As a result, although the safety of any individual PFD will not be effected, until the UL standard can be updated, an inconsistency will remain between the freeboard evaluation method of performance type II PFDs versus types I and III.

6. Wearer's View from PFD (Section 160.076–25(c)(3)(ii) and –25(c)(4)(ii))

IR Requirement: The IR requirements ensure that the inflated PFD does not unduly interfere with the wearer's ability to see in front and to the sides ("side mark view") without having to tread water. The UL standard does not address these issues.

Comments: Three comments addressed these provisions. One comment suggested that the side mark view evaluation be performed at 20 feet, rather than the 3 m (10 ft) requirement in the IR, to make it consistent with other standards and regulations which use this type of PFD performance requirement. The Coast Guard notes that the approval requirements for hybrid and commercial inflatable PFDs require that this evaluation occur at 3 m rather than 20 feet (46 CFR Part 160.077 and 160.176). In addition, the comment indicated that the in-water performance evaluation relating to front and side views should only be conducted with the device positioned in its intended wear condition. The comment indicated that if the PFD shifts during water entry it should not be judged a failure for inadequacy of vision; it does not matter if unconscious people have their vision restricted. However, the comment agreed that the remaining in-water requirements (e.g., turns, freeboard, etc.) are applicable to both conscious and unconscious users. In addition, the comment requested that the front mark view requirement not apply to Type III PFDs.

The second comment also discussed the IR requirement that the water surface be visible to the subject when looking to the side. The comment suggested that this only apply to Type I devices and even then not rigidly. The comment added that a relaxed head position without constant visibility of the lowest point on the horizon is not an unsafe condition. Another comment stated that the IR requirement for static measurements of the side mark view, freeboard, and retroreflective material location creates an excessive amount of testing and continues to increase the cost of approval.

Final rule requirements: The Coast Guard is deleting both of the wearer view requirements contained in § 160.076–25(c)(3)(ii) and –25(c)(4)(ii) as these provisions add limited additional safety and may slow inflatable PFDs from being available to boaters.

7. Retroreflective Tape and Light Visibility (Section 160.076–25(c)(3)(iii))

IR Requirement: Any retroreflective tape or light provided on the PFD is required to be visible while worn in the water. The Coast Guard instituted these requirements to ensure that the retroreflective material is effective for search and rescue purposes. The Coast Guard believes that it would be an unnecessary expense and misleading to the user to provide these materials at locations that do not aid search and rescue. The UL 1180 standard does not address these provisions.

Comments: One comment opposed the requirement in § 160.076–25(e)(3)(iii) that requires 75 percent of the reflective material to be above the water line. The comment noted that this type of requirement, and others like it, do not encourage improved performance. Instead, a minimum surface area of reflective material above the water line should be required. The comment added that manufacturers should be encouraged, not discouraged to provide more reflective material.

Final rule requirements. The Coast Guard is deleting the additional requirements relating to retroreflective material above those required in UL 1180. UL practice is to require manufacturers to ensure that the minimum area needed for effective search and rescue is covered with retroreflective material if the device is sold as one that will aid in search and rescue, or if sold for use on commercial vessels. Therefore, the Coat Guard expects that most PFDs with such material tested by UL will meet this requirement.

8. Chamber Material Physical Properties, Production Oversight, Production Tests, and Manufacturer's Records Sections 160.076(b) & (c), -25(d)(2), -29, -31, and -33]

IR Requirement: To set a baseline, the IR requires that tests be conducted on materials taken from prototypes of PFDs tested for approval. There are no pass/fail criteria associated with these tests during approval, but they provide baseline data essential for production quality control limits and for use at a later date if the manufacturer proposes changes in materials. The production oversight and tests established by the IR also cover all the usual elements of a quality control program including the division of production units into lots, running various tests on each lot, establishing and retaining certain records, and establishing criteria for product acceptance and resolution of problems.

Comments on inflation chamber properties: One comment indicated that § 160.076–25(d)(2), which requires testing of inflation chamber properties from the tested prototype PFD, should

be revised to permit PFD manufacturers to bypass the inflation chamber properties tests by using material from the same lot, or equivalent, as that evaluated for the compartment material manufacturer. The comment did not define equivalent, and the Coast Guard knows of no way to determine equivalence other than by testing these physical properties. However, other methods of demonstrating equivalence can be considered.

Another comment opposed this requirement because of the difficulty and questionable value of remaining within close limits of minimum design on all components and assembly parameters in an inflatable PFD used for approval testing. The comment went on to say that production lots of components occasionally dip below the assumed safe level, and that both wide deviations within relatively small lots as well as testing errors on a specific sample are possible. This comment points out the competing demands of economical production and assurance that a produced product is adequately represented by the samples which have been tested for safety during the approval process.

Comments on Lot numbering: One comment indicated that the § 160.076–29(d) requirement to change PFD lot numbers whenever an incoming component lot number changes, would create a hardship for manufacturers. Another comment indicated that changes in lot numbers for component lot changes should only be required for changing lots of fabric and inflation mechanisms. Additionally, one comment noted that the suggestion that PFDs be manufactured in batches and given sequential serial numbers is burdensome and unnecessary. The comment suggested that this method of numbering be an available option, but not a requirement. The Coast Guard notes that the lot numbering requirements in the IR are the same as for other kinds of PFDs and that in the IR providing sequential serial numbers is an option, not a requirement.

Comments on production tests: One comment questioned why § 160.76–29(e)(2) requires two sets of samples for every fifth lot, and indicated that the tests conducted by the inspectors should replace the tests conducted by manufacturers for these lots. The Coast Guard notes that these provisions are the same as for other PFDs and are based on the quality assurance concept of counter checking the primary quality control provider's results.

One comment indicated that § 160.076–29(e)(4) (vi) and (5)(iii) requires testing without regard to production schedules. The Coast Guard notes that these paragraphs are notes to the manufacturer's and inspector's sampling plan tables and thus only apply to testing when there is production in process, as the comment indicated should be the case.

One comment indicated that the seam strength test in § 160.076–31(c)(2) is redundant with the over-pressure and air retention tests. The Coast Guard notes that in fact the latter tests provide no meaningful measure against which production control limits for the material or process can be set because they are simply pass/fail tests and thus cannot be used to monitor or predict developing problems. Seam strength offers a measure that can show trends and thereby indicate when to intervene to prevent problems.

Comments on supervision: One comment indicated that § 160.076–31(d)(3) which requires that the examiner not be supervised by someone who is responsible for meeting production schedules would sometimes initially cause problems in production start-up. The Coast Guard notes that such start-up conflicts are expected and are handled on a case by case basis, by waiving the requirement until the product line is established.

Comments on records retention: One comment questioned why § 160.076–33(a) requires the records for inflatable PFDs to be retained longer than for inherently buoyant PFDs. Another comment questioned why § 160.076–33(b)(4)(ii) requires dates of purchase and receipt of components to be recorded in addition to the component lot number. The comment indicated the lot number provides the necessary tracking information.

Final rule requirements: Performance of approval tests on production inflation chamber materials as required by the IR, avoids the necessity and cost for manufacturers to retest a PFD design in the event of a material change. The results of these types of material tests indicate the level of quality that the materials used in production must achieve to ensure production PFDs are capable of passing the UL 1180 approval tests. The production requirements section of UL 1180 is "Reserved". Production oversight is a fundamental component for all approval processes. The IR provisions require essentially the same production oversight as for other kinds of PFDs. Therefore, the Coast Guard is retaining the baseline material and production tests to establish the quality of the fundamental element of an inflatable PFD's ability to provide durable flotation. Under the IR and the final rule, manufacturers are provided the option of qualifying several alternate inflation chamber materials, while still being prevented from unwittingly submitting a "lab queen" for initial approval. Inflation chamber material properties as well as production oversight and tests, as with all PFDs, are essential quality control provisions that ensure production units comply with specifications of the tested prototypes.

As to the lot numbering requirements, though the IR requirements are being retained in this final rule the Coast Guard will work with UL and the PFD industry to establish equivalent numbering systems, and if such a requirement is adopted into the UL standard the Coast Guard will delete the requirement for the Coast Guard regulations.

The Coast Guard is retaining the records and recordkeeping provisions in the final rule as published in the IR, because records are an essential element to its oversight responsibilities. The UL standard does not address these provisions. As the Coast Guard gains experience with regulated use and user servicing of inflatables, the Coast Guard believes that long-term records are necessary to allow for tracking of defects during the initial period of approval. Additionally, a more extensive record retention will benefit manufacturers by limiting the scope of any necessary defect notification solely to affected units. Inherently buoyant PFDs have a shorter records retention period than those for inflatables because of their "self inspecting" qualities of the PFDs as discussed in the ANPRM. The Coast Guard interprets the subpart lot recordkeeping requirement as being complied with if the component lot number provides the manufacturer with the other required information.

9. Waterproof Marking Durability [Section 160.076–31(c)(8)]

IR Requirement: The IR requires a waterproof marking test that is moderately more stringent than the test required for other kinds of PFDs.

Comments: One comment indicated that § 160.076–31(c)(8), waterproof marking test, should not require elevated temperature and mild detergent since the same is not required for other PFDs.

Final rule requirements: The Coast Guard agrees that all PFD marking should be tested in the same manner, but had established the test in the IR because the impermanence of markings is a common complaint on presently approved PFDs, and because the modified test is no challenge to current technology. However, to avoid excessive differences between this and other Coast Guard regulations and UL requirements, the waterproof marking requirement in the IR is beign revised in this final rule to make the test consistent with that applicable to other PFDs.

10. Inflator Marking [Sections 160.076–21(f) and – 39(d)(1)(ii)]

IR Requirement: The IR requires that both inflators and PFDs be marked with the model number of the inflator used for approval testing.

Comments: PFDMA, the industry association, and one manufacturer acknowledged in comments the need for the Coast Guard to address PFD marking issues as the UL standard does not completely address these concerns.

Final rule requirements: The Coast Guard is retaining the marking requirements in the final rule to aid in enforcement of the serviceability requirements in Title 33 Part 175. Additionally, these provisions are to discourage boaters from switching to less reliable and less capable after-market inflators after purchasing a PFD, and to minimize the possibility of a boater being harmed as a result of an unauthorized modification to an approved PFD. The provision will also help to prevent inadvertent voiding of approval.

11. Adhesive Requirements [Section 160.076–21(d)]

IR Requirement: The IR requires that any adhesive used in the PFD must meet a simple performance standard. The UL standard is not specific in this area.

Final rule requirements: The Coast Guard has decided to drop this restriction from the final rule. Currently, adhesives are not extensively used in most inflatable PFDs produced. The Coast Guard included the requirement in the IR because adhesives have been used in the past and may possibly come into use again. Even without the Coast Guard requirement, if adhesives are used in a PFD submitted for approval, the adhesive will still need to be evaluated for suitability in the intended application according to section 1.4 of UL 1180, which provides general testing standards for components and materials different from the standard.

12. Inflation Discomfort [Section 160.076–23(a)(2)]

IR Requirement: PFDs must not be so uncomfortable during inflation or after inflation so as to cause distress or panic to the user.

Final rule requirements: The Coast Guard is removing this requirement from the final rule. The UL 1180 Standard partially covers this area in section 6.11.4, which requires the PFD to have acceptable comfort up to 90% of the maximum inflation pressure. If after a design is approved, the Coast Guard determines that some boaters are experiencing distress upon inflation, the need for additional requirements in this area will be reevaluated.

13. Textile Cut Edges [Section 160.076–239b)]

IR Requirement: Textilo cut edges must be finished to minimize premature unraveling failures. This is a durability and product value issue and not a safety issue.

Final rule requirements: The Coast Guard is removing this requirement from the final rule. As a result, some products will need to be removed from service sooner than if the requirement were in effect; however, a shortened life span should not be catastrophic or life threatening.

14. Pamphlet Requirements [Section 160.076–35]

IR Requirement: An information pamphlet must be provided which is similar in format to that required for inherently buoyant and hybrid PFDs, but which covers the features of inflatable PFDs.

Comments: In comments, PFDMA and three manufacturers acknowledged the need for this information pamphlet section. They provided no specific comments or suggested improvements to the requirements. The UL comments indicate that they expected the Coast Guard to fill in these requirements until the UL standard could be completed. The general consensus of the attendees at the public meeting, discussed above, was support of the approach to the pamphlet published in the IR.

Final rule requirements: All Coast Guard-approved PFDs are required by 33 CFR 181 to be provided with a PFD pamphlet. The UL standard has a section reserved for this item. Without requirements specific to inflatable PFDs in this section, the pamphlet for inherently buoyant PFDs specified in 33 CFR 181 would be required. This result would add no benefit to the public as that pamphlet fails to address inflatable PFDs. Therefore, the Coast Guard is retaining the requirement regarding the information pamphlet in the final rule as published in the IR. Proper selection guidance is critical for a potential inflatable PFD consumer to make an informed purchase decision.

15. Owner's manual [Section 160.076–37 (b)(1), (b)(2), (b)(3), (b)(4), and (b)(5)]

IR Requirement: In addition to the UL 1180 requirements for the type of information to be provided in an owner's manual, the IR requires five additional issues to be addressed: (1) instructions to inform users to partially deflate a PFD to ease climbing out of the water; (2) service life disclosure; (3) warning against misuse that could be hazardous; (4) explanation of the meaning of any approval conditions; and (5) estimate of user's chances of survival if approval conditions are or are not met.

Comments: Several comments addressed this issue. One manufacturer acknowledged the need for the IR's owner's manual section. Two comments indicated that the requirement is § 160.076–37(b)(2), to state the expected service life in owners manual, was not prudent due to enormous diversity of usage conditions. One of these comments went on to say that the components which will be used in the first inflatable PFDs are newly developed to meet the new standard and have no historical data to justify any claims of expected service life. Additionally, a comment from UL indicated that the example in § 160.076–37(b)(3), which requires a warning against wearing a PFD with automatic inflation under restrictive clothing, should be revised to indicate that such a warning be provided with all inflatable PFDs since any inflatable PFD worn under clothing is hazardous.

Final rule requirements: During the development of UL 1180, PFD manufacturers were divided on the service life disclosure issue, and the UL committee could not reach a consensus on the issue. Because the IR provisions requiring additional information to be included in owner's manual add limited additional safety benefits and may delay designs being available to boaters, those provisions are being deleted in the final rule. The UL standard still requires an owner's manual to be included and manufacturers who choose to, can include the material which would have been required by the IR.

16. PFD Markings [Section 160.076–39 (c), (d), and (f)]

IR Requirement: In addition to the UL 1180 marking requirements for PFDs and component materials, the IR requires several additional marking items including information about use on commercial vessels, the approved inflator model, and warnings of foreseeable hazards. Additionally, conditional approval markings are permitted for manufacturers seeking such approval.

Comments; General: The PFDMA acknowledged that, in general, the Coast Guard's marking provisions in the IR

were necessary. The Association provided no specific comments.

Comments; Marking size: There were two comments on the size of the marking required on the inflation handle of a manual inflator. Both comments indicated that smaller marking would be adequate.

Comments; Use on Commercial Vessels: There were two comments on the requirements in § 160.076–39(d)(1)(i) which require markings on an approved PFD to state that the PFDs are "NOT APPROVED FOR USE ON COMMERCIAL VESSELS." Both comments believed that there was a high likelihood that the marking would be misinterpreted as prohibiting use of these recreational inflatable PFDs on commercial vessels. One comment noted that the marking would create the misperception in the minds of many crew members of commercial vessels, that they are not allowed to wear inflatable PFDs. The comment stated that as a result, the marking will be a disservice to thousands of men and women on board commercial vessels. Further, the comment noted, it will greatly diminish the stated objective of getting people to take the preventive measure of actually wearing a PFD and advocated that all inflatable PFDs be marked "Meets USCG Carriage Requirements Only When Worn."

The other comment also favored use of the devices on uninspected vessels with certain conditions. This comment stated that for uninspected passenger vessels for hire, there appears to be no basis for allowing inflatable PFDs in lieu of inherently buoyant PFDs unless they are worn by the passengers during the voyage.

Comments; Reliability Disclosure: One of the comments discussed above also requested that inflatable PFDs be marked with their reliability (after five years of typical service), for the consumer's information at the point of sale. The comment indicated that comparative figures for inherently buoyant PFDs should be allowed. The comment also suggested that the inflatable PFD should be marked with an indication of its reliability and effectiveness when worn.

Final rule requirements: Based on the comments the Coast Guard is revising the marking requirements in the final rule to require the PFDs to be marked "NOT APPROVED TO MEET CARRIAGE REQUIREMENTS ON COMMERCIAL VESSELS." This will make it clear that Type I, II, or III inflatable PFDs may be used as additional equipment on uninspected commercial vessels, in the same fashion as most other recreational PFDs. This would allow crew members to use these inflatables in addition to Type V PFDs permitted to be used on these vessels in accordance with their labels. In a future rulemaking the Coast Guard intends to consider revising 46 CFR part 25 to address use of these PFDs to meet certain commercial vessel carriage requirements and to address the associated maintenance responsibilities and perhaps wear requirements as suggested in the comments.

The Coast Guard has decided not to require markings concerning reliability of the PFD on the PFD label as requested because, among other things, it cannot be adequately explained in a brief statement. This information may be addressed in the information pamphlet or the owner's manual. The pamphlet is intended for point of sale information. In this final rule, the Coast Guard is not requiring this information to be provided either on the label or in the owner's manual because the rating would depend on how the PFD is used and cared for or would require the development of a standardized typical service life which is not available at this time.

As to the other comments on marking requirements in § 160.076–39, the Coast Guard is deleting paragraphs (d)(2) and (f) regarding foreseeable misuse and manual inflation handle marking, as these provisions add limited additional safety and may delay designs being available to boaters.

Editorial Corrections

In addition to the above changes, a number of editorial changes are being made in the final rule to conform the text of the rule to the new organization of the Coast Guard. Additionally, the production test and inspection sampling plan tables in § 160.076–29 are corrected in two areas. The lot size headings are relocated to not confuse them with the number of samples per lot. Also, in the notes to the tables the symbols "/@" are replaced with "§".

Incorporation by Reference

The following material is incorporated by reference in § 160.076–11: Fully Inflatable Recreational Personal Flotation Devices (UL 1180), first edition, May 15, 1995; Components for Personal Flotation Devices (UL 1191), May 16, 1995; Marine Buoyant Devices (UL 1123), February 17, 1995; American Society for Testing and Materials, ASTM D 751–79, Standard Methods of Testing Coated Fabrics, 1979; ASTM D 1434–75, Gas Transmission Rate of Plastic Film and Sheeting, 1975; and Federal Standards, Federal Test Method Standard No. 191A, July 20, 1978. Copies of the material are available for inspection where indicated under "ADDRESSES." Copies of the material are available from the sources listed in § 160.076–11.

The Director of the Federal Register has approved the material in § 160.076–11 for incorporation by reference under 5 U.S.C. 552 and 1 CFR part 51. The material is available as indicated in that section.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979).

A Regulatory Evaluation under paragraph 10e of the DOT regulatory policies and procedures has been prepared and is available in the docket for inspection or copying where indicated under **ADDRESSES.** The Evaluation is summarized as follows.

The requirements of this final rule open up a new marketing opportunity for inflatable PFD manufacturers by allowing them to obtain Coast Guard approval of recreational inflatable PFDs, if they so choose. The final rule will also allow boaters to purchase and use inflatable PFDs on their boats, if they wish to do so. Manufacturers may still make and sell unapproved inflatable PFDs, and boaters may continue to use such PFDs as additional equipment. Manufacturers who wish to obtain approval will have to pay for the approval testing at the recognized laboratory, pay the cost of the required quality control and oversight, and provide the information pamphlet and manuals required by this rule.

The estimated total initial approval cost per inflatable PFD design is expected to be approximately $18,500, excluding the cost of inflation system acceptance which could be amortized over several designs of PFDs. This cost is almost entirely due to tests required by the industry consensus standard, which are not included in the cost imposed by this rule. Costs to approve other types of PFDs are approximately $6,000, excluding component acceptance costs. The additional cost to approve inflatable PFDs could easily be absorbed in the cost of the units produced. The cost increase per device would be small considering the number of devices which could be produced under authorization of each approval certificate. The Coast Guard anticipates that it will approve 36 inflatable PFD designs within the first 10 years after issuing this rule.

Production inspection costs imposed by these regulations will be approximately $1,000 for the largest size lot of inflatable PFDs permitted. This cost is similar to that incurred for other types of approved PFDs.

The retail cost, per device, is expected to be between $50 and $200 for inflatable PFDs. Currently approved PFDs range in price from $7–$200.

If 500,000 units per year are produced, costs for the requirements imposed over those imposed by the industry consensus standard is estimated to be $618,000 annually to the industry.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider the economic impact on small entities of a rule for which a general notice of proposed rulemaking is required. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2) governmental jurisdictions with populations of less than 50,000.

As the requirements of this final rule open up a new marketing opportunity for inflatable PFD manufacturers by allowing them to obtain Coast Guard approval of recreational inflatable PFDs, a general notice of proposed rulemaking was not required. The Coast Guard has nevertheless reviewed this rule for its potential impact on small entities. The final rule will also allow boaters to purchase and use inflatable PFDs on their boats. As discussed above, the economic impact of the new requirements is expected to be minimal.

Therefore, the Coast Guard certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This rule contains collection-of-information requirements. The Coast Guard has submitted the requirements to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), and OMB has approved them. The section numbers are §§ 160.076–13, 160.076–21, 160.076–29, 160.076–31, 160.076–33, 160.076–35, and 160.076–39 and the OMB approval number is OMB Control Number 2115–0619.

Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. This rulemaking establishes procedures for Coast Guard approval of inflatable PFDs. The authority to establish these requirements are committed to the Coast Guard by Federal statutes. Furthermore, since PFDs are manufactured and used in the national marketplace, safety standards for PFDs should be national in scope to avoid burdensome variances. Therefore, the Coast Guard intends this rule to preempt State action on the same subject matter.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that under paragraph 2.B.2 of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. This rule has no environmental impact other than reducing the volume of unicellular plastic foam being used in inherently buoyant PFDs. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES.**

List of Subjects in 46 CFR Part 160

Marine safety, Reporting and recordkeeping requirements, Incorporation by reference.

Accordingly, the interim rule amending 46 CFR part 160, which was published at 60 FR 32836 on June 23, 1995, is adopted as final with the following changes:

PART 160—LIFESAVING EQUIPMENT

1. The authority citation for part 160 is revised to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703 and 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

2. Section 160.076–5 is amended by revising the definition of "Commandant", and removing the definition of "LSI" to read as follows:

§ 160.076–5 Definitions.

* * * * *

Commandant means the Chief of the Lifesaving and Fire Safety Standards Branch, U.S. Coast Guard Marine Safety and Environmental Protection Directorate. Address: Commandant (G–MMS–4), U.S. Coast Guard Headquarters, 2100 Second St. SW., Washington, DC 20593–0001; phone: 202–267–1444; facsimile: 202–267–1069; electronic mail: "mvi-3/G-M18@cgsmtp.uscg.mil".

* * * * *

3. In § 160.076–7, paragraph (a) is revised to read as follows:

§ 160.076–7 PFD approval Type.

(a) An inflatable PFD may be approved without conditions as a Type I, II, or III PFD for persons over 36 kg (80 lb) if it meets the requirements of this subpart.

* * * * *

4. In § 160.076–9, paragraph (b) is revised to read as follows:

§ 160.076–9 Conditional approval.

* * * * *

(b) PFDs not meeting the performance specifications for type I, II, or III PFDs in UL 1180 may be classified as Type V, conditionally approved PFDs, when the Commandant determines that the performance or design characteristics of the PFD make such classification appropriate.

5. In § 160.076–11, paragraph (b) is revised to read as follows:

§ 160.076–11 Incorporation by reference.

* * * * *

(b) The materials approved for incorporation by reference in this subpart, and the sections affected are as follows:

American Society for Testing and Materials (ASTM)

100 Barr Harbor Drive, West Conshohocken, PA 19428–2959.
ASTM D 751–79 Standard Methods of Testing Coated Fabrics, 1979, 160.076–25;
ASTM D 1434–75 Gas Transmission Rate of Plastic Film and Sheeting, 1975, 160.076–25.

Federal Standards

Naval Publishing and Printing Center, Customer Service, 700 Robbins Avenue, Philadelphia, PA 19120.
In Federal Test Method Standard No. 191A (dated July 20, 1978) the following methods:
(1) Method 5100, Strength and Elongation, Breaking of Woven Cloth; Grab Method, 160.076–25;
(2) Method 5132, Strength of Cloth, Tearing; Falling-Pendulum Method, 160.076–25;
(3) Method 5134, Strength of Cloth, Tearing; Tongue Method, 160.076–25.

Underwriters Laboratories (UL)

Underwriters Laboratories, Inc., P.O. Box 13995, Research Triangle Park, NC 27709–3995 (Phone (919) 549–1400; Facsimile: (919) 549–1842)

UL 1123, "Marine Buoyant Devices", February 17, 1995, 160.076–35;
UL 1180, "Fully Inflatable Recreational Personal Flotation Devices", May 15, 1995, 160.076–7; 160.076–21; 160.076–23; 160.076–25; 160.076–29; 160.076–31; 160.076–37; 160.076–39.
UL 1191, "Components for Personal Flotation Devices", May 16, 1995, 160.076–21; 160.076–25; 160.076–39.

§ 160.076–13 [Amended]

6. In § 160.076–13 paragraph (c)(10) is removed.

§ 160.076–21 [Amended]

7. In § 160.076–21 paragraphs (d) and (e) are removed and paragraph (f) is redesignated as paragraph (d).

8. In § 160.076–23, paragraphs (a)(2) and (b) are removed, paragraph (a)(3) is redesignated as (a)(2), and paragraph (a)(1) is revised to read as follows:

§ 160.076–23 Construction and performance requirements.

(a) * * *

(1) Meet the requirements in UL 1180 applicable to the PFD performance type for which approval is sought; and

* * * * *

9. In § 160.076–25, paragraph (c) is revised to read as follows:

§ 160.076–25 Approval testing.

* * * * *

(c) Each test subject participating in the tests in UL 1180, section 6 shall in addition, demonstrate that the test subject can repack the PFD such that it can be used in the donning tests and manual activation tests required by—

(1) Section 6.2.3 of UL 1180; and

(2) Sections 6.4.1, and 6.4.2 of UL 1180, if the test engineer cannot verify that the manual and oral inflators are properly stowed.

* * * * *

§ 160.076–27 [Removed and reserved]

10. § 160.076–27 is removed and reserved.

§ 160.076–29 [Amended]

11. In § 160.076–29, Tables 160.076–29A and 160.076–29B are revised to read as follows:

* * * * *

TABLE 160.076–29A—MANUFACTURER'S SAMPLING PLAN

	Number of Samples Per Lot (Lot size)					
	1–100	101–200	201–300	301–500	501–750	751–1000
Tests:						
Inflation Chamber Materials	See Note (a)					
Seam Strength	1	1	2	2	3	4
Over-pressure (b)(c)	1	2	3	4	6	8
Air Retention	EVERY DEVICE IN THE LOT					
Buoyancy and Inflation Medium Retention	1	2	3	4	6	8
Tensile Strength	See Note (d)					
Detailed Product Examination	2	2	3	4	6	8
Retest Sample Size (b)			13	13	20	20
Final Lot Inspection	EVERY DEVICE IN THE LOT					

Notes to Table.
(a) See § 160.076–29(e)(4)(i).
(b) See § 160.076–29(e)(4)(ii).
(c) See § 160.076–29(e)(4)(iii).
(d) See § 160.076–29(e)(4)(iv).

TABLE 160.076–29B—INSPECTOR'S SAMPLING PLAN

	Number of Samples Per Lot (Lot size)					
	1–100	101–200	201–300	301–500	501–750	751–1000
Tests:						
Over-pressure (a)	1	1	2	2	3	4
Air Retention	1	1	2	2	3	4
Buoyancy & Inflation Medium Retention	1	1	2	2	3	4
Tensile Strength	See Note (b)					
Waterproof marking	See Note (c)					
Detailed Project Examination	1	1	1	2	2	3
Retest Sample Size (a)	10	10	13	13	20	20
Final Lot Inspection	10	15	20	25	27	30

Notes to Table:
(a) See § 160.076–29(e)(5)(i).
(b) See § 160.076–29(e)(5)(ii).
(c) See § 160.076–29(e)(5)(iii).

* * * * *

12. In § 160.076–31, paragraph (c)(8) is revised to read as follows:

§ 160.076–31 Production tests and examinations.

* * * * *

(c) * * *

(8) *Waterproof Marking Test.* Each sample must be completely submerged in fresh water for at least 30 minutes. The sample must then be removed, immediately placed on a hard surface, and the markings vigorously rubbed with the fingers for 15 seconds. If the printing becomes illegible, the sample must be rejected.

* * * * *

13. In § 160.076–37, paragraph (b) is revised to read as follows:

§ 160.076–37 Owner's manual.

* * * * *

(b) *Manual contents.* Each owner's manual must contain the information specified in section 11 of UL 1180, and, if the PFD is conditionally approved, an explanation of the meaning of, and reasons for, the approval conditions.

14. In § 160.076–39, paragraph (d)(2) is removed and reserved, paragraphs (c) and (d)(1)(i) are revised and paragraph (f) is removed to read as follows:

§ 160.076–39 Marking.

* * * * *

(c) A Type V, conditionally approved, inflatable PFD must be marked with the approval conditions specified on the approval certificate.

(d) * * *

(1) * * *

(i) "NOT APPROVED TO MEET CARRIAGE REQUIREMENTS ON COMMERCIAL VESSELS."

* * * * *

Part III

Department of Housing and Urban Development

Office of Community Planning and Development; Fiscal Year 1995 Funding Availability for the Early Childhood Development Program; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-3961-N-01]

Office of Community Planning and Development; Fiscal Year 1995 Notice of Funding Availability for the Early Childhood Development Program

AGENCY: Office of Community Planning and Development, HUD.

ACTION: Notice of Funding Availability (NOFA) for Fiscal Year (FY) 1995.

SUMMARY: This NOFA announces the availability of $21 million to assist non-profit organizations in providing early childhood development services for lower-income families who reside in public housing, and for homeless families or those at risk of becoming homeless. In keeping with the Clinton Administration's commitment to create communities of opportunity by providing a coordinated package of programs to highly distressed areas, this competition is limited to non-profit organizations that will provide early childhood development services in or near public housing located in urban and rural Federally-designated Empowerment Zones and Enterprise Communities (EZ/ECs). Funded programs will be linked to and build upon the self-sufficiency activities outlined in EZ/EC communities' strategic plans.

DATES: An original and three copies of the completed application for grant funds must be received in HUD Headquarters prior to 5 p.m. Eastern Time on June 26, 1996.

ADDRESSES: Applications will be accepted at the following address: Processing and Control Unit, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street, SW, Room 7251, Washington, DC 20410. ATTN: Childhood Development Program. By 5 p.m. Eastern Time on the deadline date applications will be received at either room 7251 or the South Lobby of the Department of Housing and Urban Development at the above address.

Late applications will be deemed to have been received by the deadline date if postmarked by the United States Postal Service no later than three days prior to the deadline date. Late express delivery items will be deemed to have been received by the deadline date upon submission of documentary evidence that they were placed in transit with the express delivery service no later than the day before the deadline.

FOR FURTHER INFORMATION CONTACT: Elizabeth A. Butler, Office of Economic Development, Office of Community Planning and Development, Department of Housing and Urban Development, Room 7134, 451 Seventh Street, SW, Washington, DC 20410, fax (202) 708-7543. A telecommunications device for hearing or speech impaired persons (TTY) is available at 1-800-877-8339 (Federal Information Relay Service TTY). (Except for the "800" number, these are not toll-free telephone numbers.)

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act Statement

The information collection requirements contained in this notice have been submitted to the Office of Management and Budget (OMB) for review under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid control number. The OMB control number, when assigned, will be announced in the **Federal Register**.

II. Purpose and Substantive Description

(a) Background

This announcement solicits applications from nonprofit organizations serving Federally-designated urban and rural Enterprise Zones/Empowerment Communities (EZ/ECs). To ensure that grants are provided to the largest number of nonprofit organizations practicable, all applicants are limited to $500,000 per project. The average award per project is expected to be approximately $200,000. These funds are intended to establish childhood development services to facilitate the employability of the parents or guardians of children who are residing in public housing, and to provide early childhood development services to families who are homeless or at risk of becoming homeless.

(b) Program Purpose

This program is designed to determine the extent to which the availability of early childhood development services in or near lower-income housing projects facilitates the employability of the parents or guardians of children who are residing in public housing, and to provide early childhood development services in or near lower-income housing projects to families who are homeless or at risk of becoming homeless. These funds may be used for the operating expenses and/or for minor renovations of child care facilities located in or near public housing developments.

All of these funds will be awarded through a competitive process to nonprofit agencies establishing or expanding child care services in Federally-designated urban and rural EZ/ECs. Any grants awarded must be expended for their appropriate activities within eighteen (18) months of the date of award. This announcement anticipates that a likely use of the grant funds will be to create child care facilities in or near public housing developments or to develop "wrap-around" child care services in or near housing developments currently offering programs.

Wrap-around child care services means added hours and days of service will be provided to allow parents the opportunity to retain, train for or seek employment. Proposed wrap-around services must be substantially different from services already provided. Funds from grants awarded under this announcement may only be used to finance the additional hours or days of services.

To the extent the program is designed to serve children who are homeless or at risk of becoming homeless, the services should be coordinated with the community's Continuum of Care system or approach for assisting homeless persons and preventing homelessness.

(c) Definitions

(1) *A person at risk of becoming homeless* means an individual or family who is precariously housed and lacks the resources and support network needed for stable housing.

(2) *Continuum of Care* means a system or approach designed to assist homeless families and individuals and prevent homelessness, involving a community process for coordinating resources and consisting of four basic components:

(i) A system of outreach and assessment for determining the needs and conditions of an individual or family who is homeless, or whether assistance is necessary to prevent an individual from becoming homeless;

(ii) Emergency shelters with appropriate supportive services to help ensure that homeless individuals and families receive adequate emergency shelter and referral to necessary service providers or housing finders;

(iii) Transitional housing with appropriate supportive services to help those homeless individuals and families who are not prepared to make the transition to permanent housing and independent living; and

(iv) Permanent housing, or permanent supportive housing, to help meet the long-term needs of homeless individuals and families.

(3) *Empowerment Zone/Enterprise Community (EZ/EC)* means an urban or rural area so designated by the Secretary of HUD or the Secretary of Agriculture pursuant to sections 1391-1393 of the Omnibus Budget Reconciliation Act of 1993. For purposes of this NOFA, this term shall include Supplemental Empowerment Zones and Enhanced Enterprise Communities, as defined below.

(4) *Supplemental Empowerment Zone/Enhanced Enterprise Community (SEZ/EEC)* means an urban area which was designated by the Secretary of HUD as either a Supplemental Empowerment Zone (SEZ) or an Enhanced Enterprise Community (EEC) and announced as such in the Notice of Designation printed in the **Federal Register** on February 23, 1995 (60 FR 10018).

(5) *Full-day child care* means provision of child care that permits parents or guardians to work at full-time employment.

(6) *Homeless family* means:

(i) An individual or family who lacks a fixed, regular, and adequate nighttime residence; and

(ii) An individual or family who has a primary nighttime residence that is:

(A) A supervised publicly- or privately-operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing for the mentally ill);

(B) An institution that provides a temporary residence for individuals intended to be institutionalized; or

(C) A public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

(7) *Lower-income families* has the meaning given such term in section 3(b)(2) of the U.S. Housing Act of 1937.

(8) *Lower-income or public housing* has the meanings given such terms in section 3(b)(1) of the U.S. Housing Act of 1937.

(9) *Non-profit organization* means an organization:

(i) That no part of the net earnings of which inures to the benefit of any member, founder, contributor or individual;

(ii) That, in the case of a private nonprofit organization, has a voluntary board;

(iii) That has an accounting system, or has designated a fiscal agent in accordance with requirements established by the Secretary; and

(iv) That practices nondiscrimination in the provision of assistance.

(10) *Public Housing Agency* has the meaning given such term in section 3(b)(2) of the United States Housing Act of 1937.

(d) Available Funds

(1) This announcement solicits applications from non-profit organizations that wish to apply for a portion of the $21 million in grant funds that are available under HUD's Early Childhood Development program. Up to 20 percent of available funds can be awarded to rural EZ/ECs.

(2) The average award per project is expected to be approximately $200,000. Individual grants awarded under this announcement shall not exceed $500,000, in order to ensure that funds are provided to as large a number of EZ/EC communities as possible. An EZ/EC cannot receive more than $1 million. It should be noted that while an applicant may apply for funds to establish or expand services for more than one project, no single project will be funded for more than $500,000. The grants are intended to cover operating expenses or one-time renovation costs and will be funded for a period of eighteen (18) months. HUD reserves the right to fund less than the full amount requested in any application.

(e) Eligible Applicants

Applicants must be non-profit organizations, whose service areas include an EZ/EC, that wish to locate child care facilities in or near public housing developments by:

(1) Establishing one or more full-day child care centers or family day care homes, or

(2) Expanding current part-day centers for EZ/EC residents. Family-based facilities may be in the homes of one or more residents of a public housing development.

(f) Eligible Activities

Awarded funds may only be used for operating expenses and minor renovations of facilities necessary for the provision of childhood development services in or near public housing developments located in EZ/ECS. Funds may not be used for new construction of a facility.

(1) Operating expenses include such expenses as planning and development costs, administration, leasing and/or the purchase of equipment and/or leasing vehicles, maintenance, minor or routine repairs, security, utilities, furnishings, equipment and supplies (including curriculum), insurance, and staff salaries.

(2) Minor renovations include the reconfiguration of space; installation of bathrooms or kitchens; renovations necessary to achieve compliance with physical accessibility standards for persons with disabilities or required to meet State or local licensing and building code standards; landscaping; painting; and lighting. Minor renovations does not include the cost associated with lead-based paint abatement since removal of lead-based paint is funded through another HUD program.

III. Special Requirements

Interested applicants must adhere to the following requirements when developing a proposal:

(a) The program should not propose to serve children of the same ages as those currently being served by existing child care programs in or near the targeted public housing development. This prohibition does not apply to those applicants who propose to extend the hours of child care services provided by a center already located in or near the development.

(b) The appropriate public housing authority must agree to provide, at nominal or no cost, suitable facilities to the grantee for provision of full-day child care services.

(c) The full-day child care services program must serve pre-school and school children to permit parents or guardians to obtain, retain or train for employment.

(d) The full-day child care center must hire qualified staff who have received appropriate training specific to age groups served to carry out activities that support early childhood development.

(e) The full-day child care services program must involve the parents of children benefiting from such program, to the extent practicable, in the classroom.

(f) To the extent practicable, the full-day child care services program must provide opportunities for the employment of residents from the public housing development area, especially elderly residents.

(g) The full-day child care services and facilities must comply with all applicable state and local laws, regulations and ordinances.

IV. Criteria for Review and Evaluation of the Grant Application

The following are the criteria for the review and evaluation of grant applications which HUD will use in selecting grantees:

(a) *Program Quality:* comprehensiveness and effectiveness of

the proposed program. (Maximum: 25 points). The application should describe:

(1) The process by which the full-day child care center or family day care home will become operational within a reasonable period of time. Applicants should include items such as a timetable covering the projected beginning and ending dates of the minor renovations, projected date by which staff will be hired, and projected date for beginning operations.

(2) How families and children who are in need of full-day child care services and who are residents of public housing or are homeless or at risk of becoming homeless will be identified and recruited.

(3) The range of ages and number of children that will be cared for, the adult/child ratios and group sizes by age, the operating hours of the full-day child care, and the cost per child of providing services.

(4) What measures will be taken to ensure the health and safety of children and staff participating in the program.

(5) How quality full-day child care services will continue to be provided at a reasonable cost at the end of the grant period, including an adequate plan for monitoring the quality of programs and services.

(6) The consistency of care delivered to each child by a particular caregiver or caregiver team.

(b) *Capability:* the qualifications, experience, or potential capabilities of the applicant and participating parties (Maximum: 25 points). The application should describe:

(1) The ability and experience of applicant, co-applicants and/or subcontractors to perform functions.

(2) The qualifications of proposed staff, such as a Child Development Associate Credential or similar standard.

(c) *Objectives:* the extent to which the application reflects the purpose of the program. (Maximum: 25 points). The application should describe:

(1) The extent to which the child care services will serve and assist the parents or guardians to seek, retain or train for employment.

(2) The community benefit added by the service.

(3) The public housing development the services will be in or near, including street address and the number of resident children in need of proposed services.

(4) How opportunities for employment will be provided, to the extent practicable, by the program to public housing development residents.

(d) *Coordination and Resources:* partnerships formed with and participation of the community stakeholders. (Maximum: 25 points). The application should describe:

(1) How community stakeholders, including parents and the public housing authority, have worked in partnership in preparing program design and implementation.

(2) The extent to which the services will be coordinated with current supportive services, such as Americorps' VISTA and Foster Grandparent programs or similar initiatives.

(3) If the program will serve children who are homeless or at risk of becoming homeless, how the services will be coordinated with the community's Continuum of Care system or approach.

(4) Other resources; funds, staff, in-kind or other, committed to support the proposed program, including letters of commitment.

(5) Assurances or firm commitments from community sources to continue the project funding beyond the initial funding period.

(e) *EZ/EC Performance:* Progress made by the EZ/EC in the implementation of its strategic plan and benchmark activities. (Maximum: 15 points and two pages). Application should describe achievements made in:

(1) Job creation and business expansion.

(2) Job training and retention.

(3) Advancing self-sufficiency.

(4) Human services delivery.

(5) Youth development.

(6) Other activities supportive of the purpose of this NOFA.

V. Application Process

(a) Nonprofit organizations seeking Childhood Development Program assistance must make a specific request for that assistance, in accordance with this NOFA.

(b) *Timing of Submission.* One original and three copies of applications for assistance are due in HUD Headquarters on or before 5 p.m. Eastern Time on the deadline date. HUD will treat as ineligible applications that are received after that deadline. *Applications may not be sent by facsimile (FAX).*

(c) *Other Submission Requirements.* All pages of the application shall be numbered sequentially. Applications of no more than 22 pages should be submitted on 8.5" x 11" paper. In addition to the materials requested in Section IV of this notice, the nonprofit organization shall submit the following:

(1) SF–424, Application for Federal Assistance;

(2) The certification regarding lobbying required under 24 CFR part 87;

(3) Certification of a Drug-Free Workplace, in accordance with the Drug-Free Workplace Act of 1988, and HUD's regulations at 24 CFR part 24, subpart F;

(4) A copy of the organization's IRS ruling providing tax-exempt status under section 501(c) of the IRS Code of 1986, as amended;

(5) Line-item budget;

(6) A written certification stating the project will operate within EZ/EC area; and

(7) A signed statement from the local PHA committing space and/or renovation funds to the establishment/expansion of child care facility.

(d) Each grantee will be required to submit to HUD a progress report, in a form prescribed by HUD, within 90 days after the completion of the project. Each report shall describe the use of the grant funds and include a description and an analysis of the project, the approaches taken, and the level of cooperation among participating parties.

VI. Technical Deficiencies

To the extent permitted by law, HUD may advise the applicant of technical deficiencies in the applications and permit them to be corrected. Due to the requirements of the HUD Reform Act, HUD staff is limited in the assistance it is permitted to provide regarding applications for grants. The assistance and advice that can be provided includes such activities as explaining and responding to questions about program requirements, identification of those parts of an application that need substantive improvement, the dates by which decisions will be made and procedures that are required to be performed to process an application. This term, however, does not include advising the applicant how to make those improvements.

In addition, any information published in the **Federal Register** and in this NOFA and any information that has been made public through a means other than the **Federal Register** or NOFA may be discussed.

VII. Other Matters

(a) *Environmental Impact.* A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulation at 24 CFR part 50, implementing section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection and copying between 7:30 am and 5:30 pm weekdays at the Office of the Rules Docket Clerk, 451 7th St. SW Room 10276, Washington, DC 20410.

(b) *Environmental Review.* Any selected application containing funding for minor renovations is subject to environmental review by HUD and selection of such an application does not imply HUD approval of any particular property for use in the project. HUD will complete an environmental review with respect to particular properties, to the extent required under 24 CFR part 50, prior to execution of the grant agreement. The recipient may not commit HUD or other funds for minor renovations until it receives HUD approval of the property. If an application is funded only for operating expenses, environmental approval by HUD is not required.

(c) *Federalism.* The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that this NOFA will not have substantial, direct effects on States, on their political subdivisions, or on their relationship with the Federal Governments, or on the distribution of power and responsibilities between them and other levels of governments.

(d) *Family.* The General Counsel, as the Designated Official for Executive Order 12606, The Family, has determined that the policies announced in the NOFA do not have the potential for significant impact on family formation, maintenance and general well-being within the meaning of the Order. No significant change in existing HUD policies and programs will result from issuance of this NOFA, as those policies and programs relate to family concerns.

(e) *Prohibition Against Lobbying.* The use of funds awarded under this NOFA is subject to the disclosure requirements and prohibitions of section 319 of the Department of Interior and Related Agencies Appropriation Act for Fiscal Year 1990 (31 U.S.C. 1351) and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of Federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative Branches of the Federal Government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. Under 24 CFR part 87, applicants, recipients, and subrecipients of assistance exceeding $100,000 must certify that no Federal funds have been or will be spent on lobbying activities in connection with the assistance.

(f) *Prohibition Against Advance Disclosure of Funding Decisions.* HUD's regulations implementing section 103 of the HUD Reform Act are codified at 24 CFR part 4 and apply to the funding competition announced today. The requirements of part 4 continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are restrained by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted by 24 CFR part 4.

Applicants or employees who have ethics related questions should contact the HUD Office of Ethics (202) 708–3815. (This is not a toll-free number.) For HUD employees who have specific program questions, such as whether subject matter can be discussed with persons outside HUD, the employee should contact the appropriate Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

(g) *Accountability in the Provision of HUD Assistance.* HUD's regulation implementing section 102 of the HUD Reform Act is codified at 24 CFR part 12. Section 102 contains a number of provisions that are designed to ensure greater accountability and integrity in the provision of certain types of assistance administered by HUD. On January 16, 1992 (57 FR 1942), following publication of the final rule, HUD published additional information that gave the public (including applicants for, and recipients of, HUD assistance) further information on the implementation, public access, and disclosure requirements of section 102. The requirements of section 102 are applicable to assistance awarded under this NOFA.

(1) *Documentation and Public Access Requirements.* HUD will ensure documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14 (a) and 12.6 (b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942) for further information on these requirements.)

(2) *Disclosures.* HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available along with the applicant disclosure reports, but in no case for a period of less than three years.

Authority: Section 222 of the Housing and Urban-Rural Recovery Act of 1983 and the Departments of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriations Acts of 1994 and 1995 (P.L. 103–327 and P.L. 103–327, respectively).

Applicant Certifications

To be Signed By The Authorized Representative of the Applicant and Submitted with the Application.

The Applicant hereby assures and certifies that:

A. It meets the criteria for eligible applications defined in the Early Childhood Development NOFA and has the legal authority to apply for Federal assistance and the institutional, managerial and financial capability to ensure proper planning, management and completion of the project described in this application and it shall comply with all applicable Federal and state civil rights and housing laws and implementing regulations as those requirements now exist, or as they may be enacted, promulgated or amended from time to time.

B. It will comply with the requirements of the Fair Housing Act (42 U.S.C. 3601–19) and implementing 24 CFR Part 100, Part 109 and Part 110; Executive Order 11063, as amended (Equal Opportunity in Housing) and implementing 24 CFR 107; Titles II and V of the Americans with Disabilities Act, 42 U.S.C. §§ 12101 et seq.; and Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) (Nondiscrimination in Federally Assisted Programs) and implementing at 24 CFR Part 1, or, for applicants which are Indian Tribes or Indian Housing Authorities, the Indian Civil Rights Act (25 U.S.C. 1201 et seq.).

C. It will comply with the requirements of the Age Discrimination Act of 1975 (42 U.S.C. 6101–07) and implementing 24 CFR 146, and Section 504 of the Rehabilitation Act of 19973

(29 U.S.C. 794) and implementing 24 CFR 8.

D. It will comply with the requirements of Executive Order 11426, as amended (Equal Employment Opportunity) and implementing 41 CFR Part 60 and the requirements of Executive Orders 11625, 12432, and 12138, which state that recipients must make efforts to encourage the use of minority-and women-owned business enterprises in connection with funded activities.

E. It will comply with the requirements of Section 3 of the Housing and Urban Development Act of 1968, (U.S.C. 1701u) (Employment Opportunities for Lower Income Persons in Connection with Assisted Projects); and Section 109 of the Housing and Community Development Act of 1974, 42 U.S.C. 5309.

F. It will comply with the requirements of section 1352, Title 31, U.S.C. and the implementing 24 CFR Part 87, and, if this application is requesting more than $100,000, it certifies that:

(1) No Federally appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding or modification of this grant.

(2) If any funds other than Federally appropriated funds have been paid or will be paid to any person for influencing or attempting to influence any person defined in (1) above in connection with this Federal grant, the undersigned shall complete and submit Standard Form-LLL, "Disclosure form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants and contracts under this grant) and that all subrecipients shall certify and disclose accordingly.

Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and of not more than $100,000 for each such failure. Indian Housing Authorities (IHAs) established by an Indian tribe as a result of the exercise of its sovereign power are excluded from coverage, but IHAs established under state law are not excluded from coverage.

G. It and its principals: (1) are not presently debarred suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions (see 24 CFR 24,.110) by any Federal department or agency; (2) have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property; (3) are not presently indicated for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with the commission of any of the offenses enumerated in (2) above; and (4) have not within a three-year period preceding this application had one or more public transactions terminated for cause or default. Where the applicant is unable to certify any of the statements in this certification, such applicant shall attach an explanation behind this page.

Certification Regarding Drug-Free Workplace Requirements

Instruction for Certification

1. By submitting this application, the applicant is providing certification set out below.

2. The certification set out below is a material representation of fact upon which reliance will be placed if HUD determines to award a grant to the applicant. If it is later determined that the applicant knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, HUD, in addition to any other remedies available to the Federal Government, may take action authorized under the Drug-Free Workplace Act.

Certification Regarding Drug-Free Workplace Requirements

A. The applicant certifies that it will provide drug-free workplace by:

(a) publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) establishing an ongoing drug-free awareness program to inform employees about:

(1) the dangers of drug abuse in the workplace;

(2) the grantee's policy of maintaining a drug-free workplace;

(3) any available drug counseling, rehabilitation, and employee assistance programs; and

(4) the penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will:

(1) abide by the terms of the statement; and

(2) notify the employer of any criminal drug statute conviction for the violation occurring in the workplace no later than five days after such conviction:

(e) notifying HUD within ten days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction.

(f) taking one of the following actions, within 30 days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted:

(1) taking appropriate personnel action against such an employee, up to an including termination; or

(2) requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State or local health, law enforcement or other appropriate agency;

(g) making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a) through (f) above.

B. The applicant shall insert in the space provided below the site(s) for the performance of work done in connection with the specific grant.

Securities and Exchange Commission

17 CFR Part 230, et al.

Revisions to Rules Regulating Money Market Funds; Final Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 230, 239, 270, and 274

[Release Nos. 33–7275; IC–21837; S7–34–93]

RIN 3235–AE17

Revisions to Rules Regulating Money Market Funds

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting amendments to rules and forms under the Securities Act of 1933 and the Investment Company Act of 1940 that govern money market funds. The amendments tighten the risk-limiting conditions imposed on tax exempt money market funds by rule 2a–7 under the Investment Company Act of 1940; impose additional disclosure requirements on tax exempt funds; and make certain other changes applicable to all money market funds. The amendments are designed to reduce the likelihood that a tax exempt fund will not be able to maintain a stable net asset value.

EFFECTIVE DATE: June 3, 1996. Several different compliance dates apply to the amendments. For specific compliance dates for particular amendments, see Section V. of this Release.

FOR FURTHER INFORMATION CONTACT: Martha H. Platt, Senior Attorney, (202) 942–0725, or Kenneth J. Berman, Assistant Director, Office of Regulatory Policy, (202) 942–0690, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Requests for formal interpretive advice should be directed to the Office of Chief Counsel (202) 942–0659, Division of Investment Management, 450 Fifth Street, N.W., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") is adopting amendments to rule 2a–7 [17 CFR 270.2a–7] ("rule 2a–7" or the "rule") under the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*] ("1940 Act"), the rule governing the operations of money market funds ("money funds" or "funds").[1] The Commission is also adopting a new rule, rule 17a–9 under the 1940 Act [17 CFR 270.17a–9], and amendments to the following rules and forms: rule 134 under the Securities Act of 1933 [17 CFR 230.134]; rules 2a41–1, 12d–3 and 31a–1 under the 1940 Act [17 CFR 270.2a–41–1, 270.12d3–1, and 270.31a–1]; Form N–1A [17 CFR 239.15A and 274.11A]; Form N–3 [17 CFR 239.17a and 274.11b]; and Form N–SAR [17 CFR 274.101]. The Commission is also publishing three new or revised staff guides to Forms N–1A and N–3 that do not appear in the Code of Federal Regulations.

[1] Unless otherwise noted, all references to rule 2a–7; as amended, or any paragraph of the rule, will be to 17 CFR 270.2a–7 as amended by this Release.

Executive Summary

The Commission is adopting amendments to rule 2a–7 under the 1940 Act, the rule that governs the operations of money funds. The primary purpose of the amendments is to tighten the risk-limiting conditions of the rule applicable to tax exempt money funds and thereby reduce the likelihood that a tax exempt fund will not be able to maintain a stable net asset value. The amendments also affect taxable money funds in certain respects. In addition, the Commission is adopting revisions to the prospectus disclosure requirements for tax exempt money funds and a new rule exempting certain transactions from the 1940 Act's limitations on affiliated transactions.

In considering these amendments, the Commission has made changes from the proposal designed to simplify compliance with the rule while retaining the degree of flexibility necessary for money funds to operate in accordance with their investment objectives. A brief summary of the rule amendments is provided below.

Issuer Diversification and Quality Standards

The amendments extend the rule's diversification requirements to tax exempt funds. A "national" tax exempt fund is limited to investing no more than five percent of its assets in securities of a single issuer (other than Government securities) (the "Five Percent Diversification Test"). A "single state" tax exempt fund is subject to the same limitation but only with respect to seventy-five percent of its assets; the remaining twenty-five percent of a single state fund's assets ("twenty-five percent basket") may be invested in securities of one or more issuers, provided that they are "first tier securities," as the term is defined in the rule. A tax exempt fund is limited to investing five percent of its assets in "second tier securities" that are "conduit securities," as these terms are defined in the rule, with investment in the conduit securities of any one issuer limited to one percent of fund assets. To provide an additional element of flexibility, a security subject to an "unconditional demand feature issued by a non-controlled person," as defined in the rule, will be subject only to the rule's put diversification requirements.

Diversification and Quality Standards Applicable to Providers of Puts and Demand Features

The amendments provide that a fund cannot, with respect to seventy-five percent of its assets, invest more than ten percent of its assets in securities subject to puts from, or directly issued by, the same institution. The remaining twenty-five percent of a fund's assets ("twenty-five percent put basket") may be subject to puts from, or directly issued by, one or more institutions, provided that the puts are first tier securities. A fund may not invest more than five percent of its assets in securities subject to puts that are second tier securities.

As proposed, a demand feature is an "eligible security" (as defined in the rule) only if the demand feature (or its issuer) has received a short-term rating from a nationally recognized statistical rating organization ("NRSRO"). A conditional demand feature is an eligible security if the limitations on its exercise can be readily monitored by the fund's board of directors (or its delegate). The amendments as adopted, however, do not specify the conditions that may be included in a conditional demand feature.

Asset Backed Securities and "Synthetic" Securities

The amendments clarify the credit quality, diversification and maturity determination standards applicable to synthetic and asset backed securities ("ABSs"). Among other things, an ABS must have a rating from a NRSRO to be eligible for fund investment.

Interest Rate Risk Analysis

The amendments also clarify that floating rate and variable rate securities ("adjustable rate securities") must reasonably be expected to have market values that approximate their amortized cost values on each interest rate adjustment date through their final maturity dates. The amendments require funds to review periodically whether such securities can reasonably be expected to have market values that approximate their amortized cost values upon readjustment of their interest rates.

Exemptive Rule

The Commission is adopting rule 17a–9 under the 1940 Act to permit (but not require) an affiliate of a fund to purchase from the fund securities that are no longer eligible securities at the higher of their amortized cost values (including accrued interest) or market values, without having to obtain a Commission order.

I. Background

Money funds are open-end management investment companies registered under the 1940 Act that have as their investment objective generation of income and preservation of capital and liquidity through investment in short-term, high quality securities. More than $775 billion in assets is currently invested in approximately 25 million money fund shareholder accounts.[2] Approximately sixteen percent of money fund assets ($127 billion) are held by funds that have as their principal objective distribution of income exempt from federal income taxes ("tax exempt funds").[3] Approximately one third of the assets held by tax exempt funds ($43 billion) are held by funds that seek to distribute income that is also exempt from the income taxes of a specific state or locality ("single state funds").[4] The balance is held by funds that do not limit their investments to securities exempt from the income taxes of a specific state ("national funds").

Unlike other investment companies, money funds seek to maintain a stable share price, typically $1.00 per share. This stable share price of $1.00 has encouraged investors to view investments in money funds as an alternative to either bank deposits or checking accounts, even though money funds lack federal deposit insurance, and there is no guarantee that money funds will maintain a stable share price.[5]

To maintain a stable share price, most money funds use the amortized cost method of valuation ("amortized cost method")[6] or the penny-rounding method of pricing ("penny-rounding method")[7] permitted by rule 2a–7. The 1940 Act and applicable rules generally require investment companies to calculate current net asset value per share by valuing portfolio instruments at market value or, if market quotations are not readily available, at fair value as determined in good faith by, or under the direction of, the board of directors.[8] Rule 2a–7 exempts money funds from these provisions, but contains conditions designed to minimize the deviation between a fund's stabilized share price and the market value of its portfolio.[9] If the deviation does become significant, the fund may be required to take certain steps to address the

[2] *IBC's Money Fund Report* at 2, Dec. 29, 1995 (*"Money Fund Report"*); *Investment Company Institute Mutual Fund Fact Book* at 58–59 (35th ed. 1995). For a summary of the development of money funds, which were first introduced in the early 1970s, *see* Investment Company Act Rel. No. 17589 (July 17, 1990) [55 FR 30239 (July 25, 1990)] ("Release 17589") at nn.3–7 and 15–18 and accompanying text.

[3] *Money Fund Report*, *supra* note 2, at 2.

[4] Single state funds are currently available for sixteen states: Alabama, Arizona, California, Connecticut, Florida, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Texas and Virginia. *Id.*

[5] A money fund is required to disclose prominently on the cover page of its prospectus that: (1) the shares of the fund are neither insured nor guaranteed by the U.S. Government; and (2) there can be no assurance that the fund will be able to maintain a stable net asset value of $1.00 per share. *See*, *e.g.*, Item 1(vi) of Form N–1A. The prescribed legend must appear in money fund sales literature and advertisements as well. *See* paragraph (a) of rule 34b–1 under the 1940 Act, and paragraph (a)(7) of rule 482 under the Securities Act of 1933 ("1933 Act").

[6] Under the amortized cost method, portfolio securities are valued by reference to their acquisition cost as adjusted for amortization of premium or accretion of discount. Paragraph (a)(1) of rule 2a–7, as amended.

[7] Share price is determined under the penny-rounding method by valuing securities at market value, fair value or amortized cost and rounding the per share net asset value to the nearest cent on a share value of a dollar, as opposed to the nearest one tenth of one cent. Paragraph (a)(15) of rule 2a–7, as amended. *See also* Investment Company Act Rel. No. 13380 (July 11, 1983) [48 FR 32555 (July 18, 1983)] ("Release 13380") (adopting rule 2a–7) at n.6, and Investment Company Act Rel. No. 12206 (Feb. 1, 1982) [47 FR 5428 (Feb. 5, 1982)] ("Release 12206") (proposing rule 2a–7) at n.5.

[9] If shares are sold or redeemed based on a net asset value which has been either understated or overstated in comparison to the amount at which portfolio instruments could have been sold, the interests of either existing shareholders or new investors will be diluted. *See* Investment Trusts and Investment Companies: Hearings on S. 3580 Before a Subcomm. of the Sen. Comm. on Banking and Commerce, 76th Cong., 3d Sess. 136–138, 288 (1940), Report of the Staff of the Division of Investment Management of the Securities and Exchange Commission on the Regulation of Money Market Funds Before the Subcommittee on Financial Institutions of the Senate Committee on Banking, Housing, and Urban Affairs at 9 (Jan. 24, 1980), and Release 17589, *supra* note 2, at n.7.

deviation, including selling and redeeming its shares at less than $1.00 ("breaking a dollar").[10]

In February 1991, the Commission amended rule 2a–7 (the "1991 Amendments")[11] to respond to developments in the commercial paper market since the rule was adopted in 1983.[12] Among other things, the 1991 Amendments permit funds to invest only in "eligible securities," defined generally as securities that are rated in one of the highest two short-term rating categories by the "requisite NRSROs,"[13] or comparable unrated securities. Taxable funds must further limit their investments in the securities of any one issuer (other than Government securities)[14] to five percent of fund assets ("Five Percent Diversification Test"),[15] and limit fund investment in second tier securities[16] to no more than five percent of fund assets, with investment in the second tier securities of any one issuer being limited to the greater of one percent of fund assets or one million dollars ("Second Tier Securities Tests").[17]

The 1991 Amendments did not apply the Five Percent Diversification Test and the Second Tier Securities Tests to tax exempt funds.[18] At that time, the Commission concluded that most tax exempt funds could not satisfy these tests without substantially restructuring their portfolios and, perhaps, losing some of their tax advantages.[19] Single state funds were thought to present particular problems because they concentrate their investments in debt securities issued by a single state (or issuers located within that state), making diversification more difficult to achieve. After the adoption of the 1991 Amendments, the Commission closely examined the characteristics of short-term tax exempt securities, the markets in which they trade, and tax exempt fund portfolios to determine what, if any, revisions to rule 2a–7 should be proposed to provide tax exempt fund investors with protections similar to those afforded taxable fund investors by the 1991 Amendments.

The results of the Commission's examination of the tax exempt markets were reflected in amendments to rule 2a–7 that were proposed for comment on December 17, 1993 ("Proposing Release").[20] A primary objective of the proposed amendments was to tighten the diversification and portfolio quality standards applicable to tax exempt funds to make them more similar to the standards applicable to taxable funds. The proposed diversification and quality standards for tax exempt funds took into account the different investment objectives and portfolio compositions of national funds and single state funds, and would have established different requirements for each type of tax exempt fund.

The Commission received comments on the proposed amendments from seventy-one commenters, including twelve municipal issuers, twenty-two mutual fund complexes, and nine professional and trade associations.[21] The comment letters reflect a wide variety of views on almost every topic discussed in the Proposing Release. A number of commenters, expressing a general concern over the complexity of the rule, urged that the rule's diversification and quality standards for taxable and tax exempt funds be as consistent with each other as practicable so that the rule would not become too complicated.

As part of its evaluation of the proposal, the Commission considered recent events in the markets for municipal securities that had a significant effect on money funds. One such event was the bankruptcy of Orange County, California, a large municipal issuer of short-term taxable and tax exempt notes.[22] At the time of

[10] Paragraphs (c)(6) and (c)(7) of rule 2a–7, as amended.

[11] Investment Company Act Rel. No. 18005 (Feb. 20, 1991) [56 FR 8113 (Feb. 27, 1991)] ("Release 18005"). The 1991 Amendments were proposed in Release 17589, *supra* note 2, and became effective on June 1, 1991.

[12] Before the 1991 Amendments, rule 2a–7 permitted funds to invest in "high quality" securities, that is, securities that had received at least the second highest rating from one NRSRO. *See* Release 13380, *supra* note 7, at n.34. In the summer of 1989 and the spring of 1990, several taxable funds held approximately $125 million in defaulted commercial paper issued by Mortgage and Realty Trust or Integrated Resources Inc.; in the fall of 1990 several funds held commercial paper issued by MNC Financial Corp. that was downgraded to below high quality, resulting in a significant decline in its market price. In all three cases, the commercial paper had the second highest rating from one NRSRO when purchased by the funds and thus was eligible for fund investment under rule 2a–7 as then in effect. Shareholders of funds that held these commercial paper issues were not adversely affected, however, because each fund's investment adviser purchased the paper from the funds at amortized cost or principal amount or otherwise agreed to indemnify the fund. *See* Release 17589, *supra* note 2, at n.18 and accompanying text.

[13] "Requisite NRSROs" are defined as: (1) any two NRSROs that have issued a rating with respect to an instrument or class of debt obligations of an issuer, or (2) if only one NRSRO has issued a rating with respect to such instrument or issuer at the time the fund purchases or rolls over the security, that NRSRO. Paragraph (a)(19) of rule 2a–7, as amended.

The term "NRSRO" is defined in paragraph (a)(14) of rule 2a–7 to have the same meaning as in the Commission's uniform net capital rule [17 CFR 240.15c3–1(c)(2)(vi)(E), (F) and (H)]. The Commission's Division of Market Regulation responds to requests for NRSRO designation through no-action letters. Currently, the Division of Market Regulation has designated six NRSROs: Duff and Phelps, Inc., Fitch Investors Services, Inc., Moody's Investors Service Inc., Standard & Poor's Corp., and two specialized NRSRO's: IBCA Limited and its subsidiary, IBCA Inc., which is recognized as a NRSRO only with respect to its ratings of debt issued by banks, bank holding companies, United Kingdom building societies, broker-dealers and broker-dealers' parent companies, and bank-supported debt, and Thomson BankWatch, Inc., which is recognized as a NRSRO only with respect to ratings for debt issued by banks, bank holding companies, non-bank banks, thrifts, broker-dealers, and broker-dealers' parent companies. In recognition of the expanded use of credit ratings in Commission rules, the Commission solicited comment on the process employed to designate rating agencies as NRSROs and the nature of the Commission's oversight role with respect to NRSROs in a concept release issued in 1994. Exchange Act Rel. No. 34616 (Aug. 31, 1994) [59 FR 46314 (Sept. 7, 1994)].

[14] Under paragraph (a)(13) of rule 2a–7, as amended, the term "Government Security" means those securities issued or guaranteed by the United States or its instrumentalities—the definition of that term given in section 2(a)(16) of the 1940 Act [15 U.S.C. 80a–2(a)(16)]. It does not include securities issued or guaranteed by the state governments or instrumentalities. For a discussion of securities issued by government-sponsored enterprises ("GSEs"), *see Joint Report on the Government Securities Market* (Jan. 1992) at p. D–1.

[15] Paragraph (c)(4)(i) of rule 2a–7, as amended. A limited exception is provided for certain securities held for not more than three business days. *See infra* Section II.D.4. of this Release.

[16] A "second tier security" is an eligible security that is not a "first tier security." Paragraph (a)(20) of rule 2a–7, as amended. A first tier security is generally a security that is rated by the requisite NRSROs in the highest rating category for short-term debt obligations, and comparable unrated securities. Paragraph (a)(11) of rule 2a–7, as amended.

[17] Paragraph (c)(4)(iv)(A) of rule 2a–7, as amended. The 1991 Amendments also shortened the maximum dollar-weighted portfolio maturity that a fund may maintain from 120 to ninety days, and codified the actions that a fund must take when certain events occur, including defaults and rating downgrades. *See* paragraphs (c)(2) and (c)(5) of rule 2a–7, as amended. The 1991 Amendments also require that the cover page of fund prospectuses and certain fund advertisements and sales literature state prominently that investment in a fund is not guaranteed or insured by the U.S. Government and that there can be no assurance that a fund can maintain a stable net asset value per share. *See* Form N–1A, item 1(a)(vi); Form N–3, item 1(a)(ix); rule 482(a)(7) under the 1933 Act [17 CFR 230.482(a)(7)]; and rule 34b–1 under the 1940 Act [17 CFR 270.34b–1].

[18] Tax exempt funds continue to be subject to a diversification test with respect to puts, as they had been prior to the adoption of the 1991 Amendments. Paragraphs (c)(4)(v) and (c)(4)(vi)(B) of rule 2a–7, as amended.

[19] Release 17589, *supra* note 2, at Section II.6.

[20] Investment Company Act Rel. No. 19959 (Dec. 17, 1993) [58 FR 68585 (Dec. 28, 1993)] at Section I.A.

[21] The comment period for the Proposing Release was extended from April 6, 1994 to May 6, 1994. *See* Investment Company Act Rel. No. 20184 (Mar. 31, 1994) [59 FR 16576 (Apr. 7, 1994)]. The comment letters and a summary of the comments prepared by the Commission staff are included in File No. S7–34–93.

[22] On December 6, 1994, Orange County and investment pools managed by the Orange County treasurer ("Orange County Pools") filed for protection under chapter 9 of the Federal Bankruptcy Code [11 U.S.C. 901 *et seq.*]. The U.S. Bankruptcy Court for the Central District of California subsequently determined that the Orange County Investment Pools were not eligible to seek protection under chapter 9. *See* "Orange County, Mired in Investment Mess, Files for Bankruptcy," *Wall St. J.*, Dec. 7, 1994 at A1, A6; Michael Utley, "Judge Rules Pool's Bankruptcy Filing Invalid, But Impact is Mostly Academic," *Bond Buyer*, May 26, 1995 at 1, 36.

Orange County's bankruptcy, a number of taxable and tax exempt funds held notes issued by either Orange County or municipalities that invested in investment pools managed by the Orange County treasurer ("Orange County notes"). While no fund holding Orange County notes has broken a dollar to date (in large part because of actions taken by their advisers to support the funds' share prices) the Orange County bankruptcy reinforced the need to amend rule 2a–7 to address issues unique to tax exempt funds.[23]

II. Amendments to Rule 2a–7

A. Preliminary Matters

The Commission is today adopting the second of two sets of amendments to rule 2a–7 under the 1940 Act designed to tighten the risk-limiting conditions of the rule. These amendments primarily deal with tax exempt funds; they are intended to provide investors in tax exempt money market funds with protections similar to those provided to investors in taxable funds by the 1991 Amendments. The Commission believes that these amendments are necessary to provide greater assurance that tax exempt money market funds meet investors' expectations for safety and convenience by reducing the likelihood that these funds will not be able to maintain a stable net asset value using pricing procedures permitted by rule 2a–7.

The amendments to rule 2a–7 adopted in 1991, while not insulating funds from all events that could threaten their net asset values, appear to have reduced the riskiness of money market funds at a modest cost to money fund investors in terms of reduced yield.[24] The Commission acknowledges that none of its rules can eliminate completely the risk that a money market fund will break a dollar as a result of a decrease in value of one or more of its portfolio securities. Thus, in adopting these amendments, the Commission is prescribing minimum standards designed not to ensure that a fund will not break a dollar, but rather to require the management of funds in a manner consistent with the investment objective of maintaining a stable net asset value.

A money fund's board of directors has oversight responsibility for the sound management of the fund.[25] The fund's adviser is typically delegated responsibility for selecting appropriate investments for the fund. Rule 2a–7 requires that fund investments should be made in accordance with procedures "reasonably designed" to maintain a stable net asset value or share price.[26] In addition, investments made in accordance with such procedures should be consistent with maintaining a stable net asset value or share price. Rule 2a–7 provides an analytical framework for fund advisers to follow when making such investment decisions, including decisions regarding new types of securities not specifically addressed by the rule, Commission releases, or staff interpretive letters. As the Commission stated in 1991, that a particular security is technically eligible for fund investment under rule 2a–7 is not itself an adequate basis for an investment in the security.[27] For example, a number of money funds recently invested in certain structured notes that were Government securities on the asserted belief that the provisions of rule 2a–7 dealing with adjustable rate Government securities would permit such an investment. When short-term interest rates increased in early 1994, the values of these securities decreased and many became illiquid.[28] These and other types of losses are more likely to be avoided if a fund has in place, and operates in accordance with, procedures designed to determine whether investment in the security is consistent not only with the technical requirements of rule 2a–7, but with the rule's analytical framework and with the fund's investment objective of maintaining a stable net asset value.

In preparing these rules for adoption, the Commission has weighed carefully the need to provide a similar level of safety for investors in tax exempt and taxable money funds and the need, frequently expressed by fund commenters, to allow tax exempt funds sufficient flexibility to cope with a limited supply of high quality municipal securities. For example, while the amendments adopted today limit all funds to investing not more than five percent of assets in the securities of any one issuer, the amendments limit the application of this standard to only seventy-five percent of single state fund assets and exclude from the diversification requirements for all funds securities subject to certain types of demand features, refunding agreements, and issuer-provided puts.[29]

In response to comment letters, the Commission has simplified the operation of the rule in several respects. Where possible, the same provisions are applied to all types of funds, separate diversification tests for issuers of conditional and unconditional puts have been eliminated, and fund board involvement is no longer required regarding matters with which directors can be expected to have little expertise. Wherever possible, headings and cross-references have been added to the rule to assist a reader in understanding how its provisions interrelate.

B. Portfolio Quality and Diversification

1. Five Percent Diversification Test

a. *Application to Tax Exempt Funds.* As discussed above, taxable funds are subject to the Five Percent Diversification Test, that is, no more than five percent of the total assets of a taxable money fund may be invested in securities of a single issuer. In proposing to extend diversification standards to tax exempt funds, the Commission took into account the differences between national and single state funds. Most national funds elect to meet the diversification requirements of section 5(b)(1) of the 1940 Act,[30] and

[23] The Division of Investment Management addressed analogous issues raised by the Orange County bankruptcy in July 1991, when New Jersey regulators seized Mutual Benefit Life Insurance Company ("MBLI"). A number of securities held by tax exempt funds were subject to demand features provided by MBLI. After its seizure by the New Jersey insurance regulators, MBLI could no longer honor its obligations under the terms of the demand features it provided. Advisers to funds holding MBLI-backed securities took various actions to prevent shareholder losses that would have occurred had the funds been required to break a dollar. The advisers either repurchased the MBLI-backed instruments from the funds at their amortized cost or obtained a replacement guarantor.

[26] Paragraphs (c)(6)(i) and (c)(7) of rule 2a–7, as amended.

[27] Release 18005, *supra* note 11, at Section II.A.

[28] *See infra* Section II.F.4.a. of this Release.

[29] *See infra* Sections II.B.1.b., II.C.1.c. and II.D.2. of this Release, and paragraphs (c)(4) (i) and (ii), (c)(4)(vi)(A)(*2*) and (c)(4)(vi)(B)(*1*) of rule 2a–7, as amended.

[30] Section 5(b)(1) provides that a diversified investment company may not, with respect to seventy-five percent of its assets, invest more than five percent of its assets in instruments of any one issuer, other than cash, cash items, Government securities (as defined in section 2(a)(16) of the 1940 Act [15 U.S.C. 80a–2(a)(16)]) and securities of other investment companies. The remaining twenty-five percent of its assets (the "twenty-five percent

choose not to use the "twenty-five percent basket" (the portion of a diversified fund's assets that is not required to be diversified) to invest more than five percent of their assets in a single issuer. Most commenters, including most mutual fund commenters, supported the extension of the Five Percent Diversification Test to national funds, which the Commission is adopting as proposed.[31]

Unlike national funds, many single state funds are not diversified under section 5(b)(1), and could not satisfy the Five Percent Diversification Test because their investment objectives provide them with a much narrower range of high quality investment alternatives.[32] Although the Commission expressed concern about the risks involved in a non-diversified portfolio of a money fund, it was unclear to the Commission that it would be possible for single state funds to satisfy the Five Percent Diversification Test. Accordingly, the proposed amendments would not have required single state funds to comply with any issuer diversification test under the rule. To reduce the risks associated with a non-diversified portfolio, the Commission proposed to limit single state funds to investing in first tier securities, and proposed additional disclosure requirements to inform investors of the risks of an undiversified single state fund.[33] The Commission also asked commenters to consider whether single state funds should be required to satisfy a diversification standard under the rule.[34]

Most commenters supported the exception from the Five Percent Diversification Test for single state funds. Many of these commenters, however, opposed the proposed first tier securities restriction, and asserted that this requirement would exacerbate the supply problem without making funds more safe by forcing single state funds to be less diversified. Other commenters maintained that the rule should mandate some diversification with respect to single state funds, which they asserted present greater risks than other types of money funds. One commenter suggested that single state funds offering securities from "large" states should be subject to the same diversification standards as national funds. Another commenter went even further, stating that the rule should impose the diversification standards applicable to national funds to all single state funds. The views of these commenters, as well as the Commission's experience in administering rule 2a–7 since the amendments were proposed, have led the Commission to reconsider its proposal to exempt single state funds entirely from a diversification test.

In proposing the 1991 Amendments, the Commission noted that a fund's ability to maintain a stable net asset value under the rule may be impaired to the extent it invests heavily in one or more issuers that subsequently experience credit problems or default on their securities.[35] The validity of that observation has been proven by many of the incidents of the past two years in which advisers to funds have taken steps to prevent the fund from breaking a dollar as a result of holding a distressed security.[36] In each case, the smaller the position, the less of an effect the distressed security had on the fund.

In the case of the bankruptcy of Orange County, most of the funds holding the notes held a fairly small portion of their assets in Orange County notes.[37] As a result, in some cases, the fund could maintain its share price without any assistance from the fund's adviser; in other cases, the adviser was in a position to take steps to prevent the fund from breaking a dollar only because the fund's Orange County Note position was relatively small. While, as the Commission has stated several times, no adviser is required to guarantee its fund against the possibility of breaking a dollar,[38] experience has demonstrated that diversification may not only limit investment risk, but also may place the fund in a better position to address (or avoid) significant deviation between a fund's market-based and amortized cost values.

The Commission recognizes that single state funds face a limited choice of very high quality issuers in which to invest, and that the number of first tier issuers in several states is especially limited. Application of the Five Percent Diversification Test to one hundred percent of the assets of these funds could force some funds to invest in lower quality issuers than those in which they would otherwise invest. While greater diversification provides an additional measure of safety for investors where there are many issuers to choose from, the Commission is concerned that too stringent a diversification standard could result in a net reduction in safety for certain single state funds. As a result, the Commission has decided to require single state funds to be diversified at the five percent level only as to seventy-five percent of their assets; the remaining twenty-five percent basket may be invested only in the first tier securities of one or more issuers. The availability of the twenty-five percent basket will provide single state funds with the flexibility to retain several positions of over five percent in very high quality investments.[39]

The Commission has decided to exclude from the application of the

basket") may be invested in any manner. If an investment company invests more than five percent of its assets in a single issuer, the entire investment is placed in the twenty-five percent basket, and then aggregated with other investments that are greater than five percent to determine whether the fund is in compliance with section 5(b)(1). The investment company may not invest more than twenty-five percent of its assets in a single issuer by splitting its investment into two lots between the twenty-five percent basket and the diversified portion of its portfolio. *See* Lybrand, Ross Bros. & Montgomery (Oct. 24, 1941) (pub. avail. Nov. 22, 1991). Section 5(b)(1) also prohibits a diversified fund, with respect to seventy-five percent of its assets, from investing in securities that comprise more than ten percent of the outstanding voting securities of an issuer.

[31] Paragraph (c)(4)(i) of rule 2a–7, as amended.

[32] Proposing Release, *supra* note 20, at Sections II.A. and II.A.2.

[33] Proposed amendments to Form N–1A would have required a single state fund to disclose in its prospectus risks related to lack of diversification. Proposing Release, *supra* note 20, at Section III.A.

[34] Proposing Release, *supra* note 20, at Section II.A.2.

[35] Release 17589, *supra* note 2, at Section II.1.

[36] Transactions of this type occurred within the last two years because funds held either long-term adjustable rate securities whose market values declined when short-term interest rates were increased, or notes issued by Orange County. Twenty-five advisers or related persons purchased adjustable rate securities from their funds at the securities' amortized cost values to avoid any fund shareholder losses. Thirty-eight advisers or related persons either purchased Orange County notes from, or entered into credit support arrangements with their affiliated funds in order to maintain the funds' stable share price of $1.00. These transactions are prohibited by section 17 of the 1940 Act [15 U.S.C. 80a–17] in the absence of a Commission exemption. *See infra* Section IV. of this Release.

[37] The thirty-eight funds that sought and were granted "no-action" relief from the Division of Investment Management either to sell the Orange County notes to affiliated persons, or to arrange for affiliated persons to provide some type of credit support for the benefit of the funds, are illustrative. Most of these funds had no more than five percent of their assets invested in notes issued by Orange County, or one of the participants in the Orange County Investment Pools. Within this group, the fund (a single state fund) that had the greatest concentration of its assets in securities issued by a single issuer had 8.7 percent of its assets invested in that issuer.

[38] *See, e.g.*, Release 18005, *supra* note 11, at Section II.H.; Testimony of Arthur Levitt, Chairman, U.S. Securities and Exchange Commission, Concerning Issues Affecting the Mutual Fund Industry Before the Subcommittee on Telecommunications and Finance, Committee on Energy and Commerce, U.S. House of Representatives, 23–25 (Sept. 27, 1994); Testimony of Arthur Levitt, Chairman, U.S. Securities and Exchange Commission, Concerning Municipal Bond and Government Securities Markets Before the Committee on Banking, Housing and Urban Affairs, U.S. Senate, 10–11 (Jan. 5, 1995).

[39] Application of the non-diversified basket will track the comparable provision of section 5(b)(1) of the 1940 Act [15 U.S.C. 80a–5(b)(1)]. *See supra* note 30.

diversification requirement securities that are subject to an unconditional demand feature from a non-controlled person, as defined in the rule.[40] This approach will be applicable to all money funds, not only single state funds. The Commission believes that this approach, described in more detail below, will provide the advantages of diversification while permitting funds sufficient flexibility to respond to the available supply of eligible securities.

b. *Scope of the Diversification Standards.* A large percentage (sixty to seventy percent) of the securities currently held in tax exempt fund portfolios consist of long-term adjustable rate securities that are subject to unconditional demand features.[41] The provider of an unconditional demand feature assumes the credit risks presented by a particular issuer by agreeing to provide principal and interest payments in the event the issuer of the underlying security is unable to do so. Funds generally rely on the credit quality of the issuer of an unconditional demand feature to satisfy the rule's quality standards.[42] In light of this reliance, two commenters questioned the necessity of requiring a fund to satisfy the rule's issuer diversification and quality standards with respect to the issuer of the underlying security.[43]

If a security subject to an unconditional demand feature was in default or otherwise became distressed, a money fund normally would be expected to exercise the demand feature and receive the entire principal amount of the security and any interest payments due or accrued.[44] Thus, lack of diversification in the underlying security may be less important to a money fund's ability to maintain a stable net asset value than the ability to exercise the demand feature. Demand features are subject to a separate diversification requirement under the rule and, thus, excessive reliance on the credit of a single issuer is already addressed by the rule.[45]

Based on these considerations, and in light of the greater flexibility that would be afforded to single state funds, the Commission has decided to amend the rule so that the issuer diversification requirement—for all money funds—excludes securities subject to an "unconditional demand feature issued by a non-controlled person," as defined in the rule.[46] The Commission is limiting this exclusion to securities whose unconditional demand features are issued by non-controlled persons to reduce a fund's exposure to the credit risks presented by a single economic enterprise.[47] Securities subject to other types of puts, including conditional demand features, would continue to be subject to the rule's issuer diversification standard.

2. Quality Limitations on Portfolio Securities

Rule 2a–7 limits both taxable and tax exempt funds to investing only in eligible securities—securities receiving at least the second highest rating from the requisite NRSROs (as defined in the rule) or comparable unrated securities.[48] Taxable funds must comply with the Second Tier Securities Tests—investment in second tier securities is limited to five percent of fund assets, and investment in the second tier securities of any one issuer is limited to the greater of one percent of fund assets or one million dollars. The proposed amendments to the rule would have established different quality standards for national and single state funds.

a. *Proposed Limitations for Single State Funds.* The proposed amendments would have limited single state fund investment to first tier securities. The Commission stated in the Proposing Release that the first tier securities restriction was designed to reduce the additional risks that may accompany lower levels of diversification as a result of the Commission's proposal not to extend the Five Percent Diversification Test to single state funds. As noted above, most fund commenters objected to this limitation. In light of the requirement that single state funds be diversified as to seventy-five percent of their assets,[49] the Commission has decided not to adopt the proposed first tier securities restriction.

b. *Application of the Second Tier Securities Tests to Conduit Securities.* The proposed amendments to the rule would have extended the Second Tier Securities Tests only to national fund investment in "conduit securities." The Proposing Release explained that, in contrast to traditional state and municipal securities, conduit securities are issued to finance non-governmental private projects, such as retirement homes, private hospitals, local housing projects, and industrial development projects, with respect to which the ultimate obligor is not a governmental entity. Conduit securities are not backed by a revenue source from any essential public facility or by the taxing authority of any state or municipality. As a result, the risk of default for conduit securities is significantly higher than it is for traditional state or municipal securities.[50] Therefore, the Commission proposed to treat a national fund's investment in conduit securities no differently than a taxable fund's investment in securities typically issued by a private concern.

Most commenters supported the application of the Second Tier Securities Tests to national fund investment in conduit securities. These commenters generally agreed that this limited application of the Second Tier Securities Tests would allow national funds maximum flexibility to invest in the type of tax exempt securities that present the least risk of default. A smaller group of commenters, however, asserted that the proposed limitation would further limit the supply of eligible securities.[51] Many conduit securities in which money funds invest are subject to unconditional demand features. Because the Second Tier

[40] Paragraphs (c)(4)(i) and (ii) of rule 2a–7, as amended.

[41] Proposing Release, *supra* note 20, at Section I.B.

[42] Paragraph (c)(3)(ii) of rule 2a–7, as amended, permits a fund to rely on the credit quality of the unconditional demand feature in determining whether the underlying security is an eligible security or a first tier security.

[43] The commenters discussed this issue within the context of the rule's put diversification standards. *See infra* Section II.C.2. of this Release.

[44] Paragraph (c)(5)(ii) of rule 2a–7, as amended, requires a money fund to dispose of a defaulted or distressed security (e.g., one that no longer presents minimal credit risks) "as soon as practicable," absent a finding by the board of directors that disposal would not be in the best interests of the fund.

[45] Demand features and other types of puts that enhance underlying securities continue to be subject to the rule's put diversification requirements. *See infra* Section II.C.1. of this Release.

[46] An "unconditional demand feature issued by a non-controlled person" is defined in the rule to mean an "unconditional put" that is also a "demand feature issued by a non-controlled person." Paragraph (a)(26) of rule 2a–7, as amended. A "demand feature issued by a non-controlled person" is defined to mean "a demand feature issued by a person that, directly or indirectly, does *not* control, and is not controlled by or under common control with the issuer of the security subject to the Demand Feature. *Control* shall mean 'control' as defined in section 2(a)(9) of the Act." Paragraph (a)(8) of rule 2a–7, as amended.

[47] Similarly, the twenty-five percent put basket will not be available for puts that do not meet the definition of a put issued by a non-controlled person. *See infra* Section II.C.1.b. of this Release.

[48] *See supra* nn. 12 and 13 and accompanying text and paragraph (a)(19) of rule 2a–7, as amended.

[49] *See supra* Section II.B.1.a. of this Release and paragraph (c)(4)(iii) of rule 2a–7, as amended.

[50] *See Municipal Bond Defaults—The 1980's: A Decade in Review* (J.J. Kenny & Co., Inc. 1993). Bankruptcies and defaults by major municipal issuers, such as Orange County, California, are rare events. Of the approximately 120 municipal bankruptcies since 1979, most have involved small, local governments or special tax districts. *See* "Banging a Tin Cup With a Silver Spoon," *N.Y. Times*, June 4, 1995 at F1.

[51] *See supra* note 29 and accompanying text.

Securities Tests will not be applied to conduit securities with unconditional demand features issued by non-controlled persons, the application of the Second Tier Securities Tests to these securities should have a limited effect on the supply of tax exempt securities.[52]

The Commission has decided to extend the Second Tier Securities Tests to national and single state fund investment in conduit securities. Under amendments to the rule being adopted, the non-governmental entity ultimately responsible for the payment of principal and interest is treated as the issuer of the conduit security for purposes of the rule's issuer diversification requirements.[53] Credit quality determinations for a conduit security must be made by reference to the underlying corporate or project issuer, unless the conduit security is subject to an unconditional demand feature, in which case the conduit security will not be subject to the Second Tier Securities Tests.[54] Credit quality determinations for conduit securities subject to conditional demand features must be made by reference to the provider of the demand feature and the long-term rating of the underlying corporate or project issuer.[55] In addition, for purposes of calculating compliance with the one percent limit on second tier securities of a single issuer, the issuer of the conduit is the corporation or project.[56]

c. *Definition of the Term "Conduit Security".* The proposed amendments would have defined the term "conduit security" to mean a security issued through a state or territory of the United States, or any political subdivision or instrumentality thereof, which is *not:* (1) payable from the revenues of such governmental unit ("Revenue Clause"); (2) unconditionally guaranteed by such governmental unit; (3) related to a project or facility owned and operated by such governmental unit; or (4) related to a facility leased to and under the control of an industrial or commercial enterprise that is part of a public project owned and under the control of such governmental unit. The definition was intended to exclude securities for which the ultimate obligor is a governmental unit.

Several commenters advised the Commission that portfolio managers would be able to identify conduit securities more readily and without obtaining legal and other expert opinions if the rule affirmatively stated what a conduit security is, instead of what it is not. Several commenters also urged that the Revenue Clause be deleted because it might result in excluding from the Second Tier Securities Tests a security for which the ultimate obligor is a private entity.[57] The Commission has modified the definition of the term "conduit security" to reflect some of these concerns.[58]

The term "conduit security" is defined as a security issued by a municipal issuer involving an arrangement or agreement entered into, directly or indirectly, with an issuer other than a municipal issuer, which arrangement or agreement provides for or secures repayment of the security.[59] The term "conduit security" does not include a security that is: (1) unconditionally guaranteed by a municipal issuer; (2) payable from the general revenues of the municipal issuer (other than revenues derived from an agreement or arrangement with a person who is not a municipal issuer that provides for or secures repayment of the security); (3) related to a project owned and operated by a municipal issuer; or (4) related to a facility leased to and under the control of an industrial or commercial enterprise that is part of a public project which, as a whole, is owned and under the control of a municipal issuer.[60]

C. Diversification and Quality Standards for Put Providers

A substantial portion of securities held by tax exempt funds are subject to puts and demand features.[61] A "put" is the right to sell a specified underlying security within a specified period of time and at a specified exercise price that may be sold, transferred, or assigned only with the underlying security.[62] A demand feature is a put that may be exercised at specified intervals not exceeding 397 calendar days and upon no more than thirty days' notice.[63] Demand features can serve three different purposes: (1) to shorten the maturity of a variable or floating rate security;[64] (2) to enhance the security's credit quality; and (3) to provide liquidity support for the security. If the demand feature can be exercised on seven days' notice, then the security will be treated as a liquid security under the appropriate guidelines.[65]

Demand features may be conditional or unconditional.[66] Under rule 2a–7, a demand feature used as a substitute for the credit quality of the underlying security must be an "unconditional put," defined to include any guarantee, letter of credit ("LOC") or similar unconditional credit enhancement that by its terms would be readily exercisable in the event of a default in payment of principal or interest on the underlying security.[67] A demand feature that is not an "unconditional put" may serve as the basis for determining whether a security is an eligible security and categorizing it as a first or second tier security; however, the long-term credit quality of the security subject to a conditional demand feature must also be analyzed.[68]

The Commission is adopting several amendments to the provisions of the rule relating to puts and demand features.

1. Put Diversification Standards

Under rule 2a–7, a taxable money fund may not invest more than five percent of its assets in securities subject to conditional puts from, or securities directly issued by, the same institution. The percentage limitation applicable to unconditional puts is ten percent. A tax exempt fund is required to comply with these two requirements with respect to seventy-five percent of its assets; there is no diversification requirement with respect to the remaining twenty-five percent ("twenty-five percent put basket"). The Commission proposed to apply a uniform ten percent limitation on all puts issued by the same institution and to eliminate the twenty-five percent put basket for tax exempt funds.[69]

a. *Uniform Diversification Standards for Conditional and Unconditional Puts.* Under the proposed amendments, a fund could not have invested more than ten percent of its assets in securities subject to conditional and unconditional puts, and securities directly issued by, the same issuer. A fund would have been required to aggregate conditional and unconditional puts issued by the same issuer in applying the ten percent restriction. Most of the commenters who addressed these aspects of the proposal supported the aggregation of conditional and unconditional puts in applying a uniform percentage restriction. Other commenters disagreed, either urging that the ten percent limit be raised or that the rule's put diversification standards continue to distinguish between puts that provide liquidity support (conditional puts) and puts that provide credit support (unconditional puts).

The Commission has decided to adopt the uniform ten percent limitation as proposed, and eliminate the current distinction between conditional and unconditional puts under the rule's put diversification standards.[70] Although there are differences between the risks incurred by the put provider and the nature of the reliance by the investor in each case, the Commission does not believe that these differences are significant enough to warrant continued disparate treatment under the rule. Moreover, aggregating conditional and unconditional puts and applying a single put diversification standard to the aggregate number should simplify compliance with the rule.

b. *The Twenty-Five Percent Put Basket.* The proposed amendments to the rule would have eliminated the twenty-five percent put basket so that a tax exempt fund would have been required to meet the rule's put diversification standards with respect to one hundred percent of its assets. The Commission explained that extensive reliance on a single put provider or a few providers could present considerable risks, particularly for a single state fund which, under the amendments as proposed, would not have been required to be diversified with respect to underlying securities.[71]

Most commenters urged the Commission to retain the twenty-five percent put basket in some form. Many concluded that eliminating the twenty-five percent put basket would increase reliance by funds on less creditworthy put providers and decrease the flexibility currently afforded funds in enhancing the credit quality and liquidity of securities. The commenters disagreed with the Commission's assumption that one probable effect of the elimination of the twenty-five percent put basket would be new entrants to the market as put providers.

A number of commenters suggested that, in light of the Commission's proposal to require that when a fund invests more than five percent of its assets in securities subject to puts from a single put provider, the puts be first tier securities,[72] it would be appropriate to retain the twenty-five percent put basket. The Commission has decided to incorporate this approach in amendments to the rule's put diversification standards.

The amendments provide that the twenty-five percent put basket is available to all money funds for first tier puts, but only if the put is a "put issued by a non-controlled person"—a put issued by a person that does not directly or indirectly control, and is not controlled by or under common control with the issuer of the security subject to the put.[73] The Commission is restricting fund use of the twenty-five percent put basket to non-controlled persons to minimize a fund's concentration of assets in a single economic enterprise.

c. *Issuer-Provided Demand Features.* The put diversification standards under rule 2a–7 apply to "securities issued by or subject to Puts from the institution that issued the Put."[74] In the Proposing Release, the Commission requested comment on the treatment of puts by the issuer of the underlying securities ("issuer-provided demand features").[75] Some commenters asserted that funds should be permitted to exclude issuer-provided demand features from the put diversification requirements because issuer-provided demand features can be viewed as the functional equivalent of short-term securities that are "rolled over" periodically. The commenters also suggested that including issuer-provided demand features as puts in determining compliance with the rule's put diversification standards amounts to "double counting." The Commission agrees and has added language to the rule to clarify that a fund is not required to aggregate an issuer-provided put with the security subject to the put for purpose of determining compliance with the put diversification requirement of the rule.[76]

---

[52] As adopted, the rule exempts from the Second Tier Securities Tests any conduit security subject to an unconditional demand feature issued by a non-controlled person, whether the demand feature is first or second tier. Paragraph (c)(4)(iv)(B) of rule 2a–7, as amended.

[53] Paragraph (c)(4)(vi)(A)(3) of rule 2a–7, as amended.

[54] Paragraph (c)(4)(iv)(B) of rule 2a–7, as amended.

[55] *See infra* Section II.B.2.b. of this Release and paragraph (c)(3)(iii) of rule 2a–7, as amended.

[56] *See* paragraph (c)(4)(vi)(A)(3) of rule 2a–7, as amended. For example, a municipal security issued to finance a private hospital that meets the definition of a conduit security would be considered—for diversification purposes—to have been issued by the hospital, not the municipality.

[57] For example, a governmental unit could issue bonds on behalf of a private firm for the purpose of raising funds to construct facilities for a company, such as a plant or a residential real estate project. The payment of principal or interest on the bonds would be secured through a lease arrangement under which the private firm makes periodic payments to the governmental unit. If these payments were characterized as "revenue," then the bonds issued by the governmental unit would not be treated as conduit securities under the proposed definition.

[58] In the Proposing Release, the Commission asked commenters whether the rule's definition of a conduit security should reference the provisions of the Internal Revenue Code ("IRC") governing the treatment of private activity bonds, IRC sections 141–174 [26 U.S.C. 141–147]. Most commenters discussing the definition of a conduit security strongly opposed this approach, generally observing that it would have the effect of treating certain general obligation bonds, and bonds issued to finance property owned by a governmental unit, as conduit securities that are subject to the Second Tier Securities Tests, which would be inconsistent with the Commission's objective of subjecting only obligations of non-governmental issuers to the Second Tier Securities Tests. The Commission has decided not to reference the IRC's private activity bond rules in defining the term "conduit security."

[59] Paragraph (a)(6) of rule 2a–7, as amended. The rule amendments, as adopted, define the term "municipal issuer" to mean a state or territory of the United States, or any political subdivision or instrumentality thereof. The term "state" is defined in the 1940 Act to mean any state, the District of Columbia, Puerto Rico, the Virgin Islands, or any other possession of the United States [15 U.S.C. 80a–2(a)(39)].

[60] Paragraph (a)(6) of rule 2a–7, as amended.

[61] Proposing Release, *supra* note 20, at Section I.B.

[62] Paragraph (a)(16) of rule 2a–7, as amended.

[63] Paragraph (a)(7) of rule 2a–7, as amended.

[64] Paragraphs (d)(3) and (d)(5) of rule 2a–7, as amended. Initially, rule 2a–7 provided that only demand features that ran to the issuer of the security could be used to shorten maturities. *See* Release 13380, *supra* note 7, at n.9. This was changed by the amendments to rule 2a–7 adopted in 1986. Investment Company Act Rel. No. 14983 (Mar. 12, 1986) [51 FR 9773 (Mar. 21, 1986)] ("Release 14983").

[65] A money fund is limited to investing no more than ten percent of its assets in illiquid securities. *See* Release 13380, *supra* note 7, at nn.37–38 and accompanying text. *See also* Investment Company Institute (pub. avail. Dec. 9, 1992). The Division of Investment Management has provided guidance concerning the implementation of three business days as the standard settlement period for trades effected by brokers and dealers, and a fund's determination of whether securities it holds should be deemed liquid for purposes of complying with the ten percent restriction. Letter from Jack W. Murphy, Associate Director and Chief Counsel, Division of Investment Management, to Paul Schott Stevens, General Counsel, Investment Company Institute (May 26, 1995) ("T+3 Letter").

[66] Both conditional and unconditional puts may operate as demand features to shorten the maturities of adjustable rate securities. As discussed in Section II.C.3. of this Release, *infra*, amendments to rule 2a–7 limit the types of conditions to which exercise of a demand feature can be subject. Paragraph (c)(3)(iii)(B) of rule 2a–7, as amended.

[67] Paragraph (a)(27) of rule 2a–7, as amended.

[68] Paragraph (c)(3)(iii)(B) of rule 2a–7, as amended.

[69] *See* Proposing Release, *supra* note 20, at Section II.C.2.

[70] Paragraph (c)(4)(v)(B) of rule 2a–7, as amended.

[71] Proposing Release, *supra* note 20, at Section II.C.2.b.

[72] *See infra* Section II.C.2.b. of this Release.

[73] Paragraphs (a)(17) (definition of "put issued by a non-controlled person") and (c)(4)(v) of rule 2a–7, as amended. The Commission is adopting amendments that limit fund investment in puts that are second tier securities to five percent of fund assets. *See infra* Section II.C.2.b. of this Release and paragraph (c)(4)(v)(B) of rule 2a–7, as amended. Further, a fund that has invested more than ten percent of its assets in securities subject to puts and in securities directly issued by a single issuer must count the total amount invested towards the twenty-five percent undiversified put basket. In other words, a fund may not use all or a portion of its twenty-five percent put basket and an additional amount of its diversified assets to invest more than twenty-five percent of its assets in a single issuer. *See supra*, note 30.

[74] Paragraph (c)(4)(v)(A) of rule 2a–7, as amended.

[75] *See* Proposing Release, *supra* note 20, at Section II.C.2.d.(3). The Commission noted that rule 2a–7, as originally adopted, provided that only issuer-provided demand features could be used to shorten the maturity of a security. *See* Release 13380, *supra* note 7, at n.10 and accompanying text.

[76] Paragraph (c)(4)(vi)(B)(*1*) of rule 2a–7, as amended. Under this paragraph, a put issued by the same institution that issued the underlying security

Continued

d. *Multiple Puts and Guarantees.* The proposed amendments would have amended rule 2a–7's put diversification standards to address how put diversification calculations should be made when a security is subject to several puts ("multiple puts"). Under the proposed amendments, different calculation methods would have been applied when: (i) each multiple put provider had contractually agreed to guarantee only a portion of the total principal value of the underlying security ("fractional puts"), and (ii) each multiple put provider had an obligation that was not limited contractually ("layered puts"). The proposed amendments would have clarified that an institution that provides a fractional put would be treated as guaranteeing only that portion of the principal value of the security that it contractually agreed to provide.[77] An institution providing a layered put would have been deemed to cover the entire principal amount of the security, notwithstanding that the security is subject to puts from other institutions.

Most commenters who discussed these issues supported the proposed treatment of fractional puts. These commenters stated that it was appropriate to allocate exposure among put providers for diversification purposes in accordance with the put providers' contractual obligations. The Commission has decided to adopt these amendments to the rule as proposed.[78]

Most commenters opposed treating each put provider in a layered put structure as the guarantor of the entire amount guaranteed because, they argued, the approach ignored the fact that the fund may be relying only on the guarantee of one of the put providers. The Commission has decided to adopt amendments to the rule that reflect these comments. For a security subject to layered puts, the rule permits a fund that is not relying on a particular put for satisfaction of the rule's credit quality[79] or maturity standards,[80] or for liquidity, to exclude that put when determining its compliance with the rule's put diversification standards.[81] The fund must document this determination in its records.[82]

In the context of describing the proposed amendments regarding treatment of multiple puts under the rule's diversification standards, the Commission indicated that bond insurance was a type of put under rule 2a–7.[83] A number of commenters disagreed with this analysis of bond insurance, arguing that bond insurance does not provide liquidity and is not viewed by the market as a substitute for the credit of the underlying issuer. Because bond insurance guarantees the timely payment of principal and interest by the insured issuer,[84] it meets the rule's definition of an unconditional put, permitting credit substitution in the eligibility determination. The Commission has amended the rule to clarify this matter.[85]

The Commission recognizes, however, that bond insurance may not be relied upon by a fund when determining a security's eligibility under the rule. One commenter argued that, in the case of a security subject to a guarantee, such as bond insurance, and a demand feature, the fund is very likely to look only to the issuer of the demand feature if it needs to sell the security and thus, as a practical matter, to the issuer of the demand feature for credit support. Therefore, this commenter concluded, the guarantee should not be counted for purposes of rule 2a–7's diversification requirements. The Commission agrees, and has amended the rule to permit a fund holding a security subject to a put (including bond insurance) and an unconditional demand feature to count only the demand feature for purposes of the put diversification calculation.[86] A fund relying on this provision of the rule is not required to maintain contemporaneous records of its determination that the fund is not relying on the guarantee to determine credit quality.

2. Quality Standards

a. *Rating Requirement for Demand Features.* The proposed amendments to the rule would have limited funds to investing in demand features (other than standby commitments) that are rated, or provided by institutions that are rated, by NRSROs. Most commenters discussing this issue opposed the proposed rating requirement for demand features and suggested that the rule should permit a fund to purchase a security subject to an unrated demand feature if it can make a comparability determination similar to the determination permitted under the rule in connection with the purchase of unrated securities.[87] Other commenters asserted that the fund manager's obligation under the rule to determine that all portfolio securities present minimal credit risk obviated the need for the proposed rating requirement.[88]

The Commission explained in the Proposing Release that NRSRO ratings assigned to demand features or the issuer of demand features may provide additional protection by ensuring input into the minimal credit risk determination by an outside source. This extra source of protection may be particularly important in light of the

would not be subject to the rule's put diversification requirements, and would be subject only to the rule's issuer diversification requirements. For example, a security representing four percent of a fund's total assets that had an issuer-provided demand feature would be treated as a four percent position in "securities issued by or subject to Puts from the institution that issued the Put," not eight percent [quoting paragraph (c)(4)(iv)(A) of rule 2a–7, as amended].

[77] For example, if two banks issued puts on the same VRDN and each agreed to absorb fifty percent of the losses, then each would be deemed to guarantee no more than fifty percent of the VRDN under the rule's put diversification standards.

[78] Paragraph (c)(4)(vi)(B)(*2*) of rule 2a–7, as amended.

[79] Under the rule, a fund holding a security that is subject to an unconditional demand feature may satisfy the rule's credit quality standards with respect to the underlying security based solely on the short-term rating of the demand feature provider. Paragraph (c)(3)(ii) of rule 2a–7, as amended.

[80] Rule 2a–7 generally permits a fund to measure the maturity of an adjustable rate security subject to a demand feature by reference to the date on which principal can be recovered through demand. *See infra* Sections II.F.1. and II.F.2. of this Release and paragraphs (d)(3) and (d)(5) of rule 2a–7, as amended.

[81] Paragraph (c)(4)(vi)(B)(*4*) of rule 2a–7, as amended. This paragraph of the rule also permits a fund holding a security subject to a single put that it is not relying on to satisfy the rule's credit quality or maturity standards, or for liquidity, to disregard that put in determining its compliance with the rule's put diversification standards. If a fund is relying on separate puts for each of these purposes (*e.g.*, a conditional demand feature for purposes of liquidity and maturity, and an unconditional put for purposes of credit quality), then each put would have to satisfy the rule's put diversification standards.

[82] Paragraphs (c)(8)(ii) and (c)(9)(vi) of rule 2a–7, as amended. A fund would document this determination when it acquires the security. The fund may subsequently determine that it is or is not relying on a particular put, but must reflect the change in its written records.

[83] Proposing Release, *supra* note 20, at note 81.

[84] Eli Nathans, *Municipal Bond Insurance—The Economics of the Market*, 13 Mun. Fin. J., No.2 (Summer 1992) 1, 2.

[85] Paragraph (a)(27) of rule 2a–7, as amended. A bond insurance policy that permits the holder of the security to receive all principal and interest payments at the time of the default of the insured obligation would also be an unconditional demand feature. By contrast, a policy under which the fund would only receive periodic payments of principal and interest as those payments came due under the terms of the insured obligation would be an unconditional put, but not an unconditional demand feature.

[86] Paragraph (c)(4)(vi)(B)(*3*) of rule 2a–7, as amended.

[87] Paragraph (a)(9)(iii) of rule 2a–7, as amended, permits a fund to treat an unrated security as an eligible security if the fund's board of directors determines that the unrated security is of comparable quality to a rated security.

[88] Paragraph (c)(3) of rule 2a–7, as amended, limits fund investment to securities that its "board of directors determines present minimal credit risks." This determination must be based on factors pertaining to credit quality "in addition to any rating assigned to such securities by an NRSRO" (emphasis added).

Commission's decision to preserve the twenty-five percent diversification basket for put providers, and to eliminate the applicability of rule 2a–7's diversification requirements to securities subject to certain unconditional demand features.[89] In addition, funds may have limited ability to monitor the credit quality of some demand feature providers, such as foreign banks.[90] The Commission is adopting the rating requirement for demand features as proposed.[91]

b. *Providers of Puts in Excess of Five Percent of Fund Assets.* The proposed amendments would have prohibited a money fund from investing more than five percent of its assets in securities subject to a put from a single put provider that is not a first tier put. Compliance with this provision would be measured at the time the put was acquired by the fund. All the commenters discussing this aspect of the proposal agreed that it is appropriate to limit fund investment in puts that are not first tier securities ("second tier puts"), and the Commission is adopting the limit as proposed.[92]

If more than five percent of a fund's assets were subject to a demand feature from a single institution that was no longer a first tier put, the proposed amendments also would have required the fund to reduce the amount of the securities subject to the demand feature to not more than five percent of the fund's assets by exercising the demand feature at the next succeeding exercise date. Most commenters were critical of this proposed requirement and suggested that it might be in the best interests of fund shareholders for the fund either to retain the securities subject to the demand features or dispose of the securities in an orderly manner. Because there may be some circumstances during which it may be in the best interest of the fund to continue to hold the securities subject to the put, the Commission is adopting the amendment with the express provision that a fund's board of directors may determine that disposal of the securities is not in the best interest of the fund, and determine to permit the fund to continue to hold the securities.[93]

c. *Certain Unrated Securities.* Rule 2a–7 currently provides that an unrated security that, when issued, was a long-term security but when purchased by the fund has a remaining maturity of less than 397 calendar days may be considered to be an eligible security based on whether the security is comparable in quality to a rated security, unless the security has received a long-term rating from any NRSRO that is not within the two highest categories of long-term ratings. Under this provision, a long-term rating from an NRSRO below the top two rating categories results in the security becoming ineligible for investment by a money market fund. One commenter stated that, because many issuers with long-term ratings in the third highest ratings categories have first tier short-term ratings, the rule was unnecessarily restrictive. The Commission agrees, and has expanded this provision to accommodate long-term ratings within the top three ratings categories.[94] Funds will continue to be required to determine that such a security is of "comparable quality" to rated eligible securities.[95]

3. Conditional Demand Features

Rule 2a–7 does not currently restrict the types of conditions to which a demand feature may be subject. The inability of a fund to exercise a demand feature because of the occurrence of a condition precluding exercise would likely result in violations of the maturity limitations of rule 2a–7, the liquidity requirements of the 1940 Act,[96] and a loss of value of the underlying security, when, for example, a short-term security paying interest at short-term rates is transformed into a long-term security. Therefore, the proposed amendments would have limited the permissible conditions with respect to conditional puts to the following: (1) default in the payment of principal or interest on the underlying security; (2) the bankruptcy, insolvency, or receivership of the issuer or a guarantor of the underlying security; (3) the downgrading of either the underlying security or a guarantor by more than two full rating categories; and (4) in the case of a tax exempt security, a determination by the Internal Revenue Service of taxability with respect to the interest on the security.[97] These conditions were designed to permit the fund to monitor the continued availability of a demand feature and to take steps to sell the security or replace the demand feature if it appears that conditions are likely to occur that would limit the ability of the fund to exercise the demand feature.[98]

Many commenters objected to the proposed definition of the term "conditional put." These commenters stated that the current market has few, if any, variable rate demand notes ("VRDNs") with conditional puts that would satisfy the proposed definition. Even the commenters who recommended the proposed conditions conceded that although most put providers have conditions similar to those included in the proposed amendments, every provider uses somewhat different, often broader, language.[99] As a result, modifying the scope of one or more of the four conditions would not address this concern.

The Commission has decided to adopt an alternative approach suggested by several commenters by revising the rule to provide general guidance concerning the types of conditions that are appropriate for money fund investment. Rule 2a–7, as amended, provides that a security subject to a conditional demand feature is an eligible security only if the fund's board of directors (or its delegate) determines that there is "minimal risk" of occurrence of the conditions that

[89] *See supra* Section II.B.1.b. of this Release.

[90] Proposing Release, *supra* note 20, at Section II.C.2.d.(*2*).

[91] Paragraph (a)(9)(iii)(D)(*1*) of rule 2a–7, as amended. The amendments remove from the definition of eligible security unrated securities that are subject to demand features. Thus, in order for a security subject to a demand feature to be eligible for fund investment, the demand feature must be rated.

[92] Paragraph (c)(4)(v)(B) of rule 2a–7, as amended.

[93] Paragraph (c)(5)(i)(C) of rule 2a–7, as amended. This determination may not be delegated. Paragraph (e) of rule 2a–7, as amended. If the demand feature is no longer an eligible security, paragraph (c)(5)(ii) of rule 2a–7 requires the fund to obtain a new demand feature or dispose of the underlying security (unless the board of directors finds that it would be in the best interest of the fund not to dispose of the security). *See* Release 18005, *supra* note 11 at Section II.E.1. for a discussion of securities held by a money fund that are in default, are no longer eligible securities, or no longer present minimal credit risks.

[94] Paragraph (a)(9)(iii)(B) of rule 2a–7, as amended.

[95] Paragraph (a)(9)(iii) of rule 2a–7, as amended.

[96] The money fund could lose liquidity at a time when it is most necessary. A money fund is limited to investing no more than ten percent of its assets in illiquid securities. *See supra* note 65 and accompanying text and *infra* Section II.C.4.c. of this Release.

[97] The proposed amendments to the rule incorporated recommendations of Fidelity Management & Research Company ("Fidelity") and the Investment Company Institute ("ICI"). *See* Letter from Matthew Fink, Senior Vice President and General Counsel, ICI, to Marianne Smythe, Director, Division of Investment Management (Mar. 25, 1991); Letter from Thomas D. Berman, Deputy Office Chief, Office of Disclosure and Investment Adviser Regulation, Division of Investment Management, U.S. Securities and Exchange Commission (June 17, 1994); Letter from Paul Schott Stevens, General Counsel, ICI, to Jonathan G. Katz, Secretary, U.S. Securities and Exchange Commission (May 5, 1994), in File No. S7–34–93.

would result in the demand feature not being exercisable.[100] The fund's board of directors (or its delegate) also must determine that: (1) the conditions limiting exercise can be monitored readily by the fund, or relate to the taxability, under federal, state or local law, of the interest payments on the security; or (2) the terms of the demand feature require that the fund receive notice of the occurrence of the condition and the opportunity to exercise the demand feature.[101]

Rule 2a–7 currently provides that a security subject to a conditional demand feature ("underlying security") is an eligible security only if the demand feature is an eligible security and the underlying security has received a long-term rating from the Requisite NRSROs in one of the two highest long-term ratings categories or, if unrated, is determined to be of comparable quality. The rule thus assumes securities subject to conditional demand features are always long-term securities. The Commission is amending rule 2a–7 to provide that, in the case of an underlying security that has a remaining maturity of 397 days or less, the underlying security is an eligible security only if the demand feature is an eligible security and the underlying security has received a short-term rating from the requisite NRSROs in one of the two highest short-term ratings categories or, if unrated, is determined to be of comparable quality.[102]

4. Other Issues Applicable to Put Providers

a. *Accrued Interest.* The Commission proposed amendments to the definition of the term "put" and also requested comment whether additional amendments to the rule were necessary to restrict fund investment to certain types of credit and liquidity enhancements. The proposed amendments would have amended the definition of a "put" to specify that the put must enable the holder to receive not only the amortized cost of the securities, but also accrued interest. The Commission is adopting these amendments as proposed.[103]

b. *Notice of Substitution of Put Provider.* The Commission stated in the Proposing Release that it is aware of several instances in which a money fund had invested in a security backed by a LOC or other credit or liquidity enhancement that was replaced during the life of the underlying security without notice to the fund.[104] A fund must know the identity of the put provider for a number of reasons, which include a determination of whether the fund is in compliance with the rule's put diversification and credit quality provisions. The Proposing Release asked commenters to consider whether the rule should be amended to limit fund investment in puts that obligate the issuer of the underlying security (or the trustee under any applicable indenture) to inform investors of the substitution of the put provider. All the commenters responding to this question agreed with the Commission that it is essential for the control of credit risk and for compliance with the rule that funds be aware of the identity of their put providers at all times, and that rule amendments would be appropriate.[105]

The Commission is adopting amendments to address these concerns. Under the amendments, a security subject to a demand feature is not eligible for fund investment unless arrangements are in place to notify the fund holding the security in the event that there is a change in the identity of the issuer of a demand feature.[106]

c. *Liquidity Requirements for Money Funds and the Three Business Day Settlement Cycle.* Section 22(e) of the 1940 Act provides, with certain exceptions, that no registered investment company may postpone the date of payment upon redemption of a redeemable security for more than seven days after the security is tendered for redemption. The Commission has stated that all mutual funds should limit their holdings of illiquid securities to ensure that they can satisfy all redemption requests within the seven day period. The Commission considers a security to be illiquid if it cannot be disposed of within seven days in the ordinary course of business at approximately the price at which the fund has valued it.[107] The limit on money fund holdings of illiquid securities is ten percent of fund assets.[108]

Rule 15c6–1 under the Securities Exchange Act of 1934, which recently became effective, established three business days ("T+3") as the standard settlement period for securities trades effected by a broker or dealer.[109] The Division of Investment Management provided advice regarding the implications of the T+3 standard in determining whether a security held by a fund should be deemed liquid for purposes of the restrictions described above.[110] This issue is significant for money funds, because a large percentage of money fund assets consist of securities with a seven day demand feature.[111]

The Division noted that, because rule 15c6–1 applies to brokers and dealers and does not apply directly to funds, its implementation does not change the standard for determining liquidity, which is based on the requirements of section 22(e) of the 1940 Act. As a practical matter, however, many funds (including money funds) will have to meet redemption requests within three days because a broker or dealer will be involved in the redemption process. Many of these funds hold portfolio securities that do not settle within three days. In light of the T+3 standard, the Division recommended that funds should assess the mix of their portfolio holdings to determine whether, under normal circumstances, they will be able to facilitate compliance with the T+3 standard by brokers or dealers. Factors the funds should consider include the percentage of the portfolio that would settle in three days or less, the level of cash reserves, and the availability of lines of credit or interfund lending facilities. The Commission shares the Division's concerns and urges money funds to monitor carefully their liquidity needs in light of the shorter settlement period.

5. Short-Term Ratings

Rule 2a–7 currently distinguishes between short-term and long-term securities based on whether the security has a remaining maturity of 366 days—primarily for the purpose of distinguishing between securities that have short-term and long-term ratings. NRSROs do not always draw such a line when assigning ratings.[112] Therefore, the Commission has revised the rule to replace references to "short-term securities" and "long-term securities" in various sections of the rule with references to securities that have received short-term and long-term ratings from a NRSRO.[113] Whether a security has received a long- or a short-term rating from a NRSRO will depend upon how the NRSRO has characterized its rating.

D. Other Diversification and Quality Standards

1. Repurchase Agreements

Rule 2a–7 allows a fund to "look through" a repurchase agreement ("repo") to the underlying collateral for diversification purposes when the obligation of the counterparty is "collateralized fully."[114] Under the current rule, a repo is collateralized fully if, among other things, the collateral consists entirely of Government securities or securities that, at the time the repo is entered into, are rated in the highest rating category by the requisite NRSROs.[115] The Commission is adopting, as proposed, amendments to permit a fund to treat the repo as collateralized fully only if it is collateralized by securities that would qualify the repo for preferential treatment under the Federal Deposit Insurance Act[116] or the Federal Bankruptcy Code.[117] The Proposing Release noted that if the collateral does not qualify for special treatment under either of these statutes, a fund could encounter significant liquidity problems if a large percentage of its assets were invested in a repo with a bankrupt counterparty.[118] Although some commenters argued that the rule should encompass types of collateral that fall outside the repo specific provisions of the Bankruptcy Code, the Commission believes that the "look through" provisions of the rule would be inappropriate in these circumstances because the credit and liquidity risks assumed by the fund would be tied directly to the counterparty rather than the issuers of the underlying collateral.[119]

2. Pre-Refunded Bonds

The Proposing Release noted that a significant portion of tax exempt fund assets consist of pre-refunded bonds—bonds the payment of which are funded by and secured by escrowed Government securities.[120] The proposed amendments to the rule would have allowed funds to "look through" the pre-refunded bonds to the escrowed securities for diversification purposes if the underlying securities are Government securities and the escrow arrangement satisfies certain conditions designed to assure that the bankruptcy of the issuer of the pre-refunded bonds would not affect payments on the bonds from the escrow account. The proposed amendments would have limited fund investment in pre-refunded bonds issued by the same issuer to twenty-five percent of its assets. Because these securities would, in effect, be treated as Government securities, they would not be subject to a diversification limitation.

Most commenters supported the proposed treatment of pre-refunded bonds. A few of these commenters suggested that the twenty-five percent limitation per issuer was not necessary since the issuer's credit typically does not secure such bonds.[121] The Commission agrees, and has eliminated this limitation.[122] The Commission has decided to make additional technical modifications to the conditions applicable to the escrow arrangements that were suggested by the commenters.[123] The Commission is also amending the rule to include within the definition of an "unrated security" a rated security that subsequently was made subject to a refunding agreement.[124] This amendment clarifies that a fund must disregard ratings given to a security before the security became a "refunded security" (as that term is defined in the rule) in determining whether the security is an eligible security (as that term is also defined in the rule).

[108] Release 14983, *supra* note 64 at Section A.4.; Investment Company Institute (pub. avail. Dec. 9, 1992).

[109] Rule 15c6–1 [17 CFR 240.15c6–1] generally provides that "a broker or dealer shall not effect or enter into a contract for the purchase or sale of a security (other than an exempted security, government security, municipal security, commercial paper, bankers' acceptances, or commercial bills) that provides for payment of funds and delivery of securities later than the third business day after the date of the contract unless otherwise expressly agreed to by the parties at the time of the transaction." Securities Exchange Act Rel. No. 33023 (Oct. 6, 1993) [58 FR 52891 (Oct. 13, 1993)].

[110] *See* T+3 Letter, *supra* note 65.

[111] *Id.*

[112] *See, e.g.*, Fitch Ratings Book (May 1995) (short-term ratings apply to debt payable on demand or to securities with original maturities of up to three years), and Orrick, Herrington & Sutcliffe (pub. avail. July 20, 1994) (synthetic warrants maturing in twenty-two months given short-term ratings by NRSROs).

[113] Paragraphs (a)(9) (definition of "eligible security"), (a)(11) (definition of "first tier security"), (a)(29) (definition of "unrated security"), and (c)(3)(iii)(C) (requirements for security subject to conditional demand feature) of rule 2a–7, as amended. In addition, the Commission has eliminated the definitions of "short-term" and "long-term" from the rule.

[114] Paragraph (c)(4)(vi)(A)(*1*) of rule 2a–7, as amended. A money fund investing in a repurchase agreement that does not meet the requirements of this paragraph may not "look through" and must instead treat the counterparty to the agreement as the issuer.

[115] *See* Proposing Release, *supra* note 20, at Section II.D.3.

[116] *See also* 12 U.S.C. 1821(e)(8) (A) and (C) (affording preferential treatment to "qualified financial contracts"), 12 U.S.C. 1821(e)(8)(D)(i) (defining qualified financial contract to include repurchase agreements) and 12 U.S.C. 1821(e)(8)(D)(v) (defining repurchase agreement).

Not all collateral that would qualify a repo for preferential treatment under the Federal Deposit Insurance Act would be permitted. Of the mortgage-related securities referred to in 12 U.S.C. 1821(e)(8)(D)(c), only "mortgage related securit[ies]" as defined in Section 3(a)(41) of the 1934 Act [15 U.S.C. 78c(a)(41)] would be permitted.

See sections 101(47) of the Federal Bankruptcy Code ("Bankruptcy Code") (defining "repurchase agreement"), and 559 (protecting repo participants from the Bankruptcy Code's automatic stay provisions) [11 U.S.C. 101(47), 559]. The Bankruptcy Code defines a repurchase agreement as follows:

An agreement, including related terms which provides for the transfer of certificates of deposit, eligible bankers' acceptances, or securities that are direct obligations of, or that are fully guaranteed as to principal and interest by, the United States or any agency of the United States against the transfer of funds by the transferee of such certificates of deposit, eligible bankers' acceptances, or securities with a simultaneous agreement by such transferee to transfer to the transferor thereof certificates of deposit, eligible bankers' acceptances, or securities as described above, at a date certain no later than one year after such transfer or on demand, against the transfer of funds.

[117] Paragraph (a)(4) of rule 2a–7, as amended. Depository institutions are not eligible for protection under the Bankruptcy Code. Section 109 of the Bankruptcy Code [11 U.S.C. 109]. Instead, the bank regulatory laws provide for the establishment of conservatorship and receiverships of depository institutions in default. *See, e.g.*, section 11 of the Federal Deposit Insurance Act [12 U.S.C. 1821].

[118] Proposing Release, *supra* note 20, at n. 172.

[119] *Id.*

[120] *Id.*

[121] The twenty-five percent limitation was a condition specified in a "no-action" position taken by the Division of Investment Management in T. Rowe Price Tax-Free Funds (pub. avail. June 24, 1993) regarding the treatment of these securities for purposes of section 5(b)(1) of the 1940 Act. *See* Proposing Release, *supra* note 20, at n. 38 and accompanying text.

[122] The Commission is also eliminating the limitation for funds other than money funds that otherwise rely on the staff no-action position set forth in T. Rowe Price Tax-Free Funds.

[123] Paragraphs (a)(18) and (c)(4)(vi)(A)(*2*) of rule 2a–7, as amended. The proposed amendments would have permitted a fund to "look through" the pre-refunded bonds to the escrowed securities for diversification purposes if: (1) the escrowed securities were Government securities; (2) the escrowed securities were pledged only with respect to the payment of principal, interest and premiums on the pre-refunded bonds; and (3) either an independent certified public accountant or a NRSRO certified that the escrowed securities would satisfy all scheduled payments of principal, interest and premiums on the pre-refunded bonds. Commenters urged the Commission to clarify condition (2) by stating that excess proceeds could be remitted to the issuer or a third party. Commenters also noted that NRSROs rarely provide the certification described in condition (3), and requested that the reference to a NRSRO be deleted from the text. The rule reflects these comments; only independent certified public accountants may provide the certification.

[124] Paragraph (a)(29)(iii) of rule 2a–7, as amended. If the security has a NRSRO rating that does reflect the existence of the refunding agreement, then the security would not be considered unrated. *Id.*

3. Diversification Safe Harbor

A money fund that elects to be diversified must comply with the requirements of section 5(b)(1) of the 1940 Act and the rules under that section.[125] These requirements are applicable to most taxable and many tax exempt money funds, since most elect to be diversified. Although rule 2a–7's diversification requirements are more strict, under certain circumstances a money fund may be in compliance with rule 2a–7, but not in compliance with section 5(b)(1).[126] The proposed amendments would have provided that money funds complying with rule 2a–7's diversification requirements are deemed to be diversified under section 5(b)(1) ("diversification safe harbor"). Commenters discussing this aspect of the proposal supported the diversification safe harbor, and the Commission is adopting the amendments as proposed.[127]

4. Three-Day Safe Harbor

Rule 2a–7 currently permits a fund to invest more than five percent of its assets in the first tier securities of a single issuer for up to three business days (the "three-day safe harbor") and does not contain any limitation on the percentage of fund assets that can be invested in accordance with this provision. Since the provision is primarily applicable to taxable funds, which typically are diversified companies within the meaning of section 5(b)(1), funds could not use this provision to invest more than twenty-five percent of their assets in the securities of a single issuer. The Commission proposed to extend the availability of the three-day safe harbor to national funds. To assure that the three-day safe harbor could not have the effect of allowing funds that are not diversified to invest an inordinate portion of their assets in a single issuer at any time, the proposed amendments would have limited to twenty-five percent the percentage of fund assets that may be invested under the safe harbor at any one time. The Commission is adopting this amendment substantially as proposed.[128]

E. Asset Backed Securities and Synthetic Securities

1. Background

The proposed amendments would have amended rule 2a–7 to clarify the application of the rule to "synthetic" tax exempt securities and ABSs. Both types of securities rely on demand features and complex liquidity arrangements that are designed to meet the risk-limiting conditions of the rule.

An ABS represents an interest in a pool of financial assets, such as credit card or automobile loan receivables. Typically, an ABS is sponsored by a bank or other financial institution to pool financial assets and convert them into capital market instruments, thereby enabling the sponsor to transform illiquid assets into cash and increase balance sheet liquidity.[129] The ABS is structured to assure that the issuer of the ABS will not be affected by the bankruptcy of the sponsor. In addition, the structure of the ABS affects the nature and amount of the credit enhancement. While structural issues affect the risks associated with many types of securities, they are particularly important in evaluating ABSs.[130]

Synthetic securities are another form of ABSs that have been developed to address the shortage in the supply of short-term tax exempt securities.[131] While a variety of synthetic structures exist, all involve trusts and partnerships that, in effect, convert long-term fixed-rate bonds into variable or floating rate demand securities. Typically, one or two long-term, high quality, fixed-rate bonds of a single state or municipal issuer (the "core securities") are deposited in a trust by the sponsor. Interests in the trust may be distributed through an offering of securities to the public registered under the 1933 Act, or through an offering exempt from the Act's registration requirements, such as a "private placement." Holders of interests in the trust receive interest at the current short-term market rate and the sponsor receives the difference (after administrative expenses) between the current market interest rate and the long-term rate paid by the core securities. An affiliate of the sponsor or a third party (usually a bank) issues a conditional demand feature permitting holders to recover principal at par within a specified period. The demand features are conditional to address tax-related concerns.

The proposed amendments to the rule would have established specific criteria for fund investment in ABSs, and would have addressed issues concerning the diversification, maturity and quality standards applicable to these types of securities. Most commenters argued that it was not necessary to amend the rule in order to provide for the treatment of ABSs because the diversification, quality, and maturity standards applicable to ABSs could be addressed within the existing framework of the rule. Questions were raised, however, concerning the applicability of the rule to ABSs both prior to and after the publication of the Proposing Release,[132] and commenters presented widely divergent and, sometimes, conflicting views on how ABSs should be treated. The Commission therefore has concluded that amendments are necessary to reduce uncertainty concerning the application of the rule to these securities.

2. Definitions

The Commission is adopting, substantially as proposed, certain definitions used in the rule. The term "asset backed security" is defined as a fixed-income security issued by a "special purpose entity," substantially all the assets of which consist of

[125] *See supra* note 30; Proposing Release, *supra* note 20, at n. 29 and accompanying text.

[126] One difference that may cause this to occur is the timing of the measurement of diversification. Compliance with section 5(b)(1) of the 1940 Act is measured at the time of a purchase based on the value of the fund's total assets as of the end of the preceding fiscal quarter. *See* rule 5b–1 [17 CFR 270.5b–1]). For purposes of rule 2a–7, both the fund's total assets (as defined in the rule) and compliance with the rule's diversification requirements are measured at the time a purchase is made. *See* paragraph (c)(4)(i) of rule 2a–7, as amended.

[127] Paragraph (c)(4)(vii) of rule 2a–7, as amended.

[128] Paragraph (c)(4)(iii) of rule 2a–7, as amended. Because single state funds are required to be diversified only as to seventy-five percent of their assets, they have available a twenty-five percent basket to accommodate purchases in excess of five percent. Paragraph (c)(4)(i) of rule 2a–7, as amended. As a result, the three-day safe harbor of paragraph (c)(4)(ii) of the amended rule is not extended to them.

[129] For a detailed discussion of ABSs, *see* U.S. Securities and Exchange Commission Division of Investment Management, *Protecting Investors: A Half Century of Investment Company Regulation*, May 1992, at 1–103 and Investment Company Act Rel. No. 18736 (May 29, 1992) [57 FR 23980 (June 5, 1992)] and Investment Company Act Rel. No. 19105 (Nov. 19, 1992) [57 FR 56248 (Nov. 27, 1992)] respectively proposing and adopting rule 3a–7 under the 1940 Act [17 CFR 270.3a–7], the rule excluding the issuers of certain ABSs from the definition of investment company.

[130] While the structure of ABSs vary, the ABSs that have been marketed to money funds have generally involved: (i) the trust, which issues the ABSs; (ii) the sponsor, which contributes the assets to the trust; (iii) the servicer, which is responsible for administering the assets in the pool; (iv) the trustee, which monitors the activities of the servicer, and (v) the bank, which provides some form of liquidity and/or credit enhancement to assure that the trust will have sufficient funds to meet interest and amortization payments in the event that cash flow from the underlying assets is insufficient to meet the payment schedule of the ABSs.

[131] *See, e.g.*, Peter Heap, "Inside Derivatives Price and Demand Are Guide in Building Secondary Market Derivatives," *Bond Buyer*, Mar. 14, 1995 at 4; "Portfolio Manager Paints Derivatives with a Broad Brush," *The Guarantor*, Oct. 10, 1994 at 3.

[132] *See, e.g.*, Donaldson, Lufkin & Jenrette Securities Corporation (pub. avail. Sept. 23, 1994); Orrick, Herrington & Sutcliffe (pub. avail. July 27, 1994).

"qualifying assets."[133] The term "special purpose entity" is defined as a trust, corporation, partnership or other entity organized for the sole purpose of issuing fixed-income securities, which securities entitle their holders to receive payments that depend primarily on the cash flow from qualifying assets.[134] Finally, the term "qualifying assets" is defined as financial assets, either fixed or revolving, that by their terms convert to cash within a finite time period, plus any rights or other assets designed to assure the servicing or timely distribution of proceeds to security holders.[135]

3. Diversification Standards

a. *Diversification: General.* The proposed diversification standards would have distinguished between qualifying assets that consist of the securities of ten or fewer issuers, and qualifying assets that consist of the securities of more than ten issuers. In the case of qualifying assets that consist of securities issued by ten or fewer issuers (*e.g.*, most tax exempt tender option bond structures),[136] the issuer of each core security would have been treated as the issuer for issuer diversification purposes. The sponsor of the ABS would have been treated as the issuer when the ten issuer limit was exceeded.

(1) *Special Purpose Entity as Issuer.* In proposing to treat the sponsor of the special purpose entity as the issuer of the ABS, the Commission assumed that the credit quality of the ABS reflects the asset origination practices of the sponsor.[137] While some commenters agreed with the Commission's analysis, most commenters addressing the subject strongly opposed treating the sponsor of the ABS as the issuer for diversification purposes. They argued that the special purpose entity is protected in the event of the sponsor's bankruptcy so that an investment in an ABS does not reflect the credit risks associated with an investment in the sponsor. The commenters pointed out that the NRSRO ratings assigned to ABSs are premised on the integrity of the structure of the special purpose entity. These commenters urged that the rule treat the special purpose entity as the issuer of the ABS. Commenters also pointed out that the proposed treatment of the sponsor as the issuer of the ABS was inconsistent with the approach of the Commission elsewhere in the securities laws.[138]

The Commission has decided to modify the proposal to conform with its treatment of the special purpose entity as the sponsor of the ABS in other contexts. The diversification standards adopted treat the special purpose entity as the issuer of the ABS, subject to the exception described below.[139]

(2) *Looking through the Special Purpose Entity.* Several commenters agreed that in some circumstances it would be appropriate to "look through" the special purpose entity and treat the obligor of the qualifying assets as the issuer of a portion of the ABS. These commenters asserted that whether to look through the special purpose entity should not turn on the number of qualifying assets, as the Commission proposed, but the extent to which the special purpose entity is concentrated in the assets of a single obligor.

The Commission believes that the approach recommended by the commenters has advantages over that included in the proposal. The proposed approach was designed primarily to require a fund to look through the special purpose entity in the case of a tender option bond or other synthetic security that tends to have few underlying securities. These structures may have more underlying securities, but it would be appropriate to continue to look to the ultimate obligor of the underlying security if the security constitutes a sufficiently large portion of the obligations underlying the ABS. Moreover, it would be appropriate to treat an obligor in a more traditional ABS as the issuer of a proportionate portion of the ABS when the security represents a sufficiently large portion of the ABS.

Based on these considerations, the Commission has revised the rule to provide that the special purpose entity generally is treated as the issuer of the ABS; however, any entity whose obligations constitute ten percent or more of the principal amount of the qualifying assets backing the ABS is deemed to be the issuer of that portion of the ABS equal to the percentage of the qualifying assets represented by all of the obligations of the entity included in the pool.[140] As amended, the rule provides that a special purpose entity whose qualifying assets are themselves ABSs ("secondary ABSs") will be treated as the issuer of the secondary ABSs.[141] A fund holding ABSs is required to make the calculations necessary to determine the issuer of the ABSs for diversification purposes on a periodic basis.[142]

b. *Diversification: First Loss Guarantees.* The Proposing Release noted that some ABSs are issued with guarantees as to first losses, in which an institution guarantees all losses up to a specified percentage (*e.g.*, ten percent of the assets of the pool).[143] Because the loss coverage is usually a multiple of the likely losses to be experienced, the possibility of the losses exceeding the coverage generally is considered to be remote. Because a first loss guarantee exposes the guarantor to essentially the same risk as a guarantor of the entire value of the security, the Commission proposed that a first loss guarantor be treated as guarantor of the entire principal amount of the security for purposes of the put diversification standards.

Only one commenter supported this aspect of the Commission's proposal. The remaining commenters opposed the proposed amendment, and generally argued that the proposed treatment of first loss guarantors was inconsistent with the proposed treatment of put providers whose obligations are limited

[133] Paragraph (a)(2) of rule 2a–7, as amended.

[134] This term excludes investment companies. *Id.*

[135] *Id.* The Division of Investment Management has received requests for interpretive guidance under rules 2a–7 and 3a–7 under the 1940 Act regarding trusts that hold assets that may not be redeemed or mature within a "finite time period." *See, e.g.*, Donaldson, Lufkin & Jenrette Securities Corp. (pub. avail. Sept. 23, 1994) (auction rate preferred stock issued by closed-end fund that remains outstanding after sale at auction); Brown & Wood (pub. avail. Feb. 24, 1994) (cumulative preferred stock with no determinable liquidation date). The Commission welcomes requests for interpretive guidance or exemptive relief concerning such instruments. Rule 2a–7, as amended, should not be interpreted to permit investments in ABSs that hold assets that are not "qualifying assets" if the rule's conditions applicable to investment in ABSs (*e.g.*, the rating requirement) are not complied with.

[136] *See* Proposing Release, *supra* note 20, at Section II.C.4.d.

[137] *Id.*

[138] One commenter stated that a test different from the one proposed—that is, one based on asset concentration, would be consistent with certain positions taken by the Division of Corporation Finance. An asset concentration in excess of ten percent may elicit staff comments requesting disclosure of financial information regarding the obligor of the assets. *See* Staff Accounting Bulletins 71 and 71A ("SAB 71/71A").

[139] Paragraph (c)(4)(vi)(A)(*4*) of rule 2a–7, as amended.

[140] *Id.* A diversification test of this type is consistent with a no-action position taken by the Division of Investment Management under section 5(b)(1) of the 1940 Act (Hyperion Capital Management, Inc. (pub. avail. Aug. 1, 1994)) and accounting positions taken by the Division of Corporation Finance (SAB 71/71A, *supra* note 136). *See also* Securities Exchange Act Release No. 34961 (Nov. 10, 1994) [59 FR 59590 (Nov. 17, 1994)] at n.80 and accompanying text.

[141] Paragraph (c)(4)(vi)(A)(*4*) of rule 2a–7, as amended.

[142] Paragraphs (c)(8)(iv) and (c)(9)(v) of rule 2a–7, as amended. The calculations are required to be made periodically because of the revolving nature of many ABSs' assets.

[143] Proposing Release, *supra* note 20, at Section II.C.4.e.

by contract.[144] One commenter objected because the amendment appeared to be addressing the guarantor's exposure to losses, rather than the fund's. Another commenter noted that, because of the contractual limit on the first loss guarantor's obligations, that guarantor is only required to make payment for losses experienced by the pool to the extent of its guarantee, and additional losses would have to be borne by the holder of the ABS.

Rule 2a–7 diversification requirements are designed to limit the exposure of the fund to any single issuer or credit enhancer.[145] Because the exposure of a first loss guarantor to losses the pool may incur is substantially greater than the exposure of a fractional guarantor, the exposure of the fund to the first loss guarantor is also substantially greater.[146] Therefore, the Commission believes that it is appropriate to treat first loss guarantees differently from fractional guarantees. Because first loss guarantees typically are designed to cover likely losses to be experienced, a statement made in the Proposing Release no commenter contradicted, it seems appropriate to treat the first loss guarantor as guaranteeing the entire value of the security. The Commission is adopting this amendment as proposed.[147]

[144] Under proposed amendments to the rule's put diversification provisions, the issuer of a fractional put would have been treated as guaranteeing only that portion of the value of the security which it contractually agreed to provide. *See* Proposing Release, *supra* note 20, at Section II.C.2.c. The Commission is adopting these amendments as proposed. *See supra* Section II.C.1.d. of this Release and paragraph (c)(4)(vi)(B)(*2*) of rule 2a–7, as amended.

[145] *See* Proposing Release, *supra* note 20, at Section II.A.

[146] For example, if a fractional put provider guarantees ten percent of the losses experienced by a $1 million pool, and the pool has losses of seven percent, the put provider's exposure is $7,000. By contrast, if a first loss guarantor guarantees the first ten percent of losses experienced by a $1 million pool, and the pool has losses of seven percent, the guarantor's exposure is $70,000—an amount ten times greater than the fractional put provider's exposure.

[147] Paragraph (c)(4)(vi)(B)(*2*) of rule 2a–7, as amended. The Commission also notes that the proposed treatment of first loss guarantees under rule 2a–7 is consistent with a notice of proposed rulemaking issued by the Department of the Treasury, the Federal Reserve System, and the Federal Deposit Insurance Corporation. "Risk-Based Capital Requirements—Recourse and Direct Credit Substitutes; Proposed Rule," 59 FR 27115 (May 25, 1994). As described in that release, the Office of the Comptroller of the Currency, Department of the Treasury, The Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation and the Office of Thrift Supervision, Department of the Treasury proposed revisions to their risk-based capital standards that would treat certain first loss guarantees as a guarantee of the entire principal amount of the assets enhanced.

4. Quality Standards

The proposed amendments to rule 2a–7 would have limited funds to investing only in an ABS that has a short-term rating from a NRSRO and, when the final maturity of the ABS exceeds 397 days, a long-term debt rating from a NRSRO. Many commenters opposed this proposed requirement, arguing that it would be redundant because the rule currently requires fund managers to perform a thorough legal, structural and credit analysis with respect to all securities. The Commission notes that the legal, structural and credit analysis required by rule 2a–7 is to be conducted independently of any determination of a security's credit quality made by a NRSRO.[148] In addition, the Commission continues to believe that, in view of the role NRSROs have played in the development of the structured finance markets, a rating requirement should not be burdensome.[149] Because both short- and long-term debt ratings from NRSROs reflect the NRSROs' legal, structural, and credit analyses, the rule requires that an ABS be rated in order to be eligible for fund investment, but does not specify whether the rating received must be short- or long-term.[150]

5. Maturity Standards

The proposed maturity standards for ABSs would have taken into account the difference between "pay-through" ABSs and "pass-through" ABSs. A pay-through ABS has a maturity and payment schedule different from that of its underlying assets. A pass-through ABS is one in which the cash generated by the underlying assets passes through directly to the ABS holders. Pass-through ABSs held by funds generally are not scheduled to return a holder's principal for three to five years. They typically provide for periodic interest rate resets and for principal to be returned after some period (not exceeding thirteen months) after a demand for payment has been made.

The proposed amendments would have provided that the final maturity of an ABS is the date on which principal is scheduled to be returned to the holder, regardless of whether demand has been made. The proposed amendments also would have permitted a fund to measure the maturity of an ABS with an adjustable rate of interest subject to a demand feature by reference to the time principal is scheduled to be repaid once demand is made, but only if the holder is entitled to receive principal and interest within thirteen months of making demand.

Several commenters expressed concern regarding the treatment of a pass-through ABS with a "scheduled" maturity. The commenters noted that the effect of the proposed amendments would be to allow funds to determine the maturity of an ABS by relying on the date on which principal is scheduled, but not necessarily required, to be repaid. These commenters concluded that the proposed amendments' reference to a scheduled principal repayment is troublesome because on that date there is no binding obligation under which the fund would receive payment. In light of the comments, the Commission has decided to modify the ABS maturity determination by amending the definition of "demand feature" to include a feature of an ABS permitting the fund unconditionally to receive principal and interest within thirteen months of making demand.[151]

[148] Paragraph (c)(3)(i) of rule 2a–7, as amended; Release 18005, *supra* note 11, at Section II.A. (adopting amendments to paragraph (c)(2) of rule 2a–7); Letter to Registrants (pub. avail. May 8, 1990). For a discussion of the limitations of NRSRO ratings for evaluating certain aspects of ABSs, *see* Investment Company Act Rel. No. 20509 at § I.B.1 (Aug. 31, 1994) [59 FR 46304 (Sept. 7, 1994)].

[149] Proposing Release, *supra* note 20, at Section II.C.4.b.

[150] Paragraph (a)(9)(iii)(C) of rule 2a–7, as amended.

[151] Paragraph (a)(7)(ii) of rule 2a–7, as amended. For example, prior to the fund's election to receive principal payments, the maturity of an adjustable rate ABS with a five year final maturity and a demand feature permitting the fund to obtain principal and interest within thirteen months would be considered a thirteen month instrument at all times (*i.e.*, on a rolling basis). After the election is made, a fund could treat such an instrument as having a maturity equal to the date when principal will be returned (*i.e.*, each day that the fund holds the instrument after election, the fund could reduce the security's maturity by one day).

This amendment supersedes an interpretive position taken by the Division of Investment Management in Merrill, Lynch, Pierce, Fenner & Smith (pub. avail. Apr. 6, 1987). In Merrill, Lynch, the Division addressed the maturity determination for a type of variable rate coupon note. A holder of the notes was required to satisfy certain conditions in order to receive principal on "the date noted on the face of the instrument" (quoting paragraph (d)(1) of rule 2a–7, prior to amendment), and, so long as the notes continued to be held, their maturity was automatically extended at the end of each interest rate reset period by one additional such period. The Division concluded that, subject to certain conditions, a money fund could treat such a security as having a maturity equal to the date specified on the face of the instrument, as automatically extended by an additional interest payment period. The Merrill, Lynch position is inconsistent with paragraph (d) of rule 2a–7, as amended, which provides that an instrument's maturity is the date on which "the principal amount must unconditionally be paid" and with the maturity determination requirements for ABS discussed in the text of this release. Money funds may, however, continue to treat a "mandatory tender" feature as an unconditional right to receive principal, provided that the issuer's obligation to pay is not dependent on the fund taking any action (such as giving notice to the issuer of the intent to redeem), other than physically delivering the notes or bonds for redemption.

[152] Paragraphs (d)(3) and (d)(5) of rule 2a–7, as amended. The maturity of a floating or variable rate ABS may also be determined by reference to a demand feature meeting the requirements of paragraph (a)(7)(i) of the amended rule.

[153] *See* Release 13380, supra note 7, at n.14 and accompanying text; State of Wisconsin (pub. avail. Mar. 3, 1983).

The maturity of an ABS with a final maturity in excess of 397 days may be determined by reference to a demand feature only if the ABS also meets the definition of a floating or variable rate security.[152]

F. Variable and Floating Rate Securities

Rule 2a–7 generally prohibits a money fund from acquiring a security with a remaining maturity of more than 397 calendar days. The purpose of this requirement and the other maturity provisions of the rule is to limit a fund's exposure to interest rate risk.[153] The rule generally requires a fund to measure the maturity of a portfolio security by reference to the security's final maturity date. A fund, however, may measure the maturity of a "variable rate security" or a "floating rate security" (collectively, "adjustable rate securities") by reference to a date that is earlier than the final maturity date.

Rule 2a–7 defines a "variable rate security" as an instrument the terms of which provide for the adjustment of the interest rate on specified dates and that, upon adjustment, can reasonably be expected to have a market value that approximates par value. A "floating rate" security is defined as an instrument the terms of which provide for the adjustment of its interest rate whenever a specified benchmark changes and that, at any time, can reasonably be expected to have a market value that approximates par value. Rule 2a–7 allows certain adjustable rate securities to be treated as having maturities shorter than their final maturities; however, the manner in which an adjustable rate instrument is treated depends upon whether it has a demand feature, the final maturity of the instrument and whether the instrument is a Government security.

1. Maturity Determinations: Floating Rate Securities

Under the current rule, the maturity of a floating rate security subject to a demand feature is the period remaining until principal can be recovered through demand. The same test is generally applicable in determining the maturity of a variable rate security subject to a demand feature, the principal amount of which is scheduled on the instrument's face to be paid in more than 397 days. In contrast, a variable rate security (without a demand feature) scheduled to be paid in 397 days or less may be treated as having a maturity equal to the period remaining until the next readjustment of the interest rate. There is no parallel provision for floating rate securities with final maturities of 397 days or less.

Because variable and floating rate securities expose funds to similar types of interest rate risk, the Commission proposed to amend the rule to permit funds to determine the maturity of floating rate securities with final maturities of 397 days or less by referring to the interest rate reset. Commenters supported the proposed amendment, which the Commission is adopting substantially as proposed.[154] The interest rate of a floating rate security moves in tandem with changes in the interest rate to which it is linked, and the amendments will permit funds to treat these instruments as having one-day maturities.

2. Maturity Determinations: Variable Rate Securities

Under the current rule, when the period remaining until the final maturity of a variable rate demand instrument (*i.e.*, its maturity without reference to the demand feature) is less than 397 days, its maturity under rule 2a–7 is the longer of the period remaining until the next interest rate readjustment or the date on which principal can be recovered on demand. A variable rate security with the same final maturity that does not have a demand feature is treated as having a remaining maturity equal to the period remaining until the next readjustment in the interest rate. The effect of these provisions is that a variable rate security with a final maturity of less than 397 days will have a *longer* maturity when a demand feature is added to it.

To correct this anomaly, the Commission proposed that only a variable rate demand security with a final maturity in excess of 397 days would have its maturity measured by the longer of the period remaining until its next interest rate adjustment or the date on which principal can be recovered on demand; the maturities of securities with final maturities of 397 days or less would be measured by reference to the earlier of the date on which the interest rate next readjusts or the date on which principal can be recovered on demand. Commenters supported the proposed amendment, which the Commission is adopting as proposed.[155]

3. Adjustable Rate Government Securities

Rule 2a–7 provides that "an instrument that is issued or guaranteed by the United States government or any agency thereof which has a variable rate of interest adjusted no less frequently than every 762 days" is deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.[156] The Commission is adopting two amendments to clarify the scope of this provision.

First, the amendments clarify that the maturity of the security may only be determined by reference to the interest readjustment date if, upon readjustment, the security can reasonably be expected to have a market value that approximates par value.[157] This change makes explicit that Government securities are treated the same way as other adjustable rate securities under the rule.[158]

Second, the reference to Government securities in paragraph (d)(1) of rule 2a–7 is being conformed to other provisions of the rule relating to Government securities. As amended, the provision applies to all Government securities, including securities issued by persons controlled or supervised by and acting as instrumentalities of the U.S. Government.[159]

4. Other Issues Concerning Adjustable Rate Securities

a. *Background.* Rule 2a–7 allows the maturity of adjustable rate securities to be determined by reference to interest rate adjustment dates if the security "can reasonably be expected to have a market value that approximates its par value" upon adjustment of the interest

[154] Floating rate securities with final maturities of more than 397 days that are subject to demand features are deemed to having maturities equal to the period remaining until principal can be recovered through demand. Paragraph (d)(5) of rule 2a–7, as amended.

[155] Paragraph (d)(2) of rule 2a–7, as amended.

[156] Paragraph (d)(1) of rule 2a–7, as amended. Generally, the readjustment must occur every 397 days to reflect the rule's maturity requirements. For certain funds that mark-to-market, however, readjustment may occur every 762 days. Paragraph (c)(2)(ii) of rule 2a–7, as amended.

[157] This codifies the interpretation of the current rule. *See* Investment Company Institute (pub. avail. June 16, 1993); Morgan Keegan & Company, Inc. (pub. avail. July 24, 1992) at n.7.

[158] The amendments also make clear that this provision applies to floating rate Government securities. Paragraph (d)(1) of rule 2a–7, as amended.

[159] The amendment reflects a no-action position taken by the Division of Investment Management with respect to securities issued by instrumentalities of the U.S. government. *See* Student Loan Marketing Association (pub. avail. Jan. 18, 1989).

rate.[160] The Commission proposed to clarify that the board of directors or its delegate must have a reasonable expectation that, upon each adjustment of the interest rate until the final maturity of the security or until the principal amount can be recovered through demand, the security will have a market value approximating its amortized cost.[161]

Several commenters discussed the proposed amendments to the maturity determination provisions of the rule as they relate to adjustable rate Government securities. Commenters opposing this aspect of the proposed amendments emphasized that the amendments should exclude adjustable rate Government securities "based on the lack of credit risk" inherent in these instruments. The maturity determination provisions of the rule, however, are designed to limit a fund's exposure to interest rate, rather than credit, risk and recent history demonstrates that an investment in a Government security can expose the fund to substantial interest rate risk.[162]

[160] Paragraphs (a)(7) and (a)(21) of rule 2a–7 [17 CFR 270.2a–7(a)(7) and (a)(21)], prior to amendment. Adjustable rate securities may be priced at a premium to par value when the security pays interest above market rates. A fund may treat the security as an adjustable rate security for purposes of rule 2a–7's maturity provisions if the fund reasonably expects that upon readjustment of the interest rate, the market value of the security will approximate its amortized cost. The premium generally would be amortized over the life of the security. It is critical that the fund carefully consider all factors involved in the valuation of the security, particularly the likelihood of prepayment before the premium is fully amortized. An accelerated return of principal will require the fund to write off the premium before it is amortized, and could result in a significant deviation between the amortized cost and market value of the security.

[161] Paragraphs (a)(12) and (a)(30) of rule 2a–7, as amended.

[162] In the Proposing Release, the Commission noted that a number of adjustable rate securities developed specifically for money market funds had interest rate readjustment formulas that could not be expected to reflect short-term interest rates under certain conditions. At that time, the Commission expressed the concern that changes in interest rates or other conditions that could reasonably be foreseen to occur during the life of the securities could result in their market values not returning to par at the time of an interest rate readjustment. The Commission identified securities that displayed this characteristic, and concluded that such securities presented risks that were not appropriate for money market funds to assume. *See* Proposing Release, *supra* note 20, at nn.161–164 and accompanying text.

In June 1994, the Division of Investment Management provided money market funds and their advisers with additional guidance concerning investments in adjustable rate securities. The Division reminded fund managers of their general obligations under rule 2a–7 to ensure that money market funds invest only in securities that are consistent with maintaining stable net asset values, and directed money market funds that held these securities to work with their advisers in developing plans for their orderly disposition. *See* Letter from Barry P. Barbash, Director, Division of Investment Management, to Paul Schott Stevens, General Counsel, Investment Company Institute (June 30, 1994). Money market funds holding adjustable rate securities of the type described in the Proposing Release experienced problems when short-term interest rates increased last year. To maintain their funds' stable net asset values, a number of fund advisers took actions which included purchasing certain adjustable rate securities from their money market funds at their amortized cost value (plus accrued interest), or contributing capital to the funds. One fund holding notes of this type, the U.S. Government Money Market Fund, a series of Community Bankers Mutual Fund, Inc., announced in September 1994 that it would liquidate and distribute less than $1.00 per share to its shareholders. Press reports generally treated this liquidation as the first instance in which a money market fund had "broken a dollar." *See* Brett D. Fromson, "Losses on Derivatives Lead Money Fund to Liquidate," *Washington Post*, Sept. 28, 1994 at F1; Leslie Wayne, "For Money Market Fund Investors, New Cautions," *N.Y. Times*, Sept. 29, 1994 at D1, D8.

The Commission is, therefore, adopting the amendment as proposed.

The effect of the new provision is to prohibit funds from purchasing an adjustable rate Government security with a remaining maturity of more than 397 days unless the interest rate readjustment mechanism can reasonably be expected to return the instrument to par upon all interest rate adjustment dates during the life of the instrument. A fund could purchase an adjustable rate Government security with a remaining maturity of 397 days or less, the value of which the fund does not expect to return to par on all interest rate adjustment dates, but would have to treat the security as a fixed rate security and measure its maturity by reference to its final maturity. Adjustable rate securities with demand features generally would not be affected by the proposed changes because if a discount develops or is likely to develop a fund could exercise the demand feature and receive the amortized cost value of the instrument.

b. *Recordkeeping Requirement.* The Commission proposed to require a money market fund to maintain a written record of its determination that an adjustable rate security, the maturity of which is determined by reference to its interest rate readjustment date, will either maintain a value of par or return to par on each interest rate readjustment date through the life of the security. A number of commenters who opposed this requirement stated that further guidance regarding the definition of the term "approximates par" was necessary or that the rule should specifically state the amount of deviation that would be permissible. The Commission believes that this approach would be rigid and unnecessary, absent an indication that decisions reached in this area by funds are inconsistent with the purposes of the rule.

Other commenters asserted that the paperwork burden this requirement could entail might outweigh benefits to shareholders, and might have the effect of forcing funds to purchase higher proportions of fixed rate securities that may have a higher degree of price volatility than adjustable rate securities. The Commission is not persuaded by this argument. One of these commenters suggested that if the determination regarding the return to par would be common to a group of securities, a single documentation of the analysis should be sufficient. The Commission agrees. The amendments do not require a fund's board of directors to maintain a written determination for each individual adjustable rate security in the fund's portfolio—it is sufficient for the fund to maintain the required record for each type of security (*e.g.*, one record could be maintained for several different adjustable rate securities of similar credit quality whose interest rate readjustment mechanisms are tied to LIBOR plus or minus a number of basis points that make the securities similarly sensitive to interest rate changes). The Commission has decided to adopt the amendments as proposed.[163]

G. Other Amendments to Rule 2a–7

1. U.S. Dollar Denominated Instruments

To avoid exposure to foreign currency risk, rule 2a–7 limits fund investment to "United States dollar-denominated securities."[164] The proposed amendments would have defined the term "United States dollar-denominated" to clarify that it means: (a) the payment of interest and principal must be made in U.S. dollars at all times; and (b) an eligible security's interest rate may not vary or float with a rate tied to foreign currencies, foreign interest rates, or any index expressed in a currency other than U.S. dollars.

Several commenters were critical of the proposed definition and recommended that the rule permit fund investment in securities on which the amount of interest payable is based on changes in the value of a foreign currency as long as principal and interest are payable in full in U.S. dollars. The Commission believes that amending the rule in this manner would have the effect of exposing the fund to currency fluctuations. The Commission has decided to adopt the definition of "United States dollar-denominated" as proposed.[165]

[163] Paragraphs (c)(8)(iii) and (c)(9)(iv) of rule 2a–7, as amended.

[164] Paragraph (c)(3)(i) of rule 2a–7, as amended.

2. Investment in Other Money Funds

The Commission is adopting, as proposed, amendments to rule 2a–7 to clarify that shares in other money funds that comply with the rule: (a) are first tier securities;[166] and (b) should be treated as having a rolling maturity equal to the period of time within which the acquired fund is required to make payment upon redemption under applicable law.[167] A shorter maturity may be used if the fund making the investment has a contractual arrangement with the other money fund for more rapid receipt of redemption proceeds.[168]

For diversification purposes, an investment in another money fund generally may be treated as an investment in any other issuer (and therefore generally cannot exceed five percent of a fund's assets).[169] An exception to this treatment is made for funds that invest substantially all of their assets in shares of another money fund (the "underlying fund") in which case the fund is permitted to "look through" the shares to the assets of the underlying fund.[170] These include funds in "master-feeder" arrangements and certain separate accounts offering variable insurance products. Such a fund will be deemed to be in compliance with rule 2a–7 for diversification and other purposes if the board of directors reasonably believes that the underlying money fund is in compliance with the rule.[171] The board of directors of the fund is not required to monitor every investment decision made by the underlying fund. Rather, the board could review the underlying fund's procedures and obtain regular reports concerning the underlying fund's compliance with the rule.[172]

3. Board Approval and Reassessment of Certain Securities

Rule 2a–7 currently requires the board of directors of a taxable fund to approve or ratify purchases of unrated securities and securities that are rated by only one NRSRO. The amendments eliminate this requirement.[173]

Rule 2a–7 also requires funds to limit portfolio investments to securities determined to present minimal credit risks. In compliance with this requirement, the fund's board of directors must reassess promptly whether a security presents minimal credit risks when the fund's investment adviser becomes aware that an unrated security or a second tier security has been given a rating by any NRSRO below the NRSRO's second highest rating category. The Proposing Release requested comment on whether to permit delegation of the reassessment requirement.[174] All the commenters who responded to this request suggested that the rule should permit delegation of the reassessment requirement to the fund's investment adviser. These commenters stated that the investment adviser is in a better position to make credit determinations given its staff and analytical and information resources. The Commission agrees, and is amending the rule as suggested.[175]

4. Recordkeeping

Amendments to rule 2a–7 require a fund to maintain a written record of the determination that a portfolio security presents minimal credit risks and to maintain a record of NRSRO ratings (if any) used to determine the status of a security under the rule.[176] The Commission is also adopting, as proposed, amendments to rule 31a–1 under the 1940 Act that require money funds to maintain in their portfolio investment records information identifying: (a) each security by its legal name; (b) any liquidity or credit enhancements associated with each security; and (c) any coupons, accruals, maturities, puts, calls or any other information necessary to identify, value and account for each security.

5. Defaulted Securities

Rule 2a–7 imposes certain obligations regarding defaulted securities.[177] The Commission proposed amending the rule to include "events of insolvency" as events that would trigger these obligations, and is adopting those amendments substantially as they were proposed.[178] The Commission is adopting as proposed an amendment to the rule that would require a fund to notify the Commission of the default of a security subject to a credit enhancement or demand feature only in the event that the provider of the enhancement or demand feature failed to fulfill its obligations to the fund.[179]

6. Technical Amendments

The Commission is adopting technical amendments to rule 2a–7 to clarify its terminology. References to "instruments" are being changed to "securities." In addition, references to the requirement that the market value of an adjustable rate security must reasonably approximate its par value are being changed to clarify that the security's market value must reasonably approximate its amortized cost.[180] The definition of "unrated security" also is being revised to clarify that if an unrated security becomes rated while held by the fund, the fund may continue to treat it as an unrated security, in the same manner as a fund may continue to determine whether a security rated by a single NRSRO is first or second tier if a second NRSRO rates the security after it is acquired by the fund.[181] The definition of "first tier security" is also being amended to include government securities.[182]

III. Amendments to Disclosure Rules

The Commission is adopting amendments to the forms and advertising rules used by tax exempt

[165] Paragraph (a)(28) of rule 2a–7, as amended.

[166] Paragraph (a)(11)(iv) of rule 2a–7, as amended.

[167] Paragraph (d)(8) of rule 2a–7, as amended. *See also* Proposing Release, *supra* note 20, at n.182 and accompanying text; T+3 Letter, *supra* note 65.

[168] *Id.*

[169] Investment by one fund in another is limited by section 12(d)(1)(A) of the 1940 Act [15 U.S.C. 80a–12(d)(1)(A)]. Section 12(d)(1)(A) provides that a fund may not invest more than ten percent of its assets in securities issued by other investment companies, invest more than five percent of its assets in any single investment company, or acquire more than three percent of the voting securities of another investment company.

[170] Paragraph (c)(4)(vi)(A)(5) of rule 2a–7, as amended. The restrictions of section 12(d)(1)(A) do not apply if the fund making the investment invests all of its assets in shares of another fund, subject to certain conditions. Section 12(d)(1)(E) [15 U.S.C. 80a–12(d)(1)(E)].

[171] Paragraph (c)(4)(vi)(A)(5) of rule 2a–7, as amended. The responsibility for making this determination may be delegated by the board to the fund's adviser. Paragraph (e) of rule 2a–7, as amended.

[172] In addition, the investment objectives and policies of the two funds should not be inconsistent. *See* Guide 34 to Form N–1A and Guide 38 to Form N–3.

[173] Paragraph (c)(3) of rule 2a–7, as amended.

[174] Proposing Release, *supra* note 20, at Section II.D.6.

[175] Paragraphs (c)(5)(i)(A) and (e) of rule 2a–7, as amended.

[176] Paragraph (c)(9)(iii) of rule 2a–7, as amended.

[177] *See* Proposing Release, *supra* note 20, at Section II.D.8.

[178] Paragraphs (a)(10) and (c)(5)(ii) of rule 2a–7, as amended.

[179] Paragraph (c)(5)(iv) of rule 2a–7, as amended.

[180] Paragraphs (a)(12), (a)(30), and (c)(8)(iii) of rule 2a–7, as amended. *See supra* Section II.F.4.a. (discussion of determination that par will be approximated).

[181] Paragraph (a)(29) of rule 2a–7, as amended.

[182] Paragraphs (a)(11)(v) and (a)(13) of rule 2a–7, as amended. Prior to the adoption of today's amendments, a fund purchasing a government security would have been required to treat the security as an unrated first tier security (paragraph (a)(11)(iii) of rule 2a–7, as amended), because NRSROs do not rate government securities. As a result, the fund would have been required to perform a comparability analysis. Under the amended definition of "first tier security," a fund may treat a government security as first tier without conducting a comparability analysis, even though the security has not received a rating from an NRSRO.

funds and is publishing a Staff Guide designed to elicit disclosures concerning the specific risks of investing in tax exempt funds.

A. Single State Funds

To alert investors to the greater risks of investing in single state funds, proposed amendments to Form N–1A would have a required a single state fund to disclose in its prospectus that: (1) its investments are concentrated geographically; (2) for a single state fund that does not meet the Five Percent Diversification Test, that the fund may invest a significant percentage of its assets in the securities of a single issuer; and (3) that an investment in the fund therefore may be riskier than an investment in other types of money funds.

Several commenters, while generally supporting additional disclosure, expressed concern that the proposed disclosure for single state funds might exaggerate the risk of investing in these funds, leading to investor confusion. These commenters urged the Commission not to require a single state fund to disclose that an investment in it may be riskier than an investment in another type of money fund. The amendments to rule 2a–7 require single state funds to be diversified at the five percent level as to seventy-five percent of their assets, but these funds are less diversified than other types of money market funds and are still dependent on the financial health of a particular state.[183] Because of the importance of diversification in protecting a fund from exposure to a particular issuer, the Commission has decided to require a single state fund that is not diversified as to 100% of assets to disclose on the cover page of the prospectus that it may invest a significant percentage of its assets in the securities of a single issuer, and that an investment in the fund may therefore be riskier than investment in other types of money funds. The Commission has also decided to adopt the disclosure requirement regarding geographic concentration, which may be placed in the text of the prospectus, substantially as proposed.[184]

B. Disclosure Concerning Exposure to Put Providers

The Commission is publishing an amendment to Staff Guide 21 to Form N–1A. The amendment interprets the form as requiring a money fund having more than forty percent of its portfolio subject to third party credit enhancements to disclose that the safety of its portfolio (and the ability of the fund to maintain a stable share price) is largely dependent upon guarantees from foreign and domestic banks and that these arrangements are not subject to federal deposit insurance. The wording of the guide has been changed somewhat from the draft published in the Proposing Release[185] to reflect the approach taken by the Commission in proposing to simplify money market fund prospectuses.[186]

Under the proposed amendments, money fund portfolio schedules would have been required to include information regarding put providers.[187] Those amendments are not being adopted at this time. The Commission is currently examining portfolio schedule requirements for investment companies generally and will continue to consider the proposed amendments in connection with that project.

C. Risk Disclosure in Certain Communications

Money funds are required to include in certain advertisements and sales literature a statement that an investment in a money fund is not insured or guaranteed by the U.S. Government and there can be no assurance that the fund will maintain a stable net asset value.[188] The amendments extend this requirement to "tombstone" advertisements under rule 134 of the 1933 Act.[189]

IV. Exemptive Rule Governing Purchases of Certain Portfolio Securities by Affiliated Persons

The Proposing Release noted that when money funds have held a security that is no longer eligible for fund investment, fund advisers or related persons frequently have repurchased the security from the fund at the security's amortized cost value to avoid any fund shareholder loss.[190] These transactions came within section 17(a)(2) of the 1940 Act [15 U.S.C. 80a–17(a)(2)], which prohibits an affiliated person of a fund, or an affiliated person of such a person, from knowingly purchasing a security from the fund in the absence of a Commission exemption. Nevertheless, the transactions appeared to be reasonable, fair, in the best interests of fund shareholders, and consistent with the actions that a fund should take in the event of a default of a portfolio security.[191] Thus, the staff of the Division of Investment Management advised parties to these transactions that the staff would not recommend enforcement action to the Commission if these transactions were consummated.

Based upon the Commission's experience with actions taken by funds and their affiliates to dispose of portfolio securities that were no longer eligible under rule 2a–7,[192] the Commission proposed new rule 17a–9 to exempt from section 17(a) of the 1940 Act the purchase of a security that is no longer an eligible security. Several commenters, including the ICI, opposed the adoption of rule 17a–9, asserting that its mere existence would cause investors to expect a fund's adviser to purchase ineligible securities from the fund, and guarantee that the fund will maintain a stable net asset value.

The Commission believes that existing rules applicable to money funds already address this concern by requiring money fund prospectuses and sales literature to disclose prominently that there is no assurance or guarantee that a fund will be able to maintain a stable net asset value of $1.00 per share.[193] Moreover, the Commission believes it unlikely that the existence of an exemptive rule alone will create any investor expectations.

The Commission has decided to adopt the rule as proposed. In doing so, the Commission is not suggesting that affiliated persons of funds have any legal obligation to enter into transactions covered by the new rule. The exemption applies to transactions where: (a) the purchase price is paid in cash; and (b) the purchase price is equal to the greater of the amortized cost of the security or its market price (in each case, including accrued interest).[194] The rule, as adopted, is available for transactions involving securities that are no longer eligible securities because they no longer satisfy either the credit quality or maturity limiting provisions of the rule (*e.g.*, the securities are long-term adjustable rate securities whose market values no longer approximate their par values on the interest rate readjustment dates).

V. Compliance Dates

A. General Compliance Date

Money funds may comply with any of the amendments or rules adopted today upon publication of this release in the **Federal Register**. Beginning October 3, 1996, money funds must comply with all amendments and rules adopted today not specifically addressed below in paragraphs B. and C.[195] The Commission is delegating to the Division Director the authority to address issues regarding compliance dates that are not addressed in this section, unless the Director believes that it is necessary in the public interest or in the interest of investors that the Commission consider the issue.

Rule 2a–7 requires funds to meet the rule's diversification requirements with respect to a particular issuer on the date the fund acquires a security of that issuer.[196] Therefore, phase-in rules for the new diversification requirements for tax exempt funds are unnecessary. A tax exempt fund holding a greater percentage of its total assets in the securities of an issuer than the applicable diversification requirement permits as of October 3, 1996 may not purchase additional securities or "roll over" current holdings until such securities purchased or rolled over will not cause the fund to exceed the applicable diversification requirements immediately after the purchase or rollover. Funds are not required to exercise puts or otherwise dispose of portfolio holdings to meet the new diversification requirements.

B. Grandfathered Securities

To minimize disruption to funds and markets as a result of adoption of these amendments, the Commission is "grandfathering" certain securities first issued on or before June 3, 1996 that do not meet the following requirements of the amended rule:

(1) requirement that demand features be rated;[197]

(2) requirement that, in order for a security subject to a demand feature to be an eligible security, the fund must receive notice from the demand feature's issuer or another institution if there is a substitution of the provider of the demand feature;[198]

(3) new requirements for ABSs regarding maturity determinations and ratings;[199]

(4) revised definition of "put" to include ability to recover principal *and* any accrued interest;[200] and

(5) requirement that security subject to conditional demand feature is an eligible security only if board of directors or its delegate makes certain determinations regarding the demand feature's exercisability.[201]

A money fund may continue to hold these "grandfathered" securities or acquire such securities provided that they satisfy the other provisions of the rule, as amended, and are issued on or before June 3, 1996.

C. Disclosure and Reporting

The following amendments pertaining to disclosure and advertising will become effective as follows:

(1) amendments to Form N–1A will be effective: (1) for investment companies whose registration statements become effective on or after June 3, 1996 upon use of any prospectus on or after June 3, 1996; and (2) for all other investment companies, upon use of any prospectus contained in any post-effective amendment filed on or after June 3, 1996;

(2) amendments to Form N–SAR will be effective for any report required by rules 30a–1 and 30b1–1 [17 CFR 270.30a–1 and 270.30b1–1] filed on or after July 3, 1996; and

(3) the amendment to rule 134 under the Securities Act of 1933 will be effective for "tombstone" advertisements used after June 3, 1996.

VI. Regulatory Flexibility Analysis

A summary of the Initial Regulatory Flexibility Analysis regarding the proposed rule and form amendments was published in the Proposing Release. No comments were received. The Commission has prepared a Final Regulatory Flexibility Analysis in accordance with 5 U.S.C. 604, a copy of which may be obtained by contacting Martha H. Platt, Senior Attorney, Mail Stop 10–6, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549.

VII. Statutory Authority

The Commission is amending rule 2a–7 under the exemptive and rulemaking authority set forth in sections 6(c) [15 U.S.C. 80a–6(c)], 8(b) [15 U.S.C. 80a–8(b)], 22(c) [15 U.S.C. 80a–22(c)], 34(b) [15 U.S.C. 80a–34(b)], and 38(a) [15 U.S.C. 80a–37(a)] of the Investment Company Act of 1940. The Commission is adopting rule 17a–9 under the exemptive and rulemaking authority set forth in sections 6(c) [15 U.S.C. 80a–6(c)] and 38(a) [15 U.S.C. 80a–37(a)] of the Investment Company Act of 1940. The authority citations for the amendments to the rules and forms precede the text of the amendments.

VIII. Text of Rule and Form Amendments

List of Subjects in 17 CFR Parts 230, 239, 270 and 274

Investment companies, Reporting and recordkeeping requirements, Securities.

For the reasons set out in the preamble, the Commission is amending chapter II, title 17 of the Code of Federal Regulations as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. The authority citation for Part 230 continues to read in part as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77s, 77sss, 78c, 78d, 78*l*, 78m, 78n, 78o, 78w, 79*l*l(d), 79t, 80a–8, 80a–29, 80a–30, and 80a–37, unless otherwise noted.

* * * * *

2. Section 230.134 is amended by adding paragraph (e) to read as follows:

§ 230.134 Communications not deemed a prospectus.

* * * * *

(e) In the case of an investment company registered under the Investment Company Act of 1940 that holds itself out as a "money market fund," a communication used under

---

[183] *See supra* Section II.B.1.a. of this Release and paragraph (c)(4)(ii) of rule 2a–7, as amended.

[184] Item 4(c) of Form N–1A, as amended.

[185] Guide 21 to Form N–1A, as amended.

[186] Investment Company Act Rel. No. 21216 (July 19, 1995) [60 FR 38454 (July 26, 1995)].

[187] Proposing Release, *supra* note 20, at Section III.C.

[188] *See* paragraph (a)(7) of rule 482 [17 CFR 230.482(a)(7)] and introductory paragraph of rule 34b–1 [17 CFR 270.34b–1].

[189] Paragraph (e) or rule 134, as amended [17 CFR 230.134(e)].

[190] Proposing Release, *supra* note 20, at nn.12 and 28 and accompanying text.

[191] Paragraph (c)(5)(ii) of rule 2a–7, as amended, requires a fund holding a defaulted security to dispose of the security as soon as practicable consistent with achieving an orderly disposition of the security, unless the fund's board of directors concludes that disposal would not be in the best interests of the fund.

[192] *See* Testimony of Arthur Levitt, Chairman, U.S. Securities and Exchange Commission, Concerning Issues Affecting the Mutual Fund Industry Before the Subcommittee on Telecommunications and Finance, Committee on Energy and Commerce, U.S. House of Representatives, 23–25 (Sept. 27, 1994); Testimony of Arthur Levitt, Chairman, U.S. Securities and Exchange Commission, Concerning Municipal Bond and Government Securities Markets Before the Committee on Banking, Housing and Urban Affairs, U.S. Senate, 10–11 (Jan. 5, 1995).

[193] *See* Release 18005, *supra* note 11, at Section II.H. (adopting amendments to Item 1(a)(ix) of Form N–1A).

[194] *See* rule 17a–9, as adopted. A fund must notify the Commission in the event of default with respect to portfolio securities that account for one half of one percent or more of a fund's assets immediately before the occurrence of default. *See* paragraph (c)(5)(iii) of rule 2a–7, as amended.

[195] To the extent these amendments involve clarification of Commission or staff interpretations of the current provisions of rule 2a–7, these compliance dates are not intended to suggest that non-compliance prior thereto does not involve a violation of rule 2a–7.

[196] Paragraphs (c)(4) (i) and (ii) (with respect to diversification generally) and (c)(4)(v) (with respect to diversification of puts) of rule 2a–7, as amended.

[197] Paragraph (a)(9)(iii)(D)(*1*) of rule 2a–7, as amended.

[198] Paragraph (a)(9)(iii)(D)(*2*) of rule 2a–7, as amended.

[199] Paragraphs (a)(7)(ii) (definition of demand feature for ABS) and (a)(9)(iii)(C) (rating requirements) of rule 2a–7, as amended. Note, however, that funds are required to apply the diversification requirements for ABS in accordance with Section V.A., *supra*, of this Release. *See also* paragraph (c)(4)(vi)(A)(*4*) of rule 2a–7, as amended (diversification calculation for ABSs).

[200] Paragraph (a)(16) of rule 2a–7, as amended.

[201] Paragraph (c)(3)(iii)(B) of rule 2a–7, as amended.

this section shall contain the disclosure required by § 230.482(a)(7).

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

3. The authority citation for Part 270 is amended by removing the third paragraph in the sub-authority to read as follows:

Authority: 15 U.S.C. 80a–1 *et seq.*, 80a–37, 80a–39 unless otherwise noted;

* * * * *

4. Section 270.2a–7 is revised to read as follows:

§ 270.2a–7 Money market funds.

(a) *Definitions.*

(1) *Amortized Cost Method* of valuation shall mean the method of calculating an investment company's net asset value whereby portfolio securities are valued at the fund's acquisition cost as adjusted for amortization of premium or accretion of discount rather than at their value based on current market factors.

(2) *Asset Backed Security* shall mean a fixed income security (other than a Government security) issued by a Special Purpose Entity (as hereinafter defined), substantially all of the assets of which consist of Qualifying Assets (as hereinafter defined). *Special Purpose Entity* shall mean a trust, corporation, partnership or other entity organized for the sole purpose of issuing fixed income securities which entitle their holders to receive payments that depend primarily on the cash flow from *Qualifying Assets*, but does not include a registered investment company. Qualifying Assets shall mean financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period, plus any rights or other assets designed to assure the servicing or timely distribution of proceeds to security holders.

(3) *Business Day* shall mean any day, other than Saturday, Sunday, or any customary business holiday.

(4) *Collateralized Fully* in the case of a repurchase agreement shall mean that:

(i) The value of the securities collateralizing the repurchase agreement (reduced by the transaction costs (including loss of interest) that the money market fund reasonably could expect to incur if the seller defaults) is, and during the entire term of the repurchase agreement remains, at least equal to the Resale Price (as defined hereinafter) provided in the agreement; and

(ii) The money market fund or its custodian either has actual physical possession of the collateral or, in the case of a security registered on a book entry system, the book entry is maintained in the name of the money market fund or its custodian; and

(iii) The money market fund retains an unqualified right to possess and sell the collateral in the event of a default by the seller; and

(iv) The collateral consists entirely of securities that are direct obligations of, or that are fully guaranteed as to principal and interest by, the United States or any agency thereof, and/or certificates of deposit, bankers' acceptances which are eligible for acceptance by a Federal Reserve Bank, and, if the seller is a depositary institution as defined in 12 U.S.C. 1813(c), mortgage related securities (as such term is defined in section 3(a)(41) of the Securities Exchange Act of 1934 [15 U.S.C. 78c(a)(41)]) that, at the time the repurchase agreement is entered into, are rated in the highest rating category by the Requisite NRSROs.

(v) *Resale Price* shall mean the purchase price paid to the seller of the securities plus the accrued resale premium on such purchase price. The accrued resale premium shall be the amount specified in the repurchase agreement or the daily amortization of the difference between the purchase price and the resale price specified in the repurchase agreement.

(5) *Conditional Demand Feature* shall mean a Demand Feature that is not an Unconditional Demand Feature.

(6) *Conduit Security* shall mean a security issued by a Municipal Issuer (as hereinafter defined) involving an arrangement or agreement entered into, directly or indirectly, with a person other than a Municipal Issuer, which arrangement or agreement provides for or secures repayment of the security. *Municipal Issuer* shall mean a state or territory of the United States (including the District of Columbia), or any political subdivision or public instrumentality of a state or territory of the United States. A Conduit Security *does not* include a security that is:

(i) Fully and unconditionally guaranteed by a Municipal Issuer; or

(ii) Payable from the general revenues of the Municipal Issuer or other Municipal Issuers (other than those revenues derived from an agreement or arrangement with a person who is not a Municipal Issuer that provides for or secures repayment of the security issued by the Municipal Issuer); or

(iii) Related to a project owned and operated by a Municipal Issuer; or

(iv) Related to a facility leased to and under the control of an industrial or commercial enterprise that is part of a public project which, as a whole, is owned and under the control of a Municipal Issuer.

(7) *Demand Feature* shall mean:

(i) A Put that may be exercised either:

(A) At any time on no more than 30 days' notice; or

(B) At specified intervals not exceeding 397 calendar days and upon no more than 30 days' notice; or

(ii) A feature permitting the holder of an Asset Backed Security unconditionally to receive principal and interest within thirteen months of making demand.

(8) *Demand Feature Issued By A Non-Controlled Person* shall mean a Demand Feature issued by a person that, directly or indirectly, does *not* control, and is not controlled by or under common control with the issuer of the security subject to the Demand Feature. *Control* shall mean "control" as defined in section 2(a)(9) of the Act [15 U.S.C. 80a–2(a)(9)].

(9) *Eligible Security* shall mean:

(i) A security with a remaining maturity of 397 calendar days or less that has received a short-term rating (or that has been issued by an issuer that has received a short-term rating with respect to a class of debt obligations, or any debt obligation within that class, that is comparable in priority and security with the security) by the Requisite NRSROs in one of the two highest short-term rating categories (within which there may be sub-categories or gradations indicating relative standing); or

(ii) A security:

(A) That at the time of issuance had a remaining maturity of more than 397 calendar days but that has a remaining maturity of 397 calendar days or less; and

(B) Whose issuer has received from the Requisite NRSROs a rating with respect to a class of debt obligations (or any debt obligation within that class) that is now comparable in priority and security with the security, in one of the two highest short-term rating categories (within which there may be sub-categories or gradations indicating relative standing); or

(iii) An Unrated Security that is of comparable quality to a security meeting the requirements of paragraphs (a)(9)(i) or (ii) of this section, as determined by the money market fund's board of directors; *Provided, however*, that:

(A) The board of directors may base its determination that a Standby Commitment that is not a Demand Feature is an Eligible Security upon a finding that the issuer of the commitment presents a minimal risk of default;

(B) A security that at the time of issuance had a remaining maturity of more than 397 calendar days but that has a remaining maturity of 397 or less and that is an Unrated Security is not an Eligible Security if the security has received a long-term rating from any NRSRO that is not within the NRSRO's three highest long-term ratings categories (within which there may be sub-categories or gradations indicating relative standing);

(C) An Asset Backed Security shall not be an Eligible Security unless it has a debt rating from an NRSRO; and

(D) A security that is subject to a Demand Feature shall not be an Eligible Security unless:

(*1*) The Demand Feature has received a short-term rating from an NRSRO (or the issuer of the Demand Feature has received from an NRSRO a short-term rating with respect to a class of debt obligations or any debt obligation within that class that is comparable in priority and security to the Demand Feature); and

(*2*) The issuer of the Demand Feature, or another institution, undertakes to notify promptly the holder of the security in the event that the Demand Feature is substituted with a Demand Feature provided by another issuer.

(10) *Event of Insolvency* shall mean, with respect to an issuer or guarantor:

(i) An admission of insolvency, the application by the issuer or guarantor for the appointment of a trustee, receiver, rehabilitator, or similar officer for all or substantially all of its assets, a general assignment for the benefit of creditors, the filing by the issuer of a voluntary petition in bankruptcy or application for reorganization or an arrangement with creditors; or

(ii) The institution of similar proceedings by another person which proceedings are not contested by the issuer or guarantor; or

(iii) The institution of similar proceedings by a government agency responsible for regulating the activities of the issuer or guarantor, whether or not contested by the issuer or guarantor.

(11) *First Tier Security* shall mean any Eligible Security that:

(i) Has received a short-term rating (or that has been issued by an issuer that has received a short-term rating with respect to a class of debt obligations, or any debt obligation within that class, that is comparable in priority and security with the security) by the Requisite NRSROs in the highest short-term rating category for debt obligations (within which there may be sub-categories or gradations indicating relative standing); or

(ii) Is a security described in paragraph (a)(9)(ii) of this section whose issuer has received from the Requisite NRSROs a short-term rating with respect to a class of debt obligations (or any debt obligation within that class) that now is comparable in priority and security with the security, in the highest short-term rating category for debt obligations (within which there may be sub-categories or gradations indicating relative standing); or

(iii) Is an Unrated Security that is of comparable quality to a security meeting the requirements of paragraphs (a)(11)(i) and (ii) of this section, as determined by the fund's board of directors; or

(iv) Is a security issued by a registered investment company that is a money market fund; or

(v) Is a Government Security.

(12) *Floating Rate Security* shall mean a security the terms of which provide for the adjustment of its interest rate whenever a specified interest rate changes and which, at any time until the final maturity of the instrument or the period remaining until the principal amount can be recovered through demand, can reasonably be expected to have a market value that approximates its amortized cost.

(13) *Government Security* shall mean any Government Security as defined in section 2(a)(16) of the Act [15 U.S.C. 80a–2(a)(16)].

(14) *NRSRO* shall mean any nationally recognized statistical rating organization, as that term is used in paragraphs (c)(2)(vi)(E), (F) and (H) of § 240.15c3–1 of this Chapter that is not an affiliated person, as defined in section 2(a)(3)(C) of the Act [15 U.S.C. 80a–2(a)(3)(C)], of the issuer of, or any insurer, guarantor or provider of credit support for, the security.

(15) *Penny-Rounding Method* of pricing shall mean the method of computing an investment company's price per share for purposes of distribution, redemption and repurchase whereby the current net asset value per share is rounded to the nearest one percent.

(16) *Put* shall mean a right to sell a specified underlying security or securities within a specified period of time and at an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise, that may be sold, transferred or assigned only with the underlying security or securities. A Put will be considered to be from the party to whom the money market fund will look for payment of the exercise price.

(17) *Put Issued by a Non-Controlled Person* shall mean a Put issued by a person that, directly or indirectly, does not control, and is not controlled by or under common control with the issuer of the security subject to the Put. *Control* shall mean "control" as defined in section 2(a)(9) of the Act [15 U.S.C 80a–2(a)(9)].

(18) *Refunded Security* shall mean a debt security the principal and interest payments of which are to be paid by Government Securities ("deposited securities") that have been irrevocably placed in an escrow account pursuant to agreement between the issuer of the debt security and an escrow agent that is not an affiliated person, as defined in section 2(a)(3)(C) of the Act [15 U.S.C. 80a–2(a)(3)(C)], of the issuer of the debt security, and, in accordance with such escrow agreement, are pledged only to the payment of the debt security and, to the extent that excess proceeds are available after all payments of principal, interest, and applicable premiums on the Refunded Securities, the expenses of the escrow agent and, thereafter, to the issuer or another party; *provided* that:

(i) The deposited securities shall not be redeemable prior to their final maturity;

(ii) At the time the deposited securities are placed in the escrow account, an independent certified public accountant shall have certified to the escrow agent that the deposited securities will satisfy all scheduled payments of principal, interest and applicable premiums on the Refunded Securities; and

(iii) The escrow agreement shall prohibit the substitution of the deposited securities unless the substituted securities are Government Securities and, at the time of such substitution, the escrow agent shall have received a certification from an independent certified public accountant substantially the same as that required by paragraph (a)(18)(ii) of this section which certification shall give effect to the substitution.

(19) *Requisite NRSROs* shall mean:

(i) Any two NRSROs that have issued a rating with respect to a security or class of debt obligations of an issuer; or

(ii) If only one NRSRO has issued a rating with respect to such security or class of debt obligations of an issuer at the time the fund purchases or rolls over the security, that NRSRO.

(20) *Second Tier Security* shall mean any Eligible Security that is not a First Tier Security. *Second Tier Conduit Security* shall mean any Conduit Security that is an Eligible Security that is not a First Tier Security.

(21) *Single State Fund* shall mean a Tax Exempt Fund that holds itself out as primarily distributing income exempt

from the income taxes of a specified state or locality.

(22) *Standby Commitment* shall mean a Put that entitles the holder to achieve same day settlement.

(23) *Tax Exempt Fund* shall mean any money market fund that holds itself out as distributing income exempt from regular federal income tax.

(24) *Total Assets* shall mean, with respect to a money market fund using the Amortized Cost Method, the total amortized cost of its assets and, with respect to any other money market fund, the total market-based value of its assets.

(25) *Unconditional Demand Feature* shall mean an Unconditional Put that is also a Demand Feature.

(26) *Unconditional Demand Feature Issued By A Non-Controlled Person* shall mean an Unconditional Put that is also a Demand Feature Issued By A Non-Controlled Person.

(27) *Unconditional Put* shall mean a Put (including any guarantee, financial guarantee (bond) insurance, letter of credit or similar unconditional credit enhancement) that by its terms would be readily exercisable in the event of a default in payment of principal or interest on the underlying security or securities.

(28) *United States Dollar-Denominated* shall mean, with reference to a security, that all principal and interest payments on such security are payable to security holders in United States dollars under all circumstances and that the interest rate of, the principal amount to be repaid, and the timing of payments related to such security do not vary or float with the value of a foreign currency, the rate of interest payable on foreign currency borrowings, or with any other interest rate or index expressed in a currency other than United States dollars.

(29) *Unrated Security* shall mean:

(i) A security with a remaining maturity of 397 calendar days or less issued by an issuer that did not, at the time the security was acquired or rolled over by the fund, have a current short-term rating assigned by any NRSRO:

(A) To the security; or

(B) To the issuer of the security with respect to a class of debt obligations (or any debt obligation within that class) that is comparable in priority and security with the security, or a Demand Feature with respect to the security; and

(ii) A security:

(A) That at the time of issuance had a remaining maturity of more than 397 calendar days but that has a remaining maturity of 397 calendar days or less; and

(B) Whose issuer had not at the time it was acquired or rolled over by the fund received from any NRSRO a short-term rating with respect to a class of debt obligations (or any debt obligation within that class) that now is comparable in priority and security with the security; and

(iii) A security that is a rated security and is the subject of an external credit support agreement (including an arrangement by which the security has become a Refunded Security) that was not in effect when the security (or the issuer) was assigned its rating unless the security has a rating from an NRSRO reflecting the existence of the credit support agreement.

(iv) A security is not an Unrated Security if any debt obligation (*reference security*) that is issued by the same issuer and is comparable in priority and security with that security has a short-term rating by an NRSRO. The status of such security as an Eligible Security or First Tier Security shall be the same as that of the reference security.

(30) *Variable Rate Security* shall mean a security the terms of which provide for the adjustment of its interest rate on set dates (such as the last day of a month or calendar quarter) and which, upon each adjustment until the final maturity of the instrument or the period remaining until the principal amount can be recovered through demand, can reasonably be expected to have a market value that approximates its amortized cost.

(b) *Holding Out.* It shall be an untrue statement of material fact within the meaning of section 34(b) of the Act [15 U.S.C. 80a–33(b)] for a registered investment company, in any registration statement, application, report, account, record, or other document filed or transmitted pursuant to the Act, including any advertisement, pamphlet, circular, form letter, or other sales literature addressed to or intended for distribution to prospective investors that is required to be filed with the Commission by section 24(b) of the Act [15 U.S.C. 80a–24(b)] to:

(1) Adopt the term "money market" as part of its name or title or the name or title of any redeemable securities of which it is the issuer; or

(2) Hold itself out to investors as, or adopt a name which suggests that it is, a money market fund or the equivalent of a money market fund, unless such registered investment company meets the conditions of paragraphs (c)(2), (c)(3), and (c)(4) of this section. For purposes of this paragraph, a name which suggests that a registered investment company is a money market fund or the equivalent thereof shall include one which uses such terms as "cash," "liquid," "money," "ready assets" or similar terms.

(c) *Share Price Calculations.* The current price per share, for purposes of distribution, redemption and repurchase, of any redeemable security issued by any registered investment company ("money market fund"), notwithstanding the requirements of section 2(a)(41) of the Act [15 U.S.C. 80a–2(a)(41)] and of §§ 270.2a–4 and 270.22c–1 thereunder, may be computed by use of the Amortized Cost Method or the Penny-Rounding Method; *Provided, however,* That:

(1) *Board Findings.* The board of directors of the money market fund shall determine, in good faith, that it is in the best interests of the fund and its shareholders to maintain a stable net asset value per share or stable price per share, by virtue of either the Amortized Cost Method or the Penny-Rounding Method, and that the money market fund will continue to use such method only so long as the board of directors believes that it fairly reflects the market-based net asset value per share.

(2) *Portfolio Maturity.* The money market fund shall maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share or price per share; *Provided, however,* That the money market fund will not:

(i) Except as provided in paragraph (c)(2)(ii) of this section, purchase any instrument with a remaining maturity of greater than 397 calendar days; or

(ii) In the case of a money market fund not using the Amortized Cost Method, purchase a Government Security with a remaining maturity of greater than 762 calendar days; or

(iii) Maintain a dollar-weighted average portfolio maturity that exceeds ninety days.

(3) *Portfolio Quality.*

(i) *General.* The money market fund shall limit its portfolio investments, including Puts and repurchase agreements, to those United States Dollar-Denominated securities that the fund's board of directors determines present minimal credit risks (which determination must be based on factors pertaining to credit quality in addition to any rating assigned to such securities by an NRSRO) and which are at the time of acquisition Eligible Securities.

(ii) *Securities Subject to Unconditional Demand Features.* A security that is subject to an Unconditional Demand Feature may be determined to be an Eligible Security or a First Tier Security based solely on whether the Unconditional Demand Feature is an Eligible Security or First Tier Security, as the case may be.

(iii) *Securities Subject to Conditional Demand Features.* A security that is subject to a Conditional Demand Feature ("Underlying Security") may be determined to be an Eligible Security or a First Tier Security only if:

(A) The Conditional Demand Feature is an Eligible Security or First Tier Security, as the case may be; and

(B) At the time of the purchase of the Underlying Security, the money market fund's board of directors has determined that there is minimal risk that the circumstances that would result in the Conditional Demand Feature not being exercisable will occur; and

(*1*) The conditions limiting exercise either can be monitored readily by the fund, or relate to the taxability, under federal, state or local law, of the interest payments on the security; or

(*2*) The terms of the Conditional Demand Feature require that the fund will receive notice of the occurrence of the condition and the opportunity to exercise the Demand Feature in accordance with its terms; and

(C) (*1*) If the Underlying Security has a remaining maturity of 397 days or less, the Underlying Security (or the debt securities of issuer of the Underlying Security) has received a short-term rating by the Requisite NRSROs within the NRSROs' two highest short-term ratings categories (within which there may be sub-categories or gradations indicating relative standing) or, if unrated, is determined to be of comparable quality by the money market fund's board of directors; or

(*2*) If the Underlying Security has a remaining maturity of more than 397 calendar days, the Underlying Security (or the debt securities of the issuer of the Underlying Security) has received a long-term rating by the Requisite NRSROs within the NRSROs' two highest long-term rating categories (within which there may be sub-categories or gradations indicating relative standing) or, if unrated, is determined to be of comparable quality by the money market fund's board of directors.

(4) *Portfolio Diversification.*

(i) *Taxable and National Funds.* Immediately after the acquisition of any security (other than a Government Security or a security subject to an Unconditional Demand Feature Issued By a Non-Controlled Person), a money market fund other than a Single State Fund shall not have invested more than five percent of its Total Assets in securities issued by the issuer of the security.

(ii) *Single State Funds.* With respect to 75 percent of its Total Assets, immediately after the acquisition of any security (other than a Government Security or a security subject to an Unconditional Demand Feature Issued By a Non-Controlled Person), a Single State Fund shall not have invested more than five percent of its Total Assets in securities issued by the issuer of the security; *Provided, however,* That a Single State Fund shall not invest more than five percent of its Total Assets in securities issued by the issuer of the security unless the securities are First Tier Securities.

(iii) *Safe Harbor.* Notwithstanding paragraph (c)(4)(i) of this section, a money market fund other than a Single State Fund may invest up to twenty-five percent of its Total Assets in the First Tier Securities of a single issuer for a period of up to three Business days after the purchase thereof.

(iv) *Second Tier Securities.*

(A) *Taxable Funds.* Immediately after the acquisition of any Second Tier Security, a money market fund that is not a Tax Exempt Fund shall not have invested more than:

(*1*) The greater of one percent of its Total Assets or one million dollars in securities issued by that issuer which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Securities; and

(*2*) Five percent of its Total Assets in securities which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Securities.

(B) *Tax Exempt Funds.* Immediately after the acquisition of any Second Tier Conduit Security that is not subject to an Unconditional Demand Feature Issued By a Non-Controlled Person, a money market fund that is a Tax Exempt Fund shall not have invested more than:

(*1*) The greater of one percent of its Total Assets or one million dollars in securities issued by that issuer which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Conduit Securities not subject to an Unconditional Demand Feature Issued By a Non-Controlled Person; and

(*2*) Five percent of its Total Assets in Conduit Securities which, when acquired by the money market fund (either initially or upon any subsequent roll over) were Second Tier Conduit Securities not subject to an Unconditional Demand Feature Issued By a Non-Controlled Person.

(v) *Puts.*

(A) *General.* Immediately after the acquisition of any Put or security subject to a Put, with respect to seventy-five percent of the assets of a money market fund, no more than ten percent of the fund's Total Assets may be invested in securities issued by or subject to Puts from the institution that issued the Put, subject to sections (c)(4)(v)(B) and (C) of this section.

(B) *Second Tier Puts.* Immediately after the acquisition of any Put (or a security after giving effect to the Put) that is a Second Tier Security, a money market fund shall not have invested more than five percent of its Total Assets in securities issued by or subject to Puts from the institution that issued the Put.

(C) *Puts Issued by Non-Controlled Persons.* Immediately after the acquisition of any security subject to a Put, a money market fund shall not have invested more than ten percent of its Total Assets in securities issued by, or subject to Puts from the institution that issued the Put, unless, with respect to any security subject to Puts from that institution, the Put is a Put Issued By a Non-Controlled Person.

(iv) *Diversification Calculations.*

(A) *General.* For purposes of making calculations under paragraphs (c)(4)(i) through (iv) of this section:

(*1*) *Repurchase Agreements.* The acquisition of a repurchase agreement may be deemed to be an acquisition of the underlying securities, provided that the obligation of the seller to repurchase the securities from the money market fund is Collateralized Fully.

(*2*) *Refunded Securities.* The acquisition of a Refunded Security shall be deemed to be an acquisition of a Government Security.

(*3*) *Conduit Securities.* A Conduit Security shall be deemed to be issued by the issuer (other than the Municipal Issuer) ultimately responsible for payments of interest and principal on the security.

(*4*) *Asset Backed Securities.* An Asset Backed Security shall be deemed to be issued by the Special Purpose Entity that issued the Asset Backed Security, *Provided, however,* any person whose obligations constitute ten percent or more of the principal amount of the Qualifying Assets shall be deemed to be an issuer of the portion of the Asset Backed Security such obligations represent. For purposes of the foregoing, if the Qualifying Assets held by the Special Purpose Entity are themselves Asset Backed Securities ("Secondary Asset Backed Securities"), then the Special Purpose Entity shall be treated as holding directly the Secondary Asset Backed Securities.

(*5*) *Shares in Master Funds.* A money market fund substantially all of the

assets of which consist of shares of another money market fund acquired in reliance on section 12(d)(1)(E) of the Act [15 U.S.C. 80a–12(d)(1)(E)] shall be deemed to be in compliance with this section if the board of directors reasonably believes that the money market fund in which it has invested is in compliance with this section.

(B) *Put Diversification Calculations.* In making calculations under the Put diversification requirements of paragraph (c)(4)(v) of this section, the following rules apply:

(*1*) *Issuer-Provided Puts.* In the case of a security subject to a Put from the same institution that issued the underlying security, the value of the securities subject to the Put may be excluded from the Put diversification requirements of paragraph (c)(4)(v) of this section.

(*2*) *Fractional Puts.* In the case of a security subject to a Put from an institution by which the institution guarantees a specified portion of the value of the security, the institution shall be deemed to guarantee the specified portion thereof, *Provided, however,* if the security is an Asset Backed Security and the Put is a guarantee of all or a portion of the first losses with respect to the security, the institution providing the Put shall be deemed to have guaranteed the entire principal amount of the security.

(*3*) *Layered Puts.* In the case of a security subject to Puts from multiple institutions that have not limited the extent of their obligations as described in paragraph (c)(4)(vi)(B)(*2*) of this section, each institution shall be deemed to have guaranteed the entire principal amount of the security, *Provided, however,* in the case of a security subject to an Unconditional Demand Feature and a Put (or Puts) that is not a Demand Feature, the Put diversification requirements of paragraph (c)(4)(v) of this section need only be satisfied as to the institution issuing the Unconditional Demand Feature.

(*4*) *Puts Not Relied Upon.* If the fund's board of directors determines that the fund is not relying on a Put to determine the quality (pursuant to paragraphs (c)(3)(ii) or (c)(3)(iii) of this section), or maturity (pursuant to paragraph (d) of this section), or liquidity of the portfolio security and maintains a record of this determination (pursuant to paragraphs (c)(8)(ii) and (c)(9)(vi) of this section), the Put diversification requirements of paragraph (c)(4)(v) of this section need not be satisfied as with respect to such put.

(vii) *Diversification Safe Harbor.* A money market fund that satisfies the applicable diversification requirements of paragraph (c)(4) of this section shall be deemed to have satisfied the diversification requirements of section 5(b)(1) of the Act [15 U.S.C. 80a–5(b)(1)] and the rules adopted thereunder.

(5) *Downgrades, Defaults and Other Events.*

(i) *Downgrades.*

(A) *General.* Upon the occurrence of either of the events specified in paragraphs (c)(5)(i)(A)(*1*) and (*2*) of this section with respect to a portfolio security, the board of directors of the money market fund shall reassess promptly whether such security continues to present minimal credit risks and shall cause the fund to take such action as the board of directors determines is in the best interests of the money market fund and its shareholders:

(*1*) A portfolio security of a money market fund ceases to be a First Tier Security (either because it no longer has the highest rating from the Requisite NRSROs or, in the case of an Unrated Security, the board of directors of the money market fund determines that it is no longer of comparable quality to a First Tier Security); and

(*2*) The money market fund's investment adviser (or any person to whom the fund's board of directors has delegated portfolio management responsibilities) becomes aware that any Unrated Security or Second Tier Security held by the money market fund has, since the security was acquired by the fund, been given a rating by any NRSRO below the NRSRO's second highest rating category.

(B) *Securities To Be Disposed Of.* The reassessments required by paragraph (c)(5)(i)(A) of this section shall not be required if, in accordance with the procedures adopted by the board of directors, the security is disposed of (or matures) within five Business days of the specified event and, in the case of events specified in paragraph (c)(5)(i)(A)(*2*) of this section, the board is subsequently notified of the adviser's actions.

(C) *Special Rule for Certain Securities Subject to Demand Features.* In the event that after giving effect to a rating downgrade, more than five percent of the fund's Total Assets are invested in securities issued by or subject to Demand Features from a single institution that are Second Tier Securities, the board of directors (or its delegate) shall cause the fund to reduce its investment in securities issued by or subject to Demand Features from that institution to no more than five percent of its Total Assets by exercising the Demand Features at the next succeeding exercise date(s), absent a finding by the board of directors that disposal of the portfolio security would not be in the best interests of the money market fund.

(ii) *Defaults and Other Events.* Upon the occurrence of any of the events specified in paragraphs (c)(5)(ii)(A) through (D) of this section with respect to a portfolio security, the money market fund shall dispose of such security as soon as practicable consistent with achieving an orderly disposition of the security, by sale, exercise of any Demand Feature or otherwise, absent a finding by the board of directors that disposal of the portfolio security would not be in the best interests of the money market fund (which determination may take into account, among other factors, market conditions that could affect the orderly disposition of the portfolio security):

(A) The default with respect to a portfolio security (other than an immaterial default unrelated to the financial condition of the issuer);

(B) A portfolio security ceases to be an Eligible Security;

(C) A portfolio security has been determined to no longer present minimal credit risks; or

(D) An Event of Insolvency occurs with respect to the issuer of or the provider of any Put with respect to a portfolio security other than a Put with respect to which a non-reliance determination has been made pursuant to paragraph (c)(4)(vi)(B)(*4*) of this section.

(iii) *Notice to the Commission.* In the event of a default with respect to one or more portfolio securities (other than an immaterial default unrelated to the financial condition of the issuer) or an Event of Insolvency with respect to the issuer of the security or any Put to which it is subject, where immediately before default the securities (or the securities subject to the Put) accounted for ½ of 1 percent or more of a money market fund's Total Assets, the money market fund shall promptly notify the Commission of such fact and the actions the money market fund intends to take in response to such situation. Notification under this paragraph shall be made telephonically or by means of a facsimile transmission, followed by letter sent by first class mail, directed to the attention of the Director of the Division of Investment Management.

(iv) *Defaults for Purposes of Paragraphs (c)(5)(ii) and (iii).* For purposes of paragraphs (c)(5)(ii) and (iii) of this section, an instrument subject to a Demand Feature or unconditional credit enhancement shall not be deemed to be in default (and an Event of Insolvency with respect to the security shall not be deemed to have occurred) if:

(A) In the case of an instrument subject to a Demand Feature, the Demand Feature has been exercised and the fund has recovered either the principal amount or the amortized cost of the instrument, plus accrued interest; or

(B) The provider of the credit enhancement is continuing, without protest, to make payments as due on the instrument.

(6) *Required Procedures: Amortized Cost Method.* In the case of a money market fund using the Amortized Cost Method:

(i) *General.* In supervising the money market fund's operations and delegating special responsibilities involving portfolio management to the money market fund's investment adviser, the money market fund's board of directors, as a particular responsibility within the overall duty of care owed to its shareholders, shall establish written procedures reasonably designed, taking into account current market conditions and the money market fund's investment objectives, to stabilize the money market fund's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at a single value.

(ii) *Specific Procedures.* Included within the procedures adopted by the board of directors shall be the following:

(A) *Shadow Pricing.* Written procedures shall provide:

(*1*) That the extent of deviation, if any, of the current net asset value per share calculated using available market quotations (or an appropriate substitute which reflects current market conditions) from the money market fund's amortized cost price per share, shall be calculated at such intervals as the board of directors determines appropriate and reasonable in light of current market conditions;

(*2*) For the periodic review by the board of directors of the amount of the deviation as well as the methods used to calculate the deviation; and

(*3*) For the maintenance of records of the determination of deviation and the board's review thereof.

(B) *Prompt Consideration of Deviation.* In the event such deviation from the money market fund's amortized cost price per share exceeds ½ of 1 percent, the board of directors shall promptly consider what action, if any, should be initiated by the board of directors.

(C) *Material Dilution or Unfair Results.* Where the board of directors believes the extent of any deviation from the money market fund's amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall cause the fund to take such action as it deems appropriate to eliminate or reduce to the extent reasonably practicable such dilution or unfair results.

(7) *Required Procedures: Penny-Rounding Method.* In the case of a money market fund using the Penny-Rounding Method, in supervising the money market fund's operations and delegating special responsibilities involving portfolio management to the money market fund's investment adviser, the money market fund's board of directors undertakes, as a particular responsibility within the overall duty of care owed to its shareholders, to assure to the extent reasonably practicable, taking into account current market conditions affecting the money market fund's investment objectives, that the money market fund's price per share as computed for the purpose of distribution, redemption and repurchase, rounded to the nearest one percent, will not deviate from the single price established by the board of directors.

(8) *Specific Procedures: Amortized Cost and Penny-Rounding Methods.* Included within the procedures adopted by the board of directors for money market funds using either the amortized cost or penny-rounding methods shall be the following:

(i) *Securities for Which Maturity is Determined by Reference to Demand Features.* In the case of a security for which maturity is determined by reference to a Demand Feature, written procedures shall require ongoing review of the security's continued minimal credit risks, which review must be based on, among other things, financial data for the most recent fiscal year of the issuer of the Demand Feature and, in the case of a security subject to a Conditional Demand Feature, the issuer of the security, whether such data is publicly available or provided under the terms of the security's governing documentation.

(ii) *Securities Subject to Puts.* In the case of a security subject to one or more Puts, written procedures shall require periodic evaluation of the determination described in paragraph (c)(4)(vi)(B)(*4*)(puts not relied upon) of this section.

(iii) *Adjustable Rate Securities Without Demand Features.* In the case of a Variable Rate or Floating Rate Security that does not have a Demand Feature and for which maturity is determined pursuant to paragraphs (d)(1), (d)(2) or (d)(4) of this section, written procedures shall require periodic review of whether the security, upon readjustment of its interest rate, can reasonably be expected to have a market value that approximates its amortized cost.

(iv) *Asset Backed Securities.* In the case of an Asset Backed Security, written procedures shall require the fund to periodically determine whether a person other than the Special Purpose Entity is the issuer of all or a portion of the Asset Backed Security for purposes of paragraph (c)(4)(vi)(A)(*4*) of this section.

(9) *Record Keeping and Reporting.*

(i) *Written Procedures.* For a period of not less than six years following the replacement of such procedures with new procedures (the first two years in an easily accessible place), a written copy of the procedures (and any modifications thereto) described in paragraphs (c)(5) through (c)(8) and (e) of this section shall be maintained and preserved.

(ii) *Board Considerations and Actions.* For a period of not less than six years (the first two years in an easily accessible place), a written record shall be maintained and preserved of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth in this section, to be included in the minutes of the board of directors' meetings.

(iii) *Credit Risk Analysis.* For a period of not less than three years from the date that the credit risks of a portfolio security were most recently reviewed in accordance with paragraph (c)(8)(i) of this section, a written record of the determination that a portfolio security presents minimal credit risks and the NRSRO ratings (if any) used to determine the status of the security as an Eligible Security, First Tier Security or Second Tier Security shall be maintained and preserved in an easily accessible place.

(iv) *Determinations With Respect to Adjustable Rate Securities.* For a period of not less than three years from the date when the determination was most recently made, a written record shall be preserved and maintained, in an easily accessible place, of the determination required by paragraph (c)(8)(iii) of this section (that a Variable Rate or Floating Rate Security that does not have a Demand Feature and for which maturity is determined pursuant to paragraphs (d)(1), (d)(2) or (d)(4) of this section can reasonably be expected, upon readjustment of its interest rate at all times during the life of the instrument, to have a market value that approximates its amortized cost).

(v) *Determinations with Respect to Asset Backed Securities.* For a period of not less than three years from the date when the determination was most recently made, a written record shall be preserved and maintained, in an easily accessible place, of the determination required by paragraph (c)(8)(iv) of this section (whether a person other than the Special Purpose Entity is the issuer of all or a portion of an Asset Backed Security pursuant to paragraph (c)(vi)(4) of this section). The written record shall include the identities of the issuers of the Qualifying Assets whose obligations constitute ten percent or more of the principal value of the Qualifying Assets, the percentage of the Qualifying Assets constituted by the securities of each such issuer and the percentage of the fund's Total Assets that are invested in securities of each such issuer.

(vi) *Evaluations with Respect to Securities Subject to Puts.* For a period of not less than three years from the date when the evaluation was most recently made, a written record shall be preserved and maintained, in an easily accessible place, of the evaluation required by paragraph (c)(8)(ii) (regarding securities subject to one or more Puts) of this section.

(vii) Inspection of Records. The documents preserved pursuant to this paragraph (c)(9) shall be subject to inspection by the Commission in accordance with section 31(b) of the Act [15 U.S.C. 80a–30(b)] as if such documents were records required to be maintained pursuant to rules adopted under section 31(a) of the Act [15 U.S.C. 80a–30(a)]. If any action was taken under paragraphs (c)(5)(ii) (with respect to defaulted securities and events of insolvency) or (c)(6)(ii) (with respect to a deviation from the fund's share price of more than ½ of 1 percent) of this section, the money market fund will file an exhibit to the Form N–SAR [17 CFR 274.101] filed for the period in which the action was taken describing with specificity the nature and circumstances of such action. The money market fund will report in an exhibit to such Form any securities it holds on the final day of the reporting period that are not Eligible Securities.

(d) *Maturity of Portfolio Securities.* For purposes of this section, the maturity of a portfolio security shall be deemed to be the period remaining (calculated from the trade date or such other date on which the fund's interest in the security is subject to market action) until the date on which, in accordance with the terms of the security, the principal amount must unconditionally be paid, or in the case of a security called for redemption, the date on which the redemption payment must be made, except as provided in paragraphs (d)(1) through (8) of this section:

(1) *Adjustable Rate Government Securities.* A Government Security which is a Variable Rate Security where the variable rate of interest is readjusted no less frequently than every 762 days shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. A Government Security which is a Floating Rate Security shall be deemed to have a remaining maturity of one day.

(2) *Short-Term Variable Rate Securities.* A Variable Rate Security, the principal amount of which, in accordance with the terms of the security, must unconditionally be paid in 397 calendar days or less shall be deemed to have a maturity equal to the earlier of the period remaining until the next readjustment of the interest rate or the period remaining until the principal amount can be recovered through demand.

(3) *Long-Term Variable Rate Securities.* A Variable Rate Security, the principal amount of which is scheduled to be paid in more than 397 days, that is subject to a Demand Feature shall be deemed to have a maturity equal to the longer of the period remaining until the next readjustment of the interest rate or the period remaining until the principal amount can be recovered through demand.

(4) *Short-Term Floating Rate Securities.* A Floating Rate Security, the principal amount of which, in accordance with the terms of the security, must unconditionally be paid in 397 calendar days or less shall be deemed to have a maturity of one day.

(5) *Long-Term Floating Rate Securities.* A Floating Rate Security, the principal amount of which is scheduled to be paid in more than 397 days, that is subject to a Demand Feature, shall be deemed to have a maturity equal to the period remaining until the principal amount can be recovered through demand.

(6) *Repurchase Agreements.* A repurchase agreement shall be deemed to have a maturity equal to the period remaining until the date on which the repurchase of the underlying securities is scheduled to occur, or, where the agreement is subject to demand, the notice period applicable to a demand for the repurchase of the securities.

(7) *Portfolio Lending Agreements.* A portfolio lending agreement shall be treated as having a maturity equal to the period remaining until the date on which the loaned securities are scheduled to be returned, or where the agreement is subject to demand, the notice period applicable to a demand for the return of the loaned securities.

(8) *Money Market Fund Securities.* An investment in a money market fund shall be treated as having a maturity equal to the period of time within which the acquired money market fund is required to make payment upon redemption, unless the acquired money market fund has agreed in writing to provide redemption proceeds to the investing money market fund within a shorter time period, in which case the maturity of such investment shall be deemed to be the shorter period.

(e) *Delegation.* The money market fund's board of directors may delegate to the fund's investment adviser or officers the responsibility to make any determination required to be made by the board of directors under this section (other than the determinations required by paragraphs (c)(1), (c)(5)(i)(C), (c)(5)(ii), (c)(6)(i), (c)(6)(ii)(A), (B), and (C), and (c)(7) of this section) provided:

(1) *Written Guidelines.* The Board shall establish and periodically review written guidelines (including guidelines for determining whether securities present minimal credit risks as required in paragraph (c)(3) of this section) and procedures under which the delegate makes such determinations:

(2) *Oversight.* The Board shall exercise adequate oversight (through periodic reviews of fund investments and the delegate's procedures in connection with investment decisions and prompt review of the adviser's actions in the event of the default of a security or Event of Insolvency with respect to the issuer of the security or any Put to which it is subject that requires notification of the Commission under paragraph (c)(5)(iii) of this section) to assure that the guidelines and procedures are being followed.

5. Section 270.2a41–1 is amended by revising paragraph (a) introductory text to read as follows:

§ 270.2a41–1 Valuation of standby commitments by registered investment companies.

(a) A standby commitment as defined in § 270.2a–7(a)(22) may be assigned a fair value of zero, Provided, That:

* * * * * *

6. Section 270.12d3–1 is amended by revising paragraph (d)(7)(v) to read as follows:

§ 270.12d3–1 Exemption of acquisitions of securities issued by persons engaged in securities related businesses.

* * * * *

(d) * * *

(7) * * *

(v) Acquisition of Puts, as defined in § 270.2a–7(a)(16), provided that, immediately after the acquisition of any Put, the company will not, with respect to 75 percent of the total value of its assets, have invested more than ten percent of the total value of its assets in securities underlying Puts from the same institution. For the purposes of this section, a Put will be considered to be from the party to whom the company will look for payment of the exercise price.

* * * * *

7. Section 270.17a–9 is added to read as follows:

§ 270.17a–9 Purchase of certain securities from a money market fund by an affiliate, or an affiliate of an affiliate.

The purchase of a security that is no longer an Eligible Security (as defined in paragraph (a)(9) of § 270.2a–7) from an open-end investment company holding itself out as a "money market" fund shall be exempt from section 17(a) of the Act [15 U.S.C. 80a–17(a)], provided that:

(a) The purchase price is paid in cash; and

(b) The purchase price is equal to the greater of the amortized cost of the security or its market price (in each case, including accrued interest).

8. Section 270.31a–1 is amended by adding a sentence to the end of paragraph (b)(1) to read as follows:

§ 270.31a–1 Records to be maintained by registered investment companies, certain majority-owned subsidiaries thereof, and other persons having transactions with registered investment companies.

* * * * *

(b) * * *

(1) * * * In the case of a money market fund, also identify the provider of any put (as defined in § 270.2a–7(a)(16)) or guarantee with respect to a portfolio security and give a brief description of the nature of the put (*e.g.,* unconditional demand feature, conditional demand feature, guarantee, letter of credit, or bond insurance) and, in a subsidiary portfolio investment record, provide the complete legal name and accounting and other information (including sufficient information to calculate coupons, accruals, maturities, puts, and calls) necessary to identify, value, and account for each investment.

Item 4. General Description of Registrant

* * * * *

(c) * * * In the case of a Registrant that holds itself out as a money market fund primarily distributing income exempt from the income taxes of a specified state or locality ("single state fund"), a prominent statement that the registrant is concentrated in securities issued by the state or entities within the state and that therefore investment in the Registrant may be riskier than an investment in other types of money market funds.

* * * * *

Note: Form N–3 does not and the amendments will not appear in the Code of Federal Regulations.

§§ 239.17a and 274.11b [Amended]

13. Form N–3 (referenced in 17 CFR 239.17a and 274.11b) is amended by adding Instruction 11.e. to Part A, paragraph (a) of Item 4 to read as follows:

FORM N–3

* * * * *

PART A—INFORMATION REQUIRED IN A PROSPECTUS

* * * * *

Item 4. Condensed Financial Information

(a) * * *

Instructions

11. The portfolio turnover rate to be shown at caption 10 shall be calculated as follows:

* * * * *

e. A registrant that holds itself out as a money market fund is not required to provide a portfolio turnover rate in response to this Item.

* * * * *

Note: Form N–SAR does not and the amendments will not appear in the Code of Federal Regulations.

§ 274.101 [Amended]

14. Form N–SAR (referenced in 17 CFR 274.101) is amended by revising the definition of "Money Market Fund" in General Instruction G to read as follows:

FORM N–SAR

* * * * *

GENERAL INSTRUCTIONS

* * * * *

G. Definitions

* * * * *

Money Market Fund: The term "money market fund" shall mean any open-end fund that meets the maturity, quality and diversification conditions of paragraphs (c)(2), (c)(3), and (c)(4) of rule 2a–7 [17 CFR 270.2a–7].

* * * * *

15. Form N–SAR (referenced in 17 CFR 274.101) is amended by revising the last sentence of the Instruction to Item 63 to read as follows:

FORM N–SAR

* * * * *

Instructions to Specific Items

* * * * *

ITEM 63: Dollar weighted average maturity

* * * A money market fund shall determine the weighted average portfolio maturity in the same manner as it would in monitoring compliance with the average portfolio maturity provisions of rule 2a–7.

16. Form N–SAR (referenced in 17 CFR 274.101) is amended by adding a sentence at the end of the first paragraph of the Instruction to Item 71 to read as follows:

FORM N–SAR

* * * * *

Instructions to Specific Items

* * * * *

ITEM 71: Portfolio turnover rate

* * * A money market fund should enter a portfolio turnover rate of "0" even if it owns securities that have maturities in excess of one year.

* * * * *

17. Guide 21 (Disclosure of Risk Factors) to Form N–1A (referenced in 17 CFR 239.15A and 274.11A) is amended by adding a paragraph to the end of the Guide to read as follows:

Guide 21. Disclosure of Risk Factors

* * * * *

In many cases, a substantial portion of the portfolio securities held by tax exempt money market funds is supported by credit and liquidity enhancements from third parties, generally letters of credit from foreign or domestic banks. These securities include variable rate demand notes, tender or "put" bonds and similar securities. Where more than forty percent of a money market fund registrant's portfolio consists, or is likely to consist, of securities subject to these features, the registrant should, in response to Item 4, state that, because the fund invests in securities backed by banks and other financial institutions, changes in the credit quality of these institutions could cause losses to the fund and effect its share price.

§§ 239.15A and 274.11A [Amended]

18. Guide 35 is added to Form N–1A (referenced in 17 CFR 239.15A and 274.11A) to read as follows:

Guide 35. Money Market Fund Investments in Other Money Market Funds.

Money market funds are permitted to invest in the securities of other money market funds in accordance with the provisions of rule 2a–7 and section 12(d)(1) of the 1940 Act. Except when a fund has invested substantially all of its assets in the other money market fund, the investing fund does not need to "look through" the shares of the fund(s) in which it is investing in order to determine compliance with the diversification or Second Tier Security limitations of rule 2a–7.[45] However, the investment objectives and policies of the money market fund making the investment and the money market fund(s) in which it is investing should not be inconsistent. Paragraph (c)(4)(iv)(A)(*5*) of rule 2a–7 describes the obligations of a fund that invests substantially all of its asset in another money market fund.

§§ 239.17a and 274.11b [Amended]

19. Guide 38 is added to Form N–3 (referenced in 17 CFR 239.17a and 274.11b) to read as follows:

Guide 38. Money Market Fund Investments in Other Money Market Funds

Money market funds are permitted to invest in the securities of other money market funds in accordance with the provisions of rule 2a–7 and section 12(d)(1) of the 1940 Act. Except when a fund has invested substantially all of its assets in the other money market fund, the investing fund does not need to "look through" the shares of the fund(s) in which it is investing in order to determine compliance with the diversification or Second Tier Security limitations of rule 2a–7.[45] However, the investment objectives and policies of the money market fund making the investment and the money market fund(s) in which it is investing should not be inconsistent. Paragraph (c)(4)(iv)(A)(*5*) of rule 2a–7 describes the obligations of a fund that invests substantially all of its assets in another money market fund.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Consolidated Drug Elimination Program Requirements for Assisted Housing and Public Housing; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Parts 261, 761, and 961

[Docket No. FR–3997–F–01]

RIN 2501–AC18

Consolidated Drug Elimination Program Requirements for Assisted Housing and Public Housing

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This final rule consolidates and streamlines HUD's regulations for the Assisted Housing Drug Elimination Program and the Public Housing Drug Elimination Program. This rule is part of HUD's efforts to comply with the President's regulatory reform initiatives. Since the requirements for the two programs are very similar, this consolidation will eliminate redundant and unnecessary provisions in HUD's regulations.

EFFECTIVE DATE: April 29, 1996.

FOR FURTHER INFORMATION CONTACT: *For questions concerning the Assisted Housing Drug Elimination Program (AHDEP), contact:* Michael E. Diggs, Office of Multifamily Housing Programs, Office of Housing, Room 6130, telephone number (202) 708–0614, ext. 2514.

For questions concerning the Public Housing Drug Elimination Program (PHDEP), contact: Malcolm E. (Mike) Main, Crime Prevention and Security Division, Office of Community Relations and Involvement, Office of Public and Indian Housing, Room 4116, telephone (202) 708–1197, ext. 4232.

The address for the above persons is: Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Hearing- or speech-impaired persons may call (800) 877–8339 (Federal Information Relay Service TDD). (Except for the "800" number, these telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION:

I. Background

The Public Housing Drug Elimination Program was first authorized by chapter 2, subtitle C, title V of the Anti-Drug Abuse Act of 1988 (42 U.S.C. 11901–11908). The purpose of the Drug Elimination Program is to make grants for use in eliminating drug-related crime and the problems associated with it. HUD first issued implementing regulations for this program in 24 CFR part 961 on July 3, 1990 (55 FR 27598). Under this original authorization, public housing agencies (PHAs) and Indian housing authorities (IHAs) were eligible to apply for and receive grants under the program. (IHAs and PHAs will be collectively referred to as HAs.)

Section 581 of the National Affordable Housing Act (NAHA) (Pub. L. 101–625, approved November 28, 1990) amended the Public Housing Drug Elimination Program in a number of ways, and HUD implemented these amendments through a final rule published on January 7, 1993 (58 FR 3160). As described in the preamble to the January 7, 1993 final rule, that rule also implemented two amendments to the program from the Housing and Community Development Act of 1992 (Pub. L. 102–550, approved October 28, 1992).

In addition to enhancing the Public Housing Drug Elimination Program, the National Affordable Housing Act included the authorization for the Assisted Housing Drug Elimination Program. Under the Assisted Housing Program, HUD can provide grants to private for-profit and nonprofit owners of Federally assisted low-income housing. For purposes of the Assisted Housing Drug Elimination Program, NAHA also permits HUD to establish other criteria, in addition to those applicable to the Public Housing Drug Elimination Program, for the evaluation of funding applications submitted by owners of Federally assisted low-income housing. HUD issued a final rule implementing the Assisted Housing Drug Elimination Program on January 26, 1995 (60 FR 5280). The January 26, 1995 final rule followed the regulations for the Public Housing Drug Elimination Program very closely. The main difference from the Public Housing Program's regulations reflected the flexibility in the submission requirements and eligible activities provided by NAHA for the Assisted Housing Program.

II. Regulatory Reinvention

In response to Executive Order 12866 and President Clinton's memorandum of March 4, 1995 to all Federal departments and agencies on the subject of regulatory reinvention, HUD has reviewed all its regulations to determine whether certain regulations can be eliminated, streamlined, or consolidated with other regulations. As part of this review, HUD determined that the regulations for the Assisted Housing Drug Elimination Program and the Public Housing Drug Elimination Program are very similar, and HUD can consolidate them into one part.

Therefore, this final rule will consolidate the regulations in parts 261 (Assisted Housing Drug Elimination Program) and 961 (Public Housing Drug Elimination Program), into one set of regulations in part 761 (in chapter VII of title 24 of the Code of Federal Regulations (CFR)). Chapter VII of HUD's regulations is an appropriate place for the Drug Elimination Program regulations, since that chapter has historically contained those regulations common to programs under the authority of the Assistant Secretary for Housing—Federal Housing Commissioner (such as the Assisted Housing Drug Elimination Program) and to programs under the authority of the Assistant Secretary for Public and Indian Housing (such as the Public Housing Drug Elimination Program).

This final rule also streamlines the Drug Elimination Program regulations to the extent possible. For example, some of the provisions merely repeat language in the authorizing statute (42 U.S.C. 11901–11908). It is unnecessary to maintain statutory requirements in the CFR, since those requirements are otherwise fully accessible and binding. Furthermore, if regulations contain statutory language, HUD must amend the regulations whenever Congress amends the statute. Therefore, this final rule will remove repetitious statutory language and replace it with a citation to the specific statutory section for easy reference.

This rule also removes information in the regulations that is nonregulatory and would more appropriately appear in the separate Notices of Funding Availability (NOFAs) for the two programs, such as details about the selection criteria and examples of eligible activities. This final rule streamlines the regulations to provide that specific information on these topics will be included in the annual NOFAs.

Specifically, this final rule accomplishes the following:

1. Consolidates the regulations from parts 261 and 961 into part 761;

2. Removes the definitions of terms that are either not used in the regulations or are defined in the statute;

3. Removes the nonregulatory examples from the definition of *"program income"* and from the new § 761.15—Applicants and activities; and

4. Removes statutory language from the new § 761.15—Applicants and activities.

As a result of the streamlining efforts in this rule, HUD will eliminate approximately 7 pages of unnecessary regulations from the CFR.

II. Justification for Final Rulemaking

HUD generally publishes a rule for public comment before issuing a rule for effect, in accordance with HUD's regulations on rulemaking found in 24 CFR part 10. However, part 10 provides for exceptions from the general rule if the agency finds good cause to omit advance notice and public participation. The good cause requirement is satisfied when prior public procedure is "impracticable, unnecessary, or contrary to the public interest" (24 CFR 10.1). HUD finds that good cause exists to publish this rule for effect without first soliciting public comment, in that prior public procedure is unnecessary. This final rule merely consolidates and streamlines two sets of similar regulations; it does not change HUD's policies or substantive requirements.

III. Other Matters

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed and approved this final rule, and in so doing certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule merely streamlines regulations by removing unnecessary provisions. The rule will have no adverse or disproportionate economic impact on small businesses.

Environmental Impact

This rulemaking does not have an environmental impact. This rulemaking simply amends existing regulations by consolidating and streamlining provisions and does not alter the environmental effect of the regulations being amended. Separate Findings of No Significant Impact with respect to the environment were made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) at the time of initial development of the regulations for the Drug Elimination Programs. The findings remain applicable to this rule, and are available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. No programmatic or policy changes will result from this rule that would affect the relationship between the Federal Government and State and local governments.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this rule will not have the potential for significant impact on family formation, maintenance, or general well-being, and thus is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this rule.

List of Subjects

24 CFR Part 261

Drug abuse, Drug traffic control, Grant programs—housing and community development, Grant programs—low and moderate income housing, Reporting and recordkeeping requirements.

24 CFR Part 761

Drug abuse, Drug traffic control, Grant programs—housing and community development, Grant programs—Indians, Grant programs—low and moderate income housing, Indians, Public housing, Reporting and recordkeeping requirements.

24 CFR Part 961

Drug abuse, Drug traffic control, Grant programs—housing and community development, Grant programs—Indians, Grant programs—low and moderate income housing, Indians, Public housing, Reporting and recordkeeping requirements.

Accordingly, under the authority of 42 U.S.C. 3535(d), for the reasons stated in the preamble, in title 24 of the Code of Federal Regulations, parts 261 and 961 are removed, and part 761 is added as follows:

PART 261—[REMOVED]

1. Part 261 is removed.

2. In chapter VII, the heading is revised to read as follows:

CHAPTER VII—OFFICE OF THE SECRETARY, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HOUSING ASSISTANCE PROGRAMS AND PUBLIC AND INDIAN HOUSING PROGRAMS)

3. A new part 761 is added to read as follows:

PART 761—DRUG ELIMINATION PROGRAMS

Subpart A—General

Sec.
761.1 Purpose and scope.
761.5 Public and Indian housing; encouragement of resident participation.
761.10 Definitions.

Subpart B—Use of Grant Funds

761.15 Applicants and activities.

Subpart C—Application and Selection

761.20 Application selection and requirements.
761.25 Resident comments on grant application.

Subpart D—Grant Administration

761.30 Grant administration.
761.35 Periodic grantee reports.
761.40 Other Federal requirements.

Authority: 42 U.S.C. 3535(d) and 11901 *et seq.*

Subpart A—General

§ 761.1 Purpose and scope.

This part 761 contains the regulatory requirements for the Assisted Housing Drug Elimination Program and the Public Housing Drug Elimination Program. The purposes of these programs are to:

(a) Eliminate drug-related crime and problems associated with it in and around the premises of Federally assisted low-income housing, and public and Indian housing developments;

(b) Encourage owners of Federally assisted low-income housing, public housing agencies and Indian housing authorities (collectively referred to as HAs), and resident management corporations to develop a plan that includes initiatives that can be sustained over a period of several years for addressing drug-related crime and problems associated with it in and around the premises of housing proposed for funding under this part; and

(c) Make available Federal grants to help owners of Federally assisted low-income housing, HAs, and RMCs carry out their plans.

§ 761.5 Public and Indian housing; encouragement of resident participation.

For the purposes of the Public Housing Drug Elimination Program, the elimination of drug-related crime and problems associated with it within public housing developments requires the active involvement and commitment of public housing residents and their organizations. To enhance the ability of HAs to combat drug-related crime and problems associated with it within their developments, Resident Councils (RCs),

Resident Management Corporations (RMCs), and Resident Organizations (ROs) will be permitted to undertake management functions specified in this part, notwithstanding the otherwise applicable requirements of 24 CFR parts 950 and 964.

§ 761.10 Definitions.

The definitions "*Department*", "HUD", "*Indian*", "*Indian Housing Authority (IHA)*", and "*Public Housing Agency (PHA)*" are defined in 24 CFR part 5.

Controlled substance shall have the meaning provided in section 102 of the Controlled Substance Act (21 U.S.C. 802).

Drug intervention means a process to identify assisted housing or public housing resident drug users, to assist them in modifying their behavior, and/or to refer them to drug treatment to reduce or eliminate drug abuse.

Drug prevention means a process to provide goods and services designed to alter factors, including activities, environmental influences, risks, and expectations, that lead to drug abuse.

Drug-related crime shall have the meaning provided in 42 U.S.C. 11905(2).

Drug treatment means a program for the residents of an applicant's development that strives to end drug abuse and to eliminate its negative effects through rehabilitation and relapse prevention.

Federally assisted low-income housing, or *assisted housing*, shall have the meaning provided in 42 U.S.C. 11905(4). However, sections 221(d)(3) and 221(d)(4) market rate projects with tenant-based assistance contracts and section 8 projects with tenant-based assistance are not considered federally assisted low-income housing and are not eligible for funding under this part 761.

Governmental jurisdiction means the unit of general local government, State, or area of operation of an Indian tribe in which the housing development administered by the applicant is located.

In and around means within, or adjacent to, the physical boundaries of a housing development.

Indian tribe means any tribe, band, pueblo, group, community, or nation of Indians, or Alaska Natives.

Local law enforcement agency means a police department, sheriff's office, or other entity of the governmental jurisdiction that has law enforcement responsibilities for the community at large, including the housing developments owned or administered by the applicant. In Indian jurisdictions, this includes tribal prosecutors that assume law enforcement functions analogous to a police department or the Bureau of Indian Affairs (BIA). More than one law enforcement agency may have these responsibilities for the jurisdiction that includes the applicant's developments.

Problems associated with drug-related crime means the negative physical, social, educational, and economic impact of drug-related crime on assisted housing residents or public and Indian housing residents, and the deterioration of the assisted housing or public and Indian housing environment because of drug-related crime.

Program income means gross income received by a grantee and directly generated from the use of program funds. When program income is generated by an activity only partially assisted with program funds, the income shall be prorated to reflect the percentage of program funds used.

Resident council (RC), for purposes of the Public Housing Program, means an incorporated or unincorporated nonprofit organization or association that meets each of the following requirements:

(1) It must be representative of the residents it purports to represent;

(2) It may represent residents in more than one development or in all of the developments of a HA, but it must fairly represent residents from each development that it represents;

(3) It must adopt written procedures providing for the election of specific officers on a regular basis (but at least once every three years); and

(4) It must have a democratically elected governing board. The voting membership of the board must consist of residents of the development or developments that the resident organization or resident council represents.

Resident Management Corporation (RMC), for purposes of the Public Housing Program, means the entity that proposes to enter into, or that enters into, a management contract with a PHA under 24 CFR part 964 in accordance with the requirements of that part, or with an IHA under 24 CFR part 950, or with an IHA in accordance with the requirements of this part 761. The corporation must have each of the following characteristics:

(1) It must be a nonprofit organization that is incorporated under the laws of the State or the Indian tribe in which it is located;

(2) It may be established by more than one resident organization or resident council, so long as each such organization or council:

(i) Approves the establishment of the corporation, and;

(ii) Has representation on the Board of Directors of the corporation;

(3) It must have an elected Board of Directors;

(4) Its by-laws must require the Board of Directors to include representatives of each resident organization or resident council involved in establishing the corporation;

(5) Its voting members must be residents of the development or developments it manages;

(6) It must be approved by the resident council or resident organization. If there is no council or organization, a majority of the households of the development must approve the establishment of such an organization to determine the feasibility of establishing a corporation to manage the development; and

(7) It may serve as both the resident management corporation and the resident council or the resident organization, so long as the corporation meets the requirements of part 964 of this chapter for a resident council or the requirements of this part for a resident organization.

Resident organization (RO) shall have the same meaning as *Resident council (RC)*, as defined in this § 761.10.

State means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of local governments. The term does not include any public or Indian housing agency under the United States Housing Act of 1937 (42 U.S.C. 1437 *note*).

Unit of general local government means any city, county, town, municipality, township, parish, village, local public authority (including any public or Indian housing agency under the United States Housing Act of 1937) or other general purpose political subdivision of a State.

Subpart B—Use of Grant Funds

§ 761.15 Applicants and activities.

In any particular funding round, the separate Notices of Funding Availability (NOFAs) published in the **Federal Register** will contain specific information concerning eligible and ineligible applicants and activities.

(a) *Eligible applicants.* (1) Under the Public Housing Drug Elimination Program (PHDEP), specific information with regard to eligible applicants will appear in the NOFA for each funding round.

(2) Under the Assisted Housing Program (AHDEP), eligible applicants are owners of federally assisted low-income housing, as the term "*Federally assisted low-income housing*" is defined in § 761.10.

(b) *Eligible activities.* An application for funding under the Assisted Housing Program or the Public Housing Program may be for one or more of the eligible activities described in 42 U.S.C. 11903, as further explained or limited in paragraph (b) of this section and in the separate annual Notices of Funding Availability (NOFAs) for each program. All personnel funded by these programs in accordance with an eligible activity must meet, and demonstrate compliance with, all relevant Federal, State, tribal, or local government insurance, licensing, certification, training, bonding, or other similar law enforcement requirements.

(1) *Employment of security personnel*, as provided in 42 U.S.C. 11903(a)(1). For purposes of the Public Housing Program, the following provisions in paragraphs (b)(1)(i) and (b)(1)(ii) of this section apply:

(i) *Security guard personnel.* (A) Contract security personnel funded by this program must perform services not usually performed by local law enforcement agencies on a routine basis.

(B) The applicant, the cooperating local law enforcement agency, and the provider (contractor) of the security personnel are required, as a part of the security personnel contract, to enter into and execute a written agreement that describes the following:

(*1*) The activities to be performed by the security personnel, their scope of authority, and how they will coordinate their activities with the local law enforcement agency;

(*2*) The types of activities that the security personnel are expressly prohibited from undertaking.

(ii) *Employment of HA police.* (A) If additional HA police are to be employed for a service that is also provided by a local law enforcement agency, the applicant must provide a cost analysis that demonstrates the employment of HA police is more cost efficient than obtaining the service from the local law enforcement agency.

(B) Additional HA police services to be funded under this program must be over and above those that the existing HA police, if any, provides, and the tribal, State or local government is contractually obligated to provide under its Cooperation Agreement with the applying HA (as required by the HA's Annual Contributions Contract). An applicant seeking funding for this activity must first establish a baseline by describing the current level of services provided by both the local law enforcement agency and the HA police, if any (in terms of the kinds of services provided, the number of officers and equipment and the actual percent of their time assigned to the developments proposed for funding), and then demonstrate to what extent the funded activity will represent an increase over this baseline.

(C) The applicant and the cooperating local law enforcement agency are required to enter into and execute a written agreement that describes the following:

(*1*) The activities to be performed by the HA police, their scope of authority, and how they will coordinate their activities with the local law enforcement agency;

(*2*) The types of activities that the HA police are expressly prohibited from undertaking.

(2) *Reimbursement of local law enforcement agencies for additional security and protective services*, as provided in 42 U.S.C. 11903(a)(2). For purposes of the Public Housing Program, the following provisions in paragraphs (b)(2)(i) and (b)(2)(ii) of this section apply:

(i) Additional security and protective services to be funded must be over and above those that the tribal, State, or local government is contractually obligated to provide under its Cooperation Agreement with the applying HA (as required by the HA's Annual Contributions Contract). An application seeking funding for this activity must first establish a baseline by describing the current level of services (in terms of the kinds of services provided, the number of officers and equipment, and the actual percent of their time assigned to the developments proposed for funding) and then demonstrate to what extent the funded activity will represent an increase over this baseline.

(ii) Communications and security equipment to improve the collection, analysis, and use of information about drug-related criminal activities in a public housing community may be eligible items if used exclusively in connection with the establishment of a law enforcement substation on the funded premises or scattered site developments of the applicant. Funds for activities under this section may not be drawn until the grantee has executed a contract for the additional law enforcement services.

(3) *Physical improvements to enhance security*, as provided in 42 U.S.C. 11903(a)(3). For purposes of the Public Housing Program, the following provisions in paragraphs (b)(3)(i) through (b)(3)(iv) of this section apply:

(i) An activity that is funded under any other HUD program shall not also be funded by this program.

(ii) Funding is not permitted for physical improvements that involve the demolition of any units in a development.

(iii) Funding is not permitted for any physical improvements that would result in the displacement of persons.

(iv) Funding is not permitted for the acquisition of real property.

(4) *Employment of investigating individuals*, as provided in 42 U.S.C. 11903(a)(4). For purposes of the Public Housing Program, the following provisions in paragraphs (b)(4)(i) and (b)(4)(ii) of this section apply:

(i) If one or more investigators are to be employed for a service that is also provided by a local law enforcement agency, the applicant must provide a cost analysis that demonstrates the employment of investigators is more cost efficient than obtaining the service from the local law enforcement agency.

(ii) The applicant, the cooperating local law enforcement agency, and the investigator(s) are required, before any investigators are employed, to enter into and execute a written agreement that describes the following:

(A) The nature of the activities to be performed by the investigators, their scope of authority, and how they will coordinate their activities with the local law enforcement agency;

(B) The types of activities that the investigators are expressly prohibited from undertaking.

(5) *Voluntary tenant patrols*, as provided in 42 U.S.C. 11903(a)(5). For purposes of the Public Housing Program, the following provisions in paragraphs (b)(5)(i) through (b)(5)(iv) of this section apply:

(i) The provision of training, communications equipment, and other related equipment (including uniforms), for use by voluntary tenant patrols acting in cooperation with officials of local law enforcement agencies is permitted. Grantees are required to obtain liability insurance to protect themselves and the members of the voluntary tenant patrol against potential liability for the activities of the patrol. The cost of this insurance will be considered an eligible program expense.

(ii) The applicant, the cooperating local law enforcement agency, and the members of the tenant patrol are required, before putting the tenant patrol into effect, to enter into and execute a written agreement that describes the following:

(A) The nature of the activities to be performed by the tenant patrol, the patrol's scope of authority, and how the

patrol will coordinate its activities with the local law enforcement agency;

(B) The types of activities that a tenant patrol is expressly prohibited from undertaking, to include but not limited to, the carrying or use of firearms or other weapons, nightsticks, clubs, handcuffs, or mace in the course of their duties under this program;

(C) The type of initial tenant patrol training and continuing training the members receive from the local law enforcement agency (training by the local law enforcement agency is required before putting the tenant patrol into effect);

(iii) Tenant patrol members must be advised that they may be subject to individual or collective liability for any actions undertaken outside the scope of their authority and that such acts are not covered under a HA's or RMC's liability insurance.

(iv) Grant funds may not be used for any type of financial compensation for voluntary tenant patrol participants. However, the use of program funds for a grant coordinator for volunteer tenant foot patrols is permitted.

(6) *Drug prevention, intervention, and treatment programs,* as provided in 42 U.S.C. 11903(a)(6).

(7) *Funding resident management corporations (RMCs), resident councils (RCs), and resident organizations (ROs).* For purposes of the Public Housing Program, funding may be provided for HAs that receive grants to contract with RMCs and incorporated RCs and ROs to develop security and drug abuse prevention programs involving site residents, as provided in 42 U.S.C. 11903(a)(7).

(8) *Eliminating drug-related crime in HA-owned housing,* under the Public Housing Program, as provided in 42 U.S.C. 11903(b).

(c) *Continuation of current program activities.* For purposes of both drug elimination programs, the Department will evaluate an applicant's performance under any previous Drug Elimination Program grants within the past five years. Subject to evaluation and review are the applicant's financial and program performance; reporting and special condition compliance; accomplishment of stated goals and objectives under the previous grant; and program adjustments made in response to previous ineffective performance. If the evaluation discloses a pattern under past grants of ineffective performance with no corrective measures attempted, it will result in a deduction of points from the current application.

(d) *Ineligible activities.* For purposes of the Public Housing Program, the following provisions in paragraph (d) of this section apply:

(1) Joint applications are not eligible for funding under this program.

(2) Funding is not permitted for costs incurred before the effective date of the grant agreement, including, but not limited to, consultant fees for surveys related to the application or the actual writing of the application.

(3) Funding is not permitted for the costs related to screening or evicting residents for drug-related crime. However, investigators funded under this program may participate in judicial and administrative proceedings.

Subpart C—Application and Selection

§ 761.20 Application selection and requirements.

(a) *Selection criteria.* HUD will review each application that it determines meets the requirements of this part 761 and evaluate it by assigning points in accordance with the selection criteria in 42 U.S.C. 11904 and in the separate NOFAs published for each program.

(b) *Plan requirement.* Each application must include a plan for addressing the problem of drug-related crime and/or the problems associated with it on the premises of the housing for which the application is being submitted. For applications that cover more than one development, the plan does not have to address each development separately if the same activities will apply to each development. The plan must address each development separately only where program activities will differ from one development to another.

(c) *Notices of Funding Availability.* HUD will publish specific Notices of Funding Availability (NOFAs) in the **Federal Register** as appropriate for each program to inform the public of the availability of grant amounts under this part 761. The NOFAs will provide specific guidance with respect to the grant process, including the deadlines for the submission of grant applications; the limits (if any) on maximum grant amounts; the information that must be submitted to permit HUD to score each of the selection criteria; the maximum number of points to be awarded for each selection criterion; the contents of the plan for addressing drug-related crime and problems associated with it that must be included with the application; the listing of any certifications and assurances that must be submitted with the application; and the process for ranking and selecting applicants. NOFAs will also include any additional information, factors, and requirements that HUD has determined to be necessary and appropriate to provide for the implementation and administration of the program under this part 761.

(d) *Environmental review.* Grants under this part 761 are categorically excluded from review under the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321), in accordance with 24 CFR 50.20(p). However, prior to an award of grant funds under this part, HUD will perform an environmental review to the extent required by HUD's environmental regulations in 24 CFR part 50, including the applicable related authorities in 24 CFR 50.4.

§ 761.25 Resident comments on grant application.

The applicant must provide the residents of developments proposed for funding under this part 761, as well as any RMCs, RCs, or ROs that represent those residents (including any HA-wide RMC, RC, or RO), if applicable, with a reasonable opportunity to comment on its application for funding under these programs. The applicant must give these comments careful consideration in developing its plan and application, as well as in the implementation of funded programs. Grantees must maintain copies of all written comments submitted for three years.

Subpart D—Grant Administration

§ 761.30 Grant administration.

(a) *General.* Each grantee is responsible for ensuring that grant funds are administered in accordance with the requirements of this part 761, any specific Notices of Funding Availability (NOFAs) issued for these programs, 24 CFR part 85 (as applicable), applicable laws and regulations, applicable OMB circulars, HUD fiscal and audit controls, grant agreements, grant special conditions, the grantee's approved budget (SF–424A), budget narrative, plan, and activity timetable.

(b) *Grant term extensions.* (1) *Grant term.* Terms of the grant agreement may not exceed 12 months for the Assisted Housing Program, and 24 months for the Public Housing Program, unless an extension is approved by the local HUD Office or local HUD Office of Native American Programs. Any funds not expended at the end of the grant term shall be remitted to HUD.

(2) *Extension.* HUD may grant an extension of the grant term in response to a written request for an extension stating the need for the extension and indicating the additional time required. HUD will not consider requests for retroactive extension of program periods. HUD will permit only one extension. HUD will only consider extensions if the grantee meets the extension criteria of paragraph (b)(5) of this section at the time the grantee submits for approval the request for the extension.

(3) *Receipt.* The request must be received by the local HUD Office or local HUD Office of Native American Programs prior to the termination of the grant, and requires approval by the local HUD Office or local HUD Office of Native American Programs with jurisdiction over the grantee.

(4) *Term.* The maximum extension allowable for any program period is 6 months.

(5) *Extension criteria.* The following criteria must be met by the grantee when submitting a request to extend the expenditure deadline for a program or set of programs.

(i) *Financial status reports.* There must be on file with the local HUD Office or local HUD Office of Native American Programs current and acceptable Financial Status Reports, SF–269As.

(ii) *Grant agreement special conditions.* The grantee must have satisfied all grant agreement special conditions except those conditions that the grantee must fulfill in the remaining period of the grant. This also includes the performance and resolution of audit findings in a timely manner.

(iii) *Justification.* The grantee must submit a narrative justification with the program extension request. The justification must provide complete details, including the circumstances that require the proposed extension, and an explanation of the impact of denying the request.

(6) *HUD action.* The local HUD Office or local HUD Office of Native American Programs will attempt to take action on any proposed extension request within 15 days after receipt of the request.

(c) *Duplication of funds.* To prevent duplicate funding of any activity, the grantee must establish controls to assure that an activity or program that is funded by other HUD programs, or programs of other Federal agencies, shall not also be funded by the Drug Elimination Program. The grantee must establish an auditable system to provide adequate accountability for funds that it has been awarded. The grantee is responsible for ensuring that there is no duplication of funds.

(d) *Insurance.* Each grantee shall obtain adequate insurance coverage to protect itself against any potential liability arising out of the eligible activities under this part. In particular, applicants shall assess their potential liability arising out of the employment or contracting of security personnel, law enforcement personnel, investigators, and drug treatment providers, and the establishment of voluntary tenant patrols; evaluate the qualifications and training of the individuals or firms undertaking these functions; and consider any limitations on liability under tribal, State, or local law. Grantees shall obtain liability insurance to protect the members of the voluntary tenant patrol against potential liability as a result of the patrol's activities under § 761.15(b)(5). Voluntary tenant patrol liability insurance costs are eligible program expenses. Subgrantees shall obtain their own liability insurance.

(e) *Failure to implement program.* If the grant plan, approved budget, and timetable, as described in the approved application, are not operational within 60 days of the grant agreement date, the grantee must report by letter to the local HUD Office or the local HUD Office of Native American Programs the steps being taken to initiate the plan and timetable, the reason for the delay, and the expected starting date. Any timetable revisions that resulted from the delay must be included. The local HUD Office or local HUD Office of Native American Programs will determine if the delay is acceptable, approve/disapprove the revised plan and timetable, and take any additional appropriate action.

(f) *Sanctions.* (1) HUD may impose sanctions if the grantee:

(i) Is not complying with the requirements of this part 761, or of other applicable Federal law;

(ii) Fails to make satisfactory progress toward its drug elimination goals, as specified in its plan and as reflected in its performance and financial status reports;

(iii) Does not establish procedures that will minimize the time elapsing between drawdowns and disbursements;

(iv) Does not adhere to grant agreement requirements or special conditions;

(v) Proposes substantial plan changes to the extent that, if originally submitted, the applications would not have been selected for funding;

(vi) Engages in the improper award or administration of grant subcontracts;

(vii) Does not submit reports; or

(viii) Files a false certification.

(2) HUD may impose the following sanctions:

(i) Temporarily withhold cash payments pending correction of the deficiency by the grantee or subgrantee;

(ii) Disallow all or part of the cost of the activity or action not in compliance;

(iii) Wholly or partly suspend or terminate the current award for the grantee's or subgrantee's program;

(iv) Require that some or all of the grant amounts be remitted to HUD;

(v) Condition a future grant and elect not to provide future grant funds to the grantee until appropriate actions are taken to ensure compliance;

(vi) Withhold further awards for the program; or

(vii) Take other remedies that may be legally available.

§ 761.35 Periodic grantee reports.

Grantees are responsible for managing the day-to-day operations of grant and subgrant supported activities. Grantees must monitor grant and subgrant supported activities to assure compliance with applicable Federal requirements and that performance goals are being achieved. Grantee monitoring must cover each program, function or activity of the grant.

(a) *Semi-annual (nonconstruction) performance reports.* For purposes of the Public Housing Program only, the following provisions in paragraph (a) of this section apply:

(1) In accordance with 24 CFR 85.40(b)(1)(2) and 85.50(b), grantees are required to provide the local HUD Office or the local HUD Office of Native American Programs with a semi-annual performance report that evaluates the grantee's performance against its plan. These reports shall include (but are not limited to) the following in summary form:

(i) Any change or lack of change in crime statistics or other indicators drawn from the applicant's plan assessment and an explanation of any difference;

(ii) Successful completion of any of the strategy components identified in the applicant's plan;

(iii) A discussion of any problems encountered in implementing the plan and how they were addressed;

(iv) An evaluation of whether the rate of progress meets expectations;

(v) A discussion of the grantee's efforts in encouraging resident participation; and

(vi) A description of any other programs that may have been initiated, expanded, or deleted as a result of the plan, with an identification of the resources and the number of people involved in the programs and their relation to the plan.

(2) *Reporting period.* Semi-annual performance reports (for periods ending June 30 and December 31) are due to the local HUD Office or the local HUD Office of Native American Programs on July 30 and January 31 of each year. If

the reports are not received by the local HUD Office or the local HUD Office of Native American Programs on or before the due date, grant funds will not be advanced until the reports are received.

(b) *Final performance report.* For purposes of both the Assisted Housing Program and the Public Housing Program, the following provisions in paragraph (b) of this section apply:

(1) *Evaluation.* Grantees are required to provide the local HUD Office or the local HUD Office of Native American Programs, as applicable, with a final cumulative performance report that evaluates the grantee's overall performance against its plan. This report shall include (but is not limited to) the information listed in paragraphs (a)(1)(i) through (a)(1)(vi) of this section, in summary form.

(2) *Reporting period.* The final performance report shall cover the period from the date of the grant agreement to the termination date of the grant agreement. The report is due to the local HUD Office or the local HUD Office of Native American Programs, as applicable, within 90 days after termination of the grant agreement.

(c) *Semi-annual financial status reporting requirements.* For purposes of both the Assisted Housing Program and the Public Housing Program, the following provisions in paragraph (c) of this section apply, as specified below:

(1) *Forms.* The grantee shall provide a semi-annual financial status report. For purposes of the Public Housing Program, this report shall be in accordance with 24 CFR 85.41 (b) and (c). For both the Assisted Housing and Public Housing Programs, the grantee shall use the form SF–269A, Financial Status Report-Long Form, to report the status of funds for nonconstruction programs. The grantee shall use SF–269A, block 12, "Remarks," to report on the status of programs, functions, or activities within the program.

(2) *Reporting period.* Semi-annual financial status reports (SF–269A) must be submitted as follows:

(i) For purposes of the Assisted Housing Program, semi-annual financial status reports covering the first 180 days of funded activities must be submitted to the local HUD Office between 190 and 210 days after the date of the grant agreement. If the SF–269A is not received on or before the due date (210 days after the date of the grant agreement) by the local HUD Office, grant funds will not be advanced until the reports are received.

(ii) For purposes of the Public Housing Program, semi-annual financial status reports (for periods ending June 30 and December 31) must be submitted to the local HUD Office or the local Office of Indian Programs, as applicable, by July 30 and January 31 of each year. If the local HUD Office or the local HUD Office of Native American Programs, as applicable, does not receive the SF–269A on or before the due date, the grant funds will not be advanced until the reports are received.

(d) *Final financial status report (SF–269A).* For purposes of both the Assisted Housing Program and the Public Housing Program, the following provisions in paragraph (d) of this section apply:

(1) *Cumulative summary.* The final report will be a cumulative summary of expenditures to date and must indicate the exact balance of unexpended funds. The grantee shall remit all Drug Elimination Program funds owed to HUD, including any unexpended funds, as follows:

(i) For purposes of the Assisted Housing Program, the grantee must remit such funds to HUD within 90 days after the termination of the grant agreement.

(ii) For purposes of the Public Housing Program, the local HUD Office or the local HUD Office of Native American Programs shall notify the grantee, in writing, of the requirement to remit such funds to HUD. The grantee shall remit such funds prior to or upon receipt of the notice.

(2) *Reporting period.* The final financial status report shall cover the period from the date of the grant agreement to the termination date of the grant agreement. The report is due to the local HUD Office or the local HUD Office of Native American Programs, as applicable, within 90 days after the termination of the grant agreement.

§ 761.40 Other Federal requirements.

In addition to the nondiscrimination and equal opportunity requirements set forth in 24 CFR part 5, subpart A, use of grant funds requires compliance with the following Federal requirements:

(a) *Labor standards.* (1) When grant funds are used to undertake physical improvements to increase security under § 761.15(b)(3), the following labor standards apply:

(i) The grantee and its contractors and subcontractors must pay the following prevailing wage rates, and must comply with all related rules, regulations and requirements:

(A) For laborers and mechanics employed in the program, the wage rate determined by the Secretary of Labor pursuant to the Davis-Bacon Act (40 U.S.C. 276a et seq.) to be prevailing in the locality with respect to such trades;

(B) For laborers and mechanics employed in carrying out nonroutine maintenance in the program, the HUD-determined prevailing wage rate. As used in paragraph (a) of this section, nonroutine maintenance means work items that ordinarily would be performed on a regular basis in the course of upkeep of a property, but have become substantial in scope because they have been put off, and that involve expenditures that would otherwise materially distort the level trend of maintenance expenses. Nonroutine maintenance may include replacement of equipment and materials rendered unsatisfactory because of normal wear and tear by items of substantially the same kind. Work that constitutes reconstruction, a substantial improvement in the quality or kind of original equipment and materials, or remodeling that alters the nature or type of housing units is not nonroutine maintenance.

(ii) The employment of laborers and mechanics is subject to the provisions of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333).

(2) The provisions of paragraph (a)(1) of this section shall not apply to labor contributed under the following circumstances:

(i) Upon the request of any resident management corporation, HUD may, subject to applicable collective bargaining agreements, permit residents (for purposes of the Public Housing Program, residents of a program managed by the resident management corporation) to volunteer a portion of their labor.

(ii) An individual may volunteer to perform services if:

(A) The individual does not receive compensation for the voluntary services, or is paid expenses, reasonable benefits, or a nominal fee for voluntary services; and

(B) Is not otherwise employed at any time in the work subject to paragraphs (a)(1)(i)(A) or (a)(1)(i)(B) of this section.

(b) *Flood insurance.* Grants will not be awarded for proposed activities that involve acquisition, construction, reconstruction, repair or improvement of a building or mobile home located in an area that has been identified by the Federal Emergency Management Agency (FEMA) as having special flood hazards unless:

(1) The community in which the area is situated is participating in the National Flood Insurance Program in accordance with 44 CFR parts 59 through 79; or

(2) Less than a year has passed since FEMA notification to the community regarding such hazards; and

(3) Flood insurance on the structure is obtained in accordance with section 102(a) of the Flood Disaster Protection Act of 1973 (42 U.S.C. 4001).

(c) *Lead-based paint.* The provisions of section 302 of the Lead-Based Paint Poisoning Prevention Act, 42 U.S.C. 4821–4846, and implementing regulations in 24 CFR part 965, subpart H apply to activities under these programs as set out in this paragraph (c). Paragraph (c) of this section is promulgated pursuant to the authority granted in 24 CFR 35.24(b)(4) and supersedes, with respect to all housing to which it applies, the requirements (not including definitions) prescribed by subpart C of 24 CFR part 35.

(1) *Applicability.* The provisions of paragraph (c) of this section shall apply to all developments constructed or substantially rehabilitated before January 1, 1978, and for which assistance under this part is being used for physical improvements to enhance security under § 761.15(b)(3).

(2) *Definitions.* The term "*applicable surfaces*" means all intact and nonintact interior and exterior painted surfaces of a residential structure.

(3) *Exceptions.* The following activities are not covered by this section:

(i) Installation of security devices;

(ii) Other similar types of single-purpose programs that do not involve physical repairs or remodeling of applicable surfaces of residential structures; or

(iii) Any non-single-purpose rehabilitation that does not involve applicable surfaces and that does not exceed $3,000 per unit.

(d) *Conflicts of interest.* In addition to the conflict of interest requirements in 24 CFR part 85 for the Public Housing Program, no person, as described in paragraphs (d)(1) and (d)(2) of this section, may obtain a personal or financial interest or benefit from an activity funded under these drug elimination programs, or have an interest in any contract, subcontract, or agreement with respect thereto, or the proceeds thereunder, either for him or herself or for those with whom he or she has family or business ties, during his or her tenure, or for one year thereafter:

(1) Who is an employee, agent, consultant, officer, or elected or appointed official of the grantee, that receives assistance under the program and who exercises or has exercised any functions or responsibilities with respect to assisted activities; or

(2) Who is in a position to participate in a decisionmaking process or gain inside information with regard to such activities.

(e) *For IHAs,* § 950.115 of this title, "Applicability of civil rights requirements," and § 950.120 of this title, "Compliance with other Federal requirements," apply and control to the extent they may differ from other requirements of this section;

(f) *Indian preference.* For purposes of the Public Housing Program, applicants are subject to the Indian Civil Rights Act (24 U.S.C. 1301), the provisions of section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b)), and the Indian preference rules in the IHA procurement regulations at 24 CFR 950, subpart B. These provisions require that, to the greatest extent feasible, preference and opportunities for training and employment be given to Indians, and that preference in the award of subcontracts and subgrants be given to Indian Organizations and Indian Owned Economic Enterprises.

(g) *Intergovernmental Review.* The requirements of Executive Order 12372 (3 CFR, 1982 Comp., p. 197) and the regulations issued under the Order in 24 CFR part 52, to the extent provided by **Federal Register** notice in accordance with 24 CFR 52.3, apply to these programs.

PART 961—[REMOVED]

4. Part 961 is removed.

Dated: March 15, 1996.

Henry G. Cisneros,

Secretary.

Part VI

Department of Education

34 CFR Part 656

Higher Education Programs in Modern Foreign Language Training and Area Studies—National Resource Centers Program for Foreign Language and International Studies; Proposed Rule

DEPARTMENT OF EDUCATION

34 CFR Part 656

RIN 1840–AC27

Higher Education Programs in Modern Foreign Language Training and Area Studies—National Resource Centers Program for Foreign Language and Area Studies or Foreign Language and International Studies

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Higher Education Programs in Modern Foreign Language Training and Area Studies—National Resource Centers Program for Foreign Language and Area Studies or Foreign Language and International Studies (National Resource Centers Program). These amendments are needed in order to improve the application review process and to update the regulations in light of developments in the field of foreign language, area, and international studies. In the spirit of reinventing government, the goal of the proposed changes is to markedly reduce the burden associated with the application process. These proposed regulations would (a) reduce the burden on applicants and readers by clarifying and redesigning selection criteria to remove ambiguity and eliminate repetition of information presented in applications, (b) facilitate grantee selection by providing a larger point spread for greater differentiation of rankings, and (c) improve program quality, efficiency, and flexibility by adopting changes program management experience shows to be appropriate.

DATES: Comments must be received on or before April 29, 1996.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Sara West, U.S. Department of Education, 600 Independence Avenue, S.W., Suite 600B, Portals Building, Washington, D.C. 20202–5331. Comments may also be sent through the Internet to "National_Resource@ed.gov".

Comments that concern information collection requirements must be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble. A copy of those comments may also be sent to the Department representative named in the preceding paragraph.

FOR FURTHER INFORMATION CONTACT: Sara West. Telephone: (202) 401–9782. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background

The National Resource Centers Program is one of several international education programs authorized under Part A of Title VI of the Higher Education Act of 1965, as amended. The main provisions of the regulations govern the awarding of grants designed to assist eligible institutions of higher education in improving and developing their programs in modern foreign languages and area or international studies.

In the spirit of reinventing government, it is the Secretary's goal to simplify the application process and management of the National Resource Centers Program. The Secretary proposes changes to add clarity to the review process, to decrease the current burden on applicants and peer reviewers, to facilitate the application of uniform standards among peer reviewers, and to increase flexibility in program management for funded grantees and for the Secretary.

The Secretary proposes to amend the regulations for the National Resource Centers Program by modifying the selection criteria for applications and by adding activities to the list of definitions and to the list of priorities.

Selection Criteria. The selection criteria currently used are very general, leading to some misinterpretation of questions asked, frequent repetition of information, and the inclusion of information that is not pertinent to the purpose of the National Resource Centers Program. The proposed changes seek to retain much of the sense of the current criteria while removing ambiguity regarding requested information. The purpose of the changes is to clarify what information should be presented so that (a) all applicants will provide more focused information necessary for evaluation of a proposal under this program, (b) applicants will be able to present all relevant information within fewer pages of proposal narrative, and (c) peer reviewers will be able to more easily and accurately evaluate and rank proposals based on comparative strengths.

A reorganized, broader point scale and clearly identified point allocations for individual paragraphs of the selection criteria are proposed in order to (a) enable peer reviewers to score more carefully and accurately differentiate between proposals of high caliber, (b) discourage peer reviewers from overlooking any individual question to be scored, and (c) clarify for peer reviewers and applicants exactly what requested information corresponds to each point value.

Expanded Definitions. The Secretary proposes to amend the regulations in keeping with current standards in the field of area, language, and international studies by (a) expanding the definition of a comprehensive center to include curriculum development and community outreach and (b) expanding the activities that define a comprehensive center to include "training" as well as research. These activities have long been standard at successful comprehensive National Resource Centers.

Expanded Possible Priorities. The Secretary proposes to increase flexibility in program management by expanding the list of possible funding priorities to include course development. Course development has long been a standard activity at National Resource Centers because it is a primary means by which training programs are strengthened. Including it in the list of possible priorities is, therefore, in keeping with the purpose of the National Resource Centers Program.

Explanation of Changes

The proposed changes include the following:

Section 656.3. What activities define a comprehensive or undergraduate National Resource Center?

Section 656.3(e)(2). The Secretary proposes to expand the list of activities defining a comprehensive center to include training. The current list does not accurately reflect the fact that National Resource Centers train specialists in area, language, and international studies.

Section 656.7. What definitions apply?

Section 656.7(d)(5). The Secretary proposes to expand the list of activities under the comprehensive center definition to reflect two activities commonly engaged in by successful grantees: curriculum development and community outreach. Curriculum development is very important for strengthening language and area centers and programs, while community outreach is necessary in order for centers to function as national resources. These activities are, therefore, integral to the purpose of the National Resource Centers Program. Including curriculum development and community outreach in the list of activities would further clarify to the public the purpose of the grants and activities commonly engaged in by grantees.

Section 656.20. How does the Secretary evaluate an application?

Section 656.20(b). The Secretary proposes to expand the range of possible points for applications in order to enable peer reviewers to more carefully and accurately differentiate among proposals of high caliber in scoring. It has been the Secretary's experience that competition for grants under the National Resource Centers Program is strong. Recent winning applicants have scored in the 80's and low 90's on the current 100-point scale. As a result, there has been narrow point differentiation between successful applicants and high-ranking unsuccessful applicants. The Secretary believes that expanding the possible point range would facilitate funding decisions by providing peer reviewers with a larger scale on which to rank applications, allowing for greater differentiation of scores for applications of similar but different merit. The changed point scale, reflecting changes in the technical review criteria and their point allocations, would add 50 possible points for competitions for which there are no announced competitive priorities and 60 possible points for competitions for which competitive priorities have been announced.

Section 656.21. What selection criteria does the Secretary use to evaluate an application for a comprehensive center?

The Secretary proposes extensive changes in the sections dealing with selection criteria for comprehensive and undergraduate centers in order to improve the program's application review process and to reflect current standards in the field of foreign language, area and international studies. Modifications to the criteria are meant to more clearly identify the information that is relevant to the competition and to allow applicants to streamline their applications, thereby facilitating proposal writing for applicants and evaluation for peer reviewers. The proposed criteria incorporate most aspects of the current criteria, and applicants would, therefore, be expected to provide much of the same information as in the past. By more specifically identifying information to be provided in an application, the proposed criteria would allow applicants to exclude less helpful, generalized, and sometimes repetitious information and provide a concise justification for proposed activities in light of the purpose of the National Resource Centers Program.

Section 656.21(a). The Secretary proposes to replace the Plan of operation criterion with a criterion called Program planning and budget. The Program planning and budget criterion incorporates related elements of the current Plan of operation, Budget and cost effectiveness, and the Need and potential impact criteria. It has been the Secretary's experience that the language of these current criteria requires modification in order to avoid confusion among applicants and peer reviewers regarding the meaning of the questions asked. For example, one question under the Plan of operation criterion asks to what extent the objectives of the project relate to the purpose of the program. Applicants and evaluators are frequently uncertain whether "program" refers to the National Resource Centers grant program or to the applicant's training program. Additionally, the separation of these related elements under the present criteria frequently causes applicants to repeat the same information under several criteria. The Secretary proposes to clarify information to be presented and eliminate repetition by asking very explicit questions regarding the administration, cost-effectiveness, quality, and long-term impact of proposed activities in one criterion.

Section 656.21(b). The Secretary proposes to replace the Quality of key personnel criterion with a criterion called Quality of staff resources. The staff resources criterion would ask for the same kind of information as the current key personnel criterion but would also require more explicit information to be presented regarding faculty and staff involvement in center activities and oversight and professional development opportunities.

Section 656.21(c). The Secretary proposes to eliminate the current Budget and cost effectiveness criterion due to relocating questions on this subject matter under the proposed Program planning and budget criterion. The Secretary proposes a new Impact and evaluation criterion that would combine related aspects of the current Need and potential impact, Evaluation plan, and Plan of operation criteria. The combination of these questions in one criterion is logical due to the interrelatedness of questions about past performance and evaluating future performance.

Section 656.21(d). The Secretary proposes to eliminate the current Evaluation plan criterion due to the inclusion of similar questions under the proposed Impact and evaluation criterion. The Secretary proposes to redesignate the criterion Commitment to the subject area on which the center focuses, with a minor modification of language in order to identify the information to be presented.

Section 656.21(e). The Secretary proposes to modify and redesignate the Strength of library criterion. Due to the changes in information technologies and the rising costs of maintaining traditional collections, a library's book and periodical holdings are no longer the only factor that should be considered in evaluating the strength of a National Resource Center's library. The proposed regulations would clarify information to be presented and take into account that library resources can be provided in print and non-print media, through cooperative collection and access arrangements with other library collections, and through on-line, electronic data bases.

Section *656.21(f).* The Secretary proposes to insert a new criterion called Quality of the center's non-language instructional program. The proposed criterion would incorporate related elements of the current Quality of the center's instructional program and Quality of the center's relationships within the institution criteria. The Secretary believes that including all questions related to non-language course offerings in one section would allow grantees to streamline their proposals and avoid repetition. It has been the Secretary's experience that combining questions about non-language and language courses in the same criterion can lead to applicants' neglecting to provide full information about both non-language and language training. Further, the comprehensive nature of a resource center is reflected by the extent to which it incorporates non-language training in addition to training in language, literature, and linguistics. For these reasons, the Secretary proposes to ask parallel questions regarding the quality of language and non-language training under two separate criteria. It is the opinion of the Secretary that separate criteria would emphasize the importance to the National Resource Centers Program of both language and area or international studies training.

Section 656.21(g). The Secretary proposes to address under this criterion the Quality of the center's language instructional program. Questions asked under this criterion are similar to questions currently asked under Quality of the center's instructional program criterion but more specifically identify information to be provided.

Section 656.21(h). The Secretary proposes to eliminate the current Quality of the center's relationships within the institution criterion due to the inclusion of similar questions under the proposed Quality of the center's non-language instructional program criterion. The Secretary proposes a new Quality of curriculum design criterion that would combine elements of the current Quality of the center's relationships within the institution and Overseas activities criteria. The new criterion would allow applicants to focus on the issue of training options for students within the context of a single criterion.

Section 656.21(i). The Secretary proposes to eliminate the current Overseas activities criterion due to the inclusion of related questions under the proposed Quality of curriculum design, Commitment to the subject area on which the center focuses, and Quality of staff resources criteria. It has been the Secretary's experience in this program that overseas opportunities and activities have been critical to providing successful training options for students and professional development opportunities for faculty. Therefore, the Secretary believes that it is more appropriate and more clearly related to the purpose of the National Resource Centers Program to ask questions regarding overseas activities in the context of curriculum design and staff resources. The Secretary proposes to insert in this section a modified Outreach activities criterion. Proposed changes to this criterion reflect the Secretary's experience that outreach to postsecondary institutions, business, the media, and the general public is frequently overlooked in favor of elementary and secondary school outreach. By specifying separate point allocations for different kinds of outreach, the Secretary hopes to emphasize the importance to the National Resource Centers Program of outreach to all communities.

Section 656.21(j). The Secretary proposes to eliminate the current Need and potential impact criterion due to the inclusion of related questions under the proposed Program planning and budget and Impact and evaluation criteria. The Secretary proposes to replace this criterion with the current Degree to which priorities are served criterion, decreasing the point value from 20 points to 10. It has been the Secretary's experience that most proposals submitted for competitions under this program succeed in securing almost all of the points assigned to the competitive priority. A 20-point allocation to the competitive priority can result in applications with weaker scores on the mandatory criteria outscoring more fundamentally sound applications that do not meet the priority. A 10-point competitive priority allocation would continue to ensure that quality proposals that meet the competitive priority are funded before quality proposals that do not meet the priority. The Secretary proposes to decrease the total possible points allocated for priorities in order to maintain proportion in the competition and to ensure that only high quality proposals are funded.

Section 656.21(k). The Secretary proposes to delete this paragraph since the Outreach activities criterion would be included as previously noted.

Section 656.21(l). The Secretary proposes to delete this paragraph since the Degree to which priorities are served criterion would be included as previously noted.

Section 656.22. What selection criteria does the Secretary use to evaluate an application for an undergraduate center?

Like the criteria for comprehensive centers, the proposed undergraduate center selection criteria incorporate most aspects of the current criteria but are restructured to enable applicants to present the appropriate information more succinctly and with less repetition. The same selection criteria proposed for comprehensive centers are proposed for undergraduate centers, with small variances in point values and questions. The primary difference is that, for undergraduate centers, only questions related to undergraduate training programs are asked, while the comprehensive center selection criteria encompass undergraduate, graduate, and professional training programs.

Section 656.22(a). As in the comprehensive centers selection criteria, the Secretary proposes to replace the Plan of operation criterion with a criterion called Program planning and budget. The Program planning and budget criterion incorporates related elements of the current Plan of operation, Budget and cost effectiveness, and Need and potential impact criteria. It has been the Secretary's experience that the language of these current criteria requires modification in order to avoid confusion among applicants and peer reviewers regarding the meaning of the questions asked. Additionally, the separation of these related elements into individual criteria frequently causes applicants to repeat the same information under several guises. The Secretary proposes to clarify information to be presented and eliminate the need for repetition by asking very explicit questions regarding the administration, cost-effectiveness, quality, and long-term impact of proposed activities in one criterion.

Section 656.22(b). As in the comprehensive centers selection criteria, the Secretary proposes to replace the Quality of key personnel criterion with a criterion called Quality of staff resources. The staff resources criterion would ask for the same kind of information as the current key personnel criterion, but would also require more explicit information to be presented regarding faculty and staff involvement in center activities and oversight and professional development opportunities.

Section 656.22(c). As in the comprehensive center selection criteria, the Secretary proposes to eliminate the current Budget and cost effectiveness criterion due to relocating similar questions under the proposed Program planning and budget criterion. The Secretary proposes a new Impact and evaluation criterion that would combine related aspects of the current Need and potential impact, Evaluation plan, and Plan of operation criteria. The combination of these questions in one criterion is logical due to the interrelatedness of questions about past performance and evaluating future performance.

Section 656.22(d). The Secretary proposes to eliminate the current Evaluation plan criterion due to the inclusion of similar questions under the proposed Impact and evaluation criterion and to redesignate the current criterion Commitment to the subject area on which the center focuses, with a minor modification of language in order to identify the information to be presented.

Section 656.22(e). As in the comprehensive center selection criteria, the Secretary proposes to modify and redesignate the Strength of library criterion. Due to the changes in information technology and the rising costs of maintaining traditional collections, a library's book and periodical holdings are no longer the only factor that should be considered in evaluating the strength of a National Resource Center's library. The proposed regulations would clarify information to be presented and take into account that library resources can be provided in print and non-print media, through cooperative collections and access arrangements with other library collections, and through on-line, electronic data bases.

Section 656.22(f). As in the comprehensive center selection criteria, the Secretary proposes to add a new criterion called Quality of the center's non-language instructional program. The proposed criterion would incorporate related elements of the current Quality of the center's instructional program and Quality of the center's relationships within the institution criteria. The Secretary believes that including all questions related to non-language course offerings in one section would allow grantees to streamline their proposals and avoid repetition. It has been the Secretary's experience that combining questions about non-language and language courses in the same criterion can lead to applicants neglecting to provide full information about both non-language and language training. For that reason, the Secretary proposes to ask parallel questions regarding the quality of language and non-language training under two separate criteria. It is the opinion of the Secretary that separate criteria would emphasize the importance to the National Resource Centers Program of both language and area or international studies training.

Section 656.22(g). The Secretary proposes to address under this criterion the Quality of the center's language instructional program. Questions asked under this criterion are similar to questions currently asked under Quality of the center's instructional program criterion but more specifically identify information to be provided.

Section 656.22(h). As in the comprehensive center selection criteria, the Secretary proposes to eliminate the current Quality of the center's relationships within the institution criterion due to the inclusion of similar questions under the proposed Quality of the center's non-language instructional program criterion. The Secretary proposes a new Quality of curriculum design criterion that would combine elements of the current Quality of the center's relationships within the institution and Overseas activities criteria. The new criterion would allow applicants to focus on the issue of training options for undergraduate students within the context of a single criterion.

Section 656.22(i). The Secretary proposes to eliminate the current Overseas activities criterion due to the inclusion of related questions under the proposed Quality of curriculum design, Commitment to the subject area on which the center focuses, and Quality of staff resources criteria. It has been the Secretary's experience in this program that overseas activities have been critical to providing successful training options for students and professional development opportunities for faculty. Therefore, the Secretary believes that it is more appropriate and more clearly related to the purpose of the National Resource Centers Program to ask questions regarding overseas activities in the context of curriculum design and staff resources. The Secretary proposes to add under this section a modified Outreach activities criterion. Proposed changes to this criterion reflect the Secretary's experience that outreach to postsecondary institutions, business, the media, and the general public is frequently overlooked in favor of elementary and secondary school outreach. By specifying separate point allocations for different kinds of outreach, the Secretary hopes to emphasize the importance to the National Resource Centers Program of outreach to all communities.

Section 656.22(j). As in the comprehensive center selection criteria, the Secretary proposes to eliminate the current Need and potential impact criterion due to the inclusion of related questions under the proposed Program planning and budget and Impact and evaluation criteria. The Secretary proposes to replace this criterion with the current Degree to which priorities are served criterion, decreasing the point value from 20 points to 10. It has been the Secretary's experience that most proposals submitted for competitions under this program succeed in securing almost all of the points assigned to the competitive priority. A 20-point allocation to the competitive priority can result in applications with weaker scores on the mandatory criteria outscoring more fundamentally sound applications that do not meet the priority. A 10-point competitive priority allocation would continue to ensure that quality proposals that meet the competitive priority are funded before quality proposals that do not meet the priority. The Secretary proposes to decrease the total possible points allocated for priorities in order to maintain proportion in the competition and to ensure that only high quality proposals are funded.

Section 656.22(k). The Secretary proposes to delete this paragraph since the Outreach activities criterion would be included as previously noted.

Section 656.22(l). The Secretary proposes to delete this paragraph since the Degree to which priorities are served criterion would be included as previously noted.

Section 656.23. What priorities may the Secretary establish?

The Secretary proposes two modifications to this section that would help to clarify and expand possible funding priorities.

Section 656.23(a)(3). The Secretary proposes to clarify that intensive language instruction is not limited to 10 contact hours per week by adding the phrase "or more." Ten contact hours of instruction per week is normally considered the minimum for what constitutes intensive language training rather than the standard.

Section 656.23(a)(4). The Secretary proposes to expand the list of types of activities to be carried out by adding "course development." Course development is an important tool for strengthening training programs and, therefore, is in keeping with the purpose of the National Resource Centers Program.

Executive Order 12866

Clarity of the Regulations

Executive Order 12866 requires each agency to write regulations that are easy to understand.

The Secretary invites comments on how to make these proposed regulations easier to understand, including answers to questions such as the following: (1) Are the requirements in the regulations clearly stated? (2) Do the regulations contain technical terms or other wording that interfere with their clarity? (3) Does the format of the regulations (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity? Would the regulations be easier to understand if they were divided into more (but shorter) sections? (A "section" is preceded by the symbol "§" and a numbered heading; for example, § 656.20 *How does the Secretary evaluate an application?*) (4) Is the description of the proposed regulations in the "Supplementary Information" section of this preamble helpful in understanding the proposed regulations? How could this description be more helpful in making the proposed regulations easier to understand? (5) What else could the Department do to make the regulations easier to understand?

A copy of any comments that concern how the Department could make these proposed regulations easier to understand should also be sent to Stanley M. Cohen, Regulations Quality Officer, U.S. Department of Education, 600 Independence Avenue, SW. (Room 5100 FB–10B), Washington, DC 20202–2241.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a

significant economic impact on a substantial number of small entities.

These proposed regulations merely correct or simplify and clarify provisions contained in previous regulations and would impose minimal requirements to ensure the proper expenditure of program funds. The small entities that would be affected by these proposed regulations are small institutions of higher education receiving Federal funds under this program. However, the regulations would not have a significant economic impact on the institutions affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision.

Paperwork Reduction Act of 1995

Sections 656.21 and 656.22 contain information collection requirements. As required by the Paperwork Reduction Act of 1995 (44 U.S.C 3507(d)), the Department of Education has submitted a copy of these sections to the Office of Management and Budget (OMB) for its review.

Collection of Information: National Resource Centers Program for Foreign Language and Area Studies or Foreign Language and International Studies.

Institutions of higher education and consortia of institutions of higher education are eligible to apply for grants under these regulations. The information to be collected is specified by the proposed selection criteria and includes information currently collected under regulations for this program. This information is needed and used by the Department to make grants.

The Secretary estimates that this information collection will decrease the current estimated burden of 155 hours per response to 100 hours per response. The estimated burden includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the application to be submitted. Competitions for the National Resource Centers Program are held every three years, with approximately 150 respondents per competition.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 10235, New Executive Office Building, Washington, DC 20503; Attention: Wendy Taylor.

The Department considers comments by the public on these proposed collections of information in—

- Evaluating whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility;
- Evaluating the accuracy of the Department's estimate of the burden of the proposed collections of information, including the validity of the methodology and assumptions used;
- Enhancing the quality, usefulness, and clarity of the information to be collected; and
- Minimizing the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

OMB is required to make a decision concerning the collections of information contained in these proposed regulations between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment to the Department on the proposed regulations.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Suite 600B, Portals Building, 1280 Maryland Avenue, SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 656

Colleges and universities, Education, International education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.015)

Dated: March 25, 1996.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Part 656 as follows:

PART 656—NATIONAL RESOURCE CENTERS FOR FOREIGN LANGUAGE AND AREA STUDIES OR FOREIGN LANGUAGE AND INTERNATIONAL STUDIES

1. The authority citation for Part 656 continues to read as follows:

Authority: 20 U.S.C. 1122, unless otherwise noted.

§ 656.3 [Amended]

2. Section 656.3 is amended by adding "training and" before "research" in paragraph (e)(2).

3. Section 656.7 is amended by removing the word "and" at the end of paragraph (d)(3), removing the period at the end of paragraph (d)(4) and adding, in its place, "; and", and adding paragraph (d)(5) to read as follows:

§ 656.7 What definitions apply?

* * * * *

(d) * * *

(5) Engages in curriculum development and community outreach.

* * * * *

4. Section 656.20 is amended by revising paragraph (b) to read as follows:

§ 656.20 How does the Secretary evaluate an application?

* * * * *

(b) In general, the Secretary awards up to 150 possible points for these criteria. However, if the criterion in §§ 656.21(l) or 656.22(l) is used, the Secretary awards up to 160 possible points. The maximum possible points for each criterion are shown in parentheses.

5. Section 656.21 is revised to read as follows:

§ 656.21 What selection criteria does the Secretary use to evaluate an application for a comprehensive center?

The Secretary uses the following criteria in evaluating an application for a comprehensive center:

(a) *Program planning and budget.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the activities for which the applicant seeks funding are of high quality and directly related to the purpose of the National Resource Centers Program (5 points);

(2) The extent to which the applicant provides a development plan or timeline demonstrating how the proposed activities will contribute to a strengthened program and whether the applicant uses its resources and personnel effectively to achieve the proposed objectives (5 points);

(3) The extent to which the costs of the proposed activities are reasonable in relation to the objectives of the program (5 points); and

(4) The long-term impact of the proposed activities on the institution's undergraduate, graduate, and professional training programs (5 points).

(b) *Quality of staff resources.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which teaching faculty and other staff are qualified for the current and proposed center activities and training programs, are provided professional development opportunities (including overseas experience), and participate in teaching, supervising, and advising students (10 points);

(2) The adequacy of center staffing and oversight arrangements, including outreach and administration and the extent to which faculty from a variety of departments, professional schools, and the library are involved (5 points); and

(3) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, persons with disabilities, and the elderly (5 points).

(c) *Impact and evaluation.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the center's activities and training programs have a significant impact on the university, community, region, and the Nation as shown through indices such as enrollments, graduate placement data, participation rates for events, and usage of center resources; and the extent to which the applicant supplies a clear description of how the applicant will provide equal access and treatment of eligible project participants who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, persons with disabilities, and the elderly (10 points); and

(2) The extent to which the applicant provides an evaluation plan that will be comprehensive and objective and that will produce quantifiable, outcome-measure-oriented data; and the extent to which recent evaluations have been used to improve the applicant's program (10 points).

(d) *Commitment to the subject area on which the center focuses.* (10 points) The Secretary reviews each application to determine the extent to which the institution provides financial and other support to the operation of the center, teaching staff for the center's subject area, library resources, linkages with institutions abroad, outreach activities, and qualified students in fields related to the center.

(e) *Strength of library.* (10 points) The Secretary reviews each application to determine—

(1) The strength of the institution's library holdings (both print and non-print, English and foreign language) in the subject area and at the educational levels (graduate, professional, undergraduate) on which the center focuses; and the extent to which the institution provides financial support for the acquisition of library materials and for library staff in the subject area of the center (5 points); and

(2) The extent to which research materials at other institutions are available to students through cooperative arrangements with other libraries or on-line databases and the extent to which teachers, students, and faculty from other institutions are able to access the library's holdings (5 points).

(f) *Quality of the center's non-language instructional program.* (20 points) The Secretary reviews each application to determine—

(1) The quality and extent of the center's course offerings in a variety of disciplines, including the extent to which courses in the center's subject matter are available in the institution's professional schools (5 points);

(2) The extent to which the center offers depth of specialized course coverage in one or more disciplines of the center's subject area (5 points);

(3) The extent to which the institution employs a sufficient number of teaching faculty to enable the center to carry out its purposes and the extent to which teaching assistants are provided with pedagogy training (5 points); and

(4) The extent to which interdisciplinary courses are offered for undergraduate and graduate students (5 points).

(g) *Quality of the center's language instructional program.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the center provides instruction in the languages of the center's subject area and the extent to which students enroll in those language courses (5 points);

(2) The extent to which the center provides three or more levels of language training and the extent to which courses in disciplines other than language, linguistics, and literature are offered in appropriate foreign languages (5 points);

(3) Whether sufficient numbers of language faculty are available to teach the languages and levels of instruction described in the application and the extent to which language teaching staff (including faculty and teaching assistants) have been exposed to current language pedagogy training appropriate for performance-based teaching (5 points); and

(4) The quality of the language program as measured by the performance-based instruction being used or developed, the adequacy of resources for language teaching and practice, and language proficiency requirements (5 points).

(h) *Quality of curriculum design.* (15 points) The Secretary reviews each application to determine—

(1) The extent to which the center's curriculum has incorporated undergraduate instruction in the applicant's area or topic of specialization into baccalaureate degree programs (for example, major, minor, or certificate programs) and the extent to which these programs and their requirements (including language requirements) are appropriate for a center in this subject area and will result in an undergraduate training program of high quality (5 points);

(2) The extent to which the center's curriculum provides training options for graduate students from a variety of disciplines and professional fields and the extent to which these programs and their requirements (including language requirements) are appropriate for a center in this subject area and result in graduate training programs of high quality (5 points); and

(3) The extent to which the center provides academic and career advising

services for students; the extent to which the center has established formal arrangements for students to conduct research or study abroad and the extent to which these arrangements are used; and the extent to which the institution facilitates student access to other institutions' study abroad and summer language programs (5 points).

(i) *Outreach activities.* (15 points) The Secretary reviews each application to determine the extent to which the center demonstrates a significant and measurable regional and national impact of, and faculty and professional school involvement in, outreach activities that involve—

(1) Elementary and secondary schools (5 points);

(2) Postsecondary institutions (5 points); and

(3) Business, media, and the general public (5 points).

(j) *Degree to which priorities are served.* (10 points) If, under the provisions of § 656.23, the Secretary establishes specific priorities for Centers, the Secretary considers the degree to which those priorities are being served.

(Authority: 20 U.S.C. 1122)

6. Section 656.22 is revised to read as follows:

§ 656.22 What selection criteria does the Secretary use to evaluate an application for an undergraduate center?

The Secretary uses the following criteria in evaluating an application for an undergraduate center:

(a) *Program planning and budget.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the activities for which the applicant seeks funding are of high quality and directly related to the purpose of the National Resource Centers Program (5 points);

(2) The extent to which the applicant provides a development plan or timeline demonstrating how the proposed activities will contribute to a strengthened program and whether the applicant uses its resources and personnel effectively to achieve the proposed objectives (5 points);

(3) The extent to which the costs of the proposed activities are reasonable in relation to the objectives of the program (5 points); and

(4) The long-term impact of the proposed activities on the institution's undergraduate training program (5 points).

(b) *Quality of staff resources.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which teaching faculty and other staff are qualified for the current and proposed center activities and training programs, are provided professional development opportunities (including overseas experience), and participate in teaching, supervising, and advising students (10 points);

(2) The adequacy of center staffing and oversight arrangements, including outreach and administration and the extent to which faculty from a variety of departments, professional schools, and the library are involved (5 points); and

(3) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, persons with disabilities, and the elderly (5 points).

(c) *Impact and evaluation.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the center's activities and training programs have a significant impact on the university, community, region, and the Nation as shown through indices such as enrollments, graduate placement data, participation rates for events, and usage of center resources; the extent to which students matriculate into advanced language and area or international studies programs or related professional programs; and the extent to which the applicant supplies a clear description of how the applicant will provide equal access and treatment of eligible project participants who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, persons with disabilities, and the elderly (10 points); and

(2) The extent to which the applicant provides an evaluation plan that will be comprehensive and objective and produce quantifiable, outcome-measure-oriented data; and the extent to which recent evaluations have been used to improve the applicant's program (10 points).

(d) *Commitment to the subject area on which the center focuses.* (10 points) The Secretary reviews each application to determine the extent to which the institution provides financial and other support to the operation of the center, teaching staff for the center's subject area, library resources, linkages with institutions abroad, outreach activities, and qualified students in fields related to the center.

(e) *Strength of library.* (10 points) The Secretary reviews each application to determine—

(1) The strength of the institution's library holdings (both print and non-print, English and foreign language) in the subject area and at the educational levels (graduate, professional, undergraduate) on which the center focuses; and the extent to which the institution provides financial support for the acquisition of library materials and for library staff in the subject area of the center (5 points); and

(2) The extent to which research materials at other institutions are available to students through cooperative arrangements with other libraries or on-line databases and the extent to which teachers, students, and faculty from other institutions are able to access the library's holdings (5 points).

(f) *Quality of the center's non-language instructional program.* (20 points) The Secretary reviews each application to determine—

(1) The quality and extent of the center's course offerings in a variety of disciplines (5 points);

(2) The extent to which the center offers depth of specialized course coverage in one or more disciplines of the center's subject area (5 points);

(3) The extent to which the institution employs a sufficient number of teaching faculty to enable the center to carry out its purposes and the extent to which teaching assistants are provided with pedagogy training (5 points); and

(4) The extent to which interdisciplinary courses are offered for undergraduate students (5 points).

(g) *Quality of the center's language instructional program.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the center provides instruction in the languages of the center's subject area and the extent to which students enroll in those language courses (5 points);

(2) The extent to which the center provides three or more levels of language training and the extent to which courses in disciplines other than language, linguistics, and literature are offered in appropriate foreign languages (5 points);

(3) Whether sufficient numbers of language faculty are available to teach the languages and levels of instruction described in the application and the extent to which language teaching staff (including faculty and teaching assistants) have been exposed to current language pedagogy training appropriate for performance-based teaching (5 points); and

(4) The quality of the language program as measured by the performance-based instruction being used or developed, the adequacy of resources for language teaching and practice, and language proficiency requirements (5 points).

(h) *Quality of curriculum design.* (15 points) The Secretary reviews each application to determine—

(1) The extent to which the center's curriculum has incorporated undergraduate instruction in the applicant's area or topic of specialization into baccalaureate degree programs (for example, major, minor, or certificate programs) and the extent to which these programs and their requirements (including language requirements) are appropriate for a center in this subject area and will result in an undergraduate training program of high quality (10 points); and

(2) The extent to which the center provides academic and career advising services for students; the extent to which the center has established formal arrangements for students to conduct research or study abroad and the extent to which these arrangements are used; and the extent to which the institution facilitates student access to other institutions' study abroad and summer language programs (5 points).

(i) *Outreach activities.* (15 points) The Secretary reviews each application to determine the extent to which the center demonstrates a significant and measurable regional and national impact of, and faculty and professional school involvement in, outreach activities that involve—

(1) Elementary and secondary schools (5 points);

(2) Postsecondary institutions (5 points); and

(3) Business, media and the general public (5 points).

(j) *Degree to which priorities are served.* (10 points) If, under the provisions of § 656.23, the Secretary establishes specific priorities for centers, the Secretary considers the degree to which those priorities are being served.

(Authority: 20 U.S.C. 1122)

7. Section 656.23 is amended by revising paragraphs (a)(3) and (a)(4) to read as follows:

§ 656.23 What priorities may the Secretary establish?

(a) * * *

(3) Level or intensiveness of language instruction, such as intermediate or advanced language instruction, or instruction at an intensity of 10 contact hours or more per week.

(4) Types of activities to be carried out, for example, cooperative summer intensive language programs, course development, or teacher training activities.

Department of Education

34 CFR Part 657

Higher Education Programs in Modern Foreign Language Training and Area Studies—Foreign Language and Area Studies Fellowships Program; Proposed Rule

DEPARTMENT OF EDUCATION

34 CFR Part 657

RIN 1840–AC29

Higher Education Programs in Modern Foreign Language Training and Area Studies—Foreign Language and Area Studies Fellowships Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Higher Education Programs in Modern Foreign Language Training and Area Studies—Foreign Language and Area Studies (FLAS) Fellowships Program. These amendments are needed in order to improve the application review process and to update the regulations in light of developments in the field of foreign language, area, and international studies. In the spirit of reinventing government, the goal of the proposed changes is to markedly reduce the burden associated with the application review process. These regulations are intended to (a) reduce the burden on applicants and readers by clarifying and restructuring selection criteria to remove ambiguity and eliminate repetition of information presented in applications, (b) facilitate funding decisions by providing a larger possible point spread for greater differentiation of rankings, (c) simplify the application process for applicants, improve the cost-effectiveness of the program, and standardize program management by adopting the fellowship award allocation system currently used to administer other Federal fellowship programs, and (d) improve program quality, efficiency, and flexibility by adopting changes program management experience shows to be appropriate.

DATES: Comments must be received on or before April 29, 1996.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Sara West, U.S. Department of Education, 600 Independence Avenue, S.W., Suite 600B, Portals Building, Washington, D.C. 20202–5331. Comments may also be sent through the Internet to "FLAS—Fellowship@ed.gov".

Comments that concern information collection requirements must be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble. A copy of those comments may also be sent to the Department representative named in the preceding paragraph.

FOR FURTHER INFORMATION CONTACT: Sara West. Telephone: (202) 401–9782. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background

The Foreign Language and Area Studies Fellowships Program is one of several international education programs authorized under Part A of Title VI of the Higher Education Act of 1965, as amended (HEA). The main provisions of the regulations govern the awarding of grants designed to provide fellowship assistance to students enrolled in advanced programs of modern foreign language and area or international studies.

In the spirit of reinventing government, it is the Secretary's goal to simplify the application process and management of the Foreign Language and Area Studies Fellowships Program to benefit the public. The Secretary intends the proposed changes to add clarity to the review process, to decrease the current burden on applicants and peer reviewers, to facilitate the application of uniform standards among peer reviewers and in Federal fellowship program management, to increase cost-effectiveness of the program, and to increase flexibility in program management for funded grantees and for the Secretary.

The Secretary proposes to amend the regulations for the Foreign Language and Area Studies Fellowships Program by modifying the selection criteria for applications, by eliminating references to undergraduate programs and fellowship recipients in keeping with statutory requirements, by adopting a new system of allocating fellowship awards, and by easing restrictions on the use of fellowship awards abroad and clarifying that only academic year awards may be used for research abroad.

Selection Criteria. The selection criteria currently used are very general, leading to some misinterpretation of questions asked, frequent repetition of information, and inclusion of information that is not pertinent to the purpose of the Foreign Language and Area Studies Fellowships Program. The proposed changes seek to retain much of the sense of the current criteria while removing ambiguity regarding requested information. The purpose of the changes is to clarify what information should be presented so that (a) all applicants will provide more focused information necessary for evaluation of a proposal under this program, (b) applicants will be able to present all relevant information within fewer pages of the proposal narrative, and (c) peer reviewers will be able to more easily and accurately evaluate and rank proposals based on comparative strengths.

A reorganized, broader point scale and clearly identified point allocations for individual paragraphs of the technical review criteria are proposed in order to (a) enable peer reviewers to score more carefully and accurately differentiate between proposals of high caliber, (b) discourage peer reviewers from overlooking any individual question to be scored, and (c) clarify for peer reviewers and applicants exactly what requested information corresponds to each point value.

Undergraduate References. The Higher Education Amendments of 1992, Pub. L. 102–325, amended section 603 of the HEA to limit the awarding of FLAS fellowships to graduate students. For that reason, the Secretary eliminates references to undergraduate students or programs and use of ambiguous terms such as "advanced." The purpose of these changes is to bring the regulations in line with the authorizing statute and to clarify program requirements for applicants and grantees.

System of Allocation. The Secretary proposes to increase cost-effectiveness, simplify the application process and program management for grantees, and bring the Foreign Language and Area Studies Fellowships Program more in line with other government fellowship programs by amending the system of allocation. Under the system of allocation currently used to administer this program, a FLAS fellowship consists of a student subsistence allowance and tuition plus all required fees. Grantees are expected to submit in their proposal budgets a variety of tuition rates for graduate students at differing levels of study and enrolled in different academic programs; for example, public institutions provide different rates based upon residency requirements, while both public and private institutions often have varying tuition rates for graduate students enrolled in arts and sciences or professional degree programs or at the dissertation level. Grant monies are then allocated based on a combination of awards at a variety of tuition rates for an individual grantee institution. Because the rates supplied are projections based on rates in effect at the time of application and not actual prospective tuition rates, and because the grantee institutions do not know at the time of the grant competition which students will compete successfully for awards, the current system of allocation is imprecise. While the Secretary might allocate funds for five awards to an institution, there is no guarantee that the institution will make five awards in the amounts assumed. Depending on the students selected, it might actually make two awards at a high tuition rate or seven awards at a low tuition rate.

Under the proposed system of allocation, a FLAS fellowship consists of a student subsistence allowance and a standard institutional payment (rather than full tuition plus fees) to be established by the Secretary and announced in the application notice. This system of allocation is commonly referred to as the "cost-of-education allowance" system. By applying for an allocation of fellowship awards, the institution agrees to accept the institutional payment published in the application notice in lieu of any additional costs of tuition and fees. In cases in which the institutional payment is greater than the actual cost of tuition and fees at the institution, the excess institutional payment funds must be applied toward additional fellowship awards. The purpose of this amendment is to (a) simplify the budget portion of the application process for applicants; (b) make the Foreign Language and Area Studies Fellowships Program more "user-friendly" for the public by adopting a system of allocation currently used for a variety of Federal fellowship programs administered by the U.S. Department of Education and other agencies; (c) simplify grantee institutions' own competitions for fellowship candidates by treating each applicant equally, regardless of tuition rate; (d) eliminate imprecision in how funds will actually be used by grantees and increase the accountability of grantee institutions by requiring them to make a minimum number of awards with their grant allocations; and (e) increase the cost-effectiveness of the program by requiring institutions with high tuition rates to accept a standard institutional payment in lieu of full tuition and fees.

Easing Limits on Overseas Use of Fellowships. Proposed changes to the limitations on the use of funds for overseas fellowships seek to expand grantees' program management options and clarify the appropriate use of awards. The requirement that students using awards at overseas language programs be at the advanced level of language study is expanded to include intermediate-level study for all eligible languages as well as beginning-level study of languages for which appropriate instruction is not available in the United States. Additional modifications are intended to clarify that only academic year awards may be used abroad for research, and summer fellowships are to be used for intensive language training rather than for short-term dissertation research.

Explanation of Changes

The Secretary proposes to make the following changes:

Section 657.1 What is the Foreign Language and Area Studies Fellowships Program?

Section 657.1(a). The Secretary proposes to modify this section to clarify that only graduate-level students are eligible to receive awards since the 1992 reauthorization of the HEA. The current language indicates that students who receive fellowships must be enrolled in "advanced" training. The Secretary believes that substituting the word "graduate" for "advanced" more clearly states the statutory requirement.

Section 657.2 Who is eligible to receive an allocation of fellowships?

Section 657.2(d). The Secretary proposes to eliminate the reference to the Undergraduate International Studies and Foreign Language Program because undergraduate students are no longer eligible to receive awards since the 1992 reauthorization of the HEA.

Section 657.3 Who is eligible to receive a fellowship?

Section 657.3(a)(3). The Secretary proposes to eliminate the entire paragraph referring to students who are permanent residents of the Trust Territory of the Pacific Islands, because there is no longer a Trust Territory of the Pacific Islands.

Section 657.20 How does the Secretary evaluate an institutional application for an allocation of fellowships?

Section 657.20(b). The Secretary proposes to expand the range of possible points for applications in order to enable peer reviewers in scoring to more carefully and accurately differentiate between proposals of high caliber. It has been the Secretary's experience that competition for grants under the Foreign Language and Area Studies Fellowships Program is strong; recent winning applicants have scored within a 15-point range on the current scale. As a result, there has been narrow point differentiation among winning applicants and the highest scoring unsuccessful applicants. The Secretary believes that expanding the possible point range would facilitate funding decisions by providing peer reviewers with a larger scale on which to rank applications, allowing for greater differentiation of scores for applications of similar but different merit. The changed point scale, reflecting changes in the selection criteria and their point allocations, would add 40 possible points for competitions for which there are no announced competitive priorities and 50 possible points for competitions for which competitive priorities have been announced.

Section 657.21 What criteria does the Secretary use in selecting institutions for an allocation of fellowships?

The Secretary proposes extensive changes in this section in order to improve the program's application review process and to reflect current standards in the field of foreign language, area and international studies. The proposed selection criteria identify specific information to be provided in an application, thereby facilitating proposal writing for applicants and evaluation for peer reviewers. The proposed criteria incorporate most aspects of the current criteria but are restructured to enable applicants to present information in a more succinct and less repetitious manner.

Section 657.21(a). The Secretary proposes to eliminate the current Plan of operation criterion and substitute a Foreign language and area studies awardee selection procedures criterion that incorporates elements of the current Plan of operation and Need and potential impact criteria. It has been the Secretary's experience that the language of the current criterion has led to some confusion among grantees and peer reviewers regarding what information should be presented. For example, one question in the Plan of operation criterion asks about the extent to which the objectives of the project relate to the purpose of the program. Applicants and peer reviewers are often uncertain whether "program" refers to the Foreign Language and Area Studies Fellowships Program or to the applicant's training program. The Secretary believes that the proposed language would eliminate uncertainty and assist applicants in writing, and peer reviewers in evaluating, proposals for fellowship awards.

Section 657.21(b). The Secretary proposes to replace the Quality of key personnel criterion with a criterion called Quality of staff resources. The staff resources criterion would ask the same kind of questions as the current key personnel criterion, but would also require explicit information to be

presented regarding faculty and staff involvement in fellowship program activities and oversight and professional development opportunities.

Section 657.21(c). The Secretary proposes to eliminate the current Evaluation plan criterion. The Secretary proposes an Impact and evaluation criterion that would combine related aspects of the current Need and potential impact, Evaluation plan, and Plan of operation criteria. Combining elements of these criteria is logical due to the interrelatedness of questions about past performance and evaluating future performance.

Section 657.21(d). The Secretary proposes to modify the language of the Commitment to the subject area on which the center or program focuses criterion by clarifying those areas for which institutional support should be identified. In the past, some applicant institutions have shown support for the applicant's students by offering matching funds or tuition waivers for fellowship grants received. Although the Foreign Language and Area Studies Fellowships Program does not have a cost-matching requirement, the Secretary would like to encourage institutional efforts to promote the cost-effectiveness of the program as well as institutional commitment to the applicant's training program. For this reason, this criterion also asks applicants to provide information about the extent to which the institution provides financial support to graduate students in fields related to the applicant's teaching program.

Section 657.21(e). The Secretary proposes to modify and redesignate the Strength of library criterion. Due to the changes in information technology and the rising costs of maintaining traditional collections, a library's book and periodical holdings are no longer the only factor that should be considered in evaluating the strength of an applicant institution's library. The proposed regulations would clarify information to be presented and take into account that library resources can be provided in print and non-print media, through cooperative collections and access arrangements with other library collections, and through on-line, electronic data bases.

Section 657.21(f). The Secretary proposes to add a new criterion called Quality of the applicant's non-language instructional program. The proposed criterion would incorporate related elements of the current Quality of the applicant's instructional program and Quality of the applicant's relationships within the institution criteria. The Secretary believes that including all questions related to non-language course offerings in one section would allow grantees to streamline their proposals and avoid repetition. It has been the Secretary's experience that combining questions about non-language and language courses in the same criterion can lead to applicants neglecting to provide full information about both non-language and language training. For that reason, the Secretary proposes to ask parallel questions regarding the quality of language and non-language training under two separate criteria. It is the opinion of the Secretary that separate criteria would emphasize the importance to the Foreign Language and Area Studies Fellowships Program of both language and area or international studies training.

Section 657.21(g). The Secretary proposes to address under this criterion the Quality of the applicant's language instructional program. Questions asked under this criterion are similar to questions currently asked under Quality of the applicant's instructional program criterion but more specifically identify information to be provided.

Section 657.21(h). The Secretary proposes to replace the current Overseas activities criterion with a criterion called Quality of curriculum design. Relevant questions about overseas activities would be asked under the proposed Quality of curriculum design, Commitment to the subject area on which the applicant focuses, and Quality of staff resources criteria. It has been the Secretary's experience in this program that overseas activities have been critical to providing successful training options for students and professional development opportunities for faculty. Therefore, the Secretary believes that it is more appropriate and more clearly related to the purpose of the Foreign Language and Area Studies Fellowships Program to ask questions regarding overseas activities in the context of curriculum design and staff resources. The proposed Quality of curriculum design criterion would combine elements of the current Overseas activities and Quality of the applicant's relationships within the institution criteria. The new criterion would allow applicants to focus on the issue of training options for students within the context of a single criterion.

Section 657.21(i). The Secretary proposes to eliminate the current Need and potential impact criterion because related questions would be asked under the proposed Foreign language and area studies fellowships awardee selection procedures and Impact and evaluation criteria. The Secretary proposes to redesignate the current Priorities criterion as § 657.21(i) and to decrease the point value from 20 points to 10. It has been the Secretary's experience that most proposals submitted for competitions under this program succeed in securing almost all of the points allocated to the competitive priority. A 20-point allocation to the competitive priority can result in applications with weaker scores on the mandatory criteria ranking higher than quality proposals that do not meet the priority. A 10-point competitive priority allocation would continue to ensure that quality proposals that meet the competitive priority are funded before quality proposals that do not meet the priority. The Secretary proposes to decrease the total possible points allocated for priorities in order to maintain proportion in the competition and to ensure that only high quality proposals are funded.

Section 657.21(j). The Secretary proposes to eliminate this paragraph because the Priorities criterion would be included under § 657.21(i).

Section 657.31 What is the amount of a fellowship?

The Secretary proposes to change the system of allocation of fellowship award monies in order to simplify the administration of awards for grantees, increase cost-effectiveness of the program, and increase uniformity of procedures among federally funded fellowship programs. The Secretary proposes to specify that each fellowship awarded would consist of a standard institutional payment and a subsistence allowance to be announced in the application notice published in the **Federal Register**. The Secretary also proposes to delete references to education levels of recipients since all recipients must be at the graduate level.

Section 657.32 What is the payment procedure for fellowships?

Section 657.32(d). The Secretary proposes to limit the use of fellowship funds by stating that funds not used by one fellowship recipient for reasons of withdrawal are to be used for alternate recipients to the extent that funds are available for a full subsistence allowance. In addition, if actual tuition rates are less than the institutional payment, excess funds must be used to fund additional fellowships to the extent that funds are available for a full subsistence allowance. This provision would maximize the cost-efficiency of the fellowship funds by ensuring that low-tuition institutions use excess funds to support additional fellows.

Section 657.33 What are the limitations on the use of funds for overseas fellowships?

The Secretary proposes changes to this section that would ease restrictions on and clarify appropriate use of overseas awards. It has been the Secretary's experience that students at an intermediate level of language study can benefit as much from an overseas study experience as advanced students if enrolled in a high-quality language program. Furthermore, appropriate instruction (particularly for less-commonly-taught languages) is not always available in the United States.

Section 657.33(b)(1). The Secretary proposes to allow students at the intermediate level of language study to enroll in overseas language programs. Currently, only advanced students may use awards abroad. Additionally, the Secretary proposes to allow the use of fellowship awards for overseas study at the beginning level of languages for which instruction is frequently not available in the United States.

Section 657.33(b)(2). In order to clarify for grantees that summer fellowships are to be used for intensive language training rather than short-term dissertation research, the Secretary proposes to specify that awards may be approved for dissertation research during the academic year only.

Executive Order 12866

Clarity of the Regulations

Executive Order 12866 requires each agency to write regulations that are easy to understand.

The Secretary invites comments on how to make these proposed regulations easier to understand, including answers to questions such as the following: (1) Are the requirements in the regulations clearly stated? (2) Do the regulations contain technical terms or other wording that interferes with their clarity? (3) Does the format of the regulations (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity? Would the regulations be easier to understand if they were divided into more (but shorter) sections? (A "section" is preceded by the symbol "§" and a numbered heading; for example, § 657.2 *Who is eligible to receive an allocation of fellowships?*) (4) Is the description of the proposed regulations in the "Supplementary Information" section of this preamble helpful in understanding the proposed regulations? How could this description be more helpful in making the proposed regulations easier to understand? (5) What else could the Department do to make the regulations easier to understand?

A copy of any comments that concern how the Department could make these proposed regulations easier to understand should also be sent to Stanley M. Cohen, Regulations Quality Officer, U.S. Department of Education, 600 Independence Avenue, S.W. (Room 5100 FB–10B), Washington, D.C. 20202–2241.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

These proposed regulations merely correct or simplify and clarify provisions contained in previous regulations and would impose minimal requirements to ensure the proper expenditure of program funds. The small entities that would be affected by these proposed regulations are institutions of higher education receiving Federal funds under this program. However, the regulations would not have a significant economic impact on the institutions affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision.

Paperwork Reduction Act of 1995

Section 657.21 contains information collection requirements. As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), the Department of Education has submitted a copy of this section to the Office of Management and Budget (OMB) for its review.

Collection of Information: Foreign Language and Area Studies Fellowships Program.

Institutions of higher education and consortia of institutions of higher education are eligible to apply for grants under these regulations. The information to be collected is specified by the proposed technical review criteria and includes information currently collected under regulations for this program. This information is needed and used by the Department to make grants.

The Secretary estimates that this information collection will decrease the current estimated burden of 155 hours per response to 100 hours per response. The estimated burden includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the application to be submitted. Competitions for the Foreign Language and Area Studies Fellowships Program are held every three years, with approximately 160 respondents per competition.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 10235, New Executive Office Building, Washington, D.C. 20503; Attention: Wendy Taylor.

The Department considers comments by the public on this proposed collection of information in—

- Evaluating whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility;
- Evaluating the accuracy of the Department's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhancing the quality, usefulness, and clarity of the information to be collected; and
- Minimizing the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

OMB is required to make a decision concerning the collection of information contained in these proposed regulations between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment to the Department on the proposed regulations.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Suite 600B, Portals Building, 1280 Maryland Avenue, S.W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week, except Federal holidays.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 657

Colleges and universities, Education, International education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.015)

Dated: March 25, 1996.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Part 657 as follows:

PART 657—FOREIGN LANGUAGE AND AREA STUDIES FELLOWSHIPS PROGRAM

1. The authority citation for Part 657 continues to read as follows:

Authority: 20 U.S.C. 1122, unless otherwise noted.

§ 657.1 [Amended]

2. Section 657.1 is amended by revising the heading by removing the word "Fellowship" and adding, in its place, the word "Fellowships" and by removing the word "advanced" and adding, in its place, "graduate" in paragraph (a).

§ 657.2 [Amended]

3. Section 657.2 is amended by removing "or the Undergraduate International Studies and Foreign Language Program, 34 CFR part 658," in paragraph (d).

§ 657.3 [Amended]

4. Section 657.3 is amended by removing paragraph (a)(3), adding the word "or" at the end of paragraph (a)(1), and removing the word "or" at the end of paragraph (a)(2).

5. Section 657.20 is amended by revising paragraph (b) to read as follows:

§ 657.20 How does the Secretary evaluate an institutional application for an allocation of fellowships?

* * * * *

(b) In general, the Secretary awards up to 140 possible points for these criteria. However, if priority criteria are used, the Secretary awards up to 150 possible points. The maximum possible points for each criterion are shown in parentheses.

6. Section 657.21 is revised to read as follows:

§ 657.21 What criteria does the Secretary use in selecting institutions for an allocation of fellowships?

(a) *Foreign language and area studies fellowships awardee selection procedures.* (15 points) The Secretary reviews each application to determine—

(1) Whether the selection plan is of high quality, showing how awards will be advertised, how students apply, what selection criteria are used, who selects the fellows, when each step will take place, and how the process will result in awards being made to correspond to any announced priorities; and

(2) Whether the applicant provides information about current and prospective applicant/award ratios.

(b) *Quality of staff resources.* (15 points) The Secretary reviews each application to determine—

(1) The extent to which teaching faculty and other staff are qualified for the current and proposed activities and training programs, are provided professional development opportunities (including overseas experience), and participate in teaching, supervising, and advising students (5 points);

(2) The adequacy of applicant staffing and oversight arrangements and the extent to which faculty from a variety of departments, professional schools, and the library are involved (5 points); and

(3) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, persons with disabilities, and the elderly (5 points).

(c) *Impact and evaluation.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the applicant's activities and training programs have contributed to an improved supply of specialists on the program's subject as shown through indices such as graduate enrollments and placement data; and the extent to which the applicant supplies a clear description of how the applicant will provide equal access and treatment of eligible project participants who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, persons with disabilities, and the elderly (15 points); and

(2) The extent to which the applicant provides an evaluation plan that will be comprehensive and objective and that will produce quantifiable, outcome-measure-oriented data; and the extent to which recent evaluations have been used to improve the applicant's program (5 points).

(d) *Commitment to the subject area on which the applicant or program focuses.* (10 points) The Secretary reviews each application to determine—

(1) The extent to which the institution provides financial and other support to the operation of the applicant, teaching staff for the applicant's subject area, library resources, and linkages with institutions abroad (5 points); and

(2) The extent to which the institution provides financial support to graduate students in fields related to the applicant's teaching program (5 points).

(e) *Strength of library.* (15 points) The Secretary reviews each application to determine—

(1) The strength of the institution's library holdings (both print and non-print, English and foreign language) for graduate students; and the extent to which the institution provides financial support for the acquisition of library materials and for library staff in the subject area of the applicant (10 points); and

(2) The extent to which research materials at other institutions are available to students through cooperative arrangements with other libraries or on-line databases (5 points).

(f) *Quality of the applicant's non-language instructional program.* (25 points) The Secretary reviews each application to determine—

(1) The quality and extent of the applicant's course offerings in a variety of disciplines, including the extent to which courses in the applicant's subject matter are available in the institution's professional schools (10 points);

(2) The extent to which the applicant offers depth of specialized course coverage in one or more disciplines on the applicant's subject area (5 points);

(3) The extent to which the institution employs a sufficient number of teaching faculty to enable the applicant to carry out its purposes and the extent to which teaching assistants are provided with pedagogy training (5 points); and

(4) The extent to which interdisciplinary courses are offered for graduate students (5 points).

(g) *Quality of the applicant's language instructional program.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the applicant provides instruction in the languages of the applicant's subject area and the extent to which students enroll in those language courses (5 points);

(2) The extent to which the applicant provides three or more levels of language training and the extent to which courses in disciplines other than language, linguistics, and literature are offered in appropriate foreign languages (5 points);

(3) Whether sufficient numbers of language faculty are available to teach the languages and levels of instruction described in the application and the extent to which language teaching staff (including faculty and teaching assistants) have been exposed to current language pedagogy training appropriate for performance-based teaching (5 points); and

(4) The quality of the language program as measured by the performance-based instruction being used or developed, the adequacy of resources for language teaching and practice, and language proficiency requirements (5 points).

(h) *Quality of curriculum design.* (20 points) The Secretary reviews each application to determine—

(1) The extent to which the applicant's curriculum provides training options for graduate students from a variety of disciplines and professional fields and the extent to which these programs and their requirements (including language requirements) are appropriate for an applicant in this subject area and result in graduate training programs of high quality (10 points);

(2) The extent to which the applicant provides academic and career advising services for students (5 points); and

(3) The extent to which the applicant has established formal arrangements for students to conduct research or study abroad and the extent to which these arrangements are used; and the extent to which the institution facilitates student access to other institutions' study abroad and summer language programs (5 points).

(i) *Priorities.* (10 points) If one or more priorities have been established under § 657.22, the Secretary reviews each application for information that shows the extent to which the center or program meets these priorities.

(Authority: 20 U.S.C. 1122)

7. Section 657.31 is amended by revising paragraphs (a)(2) and (b)(1), and adding new paragraph (a)(3) to read as follows:

§ 657.31 What is the amount of a fellowship?

(a) * * *

(2) Each fellowship includes an institutional payment and a subsistence allowance to be determined by the Secretary.

(3) If the institutional payment determined by the Secretary is greater than the tuition and fees charged by the institution, the institutional payment portion of the fellowship is limited to actual tuition and fees. The difference between actual tuition and fees and the Secretary's institutional payment shall be used to fund additional fellowships to the extent that funds are available for a full subsistence allowance.

(4) If permitted by the Secretary, the fellowship may include an allowance for travel and an allowance for dependents.

(b) The Secretary announces in an application notice published in the **Federal Register**—

(1) The amounts of the subsistence allowance and the institutional payment for an academic year and the subsistence allowance and the institutional payment for a summer session;

* * * * *

8. Section 657.32 is amended by adding a new paragraph (d) to read as follows:

§ 657.32 What is the payment procedure for fellowships?

* * * * *

(d) Funds not used by one recipient for reasons of withdrawal are to be used for alternate recipients to the extent that funds are available for a full subsistence allowance.

9. Section 657.33 is amended by revising paragraph (b) to read as follows:

§ 657.33 What are the limitations on the use of funds for overseas fellowships?

* * * * *

(b) The Secretary may approve the use of a fellowship outside the United States if the student is—

(1) Enrolled in an overseas program approved by the institution at which the student is enrolled in the United States for study at an intermediate or advanced level or at the beginning level if appropriate equivalent instruction is not available in the United States; or

(2) Engaged during the academic year in research that cannot be done effectively in the United States and is affiliated with an institution of higher education or other appropriate organization in the host country.

TDD for the hearing impaired	523–5229

ELECTRONIC BULLETIN BOARD

Free **Electronic Bulletin Board** service for Public Law numbers, Federal Register finding aids, and list of documents on public inspection. 202–275–0920

FAX-ON-DEMAND

You may access our Fax-On-Demand service. You only need a fax machine and there is no charge for the service except for long distance telephone charges the user may incur. The list of documents on public inspection and the daily Federal Register's table of contents are available using this service. The document numbers are 7050-Public Inspection list and 7051-Table of Contents list. The public inspection list will be updated immediately for documents filed on an emergency basis.

NOTE: YOU WILL ONLY GET A LISTING OF DOCUMENTS ON FILE AND NOT THE ACTUAL DOCUMENT. Documents on public inspection may be viewed and copied in our office located at 800 North Capitol Street, N.W., Suite 700. The Fax-On-Demand telephone number is: 301–713–6905

ENERGY DEPARTMENT
Debarment and suspension (procurement) and governmentwide debarment and suspension (nonprocurement); drug-free workplace requirements; comments due by 4-2-96; published 2-2-96
National Environmental Policy Act; implementation; comments due by 4-5-96; published 2-20-96
ENVIRONMENTAL PROTECTION AGENCY
Air pollutants, hazardous; national emission standards:
Synthetic organic chemical manufacturing industry and other processes subject to equipment leaks negotiated regulation; comments due by 4-1-96; published 2-29-96
Air programs:
Stratospheric ozone protection–
Motor vehicle air conditioners servicing; comments due by 4-5-96; published 3-6-96
Refrigerant recycling; comments due by 4-1-96; published 2-29-96
Refrigerant recycling; comments due by 4-1-96; published 2-29-96
Refrigerant recycling; comments due by 4-1-96; published 2-29-96
Air quality implementation plans; approval and promulgation; various States:
California; comments due by 4-1-96; published 3-1-96
Kentucky; comments due by 4-5-96; published 3-6-96
Maryland; comments due by 4-1-96; published 3-1-96
Michigan; comments due by 4-1-96; published 3-1-96
Missouri; comments due by 4-1-96; published 2-29-96
Oklahoma; comments due by 4-1-96; published 2-29-96
Hazardous waste program authorizations:
Washington; comments due by 4-1-96; published 2-29-96
Pesticides; tolerances in food, animal feeds, and raw agricultural commodities:
Prosulfuron; comments due by 4-5-96; published 3-6-96
Sethoxydim; comments due by 4-1-96; published 2-29-96
Superfund program:
National oil and hazardous substances contingency plan–
National priorities list update; comments due by 4-1-96; published 3-1-96
Water pollution control:
Clean Water Act–
Pollutant analysis; test procedures guidelines; comments due by 4-2-96; published 1-26-96
Ocean dumping; bioassay testing requirements; comments due by 4-1-96; published 2-29-96
FEDERAL COMMUNICATIONS COMMISSION
Common carrier services:
Open video systems; implementation; comments due by 4-1-96; published 3-14-96
Satellite communications–
Fixed-satellite service in 13.75-14.0 GHz band; comments due by 4-1-96; published 3-6-96
Telecommunications Act; implementation–
Equipment standards; dispute resolution; comments due by 4-1-96; published 3-12-96
Radio broadcasting:
Arecibo Coordination Zone, PR; designation; comments due by 4-1-96; published 3-15-96
Radio stations; table of assignments:
California; comments due by 4-5-96; published 2-20-96
Delaware; comments due by 4-5-96; published 2-20-96
New York et al.; comments due by 4-5-96; published 2-20-96
Oregon; comments due by 4-5-96; published 2-20-96
Texas; comments due by 4-5-96; published 2-20-96
FEDERAL RESERVE SYSTEM
Truth in lending (Regulation Z):
Consumer protection; adequacy determination; comments due by 4-1-96; published 1-30-96
FEDERAL TRADE COMMISSION
Trade regulation rules:
Waist belts, leather content; misbranding and deception; comments due by 4-4-96; published 3-5-96
HEALTH AND HUMAN SERVICES DEPARTMENT
Food and Drug Administration
Chlorofluorocarbon propellants in self-pressurized containers:

Sterile aerosol talc; addition to list of essential uses; comments due by 4-1-96; published 3-1-96
Food additives:
Folic acid (Folacin); comments due by 4-4-96; published 3-5-96
Food for human consumption:
Food additives–
Sucrose esterified with medium and long chain fatty acids (olestra); comments due by 4-1-96; published 3-21-96
Food labeling–
Folate and neural tube defects; health claims and label statements; comments due by 4-4-96; published 3-5-96
Health claims, oats and coronary heart disease; comments due by 4-3-96; published 1-4-96
INTERIOR DEPARTMENT
Fish and Wildlife Service
Endangered and threatened species:
California condors, captive-reared; comments due by 4-1-96; published 2-29-96
INTERIOR DEPARTMENT

LIST OF PUBLIC LAWS

This is a list of public bills from the 104th Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 2036/P.L. 104–119

Land Disposal Program Flexibility Act of 1996 (Mar. 26, 1996; 110 Stat. 830)

Last List March 26, 1996

Public Laws

104th Congress, 2nd Session, 1996

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregulary upon enactment, for the 104th Congress, 2nd Session, 1996.

Individual laws also may be purchased from the Superintendent of Documents, Washingrton,DC 20402–9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws.)

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Raleigh, NC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids gpo.gov; by faxing to (202) 512–1262; or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 61 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

RALEIGH, NC

WHEN: April 16, 1996 at 9:00 am
WHERE: Federal Building and U.S. Courthouse, Room 209, 310 New Bern Avenue, Raleigh, NC 27601
RESERVATIONS: 1–800–688–9889

WASHINGTON, DC

WHEN: April 23, 1996 at 9:00 am
WHERE: Office of the Federal Register Conference Room, 800 North Capitol Street, NW., Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

Vol. 61, No. 62
Friday, March 29, 1996

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 925

[Docket No. FV95–925–1C]

Grapes Grown in a Designated Area of Southeastern California; Interim Final Rule To Revise Container Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Correction to interim final rule.

SUMMARY: This document contains a correction to the interim final rule published on March 19, 1996 [61 FR 11127] concerning grapes grown in Southeastern California.

EFFECTIVE DATE: March 19, 1996.

FOR FURTHER INFORMATION CONTACT: Charles L. Rush, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2526–S, Washington, DC 20090–6456, telephone (202) 690–3670; or Rose M. Aguayo, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, 2202 Monterey Street, Suite 102B, Fresno, California 93721; telephone (209) 487–5901.

SUPPLEMENTARY INFORMATION:

Background

This rule adds two new containers to the list of containers authorized for use by table grape handlers regulated under the marketing order. This rule also reduces the minimum net weight of containers of California table grapes from 22 pounds to 20 pounds and for grapes packed in poly bags from 20 pounds to 18 pounds.

Need for Correction

The interim final rule as published contains an error in the amendatory language affecting 7 CFR part 925.

Correction of Publication

Accordingly, in FR Doc. 96–6348, published March 19, 1996, page 11129, amendatory language number 2, is corrected to read as follows:

§ 925.304 [Corrected]

2. In § 925.304, paragraph (b)(2) is revised and paragraphs (b)(1)(vi) and (b)(1)(vii) are redesignated as paragraphs (b)(1)(viii) and (b)(1)(ix) and new paragraphs (b)(1)(vi) and (b)(1)(vii) are added to read as follows:

Dated: March 25, 1996.

Robert C. Keeney,

Director, Fruit and Vegetable Division.

[FR Doc. 96–7653 Filed 3–28–96; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–NM–70–AD; Amendment 39–9553; AD 96–07–04]

Airworthiness Directives; Fokker Model F27 Mark 050 and Model F28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Fokker Model F27 Mark 050 and Model F28 Mark 0100 series airplanes, that requires an inspection to verify that adequate clearance exists between the insulation screen and the two adjacent terminal bolts, and replacement of the circuit breaker terminal bolts with new bolts, if necessary. This amendment is prompted by a report that circuit breaker terminal bolts that were too long were discovered installed in the circuit breaker panels. The actions specified by this AD are intended to prevent damage to the insulation screen between adjacent rows of circuit breakers, as the result of a circuit breaker terminal bolt being too long; this condition could lead to electrical arcing and loss of the associated electrical system, which could result in the potential for an electrical fire.

DATES: Effective April 29, 1996.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 29, 1996.

ADDRESSES: The service information referenced in this AD may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tim Dulin, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2141; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Fokker Model F27 Mark 050 and Model F28 Mark 0100 series airplanes was published in the **Federal Register** on November 28, 1995 (60 FR 58584). That action proposed to require a one-time inspection to verify that adequate clearance exists between the insulation screen and the two adjacent terminal bolts, and replacement of the circuit breaker terminal bolts with new bolts, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 44 Model F28 Mark 0100 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the AD on U.S. operators of Model F28 Mark 0100

series airplanes is estimated to be $2,640, or $60 per airplane.

Should an operator of Model F28 Mark 0100 series airplanes be required to accomplish the necessary bolt replacement, it will take approximately 7 work hours per airplane to accomplish the replacement, at an average labor rate of $60 per work hour. Required parts will cost approximately $100 per airplane. Based on these figures, the cost impact of any necessary replacement action is estimated to be $520 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Currently there are no Fokker Model F27 Mark 050 series airplanes on the U.S. Register. However, should an affected airplane be imported and placed on the U.S. Register in the future, it will take approximately 1 work hour per airplane to accomplish the required inspection, at an average labor rate of $60 per work hour. Based on these figures, the impact of the required inspection on operators of Model F27 Mark 050 series airplanes will be $60 per airplane.

Should an operator of Model F27 Mark 050 series airplanes be required to accomplish the necessary bolt replacement, it will take approximately 17 work hours per airplane to accomplish the replacement, at an average labor rate of $60 per work hour. Required parts will cost approximately $150 per airplane. Based on these figures, the cost impact of any necessary replacement action is estimated to be $1,170 per airplane.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–07–04 Fokker: Amendment 39–9553. Docket 95–NM–70–AD.

Applicability: Model F27 Mark 050 series airplanes having serial numbers 20247 through 20292 inclusive, and 20294 through 20297 inclusive; and Model F28 Mark 0100 series airplanes having serial numbers 11390 through 11479 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent electrical arcing and subsequent loss of the associated electrical system, which could result in the potential for an electrical fire, accomplish the following:

(a) Within 12 months after the effective date of this AD, perform an inspection to verify if adequate clearance exists between the insulation screen and the two adjacent terminal bolts in accordance with Fokker Service Bulletin SBF100–20–001, dated January 15, 1994 (for Model F28 Mark 0100 series airplanes), or Fokker Service Bulletin SBF50–20–003, dated January 11, 1994 (for Model F27 Mark 050 series airplanes), as applicable.

(1) If adequate clearance is found, no further action is required by this AD.

(2) If inadequate clearance is found, prior to further flight, replace the circuit breaker terminal bolts with new bolts in accordance with the applicable service bulletin.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspection and replacement shall be done in accordance with Fokker Service Bulletin SBF100–20–001, dated January 15, 1994, or Fokker Service Bulletin SBF50–20–003, dated January 11, 1994, as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on April 29, 1996.

Issued in Renton, Washington, on March 21, 1996.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 96–7400 Filed 3–28–96; 8:45 am]

BILLING CODE 4910–13–P

---

14 CFR Part 39

[Docket No. 95–NM–86–AD; Amendment 39–9555; AD 96–07–06]

Airworthiness Directives; Fokker Model F28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Fokker Model F28 Mark 0100 series airplanes, that requires inspection(s) to verify that the position indicator of the fuel balance transfer valve (FBTV) is in the closed position, and closing the FBTV, if necessary; and deactivation of the fuel balance transfer system (FBTS). This amendment is prompted by a report that, under certain failure conditions, the actuator of the FBTV could remain in the open position without a flight deck indication. The actions specified by this AD are intended to ensure that the FBTV is not in the open position during flight, which could lead to the reduction of fuel supply to the engines during cross-feed operation and consequent engine fuel starvation.

DATES: Effective April 29, 1996.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 29, 1996.

ADDRESSES: The service information referenced in this AD may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tim Dulin, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2141; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Fokker Model F28 Mark 0100 series airplanes was published in the **Federal Register** on December 11, 1995 (60 FR 63470). That action proposed to require inspection(s) to verify that the position indicator of the fuel balance transfer valve (FBTV) is in the closed position, and closing the FBTV, if necessary; and deactivation of the fuel balance transfer system (FBTS).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 4 airplanes of U.S. registry will be affected by this AD, that it will take approximately 4 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will cost approximately $250 per airplane. Based on these figures, the cost impact of the AD on U.S. operators is estimated to be $1,950, or $490 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–07–06 Fokker: Amendment 39–9555. Docket 95–NM–86–AD.

Applicability: Model F28 Mark 0100 series airplanes, as listed in Fokker Service Bulletin SBF100–28–030, Revision 1, dated December 5, 1994; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent the reduction of fuel supply to the engines during cross-feed operation which could lead to engine fuel starvation, accomplish the following:

(a) After the effective date of this AD, whenever the fuel balance transfer system (FBTS) is used during maintenance, prior to further flight, perform an inspection to verify that the position indicator of the fuel balance transfer valve (FBTV) is in the closed position, in accordance with Fokker Service Bulletin SBF100–28–030, Revision 1, dated December 5, 1994. The inspection requirements of this paragraph must be accomplished until the deactivation required by paragraph (b) of this AD is accomplished.

(1) If the position indicator is in the closed position, no further action is required by this paragraph.

(2) If the position indicator is in the open position, close the FBTV in accordance with the service bulletin.

(b) Within 90 days after the effective date of this AD, deactivate the FBTS in accordance with either Part 2 or Part 3 of the Accomplishment Instructions of Fokker Service Bulletin SBF100–28–030, Revision 1, dated December 5, 1994, as applicable. Accomplishment of the deactivation constitutes terminating action for the repetitive inspection requirements of paragraph (a) of this AD.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of

compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The actions shall be done in accordance with Fokker Service Bulletin SBF100–28–030, Revision 1, dated December 5, 1994, which contains the following list of effective pages:

Page No.	Revision level shown on page	Date shown on page
1–3, 5, 8, 10 .	1	December 5, 1994.
4, 6, 7, 9	Original	August 28, 1994.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

(f) This amendment becomes effective on April 29, 1996.

Issued in Renton, Washington, on March 21, 1996.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 96–7399 Filed 3–28–96; 8:45 am]

BILLING CODE 4910–13–P

---

14 CFR Part 39

[Docket No. 95–NM–136–AD; Amendment 39–9554; AD 96–07–05]

Airworthiness Directives; Dornier Model 328–100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Dornier Model 328–100 series airplanes, that requires installation of a reinforcement doubler on the rudder skin. This amendment is prompted by the results of a design review of this airplane model that revealed inadequate structural strength of the attachment fitting of the rudder damper and of the adjacent structure. The actions specified by this AD are intended to prevent failure of the attachment structure of the rudder damper in the event of aerodynamic gust loads, as the result of inadequate structural strength of the subject structure.

DATES: Effective April 29, 1996.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 29, 1996.

ADDRESSES: The service information referenced in this AD may be obtained from Dornier Luftfahrt GmbH, P.O. Box 1103, D–82230 Wessling, Germany. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Gary Lium, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–1112; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Dornier Model 328–100 series airplanes was published in the **Federal Register** on January 3, 1996 (61 FR 133). That action proposed to require installation of a reinforcement doubler on the rudder skin.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supports the proposed rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 12 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 work hours per airplane to accomplish the required actions, and that the average labor rate is $60 per work hour. Required parts will be supplied by the manufacturer at no cost to operators. Based on these figures, the cost impact of the AD on U.S. operators is estimated to be $1,440, or $120 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–07–05 Dornier: Amendment 39–9554. Docket 95–NM–136–AD.

Applicability: Model 328–100 series airplanes, serial numbers 3005 through 3024 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the attachment structure of the rudder damper in the event of aerodynamic gust loads, accomplish the following:

(a) Within 6 months after the effective date of this AD, install a reinforcement doubler on the rudder skin in accordance with Dornier Service Bulletin SB–328–27–063, Revision 1, dated January 26, 1995.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The installation shall be done in accordance with Dornier Service Bulletin SB–328–27–063, Revision 1, dated January 26, 1995. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Dornier Luftfahrt GmbH, P.O. Box 1103, D–82230 Wessling, Germany. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

(e) This amendment becomes effective on April 29, 1996.

Issued in Renton, Washington, on March 21, 1996.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 28508; Amdt. No. 1718]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Area Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and

safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Air Traffic Control, Airports, Navigation (Air).

Issued in Washington, DC on March 22, 1996.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 is revised to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120, 44701; and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

** * * Effective April 25, 1996*

Athens, GA, Athens Muni, LOC RWY 27, Orig, CANCELLED
Athens, GA, Athens Muni, ILS RWY 27, Orig
Independence, KS, Independence Muni, NDB RWY 17, Amdt 1, CANCELLED

BILLING CODE 4910–13–M

14 CFR Part 97

[Docket No. 28509; Amdt. No. 1719]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which affected airport is located; or
3. The Flight Inspection Area Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC)/Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviations Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled.

The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPS criteria were applied to only these specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the TERPS. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

BILLING CODE 4910–13–M

14 CFR Part 97

[Docket No. 28510; Amdt. No. 1720]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Area Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Form 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. The SIAPs contained in this amendment are based on the criteria contained in the United States Standard for Terminal Instrument Approach Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports.

The FAA has determined through testing that current non-localizer type, non-precision instrument approaches developed using the TERPS criteria can be flown by aircraft equipped with Global Positioning System (GPS) equipment. In consideration of the above, the applicable Standard Instrument Approach procedures (SIAPs) will be altered to include "or GPS" in the title without otherwise reviewing or modifying the procedure. (Once a stand alone GPS procedure is developed, the procedure title will be altered to remove "or GPS" from these non-localizer, non-precision instrument approach procedure titles.) Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are, impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Thomas C. Accardi,

Director, Flight Standard Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 is revised to read as follows:

Authority: 49 U.S.C. 40103, 40113, 40120, 44701; 49 U.S.C. 106(g); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.27, 97.33, 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.27 NDB, NDB/DME; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

** * * Effective April 25, 1996*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Nicarbazin; Technical Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations regarding the use of nicarbazin in Type C broiler feeds. Because of incorrect amendatory instructions in a final rule that appeared in the **Federal Register** of June 5, 1995 (60 FR 29483), certain uses of nicarbazin combination Type C broiler feeds were removed from the regulations. This document corrects those errors.

EFFECTIVE DATE: March 29, 1996

FOR FURTHER INFORMATION CONTACT: David L. Gordon, Center For Veterinary Medicine (HFV–238), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1739.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 5, 1995 (60 FR 29483), the animal drug regulations were amended to codify Merck Research Laboratories, Division of Merck & Co.'s NADA 98–378 for use of single ingredient nicarbazin and bacitracin methylene disalicylate Type A articles to make combination drug Type C medicated broiler feeds. The document published with incorrect amendatory language resulting in the removal of certain approved uses of the drug from the regulation. FDA is correcting these errors.

Publication of this document constitutes final action on these changes under the Administrative Procedures Act (5 U.S.C. 553). Notice and public procedures on these corrections is unnecessary because FDA is merely republishing previously approved regulations.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Secs. 512, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b, 371).

2. Section 558.366 is amended in the table in paragraph (c) by alphabetically adding two new entries to read as follows:

§ 558.366 Nicarbazin.

* * * * *

(c) * * *

Nicarbazin in grams per ton	Combination in grams per ton	Indications for use	Limitations	Sponsor
*	*	* * *	*	*
	Roxarsone 22.7 (0.0025).	do	Feed continuously as sole ration from time chicks are placed on litter until past the time when coccidiosis is ordinarily a hazard; as sole source of organic arsenic; do not use a treatment for coccidiosis; do not use in flushing mashes; do not feed to laying hens; withdraw 5 days before slaughter.	000006
	Rosarsone 22.7 (0.0025) plus lincomycin 2 (0.0004).	do	do	000005

21 CFR Part 1310

[DEA–135F]

RIN 1117–AA30

Manufacturer Reporting

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Final Rule.

SUMMARY: This rule is issued by the Deputy Administrator of the Drug Enforcement Administration (DEA) to implement provisions of the Domestic Chemical Diversion Control Act of 1993 (Pub. 103–200) (DCDCA) to specify certain reporting requirements for manufacturers of listed chemicals. This rule requires bulk manufacturers of listed chemicals to provide annual reports containing certain production data to the DEA.

EFFECTIVE DATE: April 29, 1996. The first annual reports which detail data for calendar year 1995, shall be submitted on or before June 27, 1996.

FOR FURTHER INFORMATION CONTACT: Howard McClain Jr., Chief, Drug and Chemical Evaluation Section, Office of Diversion Control, Drug Enforcement Administration, Washington, D.C. 20537 Telephone (202) 307–7183.

SUPPLEMENTARY INFORMATION: The Domestic Chemical Diversion Control Act 1993 (Pub. 103–200) (DCDCA) amended 21 U.S.C. 830(b) to require that regulated persons who manufacture listed chemicals (other than a drug product that is exempted under 21 U.S.C. 802(39)(A)(iv)) report annually to DEA information detailing the specific quantities manufactured. This rule specifies certain reporting requirements for manufacturers of listed chemicals and finalizes a proposed rule published in the **Federal Register** on September 26, 1995 (60 FR 49529). Interested parties were given 60 days to submit written comments regarding the proposed rule.

Comments

Five organizations submitted comments in response to the proposed regulations. One comment suggested that Section 1310.03(b) be modified in order to clarify that the reporting requirements pertain to both List I and List II chemicals. Therefore Section 1310.01(b) has been amended to clarify that "Each regulated person who manufactures a List I or List II chemical shall file reports regarding such manufacture as specified in Section 1310.05."

Another comment stated that DEA had not clearly established its basis for needing information requested under the reporting requirement. This requirement, which was established by the Domestic Chemical Diversion Control Act of 1993, will provide the DEA with information on the amounts of listed chemicals available in the U.S. and provide specific strategic information and parameters on the size and direction of the legitimate listed chemical market and the availability of such chemicals for diversion. It will also enable the DEA to provide the International Narcotics Control Board (INCB) with aggregate data regarding the production and availability of chemicals controlled under provisions of the 1988 United Nations Convention Against Illicit Traffic in Narcotic Drugs and Psychotropic Substances.

Two comments requested that hydrochloric acid be exempted and one comment suggested that sulfuric acid be exempted since only exports of these chemicals to certain countries are currently regulated. However, both these chemicals are controlled in Table II of the 1988 United Nations Convention Against Illicit Traffic in Narcotic Drugs and Psychotropic Substances. This reporting provision will enable the DEA to provide the INCB with aggregate manufacturing data on hydrochloric and sulfuric acid.

The DEA recognizes that bulk manufacturers must file other similar reports to other government agencies. For example, one of the comments stated that the requested information is provided to the U.S. Environmental Protection Agency (EPA) four times per year. Therefore, as stated in the Notice of Proposed Rulemaking, if an existing standard industry report contains the information required in Section 1310.06(h) and such information is separate or readily retrievable from the report, that report may be submitted in satisfaction of this requirement. Each report shall be submitted to the DEA under company letterhead and signed by an appropriate, responsible official.

One comment stated that even though the DEA has specified that an existing standard industry report may satisfy the reporting requirements, the reporting obligation would end up as a special report for each listed material at each location and therefore would be extremely burdensome. In addition, two comments dealt with the issue of whether data must be reported by individual facility, as opposed to submitting one corporate report which includes data for all facilities.

In response to these concerns, the DEA has determined that either reporting method is acceptable. Therefore, each business entity which manufactures a listed chemical may elect to (1) report separately by individual location or (2) report as an aggregate amount for the entire business entity. These manufacturers, however, must inform the DEA of which method they will use.

One commentor asked whether inventories should be reported for listed chemicals stored in foreign locations. The DEA has determined that such foreign inventories are not subject to the inventory reporting requirements since such material would have already been reported to the DEA under existing export notification requirements if it were manufactured in the U.S. and shipped to a foreign location.

One commentor requested clarification of the term year-end inventory as used in Section 1310.06(h)(3). For purposes of this annual reporting requirement, inventory shall reflect the quantity of listed chemicals, whether in bulk or non-exempt product form, held in storage for later distribution. Inventory does not include waste material for destruction, material stored as an in-process intermediate or other in-process material. The DEA recognizes that bulk manufacturers may have specific situations which will affect the complexity of inventory reporting. Therefore, the Drug and Chemical Evaluation Section, Office of Diversion Control, Drug Enforcement Administration is available to provide guidance in response to questions bulk manufacturers may have regarding what material should be included as inventory.

One commentor requested clarification of the terms "product" and "converted" as used in Section 1310.06(h)(5). The term product refers to all pharmaceutical preparations and chemical mixtures exempted under Sections 1310.01(f)(1)(iv) or 1310.01(f)(1)(v) intended for later distribution. In order to provide clarification of Section 1310.06(h)(5), the term "converted" is being removed. This section will now specify that each annual report required by Section 1310.05(d) shall provide "[t]he aggregate quantity of each listed chemical manufactured which becomes a component of a product exempted under Section 1310.01(f)(1)(iv) or 1310.01(f)(1)(v) during the preceding calendar year."

One commentor requested clarification that the reporting requirements do not apply to formulators of chemical mixtures. In response to this comment, a bulk manufacturer is defined under the proposed rule, as a person who produces a listed chemical by means of chemical synthesis or by extraction from other substances. Unless a formulator of chemical mixtures produces a listed chemical by means of chemical synthesis or by extraction from other substances, that formulator is not considered a bulk manufacturer and therefore is not subject to these reporting requirements.

One firm noted that the proposed rule stated that quantities be reported to the nearest kilogram. The comment further stated that this was not feasible due to the large volumes of some of the listed chemicals. In response to this inquiry, be advised that the reference to reporting "to the nearest kilogram" was intended to mean that quantities should be reported in kilogram units of measure and was not intended to specify the precision with which data should be supplied. The DEA is therefore modifying the regulatory language to read that information should be reported "in kilogram units of measure".

One firm commented that an exemption should be provided for bulk manufacturers that produce listed chemicals solely for internal consumption. The DEA has determined that bulk manufacturers that produce a listed chemical solely for internal consumption shall not be required to report for that listed chemical. For purposes of these reporting requirements, internal consumption shall consist of any quantity of a listed chemical otherwise not available for further resale or distribution. Internal consumption shall include (but not be limited to) quantities used for quality control testing, quantities consumed in-house or production losses. Internal consumption does not include the quantities of a listed chemical consumed in the production of exempted products. (These quantities used in the production of exempted products shall be reported separately.) Section 1310.05 has been modified to reflect this reporting exemption.

One firm commented that the proposed rule establishes a DEA code number for each listed chemical and made a suggestion regarding the use of an alternate numbering system. However, the proposed rule only clarifies and implements manufacturer reporting requirements and does not deal with the issue of DEA code numbers. This issue was previously addressed under the regulations which implemented the Chemical Diversion and Trafficking Act (60 FR 32447). In that notice, DEA responded that it had considered the use of other numbering systems such as the Chemical Abstract Services (CAS) and Harmonized Tariff System (HTS). However, in reviewing these systems DEA determined that they were designed for other purposes and that their use could lead to confusion and jeopardize the accuracy of information reported to DEA. In the HTS numbering system there are multiple chemicals that are assigned the same number and in the CAS numbering system there are chemicals that are assigned multiple codes. The DEA has produced and made available a chemical reference guide that provides a cross reference to the CAS and HTS numbers.

Conclusion

These reporting requirements will apply only to bulk manufacturers of listed chemicals. The term bulk manufacturer as used in this regulation means a person who manufactures a listed chemical by means of chemical synthesis or by extraction from other substances. It does not include persons whose sole activity consists of repackaging or relabeling listed chemical products or the manufacture of drug dosage form products which contain a listed chemical. For each listed chemical, each manufacturer is required to report annually to DEA (1) the year-end inventory, (2) the aggregate quantity manufactured, (3) the aggregate quantity used for internal consumption and (4) the aggregate quantity of each listed chemical manufactured which becomes a component of a product exempted under Section 1310.01(f)(1)(iv) or 1310.01(f)(1)(v) during the preceding calendar year. While manufacturers are required to report the quantities of listed chemicals used in the production of exempted products (e.g. exempted drug products and chemical mixtures), the manufacturer is not required to report data regarding the aggregate quantity of the exempted products produced.

Data provided under these reporting requirements shall be submitted annually to the Drug and Chemical Evaluation Section, Drug Enforcement Administration, Washington D.C. 20537, on or before the 15th day of March of the year immediately following the calendar year for which submitted. However, in order to provide sufficient time for preparation of the initial annual reports which detail manufacturing data for calendar year 1995, these initial reports shall not be due until June 27, 1996.

The Attorney General has delegated authority under the CSA and all subsequent amendments to the CSA to the Administrator of the DEA (28 CFR 0.100). The Administrator, in turn, has redelegated this authority to the Deputy Administrator pursuant to 28 CFR 0.104. The Deputy Administrator hereby certifies that this rulemaking will have no significant impact upon entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* The DEA estimates that only approximately 210 manufacturers of listed chemicals will be impacted by these reporting requirements. The impact is minimal since the requested information is frequently maintained in the normal course of business operation. In an effort to further minimize the impact of these reporting requirements and avoid duplicate reporting, the DEA will accept existing reports which contain the required data, provided the data is separate or readily retrievable from other data in the report.

This final rule is not a significant regulatory action and therefore has not been reviewed by the Office of Management and Budget pursuant to Executive Order 12866.

This action has been analyzed in accordance with the principles and criteria in E.O. 12612, and it has been determined that the rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 21 CFR Part 1310

Drug traffic control, Reporting and recordkeeping requirements, List I and List II Chemicals.

For reasons as set out above, 21 CFR Part 1310 is amended as follows:

PART 1310—[AMENDED]

1. The authority citation for Part 1310 continues to read as follows:

Authority: 21 U.S.C. 801, 830, 871(b).

2. Section 1310.03 is amended by redesignating the existing text as paragraph (a) and adding a new paragraph (b) to read as follows:

§ 1310.03 Persons required to keep records and file reports.

(a) * * *

(b) Each regulated person who manufactures a List I or List II chemical shall file reports regarding such

manufacture as specified in Section 1310.05.

3. Section 1310.05 is amended by adding a new paragraph (d) to read as follows:

§ 1310.05 Reports.

* * * * *

(d) Each regulated bulk manufacturer of a listed chemical shall submit manufacturing, inventory and use data on an annual basis as set forth in § 1310.06(h). This data shall be submitted annually to the Drug and Chemical Evaluation Section, Drug Enforcement Administration (DEA), Washington, D.C. 20537, on or before the 15th day of March of the year immediately following the calendar year for which submitted. A business entity which manufactures a listed chemical may elect to report separately by individual location or report as an aggregate amount for the entire business entity provided that they inform the DEA of which method they will use. This reporting requirement does not apply to drug or other products which are exempted under §§ 1310.01(f)(1)(iv) or 1310.01(f)(1)(v) except as set forth in § 1310.06(h)(5). Bulk manufacturers that produce a listed chemical solely for internal consumption shall not be required to report for that listed chemical. For purposes of these reporting requirements, internal consumption shall consist of any quantity of a listed chemical otherwise not available for further resale or distribution. Internal consumption shall include (but not be limited to) quantities used for quality control testing, quantities consumed in-house or production losses. Internal consumption does not include the quantities of a listed chemical consumed in the production of exempted products. If an existing standard industry report contains the information required in § 1310.06(h) and such information is separate or readily retrievable from the report, that report may be submitted in satisfaction of this requirement. Each report shall be submitted to the DEA under company letterhead and signed by an appropriate, responsible official. For purposes of this paragraph only, the term regulated bulk manufacturer of a listed chemical means a person who manufactures a listed chemical by means of chemical synthesis or by extraction from other substances. The term bulk manufacturer does not include persons whose sole activity consists of the repackaging or relabeling of listed chemical products or the manufacture of drug dosage from products which contain a listed chemical.

4. Section 1310.06 is amended by adding a new paragraph (h) to read as follows:

§ 1310.06 Content of records and reports.

* * * * *

(h) Each annual report required by Section 1310.05(d) shall provide the following information for each listed chemical manufactured:

(1) The name, address and chemical registration number (if any) of the manufacturer and person to contact for information.

(2) The aggregate quantity of each listed chemical that the company manufactured during the preceding calendar year.

(3) The year-end inventory of each listed chemical as of the close of business on the 31st day of December of each year. (For each listed chemical, if the prior period's ending inventory has not previously been reported to DEA, this report should also detail the beginning inventory for the period.) For purposes of this requirement, inventory shall reflect the quantity of listed chemicals, whether in bulk or non-exempt product form, held in storage for later distribution. Inventory does not include waste material for destruction, material stored as an in-process intermediate or other in-process material.

(4) The aggregate quantity of each listed chemical used for internal consumption during the preceding calendar year, unless the chemical is produced solely for internal consumption.

(5) The aggregate quantity of each listed chemical manufactured which becomes a component of a product exempted from Section 1310.01(f)(1)(iv) or 1310.01(f)(1)(v) during the preceding calendar year.

(6) Data shall identify the specific isomer, salt or ester when applicable but quantitative data shall be reported as anhydrous base or acid in kilogram units of measure.

Dated: March 19, 1996.

Stephen H. Greene,

Deputy Administrator, Drug Enforcement Administration.

[FR Doc. 96–7739 Filed 3–28–96; 8:45 am]

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Occupational Safety and Health Review Commission

29 CFR Part 2201

Revisions to Rules Implementing the Freedom of Information Act

AGENCY: Occupational Safety and Health Review Commission.

ACTION: Final rule.

SUMMARY: This document makes certain technical and nomenclature changes. In addition, the Commission is revising its fee structure for documents sought under the Freedom of Information Act to compensate for rising costs.

EFFECTIVE DATE: These amendments are effective March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Linda A. Whitsett, Freedom of Information Act Officer, Occupational Safety and Health Review Commission, Room 903, 1120 20th St. N.W., Washington, DC 20036. Phone (202) 606–5398.

SUPPLEMENTARY INFORMATION: Part 1921 is being amended to reflect certain technical changes in the Commission's implementation of the Freedom of Information Act. Primarily, the Commission has changed the title of the "Public Information Specialist" to the "Freedom of Information Act Officer." Part 1921 is revised to reflect that change. In addition, decisions will no longer be available at the Commission's regional offices. Accordingly, references to the field offices are eliminated. Finally, the Commission is increasing several fees associated with Freedom of Information Act requests to compensate for rising costs incurred since the fees were set in 1988.

List of Subjects in 29 CFR Part 2201

Freedom of information, Records.

For the reasons set forth in the preamble, title 29, chapter XX, part 2201 is amended as set forth below:

PART 2201—REGULATIONS IMPLEMENTING THE FREEDOM OF INFORMATION ACT

1. The authority for part 2201 continues to read as follows:

Authority: 29 U.S.C. 661(g); 5 U.S.C. 552.

2. In part 2201 all references to "Public Information Specialist" are removed and "Freedom of Information Act Officer" added in their places.

3. Section 2201.3 is revised to read as follows:

§ 2201.3 Delegation of authority.

The Freedom of Information Act Officer is delegated the authority to act upon all requests for public records. In the absence of the Freedom of Information Act Officer, the Chairman or the Executive Director may designate another Commission officer or employee, such as the General Counsel or the Executive Secretary, to respond to requests. Copies of individual Commission decisions may be obtained directly from the Freedom of Information Act Officer at the Commission's national office. See § 2201.5(a). All other information requests shall be directed to the Freedom of Information Act Officer. See § 2201.6(b).

4. Section 2201.5 is amended by revising paragraphs (a) and (b)(1) to read as follows:

§ 2201.5 Copies of Commission decisions.

(a) *Single decisions.* One copy of a Commission decision or decision by an Administrative Law Judge may be obtained free of copying fees by calling, writing or visiting the Freedom of Information Act Officer at the Commission's national office. A search fee may be charged, however, if the decision is not identified by name and date, or by docket number, or if it is not otherwise easily identifiable. See § 2201.8 (b)(2)(i). Copying fees will be charged if more than one decision is requested and the copying cost exceeds $10. See § 2201.8 (a)(1) and (b)(1). The address and telephone number of the office at which decisions are available is OSHRC, Freedom of Information Act Officer, One Lafayette Centre, 1120–20th St. NW., room 900, Washington, DC 20036–3419. Telephone 202–606–5398.

(b)(1) *OSAHRC Reports.* All final Commission decisions from 1971 through 1992 (including decisions of the Commission and its Administrative Law Judges) of general applicability, and concurring and dissenting opinions, are published in a series of microfiche entitled OSAHRC Reports. OSAHRC Reports may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Persons wishing to obtain copies of numerous decisions and avoid large copying charges may purchase OSAHRC Reports or subscribe to a private reporting service. Decisions issued after 1992 are available by calling, writing or visiting the national office.

* * * * *

5. Section 2201.8 is amended by revising the first sentence of paragraph (b)(2) introductory text to read as follows:

§ 2201.8 Fees for copying, searching, and review.

* * * * *

(b) *Types of fees.* * * *

(2) *Search fee.* The fee for searching for information and records shall be $19 per hour of clerical time and $46 per hour of professional time. * * *

* * * * *

Dated: March 25, 1996.

Earl R. Ohman, Jr.,

General Counsel.

BILLING CODE 7600–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD 05–96–014]

Special Local Regulations for Marine Events; 17th Annual Safety at Sea Seminar, Severn River, Annapolis, MD

AGENCY: Coast Guard, DOT.

ACTION: Notice of implementation of 33 CFR 100.511.

SUMMARY: This notice implements 33 CFR 100.511 for the 17th Annual Safety at Sea Seminar, an annual event to be held March 30, 1996, on the Severn River at Annapolis, Maryland. These special local regulations are necessary to control vessel traffic within the immediate vicinity of the U.S. Naval Academy during the Pyrotechnic Display, Helicopter Rescue Demonstration, and Sail Training Craft Maneuver Demonstration. The effect will be to restrict general navigation in this area for the safety of the spectators and the participants in these events.

EFFECTIVE DATES: The regulations in 33 CFR 100.511 are effective from 11 a.m. to 3:30 p.m. on March 30, 1996.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Phillips, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004 (804) 398–6204, or Commander, Coast Guard Group Baltimore (410) 576–2516.

SUPPLEMENTARY INFORMATION: The U.S. Naval Academy, Annapolis, Maryland, submitted an application to hold the 17th Annual Safety at Sea Seminar on the Severn River just off the Robert Crown Sailing Center, U.S. Academy, Annapolis, Maryland. The event includes demonstrations of life rafts, pyrotechnics, use of anti-exposure suits, man overboard procedures, and a helicopter rescue. Since this event is of the type contemplated by these regulations, the safety of the participants will be enhanced by the implementation of the special local regulations. Commercial traffic should not be severely disrupted.

Dated: March 21, 1996.

W.J. Ecker,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

[FR Doc. 96–7715 Filed 3–28–96; 8:45 am]

BILLING CODE 4910–14–M

POSTAL SERVICE

39 CFR Part 20

Expansion of Global Priority Mail

AGENCY: Postal Service.

ACTION: Interim rule with request for comments.

SUMMARY: The Postal Service is expanding Global Priority Mail service by increasing the number of acceptance points, countries (annotated in bold in the text) and adding weight variable rates for items up to four pounds.

DATES: The interim regulations take effect March 25, 1996. Comments must be received on or before May 28, 1996.

ADDRESSES: Written comments should be mailed or delivered to the Manager, Commercial Products, International Business Unit, US Postal Service, Room 370–IBU, 475 L'Enfant Plaza SW, Washington, DC 20260–4261. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, at the above address.

FOR FURTHER INFORMATION CONTACT: Jay Thabet, (202) 268–2269.

SUPPLEMENTARY INFORMATION: On March 17, 1995, the Postal Service published in the **Federal Register** (60 FR 14370) interim regulations implementing WORLDPOST Priority Letter and requested comments. A final rule adopting the interim rules as final was filed at the Office of the Federal Register March 25, 1996. In the final rule the name of the service was changed to Global Priority Mail service and additional acceptance points were added.

Global Priority Mail is an expedited airmail service providing fast reliable, and economical delivery of all items mailable as letters. Although a Global Priority Mail item will travel in the normal airmail stream between the United States and the destination country, the item will receive priority

handling in the United States and, typically, in the destination country. In the United States, after the item is deposited, the Postal Service will transport it in a dedicated stream to the appropriate gateway for dispatch. Upon arrival in the destination country, the item will also receive priority handling. Service is available only in certain ZIP Code areas in the United States and only to certain countries.

The Postal Service is now expanding the number of acceptance points to make the service more widely available. The new acceptance points are set forth below. The Postal Service is also adding weight variable rates. With the new rates, customers may use their own packaging for items weighing up to 4 pounds. Each variable weight item must bear a Global Priority Mail sticker provided by the Postal Service. These changes will make Global Priority Mail available to more customers and should make the service more useful, by making it easier to mail items other than documents or letters.

Although 39 U.S.C. 407 does not require advance notice and opportunity for submission of comments, and the Postal Service is exempted by 39 U.S.C. 410 (a) from the advance notice requirements of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C 553), the Postal Service invites interested persons to submit written data, views, or comments,concerning the interim rule.

The Postal Service adopts the following interim amendments to the International Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 20.1.

List of Subjects in 39 CFR Part 20

International postal service, Foreign relations.

PART 20—[AMENDED]

1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 401, 404, 407, 408.

2. Chapter 2 of the International Mail Manual is amended by revising part 226 to read as follows:

2 CONDITIONS FOR MAILING

* * * * *

226 Global Priority Mail

226.1 General

226.11 Definition

Global Priority Mail is an expedited airmail letter service providing fast, reliable, and economical delivery of all items mailable as letters or merchandise up to 4 pounds. Global Priority Mail items receive priority handling in the United States and in destination countries. Service is available only to destination countries identified in 226.2, from post offices identified in 226.3.

226.12 Permissible Items

All items sent as letter cláss mail (see 221.1) are accepted in Global Priority Mail provided the contents are mailable and fit securely in the envelope. Global Priority Mail items may contain dutiable merchandise unless the country of destination specifically prohibits dutiable merchandise in letters (see 224.51). Any item that is prohibited in international mail is prohibited in Global Priority Mail. Refer to the "Country Conditions of Mailing" in the individual country listings for individual country prohibitions.

226.13 Packaging

Items must fit comfortably within the flat-rate envelope without distorting or bursting the container. No excessive use of tape to keep the envelopes from bursting, only one piece of tape may be used to secure the flap.

226.2 Availability

Global Priority Mail is available to the following additional countries:

Western Europe	Pacific Rim	North America
Austria	Australia	Canada.
Belgium	Hong Kong.	
Denmark	Japan.	
Finland	Korea, Republic of.	
France	New Zealand.	
Germany	Philippines.	
Iceland	Singapore.	
Ireland	Taiwan.	
Luxembourg	Thailand.	
Netherlands, The.	Vietnam.	
Norway.		
Portugal.		
Spain.		
Sweden.		
Switzerland.		
United Kingdom.*		

*Includes all points in England, Scotland, Wales, Northern Ireland, Guernsey, Jersey, and the Isle of Man.

226.3 Mailing Locations

226.31 Acceptance Offices and Pickup Service Locations

Global Priority Mail service is available only through the designated post offices and the additional post offices listed in 226.32. Pickup Service is available for an additional fee. (See 226.83.)

226.32 Service Areas

Service is available only from the metropolitan areas as defined by the ZIP Code ranges shown below. If Global Priority Mail is presented at a non-participating retail unit, advise the customer that the item cannot be accepted as Global Priority Mail. Refer customer to the nearest Global Priority Mail retail acceptance unit. Within these service areas, prepaid items may be given to carriers, deposited in Express Mail collection boxes, or mailed at post offices, stations, and branches.

226.4 Postage

226.41 Flat Rate Envelopes Postage

Each Global Priority Mail flat rate envelope is charged at a flat rate. The rate is based on the geographic rate zone regardless of its actual weight. Postage is required for each piece.

EXHIBIT 226.41

Destination	Small envelope	Large envelope
Western Europe*	$3.75	$5.95

EXHIBIT 226.41—Continued

Destination	Small envelope	Large envelope
Canada*	3.75	5.95
Pacific Rim*	4.95	8.95

*See 226.2 for listing.

226.42 Variable Weight Option Postage—Single Piece Rates

Global Priority Mail variable weight rates are calculated in half (or fraction thereof) increments based on the weight of each piece the destination geographic rate zone up to four pounds. (See Exhibit 226.42.)

EXHIBIT 226.42.—VARIABLE WEIGHT RATE STICKER POSTAGE

Weight level (lbs.)	Western Europe	Pacific Rim	Canada
0.5	$7.00	$8.00	$5.95
1.0	10.50	12.50	10.00
1.5	12.50	16.95	13.50
2.0	15.00	21.00	16.50
2.5	17.50	23.95	18.00
3.0	19.95	27.25	19.50
3.5	22.00	31.50	21.00
4.0	24.75	34.50	22.50

226.43 Global Priority Mail Sticker—Volume Rates

226.431 Minimum Quantity Requirement

The mailer must have a minimum of 5 or more pieces to one or more Global Priority Mail countries. The minimum does not apply to each geographic zone rate.

226.432 Mailing Statement

Postage for volume rate mail and permit imprint must be computed on Form 3653, Global Priority Mail Statement of Mailings.

EXHIBIT 226.43.—VARIABLE WEIGHT STICKER OPTION—VOLUME RATES

Weight level	Western Europe	Pacific Rim	Canada
0.5	$5.95	$6.95	$5.00
1.0	8.50	10.00	7.50
1.5	10.00	13.50	10.00
2.0	12.00	16.95	12.50
2.5	14.00	19.25	13.50
3.0	15.95	21.95	14.50
3.5	19.95	25.50	15.50
4.0	22.50	27.75	16.50

226.5 Payment Methods

226.51 Postage Payment Methods

Nonidentical weight piece mailings must have the applicable postage affixed by adhesive stamps, meter stamps or if presented at a post office, postal validation imprinter (PVI labels). Identical weight piece mailings may be paid by meter stamps, adhesive stamps, PVI labels or permit imprint subject to certain standards. To use permit imprint, the mailing must consist of 200 or more pieces and be of identical weight. The 200 pieces criteria for permit imprint applies to both volume rate and flat rate mail. Mailers may use permit imprint with nonidentical weight items only if authorized by the USPS under a Manifest Mailing System (MMS), in Domestic Mail Manual (DMM) P710.

226.52 Postal Marking Related to Volume Rate Postage

When pieces are paid at the volume rate and paid by stamps or meter impression, each piece must be legibly marked with the words "Volume Rate Global Priority Mail." If stamps are used the endorsement must appear on the address side of each piece and must be applied by a printing press, hand stamp or other similar printing device. If meter impression is used the endorsement must be in the ad plate or the slug area. If part of the slug, the abbreviation GPM Vol. Rate may be used. See DMM P030.4.14 for specification of size requirements.

226.53 Permit Imprint Content and Format

All permit imprints on Global Priority Mail must show city and state, "Global Priority Mail," U.S. Postage Paid, and permit number. They may show the mailing date, amount of postage paid or the number of ounces for each postage.

226.54 Meter Stamps Content

At a minimum, a meter stamp must show the month, day and year in the postmark, city and state designation of the licensing post office, the number, and the amount of postage. See DMM P030.4.6.

226.6 Preparation Requirements

226.61 Addressing

All items must bear the complete delivery address of the addressee and the full name (no abbreviations) of the destination country. See 122.

226.62 Marking

Global Priority Mail items must be mailed in special envelopes (EP–15A, EP–15B) or with the Global Priority Mail sticker (DEC–10) provided by the Postal Service. (These supplies may be obtained by calling 800–222–1811.) Unmarked pieces are subject to the applicable LC/AO airmail regular rates and treatment. Pieces paid at the Global Priority Mail sticker rate must be affixed to the address side of the package.

226.63 Customs

A green customs label must be affixed if the package is 1 pound or more, regardless of its contents. Only documents and correspondence under 1 pound do not require a customs form.

226.7 Size and Weight Limits

226.71 Size Limits

226.72 Flat-Rate Envelope Sizes

a. Small Size: 6×10 inches.
b. Large Size: 9½×12½ inches.

226.73 Package Sizes for Variable Weight Option

a. Minimum length and height: 5½×3½ inches.
b. Minimum depth (thickness): .007 inches.
c. Maximum length: 24 inches.
d. Maximum length, height, depth (thickness) combined: 36 inches.

226.74 Rolls

a. Minimum length: 4 inches.
b. Minimum length plus twice the diameter combined: 6¾ inches.
c. Maximum length: 36 inches.
d. Maximum length plus twice the diameter combined: 42 inches.

226.75 Weight Limits

Items sent as Global Priority Mail in envelopes and the variable weight option must not exceed 4 pounds.

226.76 Special Services

Mailers may obtain certificates of mailing (see 310). No other special services such as registry, insurance, restricted delivery, return receipt, or recorded delivery are available.

226.8 Mailer Preparation

226.81 Mailer Requirement

Global Priority Mail claimed at the volume rate must be separated by geographic rate zone (Western Europe, Pacific Rim, and Canada) when presented to the business mail entry unit unless otherwise authorized by the USPS. All pieces in a permit imprint mailing and metered mail must be facing the same direction.

226.82 Deposit Of Mail

Global Priority Mail pieces paid by permit imprint and pieces claimed at the Global Priority Mail volume rates must be deposited at a business mail acceptance unit as authorized by the postmaster in the designated Global Priority Mail sites for weighing. Flat rate envelopes with postage affixed may be deposited in any Express Mail Street collection or other such place where Express Mail is accepted. Metered mail must be deposited in locations under the jurisdiction of the licensing post office except as permitted under DMM P030.

226.83 Pickup Service

On call and scheduled pickup service are available for Global Priority Mail from the designated Global Priority Mail acceptance cities. There is a charge of $4.95 for each pickup stop, regardless of the number of pieces picked up. (See DMM D010 for standards of pickup service.) Pickup is not available for Global Priority Mail pieces if paid by permit imprint or claimed at the volume rate.

* * * * *

A transmittal letter making the changes in the pages of the International Mail Manual will be published and transmitted automatically to subscribers. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 20.3.

Stanley F. Mires,
Chief Counsel, Legislative.

BILLING CODE 7710–12–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD–FRL–5449–8]

Standards of Performance for New Stationary Sources: Industrial-Commercial-Institutional Steam Generating Units; Louisiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final revision of rule.

SUMMARY: New source performance standards (NSPS) limiting emissions of nitrogen oxides (NO_X) from industrial-commercial-institutional steam generating units capable of combusting more than 100 million Btu per hour were proposed on June 19, 1984 and were promulgated on November 25, 1986. These standards limit NO_X emissions from the combustion of fossil fuels, as well as the combustion of fossil fuels with other fuels or wastes. The standards include provisions for facility-specific NO_X standards for steam generating units which simultaneously combust fossil fuel and chemical byproduct waste(s) under certain conditions. This document approves a facility-specific NO_X

standard that was proposed on December 28, 1994 for a steam generating unit which simultaneously combusts fossil fuel and chemical by-product waste (vent gas) at the Cytec Industries Fortier Plant located in Westwego, Louisiana.

EFFECTIVE DATE: March 29, 1996.

ADDRESSES: Docket. Docket Number A–94–48, containing supporting information used in developing the proposed revision, is available for public inspection and copying between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday (except for government holidays) at the EPA's Air and Radiation Docket and Information Center, Room M1500, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. George Smith at telephone number (919) 541–1549, Emission Standards Division, Combustion Group (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION:

Background

The objective of the NSPS, promulgated on November 25, 1986 is to limit NO_x emissions from the combustion of fossil fuel. For steam generating units combusting by-product waste, the requirements of the NSPS vary depending on the operation of the steam generating units.

During periods when only fossil fuel is combusted, the steam generating unit must comply with the NO_x emission limits in the NSPS for fossil fuel. During periods when only by-product waste is combusted, the steam generating unit may be subject to other requirements or regulations which limit NO_x emissions, but it is not subject to NO_x emission limits under the NSPS. In addition, if the steam generating unit is subject to Federally enforceable permit conditions limiting the amount of fossil fuel combusted in the steam generating unit to an annual capacity factor of 10 percent or less, the steam generating unit is not subject to NO_x emission limits under the NSPS when it simultaneously combusts fossil fuel and by-product waste.

With the exception noted above, during periods when fossil fuel and by-product waste are simultaneously combusted in a steam generating unit, the unit must generally comply with NO_x emission limits under § 60.44b(e) of the NSPS. Under § 60.44b(e) the applicable NO_x emission limit depends on the nature of the by-product waste combusted. In some situations, however, "facility-specific" NO_x emission limits developed under § 60.44b(f) may apply. The order for determining which NO_x emission limit applies is as follows.

A steam generating unit simultaneously combusting fossil fuel and by-product waste is expected to comply with the NO_x emission limit under § 60.44b(e); only in a few situations may NO_x emission limits developed under § 60.44b(f) apply. Section 60.44b(e) includes an equation to determine the NO_x emission limit applicable to a steam generating unit when it simultaneously combusts fossil fuel and by-product waste.

Only where a steam generating unit which simultaneously combusts fossil fuel and by-product waste is unable to comply with the NO_x emission limit determined under § 60.44b(e), might a facility-specific NO_x emission limit under § 60.44b(f) apply. This section permits a steam generating unit to petition the Administrator for a facility-specific NO_x emission limit. A facility-specific NO_x emission limit will be proposed and promulgated by the Administrator for the steam generating unit, however, only where the petition is judged to be complete.

To be considered complete, a petition for a facility-specific NO_x standard under § 60.44b(f) consists of three components. The first component is a demonstration that the steam generating unit is able to comply with the NO_x emission limit for fossil fuel when combusting fossil fuel alone. The purposes of this provision are to ensure that the steam generating unit has installed best demonstrated NO_x control technology, to identify the NO_x control technology installed, and to identify the manner in which this technology is operated to achieve compliance with the NO_x emission limit for fossil fuel.

The second component of a complete petition is a demonstration that this NO_x control technology does not enable compliance with the NO_x emission limit for fossil fuel when the steam generating unit simultaneously combusts fossil fuel with chemical by-product waste under the same conditions used to demonstrate compliance on fossil fuel alone. In addition, this component of the petition must identify what unique and specific properties of the chemical by-product waste(s) are responsible for preventing the steam generating unit from complying with the NO_x emission limit for fossil fuel.

The third component of a complete petition consists of data and/or analysis to support a facility-specific NO_x standard for the steam generating unit when it simultaneously combusts fossil fuel and chemical by-product waste and operates the NO_x control technology in the same manner in which it would be operated to demonstrate and maintain compliance with the NO_x emission limit for fossil fuel, if only fossil fuel were combusted. This component of the petition must identify the NO_x emission limit(s) and/or operating parameter limits, and appropriate testing, monitoring, reporting and recordkeeping requirements which will ensure operation of the NO_x control technology and minimize NO_x emissions at all times.

Upon receipt of a complete petition, the Administrator will propose a facility-specific NO_x standard for the steam generating unit when it simultaneously combusts chemical by-product waste with fossil fuel. The NO_x standard will include the NO_x emission limit(s) and/or operating parameter limit(s) to ensure operation of the NO_x control technology at all times, as well as appropriate testing, monitoring, reporting and recordkeeping requirements.

Comments on the Proposed Standards

After completing construction of its C.AOG incinerator, Cytec Industries conducted tests of NO_x emissions under actual operating conditions. Cytec Industries has provided the emissions data from these tests to the EPA (Agency). The actual emissions data comes very close to what was predicted by the calculations made by Cytec Industries, and thus demonstrates the actual need for the facility-specific NO_x standard.

Aside from the emissions data supplied to the Agency by Cytec Industries, no other comments were received on the proposed standard. Consequently, the Administrator has decided not to change the proposed standard, and to promulgate it, as proposed.

Administrative Requirements

Executive Order 12866

Under Executive Order 12866 (58 FR 51735, (October 4, 1993)), the Agency must determine whether the regulatory action is "significant" and, therefore, subject to OMB review and the requirements of the Executive Order. The Order defines a "significant regulatory action" as one that is likely to result in a rule that may:

1. Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

2. Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

3. Materially alter the budgetary impact of entitlements, grants, user fees, or land programs or the rights and obligations of recipients thereof; or

4. Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This rule was classified "non-significant" under Executive Order 12866 and, therefore, was not reviewed by the Office of Management and Budget.

Paperwork Reduction Act

The information collection requirements of the previously promulgated NSPS under 40 CFR Part 60, Subpart Db were submitted to and approved by the Office of Management and Budget. A copy of this Information Collection Request (ICR) document (OMB control number 2060–0135) may be obtained from Sandy Farmer, Information Policy Branch (PM–223Y); U.S. Environmental Protection Agency; 401 M Street, SW; Washington, DC 20460 or by calling (202) 260–2740. Today's changes to the NSPS do not affect the information collection burden estimates made previously. The information that is required to be collected for this facility specific NO_x standard is the same as for all other affected facilities subject to these NSPS. Therefore, the ICR has not been revised.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The RFA specifically requires the completion of a Regulatory Flexibility Analysis in those instances where small business impacts are possible. Because this rulemaking imposes no adverse economic impacts, a Regulatory Flexibility Analysis has not been prepared.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small business entities.

List of Subjects in 40 CFR Part 60

Environmental protection, Administrative practice and procedure, Air pollution control.

Dated: March 22, 1996.

Carol M. Browner,

Administrator.

Title 40, chapter I, part 60, of the Code of Federal Regulations is amended to read as follows:

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Subpart Db—Standards of Performance for Industrial Commercial-Institutional Steam Generating Units

1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401, 7411, 7414, 7416, 7429, and 7601.

2. Section 60.49b is amended by adding paragraph (s) as follows:

§ 60.49b Reporting and recordkeeping requirements.

* * * * *

(s) Facility specific nitrogen oxides standard for Cytec Industries Fortier Plant's C.AOG incinerator located in Westwego, Louisiana:

(1) Definitions.

Oxidation zone is defined as the portion of the C.AOG incinerator that extends from the inlet of the oxidizing zone combustion air to the outlet gas stack.

Reducing zone is defined as the portion of the C.AOG incinerator that extends from the burner section to the inlet of the oxidizing zone combustion air.

Total inlet air is defined as the total amount of air introduced into the C.AOG incinerator for combustion of natural gas and chemical by-product waste and is equal to the sum of the air flow into the reducing zone and the air flow into the oxidation zone.

(2) Standard for nitrogen oxides.

(i) When fossil fuel alone is combusted, the nitrogen oxides emission limit for fossil fuel in § 60.44b(a) applies.

(ii) When natural gas and chemical by-product waste are simultaneously combusted, the nitrogen oxides emission limit is 289 ng/J (0.67 lb/million Btu) and a maximum of 81 percent of the total inlet air provided for combustion shall be provided to the reducing zone of the C.AOG incinerator.

(3) Emission monitoring.

(i) The percent of total inlet air provided to the reducing zone shall be determined at least every 15 minutes by measuring the air flow of all the air entering the reducing zone and the air flow of all the air entering the oxidation zone, and compliance with the percentage of total inlet air that is provided to the reducing zone shall be determined on a 3-hour average basis.

(ii) The nitrogen oxides emission limit shall be determined by the compliance and performance test methods and procedures for nitrogen oxides in § 60.46b.

(iii) The monitoring of the nitrogen oxides emission limit shall be performed in accordance with § 60.48b.

(4) Reporting and recordkeeping requirements.

(i) The owner or operator of the C.AOG incinerator shall submit a report on any excursions from the limits required by paragraph (a)(2) of this section to the Administrator with the quarterly report required by § 60.49b(i).

(ii) The owner or operator of the C.AOG incinerator shall keep records of the monitoring required by paragraph (a)(3) of this section for a period of 2 years following the date of such record.

(iii) The owner of operator of the C.AOG incinerator shall perform all the applicable reporting and recordkeeping requirements of § 60.49b.

40 CFR Part 110

[FRL–5449–6]

Oil Discharge Program; Editorial Revision of Rules; Correction

AGENCY: Environmental Protection Agency.

ACTION: Correction to final regulations.

SUMMARY: This document contains a correction to the final regulations which were published Wednesday, February 28, 1996 (61 FR 7419). The regulations contained nonsubstantive, editorial revisions to 40 CFR part 110.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Hugo Paul Fleischman, Office of Emergency and Remedial Response, U.S. Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, mail code 5203G, phone (703)603–8769; or the RCRA/Superfund Hotline, phone (800)424–9346 or (703)603–9232 in the Washington, DC, metropolitan area.

SUPPLEMENTARY INFORMATION

Background

In the rulemaking, EPA reviewed 40 CFR part 110, and removed text which unnecessarily repeats section 311 of the Act. EPA also revised regulatory text: to make it more concise, to conform more

closely to statutory language, or to eliminate text which is legally obsolete. All of these changes were editorial. None effected any changes to the substance of the revised rules. EPA also redesignated affected sections as necessary.

Need for Correction

As published, the final rule contained an incorrect phone number, which could mislead the public and is therefore in need of correction.

Correction of Publication

Accordingly, the publication on February 28, 1996, of the final rule described above, is corrected as follows:

§ 110.6 [Corrected]

Paragraph 1. On page 7421, in the third column, in § 110.6 Notice, in the last line (line nine) of the indented paragraph, the phone number, "202–462–2675," is corrected to read "202–426–2675."

Dated: March 22, 1996.

Stephen D. Luftig,

Director, Office of Emergency and Remedial Response.

[FR Doc. 96–7751 Filed 3–28–96; 8:45 am]

BILLING CODE 6560–50–C

FEDERAL MARITIME COMMISSION

46 CFR Part 501

The Federal Maritime Commission—General

AGENCY: Federal Maritime Commission.

ACTION: Final rule; correction.

SUMMARY: The Federal Maritime Commission is correcting its recent document which amended its statement of delegations of authorities to add new authority delegated to the Director of the Bureau of Economics and Agreement Analysis to grant or deny applications for waivers of certain regulations in 46 CFR Part 572.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, N.W., Washington, DC 20573–0001, (202) 523–5725.

SUPPLEMENTARY INFORMATION: In the Commission's Final Rule in this matter, published March 12, 1996 (61 FR 9944), amendatory instruction 2 is corrected to read:

"In section 501.26, paragraph (f) is amended by changing the reference to "572.404" to "572.406," and by changing the references to "572.501 and 572.502" to "572.404 and 572.405"'

paragraphs (g) through (n) are redesignated (i) through (p); newly redesignated (i)(6) is removed; the references to "paragraph (g) of this section" in newly redesignated paragraphs (j) and (k) are revised to read "paragraph (i) of this section;" and new paragraphs (g) and (h) are added, as follows:"

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 95–78; RM–8619, RM–8678]

Radio Broadcasting Services; Stonewall, MS, and Lisman, AL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Stonewall Broadcasters, allots Channel 295A to Stonewall, Mississippi, as the community's first local FM service. *See* 60 FR 31277, June 14, 1995. At the request of Lisman Community Broadcasting Company, Inc., the Commission allots Channel 299A to Lisman, Alabama, as the community's first local FM service. Channels 295A and 299A can be allotted to Stonewall and Lisman, respectively, in compliance with the Commission's minimum distance separation requirements. Channel 295A can be allotted to Stonewall with a site restriction of 14.1 kilometers (8.7 miles) northeast to avoid a short-spacing with Station WSTZ(FM), Channel 294C, Vicksburg, Mississippi. Channel 299A can be allotted to Lisman without the imposition of a site restriction. The coordinates for Channel 295A at Stonewall, Mississippi, are 32–11–37 and 88–39–48. The coordinates for Lisman, Alabama, are 32–10–07 and 88–16–57. With this action, this proceeding is terminated.

DATES: Effective May 10, 1996. The window period for filing applications will open on May 10, 1996, and close on June 10, 1996.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MM Docket No. 95–78, adopted March 15, 1996, and released March 26, 1996. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

General Services Administration Acquisition Regulation; Acquisition of Commercial Items

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Interim rule with request for comments; correction.

SUMMARY: This document corrects editorial errors in the interim rule, published in the **Federal Register** on February 16, 1996 (61 FR 6164).

EFFECTIVE DATE: March 4, 1996.

FOR FURTHER INFORMATION CONTACT: Les Davison, GSA Acquisition Policy Division, (202) 501–1224.

SUPPLEMENTARY INFORMATION: In FR document 96–3593, beginning on page 6164, in the issue of February 16, 1996, make the following corrections:

1. **Authority:** 40 U.S.C. 486(c).

501.105 [Corrected]

2. On page 6164, item No. 2 at the bottom of column 3 is corrected to read as follows:

2. Section 501.105 is amended by revising the following GSAR references to read as follows:

510.004–70 is redesignated as 511.170(b)(3), 510.011(i) is redesignated as 511.204(g), 512.104(a)(2) is redesignated as 511.404(a)(2) and 512.104(a)(4) is redesignated as 511.404(a)(5).

3. On page 6165, item No. 3 at the top of column 1 is corrected to read as follows:

3. Section 504.803 is amended in the first sentence of paragraph (a) by removing "(28)" and inserting "(27)" and by revising paragraphs (a)(12) and (a)(25) to read as follows:

4. On page 6165, column 1, "PART 10—MARKET RESEARCH" is corrected to read "PART 510—MARKET RESEARCH."

511.404 [Corrected]

5. On page 6166, column 2, in section 511.404(a)(3) is corrected by removing the last sentence and inserting in its place two sentences to read as follows:

* * * For items having a limited shelf-life, Alternate I to 48 CFR 552.211–79 must be substituted for the basic clause when required by the director of the FSS commodity center concerned. The Age on Delivery clause at 48 CFR 552.211–80 should be used when the required shelf life period is more than 12 months, or when source inspection can be performed within a short time period.

515.804–6 [Corrected]

6. On page 6168, column 2, the second line in paragraph (b)(5) of the "Commercial Sales Practices" format, "paragraph (b) (1) through (4)" is corrected to read "paragraphs (1) through (4)".

7. On page 6170, in item 48, "52.211–82" is corrected to "552.211–82."

Dated: March 20, 1996.

Ida M. Ustad,

Deputy Associate Administrator for Acquisition Policy.

Proposed Rules

Federal Register
Vol. 61, No. 62
Friday, March 29, 1996

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 96–NM–31–AD]

Airworthiness Directives; Boeing Model 727 and Model 737 Series Airplanes Equipped With J.C. Carter Company Fuel Valve Actuators

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Boeing Model 727 and Model 737 series airplanes. This proposal would require replacement of the actuator of the engine fuel shutoff valve and the fuel system crossfeed valve with an improved actuator. This proposal is prompted by a report indicating that, during laboratory tests, the actuator clutch on the engine shutoff and crossfeed valves slipped at cold temperatures due to improper functioning. The actions specified by the proposed AD are intended to prevent improper functioning of these actuators, which could result in a fuel imbalance due to the inability of the flightcrew to crossfeed fuel; improperly functioning actuators could also prevent the pilot from shutting off the fuel to the engine following an engine failure and/or fire.

DATES: Comments must be received by May 6, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 96–NM–31–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from J.C. Carter Company Inc., Aerospace Components and Repair Service, 673 W. 17th Street, Costa Mesa, California 92627–3605. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Stephen S. Bray, Aerospace Engineer, Propulsion Branch, ANM–140S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office; 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2681; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 96–NM–31–AD." The postcard will be date stamped and returned to the commenter. Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 96–NM–31–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On July 7, 1995, the FAA issued AD 95–15–06, amendment 39–9309 (60 FR 37811, July 24, 1995), applicable to certain Boeing Model 727 and Model 737 series airplanes, to require replacement of the actuator of the engine fuel shutoff valve and the fuel system crossfeed valve with an improved actuator. That action was prompted by reports indicating that, during laboratory tests on Model 737 series airplanes, the actuator clutch on the engine shutoff and crossfeed valves slipped at cold temperatures due to improper functioning. The requirements of that AD are intended to prevent improper functioning of these actuators, which could result in a fuel imbalance due to the inability of the flightcrew to crossfeed fuel; improperly functioning actuators could also prevent the pilot from shutting off the fuel to the engine following an engine failure and/or fire.

Since issuance of that AD, the FAA has received a report indicating that an additional fuel valve actuator having part number (P/N) 40574–5 (Kearfott Model 3715–9) installed on certain Model 727 and Model 737 series airplanes is also subject to the same failure. Therefore, the FAA has determined that this additional actuator is subject to the same unsafe condition addressed in AD 95–15–06.

The FAA has reviewed and approved J.C. Carter Company Service Bulletin 61163–28–09, dated September 28, 1995. The service bulletin describes procedures for replacement of actuators having P/N 40574–5 (Kearfott Model 3715–9) and P/N 40574–2 (Kearfott Model 3715–7 and 3715–8) on the fuel system crossfeed valve and the engine shutoff valves. These actuators are replaced with new actuators having P/N 40574–4; or with actuators having P/N 40574–2 (Kearfott Model 3715–7) with nameplates indicating that they were manufactured by General Design, Midland Ross, Janitrol Aero Division, or FL Aerospace/General Design (except FL Aerospace/General Design serial numbers 0001 through 0200, inclusive).

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require replacement of the actuator having P/N 40574–5 (Kearfott Model 3715–9) on the fuel system crossfeed valve and the engine shutoff valves either with a new actuator having P/N 40574–4, or with an actuator having P/N 40574–2 and an appropriate nameplate. The actions would be required to be accomplished in accordance with the service bulletin described previously.

Operators should note that, although the service bulletin specifies replacement of actuators having P/N 40574–5 (Kearfott Model 3715–9) and P/N 40574–2 (Kearfott Model 3715–7 and 3715–8), this proposed AD would require replacement of only P/N 40574–5. Actuators having P/N 40574–2 currently are required to be replaced in accordance with AD 95–15–06.

[Note: The FAA's normal policy is that when an AD requires a substantive change, such as a change (expansion) in its applicability, the "old" AD is superseded by removing it from the system and a new AD is added. In the case of this AD action, the FAA normally would have proposed superseding AD 95–15–06 to expand its applicability to include the J.C. Carter Company fuel valve actuator having P/N 40574–5 as an additional affected actuator. However, in reconsideration of the entire fleet size that would be affected by a supersedure action, and the consequent workload associated with revising maintenance record entries, the FAA has determined that a less burdensome approach is to issue a separate AD applicable only to the additional actuator. This AD does not supersede AD 95–15–06; airplanes listed in the applicability of AD 95–15–06 are required to continue to comply with the requirements of that AD. This proposed AD is a separate AD action, and is applicable only to airplanes equipped with J.C. Carter Company fuel valve actuator having P/N 40574–5.]

There are approximately 4,137 Boeing Model 727 and Model 737 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 2,190 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 3 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would be supplied by J.C. Carter Company at no cost to operators. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $394,200, or $180 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 96–NM–31–AD.

Applicability: All Model 727 and Model 737 series airplanes; equipped with J.C. Carter Company fuel valve actuator having part number (P/N) 40574–5; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent improper functioning of a certain actuator, which could result in a fuel imbalance due to the inability of the flightcrew to crossfeed fuel, or which could prevent the pilot from shutting off the fuel to the engine following an engine failure and/or fire, accomplish the following:

(a) Within 36 months after the effective date of this AD, replace the actuator having P/N 40574–5 (Kearfott Model 3715–9) on the fuel system crossfeed valve and the engine shutoff valves with either a new actuator having P/N 40574–4, or an actuator having P/N 40574–2 with a nameplate identified in paragraph III, Material of J.C. Carter Company Service Bulletin 61163–28–09, dated September 28, 1995. The replacement shall be done in accordance with J.C. Carter Company Service Bulletin 61163–28–09, dated September 28, 1995.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 25, 1996.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

29 CFR Part 500

RIN 1215–AA93

Migrant and Seasonal Agricultural Worker Protection Act

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Notice of proposed rulemaking, request for comments.

SUMMARY: This document proposes regulations to amend the definition of

"employ" under the Migrant and Seasonal Agricultural Worker Protection Act (MSPA). Consistent with Executive Order 12866, which concerns regulatory planning and review (see 58 Fed. Reg. 51735 (Oct. 4, 1993)), this document proposes to amend MSPA regulations to clarify and make easier to understand the definition of "independent contractor" and "joint employment" under MSPA, with the goal of minimizing the potential for uncertainty and litigation arising from such uncertainty and to better guide the Department's enforcement activities.

DATES: Comments on the proposed rule are due on or before June 12, 1996.

ADDRESSES: Submit written comments to Maria Echaveste, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue, NW., Washington, DC 20210. Commenters who wish to receive notification of receipt of comments are requested to include a self-addressed, stamped post card or to submit them by certified mail, return receipt requested. As a convenience to commenters, comments may be transmitted by facsimile ("FAX") machine to (202) 219–5122. This is not a toll-free number. If transmitted by FAX and a hard copy is also submitted by mail, please indicate on the hard copy that it is a duplicate copy of the FAX transmission.

FOR FURTHER INFORMATION CONTACT: Michael Hancock, Office of Enforcement Policy, Farm Labor Team, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3510, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 219–7605. This is not a toll-free number. Copies of this NPRM in alternative formats may be obtained by calling (202) 219–7605, (202) 219–4634 (TDD). The alternative formats available are large print, electronic file on computer disk and audio-tape.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act of 1995

This proposed rule contains no reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1995 (Pub. L. 104–13).

II. Background

The MSPA definition of "joint employment," 29 CFR 500.20(h)(4), is proposed to be amended to clarify and provide more accurate and complete information to the regulated community, thereby making the MSPA regulations more "user-friendly." The proposed regulation comports more fully with (1) the Fair Labor Standards Act (FLSA) regulations at 29 CFR 791; (2) seminal court decisions regarding the employment relationship; and (3) the MSPA legislative history.

The MSPA statutory definition of "employ", 29 U.S.C. 1803(3)(5), from which the concept of "joint employment" is drawn, is the FLSA statutory definition of "employ", 29 U.S.C. 203(g), incorporated by reference. In keeping with the President's executive order directive to Federal agencies to identify rules that could be clarified to provide more complete and understandable guidance to the regulated community, the Department proposes to amend the MSPA "joint employment" regulation. The Department has notified the public and the regulated community of its intention, through the regulatory agenda and regulatory planning process, to amend this regulation. See 60 Fed. Reg. 23546 (May 8, 1995) and 60 Fed. Reg. 59614 (Nov. 28, 1995).

III. Summary and Discussion

Joint Employment Standard Under MSPA

The Department proposes to amend the MSPA regulation defining the employment and joint-employment relationship in agriculture. Having reviewed this regulation in the normal course of DOL operations, the Department recognizes the need for a clearer and more complete regulation setting forth the applicable criteria, thereby making the regulation more "user-friendly." The purpose of the amendment is to clarify the regulation and, thus, to avoid confusion and misapplication of the standards to be considered in determining the existence of the employment and joint-employment relationship. A further purpose is to update the regulation to reflect more completely the Congressional intent in the enactment of MSPA, the state of the law, and the Department's understanding of the employment and joint employment standard.

The Department has intended for some time to up-date and clarify this MSPA regulation. The matter has been included in the DOL regulatory agendas published in the **Federal Register** (60 FR 23546 (May 8, 1995); 60 FR 59614 (November 28, 1995)). The present proposed rulemaking undertakes the previously announced revision of the employment and joint employment definition.

The current MSPA "joint employment" regulation identifies particular factors which should be considered in determining the existence of such relationships in the agricultural context. This Departmental guidance appears to be subject to some misunderstanding in the regulated community and the courts with regard to the applicability of the legal standards under MSPA and the Fair Labor Standards Act, which contain the identical statutory standard.[1] It is the Department's view that the MSPA "joint employment" regulation should be modified to focus more closely on the ultimate test for employment and joint employment as established by the federal courts, i.e., "economic dependence," and to further clarify the multi-factor analysis to be used to determine the existence of "economic dependence" in the agricultural context. Such a clarified regulation will ensure more consistent application of the FLSA principles of employment and "joint employment" under MSPA, and will also ensure the full implementation of the Congressional intent in adopting those principles in MSPA.

Legislative and Judicial Basis for "Joint Employment"

The FLSA defines the term *employ* as meaning "to suffer or permit to work" (29 U.S.C. 203(g)), and the courts have given an expansive interpretation to the statutory definition of *employ* under the FLSA in order to accomplish the remedial purposes of the Act.[2] In accordance with the FLSA's broad definitions and remedial purposes, the traditional common law "right to control" test has been rejected in interpreting the FLSA definition of *employ*. Instead, the test of an employment relationship under the FLSA is "economic dependence," which requires an examination of the relationships among the employee and the putative employer(s) to determine upon whom the employee is economically dependent.[3] The determination of economic dependence is based upon the "economic reality" of all the circumstances and not upon isolated factors or contractual labels.[4] Since the "economic reality" test first delineated by the Supreme Court in *Rutherford Food*, the courts have uniformly considered a number of factors, no one of which is

[1] *Compare: Hodgson v. Griffin & Brand of McAllen, Inc.*, 471 F.2d 235 (5th Cir.), *cert. denied*, 414 U.S. 819 (1973), *with Aimable v. Long and Scott Farms*, 20 F.3d 434 (11th Cir.), *cert. denied*, 115 S.Ct. 351 (1994).

[2] *See Rutherford Food Corp. v. McComb*, 331 U.S. 722, 729 (1947).

[3] *See Real v. Driscoll Strawberry Assoc., Inc.*, 603 F.2d 748 (9th Cir. 1979); *Griffin & Brand, supra.*

[4] *Rutherford Food; Griffin & Brand, supra.*

determinative. Instead, the multi-factor analysis is a means of gauging whether the worker is economically dependent on the business(es) for which the worker is "suffered or permitted to work" and whether the nature and degree of that dependence constitutes an employment relationship within the intended protections of the FLSA.

The joint employment doctrine, which has long been recognized under the FLSA case law,[5] is defined by the FLSA regulation to mean a condition in which "[a] single individual stands in the relation of an employee to two or more persons at the same time" (29 CFR 791.2(a)). A joint employment relation is found when "employment by one employer is not completely disassociated from employment by the other employer," such a determination depending upon "all the facts in the particular case." *Id.*

Under MSPA, the term *employ* has the same meaning as that term under the FLSA. 29 U.S.C. 1802(5). Congress enacted this express incorporation of the FLSA definition of *employ* with the deliberate intention of adopting the FLSA case law defining employment and joint employment. Congress specifically stated that the "joint employer doctrine" articulated under the FLSA was to serve as the "central foundation" of the MSPA and "the best means by which to ensure that the purposes of this Act would be fulfilled."[6] Congress intended the joint employer doctrine to serve as a vehicle for protecting agricultural employees "by fixing the responsibility on those who ultimately benefit from their labors—the agricultural employer."[7] In declaring this purpose, Congress cited with approval the joint employment analysis utilized by the Court of Appeals in *Griffin & Brand;* thus, that decision should be the benchmark for the analysis in the agricultural setting.[8] The multi-factor test, as stated in *Griffin & Brand*, is largely the same as the Supreme Court's seminal decision in *Rutherford Food*, although the Court of Appeals restated some factors to comport more fully and realistically with the unique characteristics of an agricultural operation.

The current MSPA regulation, promulgated in 1983, sets out a non-exclusive list of factors which could appropriately be considered in the joint employment analysis. 29 CFR 500.20(h)(4)(ii). The regulation states that the ". . . determination of whether the employment is to be considered joint employment depends upon all the facts in the particular case." 29 CFR 500.20(h)(4)(i). The factors identified in the regulation were not intended by the Department to be a checklist for determining a joint employment relationship; nor were the factors intended to be given greater weight than other relevant factors presented in a particular case or developed in the case law. To the extent that courts and the regulated community may have strayed from the "economic reality"/"economic dependence" analysis by applying the regulation as a rigid checklist, or treating the regulation as an exclusive list which precludes consideration of additional factors (*e.g.*, whether workers' activities are an integral part of the putative employer's operation), or distorting or placing undue emphasis on particular factors (*e.g.*, "control" misconstrued as being direct supervision of workers' activities), the regulation is not only misinterpreted but is also being applied so as to frustrate the express intention of Congress in enacting MSPA.

Proposed "Joint Employer" Rule

In order to resolve any confusion or misunderstanding of the current MSPA regulation and to provide clearer and more complete guidance to the regulated community, the regulation is proposed to be amended to better delineate the appropriate analysis of the employment and joint employment relationships using "economic dependence" as the touchstone, as contemplated by Congress when MSPA was enacted. The proposed regulation also addresses the crucial, initial issue of whether a farm labor contractor (FLC) is a bona fide independent contractor or an employee of the agricultural association or agricultural employer; where an FLC is actually an employee of the agricultural employer or association, any worker employed by the FLC is necessarily also an employee of the FLC's employer. The proposed regulation more clearly enunciates the proper test for joint employment, as prescribed in the legislative history and set forth in the case law that has properly focused on economic reality and economic dependence. Further, the regulation will provide needed guidance on "control," clarifying that the inquiry is as to the putative employer's power or right to exercise authority in the workplace, either directly or indirectly; the actual exercise of such power or authority is not necessary. The regulation would be further clarified, in that the illustrative list of factors eliminates redundancy (*e.g.*, items in the current regulation dealing with aspects of control are consolidated) and provides more complete guidance as to appropriate consideration of factors. Comments are requested concerning the factors listed, in particular whether or not additional factors should be included in the illustrative list of factors.

[8] Rept. 7.

Executive Order 12866/Section 202 of the Unfunded Mandates Reform Act of 1995

This proposed rule is not "economically significant" within the meaning of Executive Order 12866, nor does it require a § 202 statement under the Unfunded Mandates Reform Act of 1995. However, because the rule may raise novel legal or policy issues arising out of legal mandates, it has been determined by OMB to be a "significant regulatory action" within the meaning of § 3(f)(4) of Executive Order 12866. The proposed rule proposes to amend the MSPA regulations to clarify the concepts of *employ, employer, employee,* and *joint employment*. No economic analysis is required because the rule will not have a significant economic impact.

Regulatory Flexibility Analysis

This proposed rule will not have a significant economic impact on a substantial number of small entities. The Department has certified to this effect to the Chief Counsel for Advocacy of the Small Business Administration. The proposed rule contains language which is intended to clarify what is meant by the terms *employ, employer, employment,* and *joint employment* under MSPA.

Document Preparation

This document was prepared under the direction and control of Maria Echaveste, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects in 29 CFR Part 500

Agricultural employers, Agricultural associations, Agricultural worker, Employ, Employee, Employer, Farm labor contractor, Independent Contractor, Joint Employment, Migrant agricultural workers, Migrant labor, Seasonal agricultural workers.

Signed at Washington, D.C., on this 26th day of March, 1996.

John R. Fraser,

Deputy Administrator, Wage and Hour Division.

For the reasons set forth above, 29 CFR part 500 is proposed to be amended as set forth below:

PART 500—MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION

1. The authority citation for Part 500 is revised to read as follows:

Authority: Pub. L. 97–470, 96 Stat. 2583 (29 U.S.C. 1801–1872); Secretary's Order No. 6–84, 49 FR 32473.

2. In § 500.20, paragraph (h)(4) is revised and paragraph (h)(5) is added to read as follows:

§ 500.20 Definitions.

* * * * *

(h) * * *

(4) The definition of the term *employ* may include consideration of whether or not an *independent contractor* or *employment* relationship exists under the Fair Labor Standards Act. Under MSPA, questions will arise whether or not the farm labor contractor engaged by the agricultural employer/association is a bona fide independent contractor or an employee. Questions also arise whether or not the worker is a bona fide independent contractor or an employee of the farm labor contractor and/or the agricultural employer/association. These questions should be resolved in accordance with the factors set out below and the principles articulated by the federal courts in *Rutherford Food Corp.v. McComb*, 331 U.S. 722 (1947), *Real v. Driscoll Strawberry Assoc., Inc.*, 603 F.2d 748 (9th Cir. 1979), and *Sec'y of Labor, U.S. Dept. of Labor v. Lauritzen*, 835 F.2d 1529 (7th Cir. 1987). If it is determined that the farm labor contractor is an *employee* of the agricultural employer/association, the agricultural workers in the farm labor contractor's crew who perform work for the agricultural employer/association are deemed to be employees of the agricultural employer/association and an inquiry into joint employment is not necessary or appropriate. In determining if the worker or farm labor contractor is an employee or an independent contractor, the ultimate question is the economic reality of the relationship—whether there is economic dependence upon the farm labor contractor or agricultural employer/association, as appropriate. This determination is based upon an evaluation of all of the circumstances, including the following:

(i) The nature and degree of the putative employer's control as to the manner in which the work is performed;

(ii) The putative employee's opportunity for profit or loss depending upon his managerial skill;

(iii) The putative employee's investment in equipment or materials required for the task, or the putative employee's employment of other workers;

(iv) Whether the services rendered by the putative employee requires special skill;

(v) The degree of permanency and duration of the working relationship;

(vi) The extent to which the services rendered by the putative employee are an integral part of the putative employer's business.

(5) The definition of the term *employ* includes the *joint employment* principles applicable under the Fair Labor Standards Act. The term *joint employment* means a condition in which a single individual stands in the relation of an employee to two or more persons at the same time. A determination of whether the employment is to be considered joint employment depends upon all the facts in the particular case. If the facts establish that two or more persons are completely disassociated with respect to the employment of a particular employee, a joint employment situation does not exist.

(i) If it is determined that the farm labor contractor is an independent contractor, it still must be determined whether or not the employees of the farm labor contractor are also jointly employed by the agricultural employer/association. *Joint employment* under the Fair Labor Standards Act is joint employment under the MSPA. Such joint employment relationships, which are common in agriculture, have been addressed both in the legislative history and by the courts.

(ii) The legislative history of the Act (H. Rep. No. 97–885, 97th Cong., 2d Sess., 1982) states that the legislative purpose in enacting MSPA was "to reverse the historical pattern of abuse and exploitation of migrant and seasonal farm workers . . .," which would only be accomplished by "advanc[ing] . . . a completely new approach" (Rept. at 3). Congress's incorporation of the FLSA term *employ* was undertaken with the deliberate intent of adopting the FLSA *joint employer* doctrine as the "central foundation" of MSPA and "the best means by which to insure that the purposes of this MSPA would be fulfilled" (Rept. at 6). Further, Congress intended that the *joint employer* test under MSPA be the formulation as set forth in *Hodgson v. Griffin & Brand of McAllen, Inc.* 471 F.2d 235 (5th Cir.), *cert. denied*, 414 U.S. 819 (1973) (Rept. at 7). In endorsing *Griffin & Brand*, Congress stated that this formulation should be controlling in situations "where an agricultural employer . . . asserts that the agricultural workers in question are the *sole* employees of an independent contractor/crewleader," and that the "decision makes clear that even if a farm labor contractor is found to be a bona fide independent contractor, . . . this status does not as a matter of law negate the possibility that an agricultural employer may be a joint employer . . . of the harvest workers" together with the farm labor contractor. Further, regarding the joint employer doctrine and the *Griffin & Brand* formulation, Congress stated that "the absence of evidence on any of the criteria listed does not preclude a finding that an agricultural association or agricultural employer was a joint employer along with the crewleader", and that "it is expected that the special aspects of agricultural employment be kept in mind" when applying the tests and criteria set forth in the case law and legislative history (Rept. at 8).

(iii) In determining whether or not an employment relationship exists between the agricultural employer/association and the agricultural worker, the ultimate question to be determined is the economic reality—whether the worker is so economically dependent upon the agricultural employer/association as to be considered its employee, subject to MSPA protections.

(iv) The factors set forth below are analytical tools to be used in determining the ultimate question of economic dependency. The factors are not to be applied as a checklist. They are illustrative only and are not intended to be exhaustive; other factors may be considered, depending upon the specific circumstances of the relationship among the parties. No one factor is critical to the analysis; nor must a majority of the factors be found for an employment relationship to exist. Rather, how the factors are weighed depends upon all of the facts and circumstances. Among the factors to be considered in determining whether or not an employment relationship exists are:

(A) Whether the agricultural employer/association has the power, either alone or through control of the farm labor contractor to direct, control, or supervise the worker(s) or the work performed (such control may be either direct or indirect, and may be either exercised or unexercised, taking into account the nature of the work performed);

(B) Whether the agricultural employer/association has the power, either alone or in addition to another employer, directly or indirectly, to hire or fire, modify the employment conditions, or determine the pay rates or the methods of wage payment for the worker(s);

(C) Whether the agricultural employer/association supplies housing, transportation, tools and equipment or materials required for the job;

(D) The degree of permanency and duration of the relationship of the parties, in the context of the agricultural activity at issue;

(E) The extent to which the services rendered by the workers are repetitive, rote tasks requiring skills which are acquired with relatively little training;

(F) Whether the activities performed by the worker are an integral part of the overall business operation of the agricultural employer/association;

(G) Whether the work is performed on the agricultural employer/association's premises or on the premises owned or controlled by another business entity;

(H) Whether the agricultural employer/association undertakes responsibilities in relation to the worker which are normally performed by employers, such as maintaining payroll records, preparing and/or issuing pay checks, paying FICA taxes, providing workers' compensation insurance, or providing field sanitation facilities; and

(I) Other facts bearing on economic dependency.

BILLING CODE 4510–27–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

[SPATS No. IL–092–FOR]

Illinois Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing.

SUMMARY: OSM is announcing receipt of a proposed amendment to the Illinois regulatory program (hereinafter the "Illinois program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of the revision of four sections and the addition of one section to Title 62 of the Illinois Administrative Code (IAC) regulations pertaining to self-bonding. The amendment is intended to revise the Illinois program to be consistent with the corresponding Federal regulations.

DATES: Written comments must be received by 4 p.m., e.s.t., April 29, 1996. If requested, a public hearing on the proposed amendment will be held on April 25, 1996. Requests to speak at the hearing must be received by 4 p.m., e.s.t. on April 15, 1995.

ADDRESSES: Written comments and requests to speak at the hearing should be mailed or hand delivered to Roger W. Calhoun, Director, Indianapolis Field Office, at the address listed below.

Copies of the Illinois program, the proposed amendment, a listing of any scheduled public hearings, and all written comments received in response to this document will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Indianapolis Field Office.

Roger W. Calhoun, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Minton-Capehart Federal Building, 575 North Pennsylvania Street, Room 301, Indianapolis, IN 46204, Telephone: (317) 226–6700.

Illinois Department of Natural Resources, Office of Mines and Minerals, 524 South Second Street, Springfield, IL 62701–1787, Telephone (217) 782–4970.

FOR FURTHER INFORMATION CONTACT:

Roger W. Calhoun, Director, Indianapolis Field Office, Telephone: (317) 226–6700.

SUPPLEMENTARY INFORMATION:

I. Background on the Illinois Program

On June 1, 1982, the Secretary of the Interior conditionally approved the Illinois program. Background information on the Illinois program, including the Secretary's findings, the disposition of comments, and the conditions of approval can be found in the June 1, 1982, **Federal Register** (47 FR 23883). Subsequent actions concerning the conditions of approval and program amendments can be found at 30 CFR 913.15, 913.16, and 913.17.

II. Description of the Proposed Amendment

By letter dated March 4, 1996 (Administrative Record No. IL–1800), Illinois submitted a proposed amendment to its program pursuant to SMCRA. Illinois submitted the proposed amendment at its own initiative. Illinois proposed to revise 62 IAC 1800.4, Department responsibilities; 62 IAC 1800.5, Definitions; 62 IAC 1800.11, Requirement to file a bond; and 62 IAC 1800.12, Form of the performance bond. Illinois also proposed to add 62 IAC 1800.23, Self-bonding.

1. 62 IAC 1800.4 Department Responsibilities

Illinois proposes to revise § 1800.4 by adding new subsection (c) that authorizes the acceptance of a self-bond if the permittee meets the requirements of 62 IAC 1800.23. Existing subsections (c) through (e) are proposed to be redesignated (d) through (f).

2. 62 IAC 1800.5 Definitions

Illinois proposes to revise § 1800.5 by adding a definition for the term "self-bonding" at new subsection (c) that reads as follows:

Self-bonding means an indemnity agreement in a sum certain executed by the applicant or by the applicant and any corporate guarantor and made payable to the Department, with or without separate surety.

3. 62 IAC 1800.11 Requirement to File a Bond

Illinois proposes to revise § 1800.11 by adding new subsection (e) that requires self-bonding for eligible permittees be administered consistent with all applicable provisions of 62 IAC 1800.1 through 1800.50.

4. 62 1800.12 Form of the Performance Bond

Illinois proposes to revise § 1800.12 by adding new subsection (c) that identifies a self-bond as form of performance bond allowed by the Illinois program. Existing subsection (c) is proposed to be redesignated subsection (d)..

5. 62 IAC 1800.23 Self-Bonding

Illinois proposes to add new § 1800.23 concerning its conditions for acceptance of a self-bond. At subsection (a), Illinois defines the terms to be used in the section: "current assets"; "current liabilities"; "fixed assets"; "liabilities"; "net worth"; "parent corporation"; and "tangible net worth." At subsection (b), Illinois specifies the conditions that must be met before a self-bond would be accepted from the applicant. At

subsection (c), Illinois specifies the conditions that must be met for acceptance of a written guarantee for an applicant's self-bond from a parent corporation guarantor or non-parent corporation guarantor. At subsection (d), Illinois specifies that the total amount of the outstanding and proposed self-bonds for either an applicant, parent corporation guarantor, or nonparent corporate guarantor shall not exceed 25 percent of the their tangible net worth in the United States. At subsection (e), Illinois is requiring an indemnity agreement be submitted with specified requirements. At subsection (f), Illinois is requiring submittal of an update of specified information within 90 days after the close of each fiscal year following issuance of the self-bond or corporate guarantee. At subsection (g), Illinois is requiring that if the financial conditions of the applicant, parent or nonparent corporate guarantor change so that specified criteria are not satisfied, the permittee shall notify Illinois immediately and post an alternate form of bond within 90 days.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Illinois program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **DATES** or at locations other than the Indianapolis Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to speak at the public hearing should contact the person listed under **FOR FURTHER INFORMATION CONTACT** by 4:00 p.m., e.s.t on April 15, 1996. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to speak at the public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions. Any disabled individual who has need for a special accommodation to attend a public hearing should contact the individual listed under **FOR FURTHER INFORMATION CONTACT**.

The public hearing will continue on the specified date until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to speak and persons present in the audience who wish to speak have been heard.

Public Meeting

If only one person requests an opportunity to speak at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**. All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **ADDRESSES**. A written summary of each meeting will be made a part of the Administrative Record.

IV. Procedural Determinations

Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11; 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Pesticide Worker Protection Standard, Decontamination Requirements; Notification to the Secretary of Agriculture

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification to the Secretary of Agriculture.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of Agriculture a final regulation under section 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The rule reduces the duration that decontamination supplies must be maintained for low toxicity pesticides. This action is required by FIFRA section 25(a)(2).

FOR FURTHER INFORMATION CONTACT: By mail: Linda H. Strauss, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: Rm. 1121F, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-308-3240), e-mail: strauss.linda@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Section 25(a)(2) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days before signing it for publication in the **Federal Register**. If the Secretary comments in writing regarding the final regulation within 15 days after receiving it, the Administrator shall issue for publication in the **Federal Register**, with the final regulation, the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing within 15 days after receiving the final regulation, the Administrator may sign the regulation for publication in the **Federal Register** anytime thereafter. As required by FIFRA section 25(a)(3), a copy of the final regulation has been forwarded to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

Pesticide Worker Protection, Standard Language and Size Requirement for Warning Sign; Notification to the Secretary of Agriculture

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification to the Secretary of Agriculture.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of Agriculture a final regulation under section 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The rule amends the requirements in the worker protection standards for the posting of a warning sign at pesticide use sites. This action is required by FIFRA section 25(a)(2).

FOR FURTHER INFORMATION CONTACT: By mail: John R. MacDonald, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1121F, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-305-7370).

SUPPLEMENTARY INFORMATION: Section 25(a)(2) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days before signing it for publication in the **Federal Register**. If the Secretary comments in writing regarding the final regulation within 15 days after receiving it, the Administrator shall issue for publication in the **Federal Register**, with the final regulation, the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing within 15 days after receiving the final regulation, the Administrator may sign the regulation for publication in the **Federal Register** anytime thereafter. As required by FIFRA section 25(a)(3), a copy of the final regulation has been forwarded to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2, 15 and 97

[Docket No. 94–124; RM–8308; FCC 95–499]

Operation Above 40 GHz

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: By this *Second Notice of Proposed Rule Making, ("2nd NPRM")*, the Commission addresses proposals: to restrict amateur usage of the 76–77 GHz band in order to protect vehicle radar systems from interference while also giving amateur operators coprimary status in the 77.5–78 GHz band; to develop a spectrum etiquette technical standard for the 59–64 GHz band to minimize interference within that band; and to further restrict emissions above 200 GHz to protect radio astronomy operations from interference.

DATES: Comments must be submitted on or before May 28, 1996. Reply comments must be submitted on or before June 27, 1996.

ADDRESSES: Comments and reply comments should be sent to the Office of Secretary, Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: John Reed, Office of Engineering and Technology, (202) 418–2455, Richard Engelman, Office of Engineering and Technology, (202) 418–2445, or Michael Marcus, Office of Engineering and Technology, (202) 418–2470, or send an electronic mail message via the Internet to mmwaves@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *2nd NPRM*, ET Docket 94–124, FCC 95–499, adopted December 15, 1995, and released December 15, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857–3800, 1919 M Street, NW., Room 246 or 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of 2nd NPRM

1. *2nd NPRM* addresses several issues relating to use of the 46.7–46.9 GHz, 59–64 GHz, and 76–77 GHz bands. First, we are proposing to amend Part 97 of our rules to restrict temporarily amateur use of the 76–77 GHz band in order to ensure that vehicle radar systems will not receive interference from amateur operations. To balance any perceived harm by amateur operators, we are proposing to upgrade the status of amateur operators in the 77.5–78 GHz band to co-primary with the radiolocation service. We are also proposing limits for emissions in the 200–231 GHz band to protect radio astronomy operations from potential interference. In addition, we are proposing to initiate the development of a spectrum etiquette standard to prevent interference among unlicensed 59–64 GHz devices, analogous to the standards used for unlicensed PCS under Part 15 of our rules, and request specific proposals for such standards. *See* 47 CFR 15.321 and 15.323.

2. The Initial Regulatory Flexibility Analysis ("IRFA") is contained in the text of the 2nd NPRM. The Commission requests written public comment on the foregoing IRFA. Comments must have a separate and distinct heading designating them as responses to the IRFA and must be filed by the deadlines specified in the summary above.

47 CFR Part 73

[MM Docket No. 96–54; RM–8769]

Radio Broadcasting Services; Ruidoso, NM

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Kellie K. Brown seeking the allotment of Channel 268A to Ruidoso, NM, as the community's third aural and second local FM service. Channel 268A can be allotted to Ruidoso in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction, at coordinates 33–20–00 NL; 105–40–54 WL. Mexican concurrence is required since Ruidoso is located within 320 kilometers (199 miles) of the U.S.-Mexican border.

DATES: Comments must be filed on or before May 13, 1996, and reply comments on or before May 28, 1996.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Kellie K. Brown, P.O. Box 4396, Ruidoso, NM 88345 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rule Making*, MM Docket No. 96–54, adopted March 1, 1996, and released March 21, 1996. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712–01–F

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Denial of Petition for Rulemaking; Federal Motor Vehicle Safety Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Denial of petition for rulemaking.

SUMMARY: This document denies Mr. John Chevedden's petition for rulemaking to require only amber bulbs be sold in the aftermarket for replacement of the front amber turn signal bulbs. NHTSA's analysis of the petition concludes that this action would have a negligible effect on reducing crashes or fatalities, and would have significant cost effects for the redesign of turn signal and stop lamps.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Van Iderstine, Office of Safety Performance Standards, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Mr. Van Iderstine's telephone number is: (202) 366–5275. His facsimile number is (202) 366–4329.

SUPPLEMENTARY INFORMATION: By letter dated November 14, 1995, Mr. John Chevedden of Redondo Beach, California, petitioned the agency to issue a rule that would "require only amber light bulbs to be sold in the aftermarket for replacement of factory amber front turn signal bulbs." Mr. Chevedden stated that this is necessary "to prevent the aftermarket from nullifying the requirement (since 1963) that front turn signal lamps be amber." He states that the use of clear bulbs on vehicles with clear lenses on front turn signal lamps nullifies the amber requirement.

While it is true that front turn signal lamps are required to be amber on new motor vehicles at the time of their delivery to the first user, the requirement may be met by either an amber bulb behind a clear lens, or a clear bulb behind an amber lens. In service, the correct maintenance of that safety equipment is the responsibility of vehicle owners. The installation of incorrect bulbs or replacement lenses represents the failure of the owner to fulfill that responsibility. The responsibility for inspection of and enforcement for properly operating safety equipment belongs to the states, and in the petitioner's case, existing laws in most states require that front turn signal lamps emit amber light.

The clear bulbs, about which the petitioner is concerned, that may be used to replace burned-out amber bulbs in front turn signal lamps with clear lenses, are also used for all existing backup, stop, and rear red turn signal lamps, as well as for other purposes. These bulbs would be banned under the Mr. Chevedden's petition. Ultimately, this would necessitate that new bulbs be designed and marketed that are not interchangeable between lamp functions. This would have cost impacts on new and replacement bulbs as well as on the design of new signal lamps. This also could have significant adverse consequences to safety, because of the inability of vehicle owners to obtain clear replacement bulbs for the ones that will burn out on the 150 million vehicles already in the fleet. Thus, the fleet could have fewer and fewer functional lamps over time, leading to increases in accidents.

Mr. Chevedden did not provide any support for his petition, such as the argument that accidents are occurring as a result of the use of clear turn signal bulbs in lamps with clear lenses. In the absence such support and in light of the adverse consequences that the agency foresees for his solution, the agency sees no basis for rulemaking.

In accordance with 49 CFR part 552, this completes the agency's technical review of the petition. The agency has concluded that there is no reasonable possibility that the amendment requested by the petitioner would be issued at the conclusion of a rulemaking proceeding. After considering all relevant factors, including the need to allocate and prioritize limited agency resources to best accomplish the agency's safety mission, the agency has decided to deny the petition.

Authority: 49 U.S.C. 30103, 30162; delegation of authority at 49 CFR 1.50 and 501.8.

Issued on: March 25, 1996.

Barry Felrice,

Associate Administrator for Safety Performance Standards.

[FR Doc. 96–7706 Filed 3–28–96; 8:45 am]

BILLING CODE 4910–59–P

49 CFR Part 571

Denial of Petition for Rulemaking; Federal Motor Vehicle Safety Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Denial of petition for rulemaking.

SUMMARY: This document denies a petition from the Society of Automotive Engineers (SAE) for rulemaking to incorporate the latest version of SAE Standard J594—*Reflex Reflectors*, into Federal Motor Vehicle Safety Standard (FMVSS) No. 108. NHTSA's analysis of the petition concludes that there is minimal benefit to the public in updating the reference to this SAE standard. While incorporation would make reflex reflector requirements more readily available to lighting and vehicle design engineers as a current reference, it would require considerable expenditures of agency resources to implement it and all the other SAE standards whose references in FMVSS No. 108 are not the most recent. The agency's commitment of its resources to identify its safety priorities precludes granting this petition. However, the agency will compile a reference document of materials incorporated into Standard No. 108 to improve availability of these materials.

FOR FURTHER INFORMATION CONTACT: Mr. Jere Medlin, Office of Crash Avoidance Standards, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Mr. Medlin's telephone number is: (202) 366–5276. His facsimile number is (202) 366–4329.

SUPPLEMENTARY INFORMATION: By letter dated October 4, 1995, William A. McKinney, Chairman of the Lighting Coordinating Committee of the Society of Automotive Engineers, Inc. (Petitioner) petitioned the agency to incorporate the latest version of SAE J594—*Reflex Reflectors*, into 49 CFR 571.108 (Federal Motor Vehicle Safety Standard No. 108, Lamps, reflective devices and associated equipment). The petitioner claimed the changes in the latest version (J594 JUL95) provide significant improvements in format consistent with the current SAE practice, incorporate information on other SAE publications referenced in the document, include definitions of photometry observation and entrance angles, and provide additional explanations and guidelines for photometry and installation requirements. Petitioner further claimed that these revisions make this new version easier to apply, as well as easier to find because it is located in current SAE Handbooks. Petitioner also claimed that the changes would not adversely affect the costs of any lighting or vehicle manufacturer. No claims about safety or performance were made.

The agency has reviewed what would be required to implement the Petitioner's desired solution. It has found that the tests and many requirements of the new J594 are from or referenced to SAE Recommended Practice J575 JUN92—*Test Methods and Equipment for Lighting Devices and Components for Use on Vehicles Less than 2032 mm in Overall Width*. However, the version of J575 to which FMVSS No. 108 refers is J575e August 1970. It is not found in the current SAE Handbook. The same issue occurs for SAE J578, *Color Specification*. The new SAE J594 refers to the "current version(s)", rather than the version required by FMVSS No. 108, which is SAE J578a October 1966.

Therefore, the advantage claimed by Petitioner by referencing to a standard in current SAE handbooks appears to be very small because this action would update only J594, and none of the subreferenced documents. Additionally, because NHTSA reference to SAE standards is not always absolute, in that parts of standards are referenced or exceptions are made to specific requirements in SAE standards where different or more stringent performance is necessary for safety purposes, the value of having the latest version of an SAE document is lessened. Thus, without a careful reading of FMVSS No. 108, a reader of the newest J594 could continue to be misled as to the pertinent requirements, just as with the currently referenced version.

An example of this issue is seen in the Installation Requirements paragraph of J594 JUL95. NHTSA is currently proposing in another rulemaking (60 FR 54833) to amend geometric visibility requirements of signal lamps (installed visibility requirements) that are substantially different from those in J594 JUL95. Should this geometric visibility proposal be adopted, the text of any referenced version of J594 will be superseded. It is unlikely that J594 JUL95, or any version of a referenced industry standard would be wholly usable for more than just a short period of time and probably would be out of print after just five years because of SAE's schedule of periodic updating of its standards. At that time, the value of the rulemaking efforts requested by this petition would be negated by another SAE update.

Allocation of agency resources and agency priorities must be considered in processing what may be the first of many petitions from the SAE to update each of the SAE standards directly referenced in FMVSS No. 108, and potentially more petitions to update the additional SAE standards that are subreferenced in those SAE standards. All of these mentioned standards have specific dated versions referenced in FMVSS No. 108. Because the SAE endeavors to update its standards on a regular five year schedule, the federal regulatory workload from such a course of updating would be continuous and drain resources from other activities. This is not a desirable course given the agency's shrinking resources. Nonetheless, NHTSA recognizes that the technical expertise found on SAE Committees is invaluable to NHTSA's mission, particularly when performance requirements must be developed to accommodate new technologies. Consequently, NHTSA plans to consider how best to cooperate with the SAE. NHTSA will still be favorably inclined to consider any future SAE request that has significant safety benefits or when such action would remove impediments to the use of new technologies.

To respond to the need expressed by SAE, the agency will compile and provide on request to interested persons, a document containing the desired SAE and other organizations' standards which are referenced and subreferenced in FMVSS No. 108. The immediate effect is to make it easier for all interested persons, especially lighting and vehicle personnel, to have available in one document all the requirements in the Federal lighting standard. The agency recognizes the problem of finding older SAE Standards, and takes this action to solve that problem. It will be updated as required.

In accordance with 49 CFR part 552, this completes the agency's review of the petition. The agency has concluded that there is no reasonable possibility that the specific action requested by the petitioner would be issued at the conclusion of a rulemaking proceeding. Accordingly, it denies the SAE's petition.

Authority: 49 U.S.C. 30103, 30162; delegation of authority at 49 CFR 1.50 and 501.8.

Issued on March 25, 1996.

Barry Felrice,

Associate Administrator for Safety Performance Standards.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[Docket No. 96–016–2]

Declaration of Emergency Because of Karnal Bunt

An exotic fungal disease, Karnal bunt, has been detected in the United States. The disease was detected in Arizona, and potentially contaminated seed was sent to New Mexico and Texas. The disease had not previously been detected in the United States.

Karnal bunt (*Tilletia indica*) is a serious disease of wheat, durum wheat, and triticale, a hybrid of wheat and rye. The disease affects both yield and grain quality. It adversely affects the color, odor, and palatability of flour and other foodstuffs made from wheat. It does not present a risk to human health.

If Karnal bunt is allowed to spread, the overall crop loss and impact on quality may be significant. The disease could affect United States grain exports. The United States is the world's leading wheat exporter, accounting for one-third of the world wheat exports. Wheat exports from the United States were valued at $4.9 billion in Fiscal Year 1995. At least 21 countries are known to regulate or prohibit grain movement on the basis of Karnal bunt.

Control and eradication of Karnal bunt is difficult. Management of the disease is through quarantine and containment of regulated articles. Initial emergency action was taken by the Arizona Department of Agriculture (ADA) and the Animal and Plant Health Inspection Service (APHIS). APHIS and ADA have instituted emergency quarantines on the infected premises and are regulating the movement of seed, farm equipment, and soil associated with the infected wheat.

To conduct a management and eradication program, funds are needed to conduct surveys, and establish regulatory controls and other activities deemed necessary to protect wheat production areas and export markets. APHIS has insufficient funds to meet the needs of the proposed program. Once funded, APHIS can continue management programs in Arizona, New Mexico, and Texas, and regulate areas that have received infected seed, soil, and equipment to prevent further spread. Delimiting surveys are planned to determine the extent of the infection. A national survey of grain elevators and a survey of grain export elevators is planned to verify Karnal bunt-free areas and to ensure continuation of exports.

Therefore, in accordance with the provisions of the Act of September 25, 1981, 95 Stat. 953 (7 U.S.C. 147b), I declare that there is an emergency which threatens the wheat, durum wheat, and triticale crops of this country, and I authorize the transfer and use of such sums as may be necessary from appropriations or other funds available to agencies or corporations of the Department of Agriculture for the conduct of a program to detect and identify Karnal bunt infested areas, and to control and prevent the spread of Karnal bunt to noninfested areas in the United States, and to eradicate Karnal bunt wherever it may be found in the United States.

Effective Date: This declaration of emergency shall become effective March 26, 1996.

Dan Glickman,
Secretary of Agriculture.

Agricultural Research Service

Notice of Intent To Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the United States Department of Agriculture, Agricultural Research Service, intends to grant to Peterson Seed Company, Inc., of Savage, Minnesota, an exclusive license for ARS–2620, a new plant variety entitled "Rhizomatous Birdsfoot Trefoil." Notice of Availability for this new plant variety, for which Plant Variety Protection is pending, was published in the Federal Register on October 17, 1995.

DATES: Comments must be received on or before May 28, 1996.

ADDRESSES: Send comments to: USDA–ARS–Office of Technology Transfer, Beltsville Agricultural Research Center, Baltimore Boulevard, Building 005, Room 416, BARC–W, Beltsville, Maryland 20705–2350.

FOR FURTHER INFORMATION CONTACT: Andrew Watkins of the Office of Technology Transfer at the Beltsville address given above; telephone: 301/504–6786.

SUPPLEMENTARY INFORMATION: The Federal Government's plant variety protection rights to this variety are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention, for the Peterson Seed Company, Inc., has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 USC 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty days from the date of this published Notice, ARS receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

R.M. Parry, Jr.,
Assistant Administrator.

Animal and Plant Health Inspection Service

[Docket No. 92–110–4]

Veterinary Services Draft Programmatic Environmental Impact Statement

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared a draft programmatic environmental impact statement for the Veterinary Services Program, which is responsible for the protection of the Nation's livestock and poultry. As part of this mission, Veterinary Services conducts ongoing programs designed to detect, prevent, control, and eradicate endemic and foreign animal diseases and pests that threaten these resources. The draft programmatic environmental impact statement addresses environmental impacts associated with these ongoing programs. We are requesting public comments on the draft programmatic environmental impact statement.

DATES: Consideration will be given only to comments received on or before May 28, 1996.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 92–110–4, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 92–110–4. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, Between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

Interested persons may obtain a copy of the draft environmental impact statement by writing to the addresses listed below under **FOR FURTHER INFORMATION CONTACT.**

FOR FURTHER INFORMATION CONTACT: Ms. Nancy Sweeney, Project Leader, Environmental Analysis and Documentation, BBEP, APHIS, Suite 5B05, 4700 River Road Unit 149, Riverdale, MD 20737–1237, (301) 734–8565; or Dr. William E. Ketter, Assistant to Director, Operational Support, VS, APHIS, Suite 3B08, 4700 River Road Unit 33, Riverdale, MD 20737–1231, (301) 734–4357.

SUPPLEMENTARY INFORMATION:

Background

The Animal and Plant Health Inspection Service (APHIS) has prepared a draft programmatic environmental impact statement (EIS) for our Veterinary Services Program, which is responsible for the protection of the Nation's livestock and poultry. As part of this mission, (VS) conducts ongoing programs designed to detect, prevent, control, and eradicate endemic and foreign animal diseases and pests that threaten these resources. The draft programmatic EIS addresses environmental impacts associated with these ongoing programs.

We published a notice of intent to prepare a programmatic EIS in the

Federal Register on July 23, 1992 (57 FR 32771–32772, Docket No. 92–110–1). This notice advised the public that we intended to use in-house resources to study the disease prevention, surveillance, control, and eradication activities of the VS Program to identify any potential environmental effects. We published a notice of the proposed scope of study for the programmatic EIS in the **Federal Register** on October 9, 1992 (57 FR 46532–46534, Docket No. 92–110–2). This notice identified potential issues to be analyzed in the programmatic EIS, and requested public comment on these and other issues. Comments were to be received on or before November 23, 1992. We published a notice of the final scope of study for the programmatic EIS in the **Federal Register** on March 29, 1993 (58 FR 16520–16521, Docket No. 92–110–3).

Major Issues

The comments received from the public helped us to determine the principal focus of the draft programmatic EIS. The draft programmatic EIS identifies the following VS programs and activities as having the potential to affect the quality of the human environment: (1) Methods of animal carcass disposal; (2) disease eradication efforts of an emergency nature; (3) the use of disinfectants and pesticides; (4) the import-export program; (5) the vaccination program; (6) the construction, use, and expansion of facilities; and (7) methods of animal identification. The document analyzes these VS programs and activities and examines the potential impacts of the programs as currently implemented along with the alternative of taking no Federal action.

The draft programmatic EIS is now available for review and comment. We are seeking comments from the public; industry; environmental groups; and Federal, State, and local agencies, including Federal and State agencies that have either jurisdiction by law or special expertise regarding any program issue or environmental impact that is discussed in the draft programmatic EIS.

We will consider all comments received by the close of the comment period in the development of the final programmatic EIS. The availability of the final programmatic EIS will be announced in a subsequent **Federal Register** notice.

This notice is issued in accordance with: (1) The National Environmental Policy Act (NEPA) (42 U.S.C. 4231 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 22nd day of March 1996.

Terry L. Medley,
Acting Administrator, Animal and Plant Health Inspection Service.

Oregon Coast Provincial Advisory Committee Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Oregon Coast Provincial Advisory Committee (PAC) will meet on April 19, 1996, in Newport, Oregon, at the Hotel Newport, 3019 N. Coast Highway. The meeting will begin at 9:00 a.m. and continue until 3:30 p.m. Agenda items to be covered include: (1) Current events, (2) Flood update, (3) Northern Coast Range AMA Update, and (4) open public forums. All Oregon Coast Provincial Advisory Committee meetings are open to the public. Two "open forums" are scheduled; one at 9:45 a.m. and another near the conclusion of the meeting. Interested citizens are encouraged to attend. The

committee welcomes the public's written comments on committee business at any time.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to Rick Alexander, Public Affairs Officer, at (541) 750–7075, or write to Forest Supervisor, Siuslaw National Forest, P.O. Box 1148, Corvallis, Oregon 97339.

Dated: March 22, 1996.

James R. Furnish,

Forest Supervisor.

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Producing Firms for Determination of Eligibility To Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: To give firms an opportunity to comment.

Petitions have been accepted for filing on the dates indicated from the firms listed below.

LIST OF PETITION ACTION BY TRADE ADJUSTMENT ASSISTANCE FOR PERIOD 02/21/96—03/16/96

Firm name	Address	Date petition accepted	Product
Boston Precision Parts Co., Inc	46 Sprague St., Hyde Park, MA 02136	02/22/96	Stamped sheet metal parts.
Apex Machine Tool Company, Inc	21 Spring Lane, Farmington, CT 06032	03/01/96	Fixtures, gages and injection molds.
Caruso International, Inc	40 Ash Circle, Warminster, PA 18974	03/05/96	Steamsetter, hot rollers and accessories.
Gordon B. Hamilton Company	P.O. Box 11746, Tucson, AZ 85734	03/11/96	Modification and rebuilding of aircraft.
Karen Anne Mfg., Inc	599–657 Quarry Street, Fall River, MA 02723.	03/07/96	Nylon luggage and computer cases.
Colloid Chemical, Inc	225 Cedar Knolls Road, Cedar Knolls, NJ 07927.	03/11/96	Cured resin friction particle powders and Novolac-type viscous liquid resin binders.
Bibco, Inc	326 E. Main St., Benton Harbor, MI 49022.	03/07/96	Custom electronic assemblies, including flat ribbon cable, round cable and printed circuit boards.
Van Stee Corporation	200 Crescent Street, Jamestown, NY 14701.	03/07/96	Solid wooden (maple and cherry) bedroom furniture.
Cover Stitch, Inc	1629 4th Ave. SE, Dacatur, AL 35601	03/06/96	Fabric car covers.
Burton Golf, Inc	2700 25th Ave. SE, Jasper, AL 35501	03/07/96	Golf bags of leather and man-made materials.
Lestage Manufacturing Company	31 Larsen Way, North Attleboro, MA 02763.	03/13/96	Jewelry.
Detroit Steel Products Co., Inc	P.O. Box 285, Range Line Road; Morristown, IN 46161.	03/14/96	Multi-leaf springs, parabolic leaf springs and air springs for vehicles.
Great Exportations Hawaii	P.O. Box 788, Mountain View, HI 96771	03/14/96	Palms.
W.J. Dennis & Company	1111Davis Road, Elgin, IL 60123	03/14/96	Weather stripping, of plastic, felt, and adhesive.

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Trade Adjustment Assistance Division, Room 7023, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: March 19, 1996.

Lewis R. Podolske,

Director, Trade Adjustment Assistance Division.

BILLING CODE 3510–24–M

Bureau of Export Administration

Materials Processing Equipment Technical Advisory Committee; Notice of Partially Closed Meeting

A meeting of the Materials Processing Equipment Technical Advisory Committee will be held April 18, 1996, 9:00 a.m., in the Herbert C. Hoover Building, Room 1617M(2), 14th Street between Pennsylvania and Constitution Avenues, N.W., Washington, D.C. The Committee advises the Office of the Assistant Secretary for Export Administration with respect to technical questions that affect the level of export controls applicable to materials processing and related technology.

Agenda

General Session

1. Opening remarks by the Chairman.

2. Presentation of papers or comments by the public.
3. Report on status of Control List Category 2 items.
4. Discussion of membership issues.
5. Status report on implementation of Executive Order on license processing.

Closed Session

6. Discussion of matters properly classified under Executive Order 12958, dealing with the U.S. export control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent that time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials two weeks prior to the meeting date to the following address: Ms. Lee Ann Carpenter, TAC Staff/OAS–EA/Room 3886C, Bureau of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on December 13, 1995, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C., 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6020, U.S. Department of Commerce, Washington, D.C. 20230. For further information or copies of the minutes, contact Lee Ann Carpenter on (202) 482–2583.

Dated: March 22, 1996.

Lee Ann Carpenter,

Director, Technical Advisory Committee Unit.

International Trade Administration

[A–602–803]

Certain Corrosion-Resistant Carbon Steel Flat Products From Australia; Final Results of Antidumping Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Antidumping Duty Administrative Review.

SUMMARY: On August 16, 1995, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on certain corrosion-resistant carbon steel flat products from Australia. The review covers one manufacturer/exporter of the subject merchandise to the United States and the period February 4, 1993, through July 31, 1994. We gave interested parties an opportunity to comment on our preliminary results. Based on our analysis of the comments received, we have changed the results from those presented in the preliminary results of review.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Bob Bolling or Jean Kemp, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–3793.

SUPPLEMENTARY INFORMATION:

Background

On August 16, 1995, the Department published in the **Federal Register** (60 FR 42507) the preliminary results of the administrative review of the antidumping duty order on certain corrosion-resistant carbon steel flat products from Australia (58 FR 44161, August 19, 1993). The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Applicable Statute and Regulations

Unless otherwise stated, all citations to the statute and to the Department's regulations are references to the provisions as they existed on December 31, 1994.

Scope of this Review

The products covered by this administrative review constitute one "class or kind" of merchandise: certain corrosion-resistant carbon steel flat products. These products include flat-rolled carbon steel products, of rectangular shape, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the HTS under item numbers 7210.31.0000, 7210.39.0000, 7210.41.0000, 7210.49.0030, 7210.49.0090, 7210.60.0000, 7210.70.6030, 7210.70.6060, 7210.70.6090, 7210.90.1000, 7210.90.6000, 7210.90.9000, 7212.21.0000, 7212.29.0000, 7212.30.1030, 7212.30.1090, 7212.30.3000, 7212.30.5000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7212.60.0000, 7215.90.1000, 7215.90.5000, 7217.12.1000, 7217.13.1000, 7217.19.1000, 7217.19.5000, 7217.22.5000, 7217.23.5000, 7217.29.1000, 7217.29.5000, 7217.32.5000, 7217.33.5000, 7217.39.1000, and 7217.39.5000. Included are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been "worked after rolling")—for example, products which have been beveled or rounded at the edges. Excluded are flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead ("terne plate"), or both chromium and chromium oxides ("tin-free steel"), whether or not painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating. Also excluded are clad products in straight lengths of 0.1875 inch or more in composite thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness. Also excluded are certain clad stainless flat-rolled products, which are three-layered corrosion-resistant carbon steel flat-rolled products less than 4.75 millimeters in composite thickness that consist of a carbon steel flat-rolled

product clad on both sides with stainless steel in a 20%–60%–20% ratio. These HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive. The period of review (POR) is February 4, 1993 through July 31, 1994.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received comments and rebuttal comments from both parties, The Broken Hill Proprietary Company Ltd. (BHP) and petitioners. At the request of BHP and petitioners a hearing was held on October 5, 1995.

Comment 1: Respondent states that the Department erred in preliminarily denying BHP its "constructive" quantity discount. Respondent argues that, because the Department verified that BHP granted quantity discounts on more than 20 percent of its home market sales, under section 353.55(b)(1) of the Department's regulations it follows inescapably that "the discounts granted were of at least the same magnitude."

Respondent illustrated how this result must follow. Assuming respondent granted discounts of 10 percent, 15 percent, 20 percent and 25 percent on 4 out of 10 sales, then discounts were granted on 40% of the total sales, and respondent asserts that the discounts granted were of at least the same magnitude as the minimum discount because each discount was of at least 10 percent. Respondent argues further that even though it only provided the average quantity discount, as opposed to the actual quantity discount given on each sale at issue, this so-called "constructive" quantity discount was arrived at by using actual figures, *i.e.*, by dividing the total value of discounts by the number of tonnage that received an actual discount. For any sale which received less than the average discount, or no discount, a value up to the "constructive" discount was reported. Moreover, the respondent contends that because the Department verified each of the "constructive" quantity discounts associated with the pre-selected and surprise sales at verification by using the actual public and internal price lists and checking actual quantity discounts granted, this is sufficient to justify the reliability of the average discount constructed by BHP.

Respondent states that granting the "constructive" quantity discount need not establish a wholesale-type precedent since BHP's factual information is unique. Therefore, based upon the facts of record, it is entitled to its "constructive" quantity discount adjustment pursuant to section 353.55(b)(1) of the Department's regulations.

Petitioners argue that BHP has not demonstrated a basis for granting the quantity discount under the Department's regulations. Petitioners take issue with BHP's assertion that discounts are of at least the same magnitude as the smallest discount amount granted on any sale because the smallest discount amount is not the amount reported as the constructive quantity discount. Petitioners state that the actual discounts given, or extras charged by, respondent were not of the same magnitude as the reported "constructive" quantity discount. Moreover, petitioners point out that at verification BHP made no attempt to demonstrate that its actual quantity discounts were of the same magnitude as the reported "constructive" quantity discount. In addition, petitioners state that a respondent must also establish that it granted discounts to home market customers on a uniform basis, and that the evidence confirms that quantity discounts were not charged on a uniform basis, rather they varied based on quantity purchased, product type, and whether the product was painted.

Department's Position: We disagree with respondent. To be eligible for a quantity-based discount, a respondent must demonstrate a clear and direct correlation between price differences and quantities sold. (*See e.g., Brass Sheet and Strip From the Netherlands*, 53 FR 23,431, 33 (1988). Pursuant to 353.55(b)(1) of the Department's regulations, in order to receive this adjustment a respondent must establish that it gave quantity discounts of at least the same magnitude on 20 percent or more of its home market sales of such or similar merchandise. That is to say that the discount amounts submitted must be at least as large as the discounts granted on 20 percent or more of all home market sales of such or similar merchandise. If this test is met the Department applies a discount adjustment equal to the minimum discount given.

Regardless of the fact that the Department verified that BHP had granted quantity discounts on more than 20 percent of its home market sales, because BHP only provided the Department with an average discount amount, which it applied across the board to all home market sales it claimed received a quantity-based discount, the Department has no way of determining which of the actual discounts granted were at least as large as the average discount claimed by BHP.

The hypothetical example proffered by BHP illustrates its misreading of 353.55(b)(1). BHP points to the smallest discount of 10 percent in the hypothetical example and concludes that because the other discounts in the example were all higher, it *must* follow that its average "constructed" discount amount will always be of at least the same magnitude as the minimum discount. However, it is not the minimum discount that we are concerned with. In BHP's example the average discount, which is 17.5 percent, while at least as large as 10 and 15 percent, is not of the same magnitude as 20 and 25 percent. By definition, the *average* discount can never be at least as large as those discounts which are higher than the average.

While the Department can agree with BHP's argument that quantity discounts granted on more than 20 percent of its home market sales must be of at least the same magnitude as the minimum discount granted, we cannot determine what that minimum discount was from the "constructed" average submitted by BHP. Therefore, we cannot establish the proper amount of the claimed adjustment. Lastly, as petitioners correctly point out, the Department also requires that a respondent establish that it gave discounts on a uniform basis which were available to substantially all home market customers, which BHP failed to demonstrate. Therefore, the Department will disallow the adjustment for the purposes of the final results.

Comment 2: Respondent argues that for its preliminary results, the Department omitted certain home market sales of its prime merchandise. Respondent explains that it reported all of its prime sales (by PRIMEH='1' and by PRIMEH='3'), as well as its non-prime sales, which included seconds and downgraded merchandise (by PRIMEH='2').

However, the respondent notes that the Department included in the home market database only prime 1 sales ("WHERE PRIMEH='1'") and omitted prime 3 sales ("WHERE PRIMEH='3'"). Respondent claims that the reason it reported some of its prime as PRIMEH='3' was in response to a Department request that overruns be separately reported, but respondent asserts that in its normal course of business it does not distinguish between its prime product and prime overruns. Respondent claims that prime overruns are sold in the home market as prime surplus stock, and that standard customer agreements grant an option to buy both prime and prime surplus. Consequently, respondent argues that

the record establishes that products designated as PRIMEH='1' and PRIMEH='3' are prime products, and that the Department should correct the program to include sales of the latter even though they are overruns.

Petitioners argue that the Department correctly excluded overrun sales from the foreign market value calculation. Petitioners assert that it is Department practice to exclude overrun sales that are outside the ordinary course of trade. Petitioners contend that looking at the factors that the Department uses to determine whether overruns are sold in the ordinary course of business, sales of BHP's overruns are outside the ordinary course of trade. Petitioners argue that record evidence of differences in prices, profit margins, sales quantities, and sales practices between prime and overruns, all support their claim that these sales are outside the ordinary course of trade.

Department's Position: We agree with respondent. It is the Department's established practice to include home market sales of such or similar merchandise unless it can be established that such sales were not made in the ordinary course of trade. (*See e.g., Final Determination of Stainless Steel Angle From Japan*, 60 FR 16608, 16614–15 (1995)). Section 773(a)(1)(A) of the Act and section 353.46(a) of the Department's regulations provide that foreign market value shall be based on the price at which or similar merchandise is sold in the exporting country in the ordinary course of trade for home consumption. Section 771(15) of the Act defines ordinary course of trade as conditions and practices which, for a reasonable time prior to the exportation of the subject merchandise, have been normal in the trade with respect to merchandise of the same class or kind. (See, also section 353.46(b))

In looking at overruns in making this determination the Department typically examines several factors taken together, with no one factor dispositive. (*See e.g., Certain Welded Carbon Steel Standard Pipes and Tubes From India*, 56 FR 64753, 64755 (1991)). In this case, we examined: (a) whether the home market sales in question did, if fact, consist of production overruns; (b) whether differences in physical characteristics or different product uses existed between overruns and ordinary production; (c) whether the number of buyers of overruns in the home market and the sales volume and quantity (tonnage) of overruns were similar or dissimilar as compared to prime merchandise; and (d) whether the price and profit differentials between sales of overruns and ordinary production were dissimilar. In considering these factors as a whole, we found that sales of overrun corrosion-resistant steel were made in the ordinary course of trade.

Evidence indicates that home market sales of Prime3 were sales of overruns. There is no evidence on the record to indicate that there were any differences in product characteristics between prime merchandise and overruns. BHP's standard customer agreements provided an option to purchase either prime merchandise or overruns, which BHP label's as prime surplus, as they arise on their surplus stock list. (See Verification Exhibit BHP–9(b)) There is nothing in the record to indicate that overruns have different physical characteristics than prime merchandise or are used for different purposes. Record evidence establishes that the cost of producing prime and the cost of producing overruns is the same, and standard customer agreements do not distinguish between physical characteristics or product uses.

Also, the record reflects that there was a high number of buyers of overruns in relation to the number of buyers of prime merchandise sales and, in most instances, they were the same purchasers. In addition, in relation to the total quantity and volume of home market sales of prime merchandise, overruns accounted for a not insignificant percentage. With regard to pricing differences between prime merchandise and overruns, the record demonstrates that there were a variety of pricing differences. Several sales of overruns were at prices many times higher than prices for prime merchandise, several were sold at a substantial percentage of the price of prime merchandise, and some were sold at a small percentage of the price of prime. Record evidence indicates that the average profit margin on overruns was not insignificant, although the average profit margin on prime merchandise was much greater. All these factors when looked at in totality lead us to conclude that sales of 'PRIMEH=3' were sold in the ordinary course of trade, and we will for the final results include home market sales of overruns.

Comment 3: Respondent asserts that notwithstanding the paucity of sales found to be below cost, it provided the Department with information that demonstrates that it will recover costs on these few below cost sales within a reasonable period of time.

Respondent asserts that under the law and the Department's practice it is entitled to a finding of cost recovery. Respondent notes that the Court of International Trade (CIT) has stated that "[t]he issue * * * is not whether the record supports the conclusion that [the respondent] would be able to recover its costs at the prices charged during the investigatory period within a reasonable period of time in the normal course of trade, but whether there is substantial evidence on the record supporting Commerce's determination that [the respondent] could not recover its costs at these prices in such time period." *NSK Ltd.* v. *United States*, 809 F. Supp. 115 (CIT 1992) (quoting *Toho Titanium Co.* v. *United States*, 670 F. Supp. 1019, 1022 (CIT 1987)). Respondent further asserts that the CIT has stated that the Department must support its cost recovery conclusion with supporting calculations or analytical explanations, "using either the data already collected or, if necessary, by collecting further data" that cost recovery will not occur within a reasonable period time. *See Toho*, 670 F. Supp. at 1022.

Respondent states that it is aware that, in past cases, parties alleging cost recovery have not provided the Department with adequate data, but respondent argues that it provided detailed evidence of declining production costs and efficiency gains when it submitted information about APEX, a cost reduction program it undertook with the assistance of McKinsey Consultants and charts demonstrating cost reductions achieved over successive six month periods during the POR. This, coupled with the fact that so few sales were found by the Department to be below cost, respondent asserts is sufficient to shift the burden on the Department to demonstrate with substantial evidence that cost recovery did not occur.

Petitioners argue that respondent has the burden of proof to demonstrate that it will recover the costs of below cost sales within a reasonable period of time, a burden respondent has failed to meet. Petitioners argue that respondent failed to demonstrate that it could recover its costs at the model-specific below cost prices. Petitioners assert that respondent is required to demonstrate how any reduction in the future cost of production for the products sold below cost would translate into recovery of costs on those products for prior periods. (*NSK Ltd.* v. *United States* Slip-OP. 95–138 (CIT 1995)) Petitioners assert that while the determination of what constitutes a reasonable period of time is the Department's, respondent was also unable to identify and justify the period of time within which costs could be recovered and demonstrate that this was a reasonable period of time for cost recovery.

Department's Position: Section 773(b) of the Act provides that the Department will determine whether sales are made at less than the cost of producing the subject merchandise. If sales made below cost are not at prices which permit recovery of all costs within a reasonable period of time in the normal course of trade, such sales shall be disregarded in determining FMV. What must be demonstrated is that the prices which are below cost during the POR are at a level such that those prices would permit not only sufficient revenue to cover future costs, but also exceed future costs to a degree which permits recovery of past losses. (*See, e.g., Granular Polyethelrafluoroethylene Resin From Japan*, 58 FR 50343, 50346 (1993); *Timken Co.* v. *United States*, 673 F. Supp. 495, 516–17 (CIT 1987)) (Court holding that the term "prices" in section 773(b) refers only to prices of below cost sales and not to prices of above cost sales).

One situation recognized by Congress which might permit recovery of losses on below cost sales within a reasonable period of time is an industry, such as the airline industry, which incurs large research and development costs that cannot be immediately recovered by sales. (*See* S. Rep. No. 1298, 93rd Cong., 2d Sess. 173 (1974), reprinted in 1974 U.S. Code Cong. & Admin. News 7188, 7310; *Toho Tinanium Co.* v. *United States*, 670 F. Supp. 1091, 1021 (CIT 1987). The Department's practice also recognizes that extremely high production costs associated with an extraordinary event not required for the continuous production of the merchandise may be recoverable by future sales at the same prices within a reasonable period of time. (*See Porcelain-on-Steel Cooking Ware From Mexico*, 58 FR 32095, 32102 (1993)). The evidence placed on the record by respondent does not support any such finding.

BHP did submit evidence of the results of certain cost-cutting measures undertaken by the company during the POR which demonstrates that total operating costs did decline in that period. BHP points to this cost reduction as proof that it would be able to offset losses from below cost sales made during the POR using revenues from profitable, lower-cost sales made within a reasonable period of time thereafter. That is, if the company's cost of production declines in the future below the prices of below cost sales made during the POR, then those same sales prices may, in the future, allow recoupment of all costs and past losses.

Much of the information we relied on in analyzing respondent's claims is proprietary. (*See* Memo to the File, Cost Recovery (proprietary version) (February 28, 1996)). Although we found a general reduction in BHP's total operating costs, as well as a general increase in productivity and production volume, during the POR, the cost reductions and productivity/ production increases were not sustained and, in several instances, actually began to reverse direction during the POR. This, together with our finding that the prices of the below-cost sales during the POR were below *average* POR costs, leads us to conclude that the information provided by respondent regarding its cost reduction programs during the POR does not support it contention that the company's below-cost sales were at prices that would allow recovery of all costs within a reasonable period of time. Therefore, from a review of the record evidence, we conclude that BHP's below cost sales must be disregarded in calculating FMV.

Comment 4: Respondent argues that the Department should use BHP's reported interest rate to calculate inventory carrying costs and credit expenses. Respondent asserts that the intra-corporate interest rate it provided at verification is the Australian equivalent of the U.S. prime rate, and that the Federal Reserve Bank of Australia Bulletin (Bulletin) provided at verification reflects the short-term commercial interest rates (Large Business), which correspond to respondent's internal interest rates. Respondent notes that the Department in its analysis memorandum found "[t]hese rates were not substantially different from the related-party rates reported by BHP, however, it is not clear whether these rates represent short- or long-term rates." Respondent asserts that the rates listed under the Large Business column of the Bulletin are a set of rates "offered by four major Australian banks," and that rate is the Australian equivalent of the U.S. prime rate, which is a short-term rate by definition. Therefore, respondent contends that the Department should use the intra-corporate rate reported by BHP because this interest rate was not substantially different from the Large Business rate and these rates are short-term and market-driven.

Petitioners assert that there is no evidence on the record that the "Large Business" rate is the Australian equivalent of the U.S. prime rate, and that from this evidence the Department could not tell whether or not these rates represent long- or short-term rates. Furthermore, petitioners argue that it is Department practice not to accept an intra-corporate rate, since such a lending rate need not reflect commercial reality in the marketplace. Petitioners contend that the commercial bill rate selected by the Department is a permissible and reasonable Best Information Available (BIA) because it represents the interest rate for 90-day commercial lending in the home market.

Department's Position: We agree with petitioners . It is not the Department's practice to rely upon intra-corporate lending rates that are merely intra-company transfers of funds. (*See, e.g., Tapered Roller Bearing and Parts, Thereof, Finished and Unfinished from Japan*, 57 FR 4960, 71 (1992) (Comm. 32)). Additionally, even though BHP's intra-corporate rate was comparable to the Australian "Large Business" rate, BHP failed to provide evidence on the record to support its contention that the Australian "Large Business" rate is a short-term rate. Therefore, for the final results we will continue to use information on the record regarding the Australian quarterly rates for commercial bills (90 days) in effect during the POR as quoted in the OECD's "Main Economic Indicators" for May 1995.

Comment 5: Petitioners contend that respondent failed to report an unknown quantity of U.S. sales by its subsidiary BHP Steel Building Products (Building Products) of further manufactured merchandise made from Australian coils subject to review, and that BHP impermissibly reported only Building Products sales that Building Products could link to Australian coil tonnage entered during the POR. Petitioners assert that the Department requires that all ESP sales during the POR be reported, regardless of whether or not the subject merchandise (Australian coils) entered before suspension of liquidation.

In addition, petitioners contend that the Department verified that Building Products did not report all of its sales of subject merchandise sold during the POR, and that the Department's verification of the total sales *reported* did not address the (1) unreported sales of accessories, (2) intra-company transfers of coil tonnage, and (3) unaccounted for coil tonnage.

Petitioners claim that all sales made during the POR must be reported and point to *Industrial Belts from Italy*, 57 FR 8295, 8296 (1992 1st Review) and *Canned Pineapple Fruit from Thailand*, 60 FR 29553 (June 5, 1995) to support their position. In *Industrial Belts From Italy* petitioners assert that all sales, including sales from merchandise entered before the POR, were reported and used to ensure that there was no manipulation of the dumping margin.

However, petitioners argue that Building Products unilaterally decided which sales to report. Therefore, the Department should apply a BIA rate to all of Building Products unreported sales by applying the higher of (1) the "second-tier" margin under its AFBs 1992 partial BIA methodology, or (2) the highest non-aberrant margin in a given case.

Respondent asserts that petitioners incorrectly contend that respondent did not report sales made during the POR from tonnage sourced from Australia which was in Building Products inventory prior to the suspension of liquidation, *i.e.*, from coils entered before the POR. Respondent denies that it decided unilaterally not to report sales made during the POR which could not be linked to tonnage entered during the POR. In fact, respondent asserts that sales made from coils in beginning inventory (i.e., coils in inventory at the beginning of suspension of liquidation) constituted the bulk of Building Products reported sales during the POR. Respondent further asserts that all sales emanating from coils in beginning inventory were reported because respondent was unable to establish that these coils had, in fact, entered prior to the suspension of liquidation.

Respondent claims that it identified sales of subject merchandise (in coil form) in 2 ways; it made a list of all coils in Building Products inventory at the time of suspension of liquidation, which were termed beginning inventory, and a list of all coils shipped from Australia that entered during the POR, which were identified as liability coils. Respondent asserts that from both of these lists Building Products then tracked all coils as they moved through inventory and production and into a particular line item on an invoice, representing a sale of subject merchandise. Respondent argues that the Department verified the completeness of Building Products response, including its reporting of sales made from beginning inventory. Therefore, respondent argues that petitioner is completely wrong in claiming that respondent did not report all sales made from Australian coils, whether or not they entered prior to, or after, suspension of liquidation.

Additionally, respondent contends that Building Products not being able to account for all of the weight of the liability coils is not the result of respondent failing to report all sales from liability coil, as petitioners argue. Rather, this missing percentage merely reflects scrap and accessory sales made during the POR, as demonstrated by verification exhibits, and therefore no sales from liability coils were missing and not reported.

Moreover, respondent asserts that Building Products had no sales of accessories which could be identified as being of Australian origin. Respondent claims that accessory sales are, like scrap, a percentage of coil used, and that verification exhibits demonstrate that the percentage of coil weight for accessories approximates that attributable to scrap. Respondent asserts that when a coil is roll-formed, portions are lost in the process. This scrap is then collected and placed in a bin and from this point on the scrap's origin cannot be identified. Respondent contends that, as with scrap, when a small portion of a coil is subsequently converted into an accessory item, the origin of the accessory can no longer be identified. Therefore, Building Products was unable to identify accessory sales made from Australian coil.

Department's Position: Except with regard to accessories, we agree with the respondent that it properly reported all sales made during the POR. At verification, we confirmed Building Products total sales universe of its reported sales to the first unrelated party during the POR. Our review established that Building Products properly linked all the ESP sales of further-manufactured goods to coils of subject merchandise from both beginning inventory and from liability coils, which included inter-company transfers of Australian tonnage. Additionally, we verified respondents method for ascertaining how further manufactured goods were produced from Australian subject coil and how respondents accounted for and sold the merchandise to the first unrelated party. We found this methodology accurately tracked all further manufactured sales (*See Building Products Verification Report*, May 19, 1995 and Sales Trace Exhibits BP53–BP61). We traced the subject coil from each sourced point to Building Products records (*See* verification Exhibits BP–22 through BP30(a)). In addition, we traced the linkage establishing total tonnage shipped from Sheet and Coil Products Division (SCPD) to Building Products (*See* verification Exhibits BHP–27 through BHP28), and found that Building Products has reported all of its sales from Australian sourced tonnage.

In *Industrial Belts From Italy* the Department indicated that it would presume that all ESP sales of subject merchandise made during the POR were from subject merchandise entered after the date of suspension of liquidation and thus subject to antidumping duties, unless the respondent could affirmatively demonstrate that particular subject merchandise sold during the POR was entered prior to the POR. As in *Industrial Belts from Italy*, because Building Products was unable to link any sales with subject merchandise (coil tonnage) that entered the U.S. prior to the date of suspension of liquidation (February 4, 1993), all sales during the POR of merchandise made from Australian coils were reported by respondent. Therefore, we have included all sales made during the POR in our margin calculation. The Department accepts that it was impossible for Building Products to link sales of accessories, which only account for an insignificant portion of total sales, to particular coils of Australian origin. However, sales of accessories cannot properly be excluded. Therefore, the Department has treated all accessories as sales made from Australian-origin coil and has assigned to those sales the weighted-average margin based on all other sales made during the POR. (*See e.g., AFBs From Germany*, 54 FR 18,992, 19,033 (1989); *National Steel* v. *United States*, 870 F. Supp. 857 (1994)).

Comment 6: Respondent states that while, in the preliminary results, the Department denied BHP's claim for a cash (settlement) discount in the home market, the Department requested updated information for payment and shipment dates from BHP after the preliminary results were issued. Pursuant to the Department's instructions, on September 7, 1995, BHP submitted a computer tape containing updated payment and shipment dates. Therefore, respondent asserts that the Department should allow the cash (settlement) discounts adjustment reported for those sales in the final results.

Petitioners argue that the Department correctly denied the reported cash discounts for sales for which respondent had not originally reported a date of payment. Although respondent has since provided shipment and payment dates for these sales, petitioners argue that the Department has not verified these dates and the estimated cash discount amounts reported by respondent. Additionally, petitioners assert that some of these sales with a certain term of payment were found at verification by the Department to have been misreported and thus unverified. Therefore, the Department should not deduct the estimated cash discounts amounts on any of these sales.

Petitioners also contend that in the preliminary results, the Department deducted a cash discount with regard to a particular customer on certain home market sales even though the

Department verified that no discount was given. Therefore, the Department must deny cash discounts claimed on these particular home market sales to this customer.

In rebuttal respondent notes that while it originally reported cash discounts on certain sales to this particular customer even though it did not actually grant the discounts, it deleted these cash discounts from the revised data BHP submitted after the preliminary results were published. Respondent also notes that this customer failed the arms-length test so the sales were excluded from the calculation of BHP's fair market value in any event.

Department's Position: We agree with respondent. In the Department's preliminary results, we stated that we would request the updated shipment and payment date information from BHP after the preliminary results were issued. The Department has analyzed the information BHP submitted on September 7, 1995, and found the information to be consistent with the verified information (See, BHP's Verification Report dated May 23, 1995, p. 17). Therefore, for the final results the Department will use the updated shipment and payment date information.

With regard to a cash discount granted at the preliminary results to a customer who was not eligible to receive a discount, we agree with respondent that this customer, which did not actually receive the discount, failed the arms-length test. Therefore, the Department is excluding its sales from the Department's margin calculation program.

Comment 7: Petitioners allege that because BHP failed to use a proper U.S. interest rate in the calculation of credit expenses and inventory carrying costs, in the preliminary results the Department was forced to use a BIA rate of 3.44 percent, which was the average of the *Federal Reserve Statistical Release* one month commercial paper rates. However, petitioners state that the Department should use the home market short-term interest as a BIA rate because respondent had no U.S. borrowings and did not show it had access to U.S. borrowing. Therefore, in keeping with the Department's practice and the holdings of review courts, the use of a U.S. interest rate to calculate U.S. credit expense and inventory carrying costs is not appropriate. (*See, Gray Portland Cement and Clinker From Japan,* 60 FR 43761, 67 (1995)) Additionally, petitioners argue that the BIA rate applied by the Department in the preliminary results was not sufficiently adverse. Therefore, the Department should use the short-term interest rate BHP obtained when borrowing in the home market when calculating U.S. credit expense and inventory carrying costs.

Respondent asserts that it has not advocated use of its home market interest rate as a surrogate for the U.S. interest rate, as claimed by petitioners. Respondent contends that the petitioners are incorrect in claiming that it is the Department's practice to rely upon actual home market interest rates when a respondent has no U.S. dollar borrowings and provides no proof that it had access to U.S. borrowings. Rather, respondent asserts that the Department will now look to external information to determine an appropriate interest rate even in the absence of proof of access. (*See, Brass Sheet and Strip From Germany,* 60 FR 38542, 38545 (1995)) Moreover, respondent argues that, in any event, it provided evidence that it had access to U.S. borrowings.

Department's Position: When a respondent has no U.S. borrowings, it is no longer the Department's practice to substitute home market interest rates when calculating U.S. credit expense and U.S. inventory carrying costs. Rather, the Department will now match the interest rate used for credit expenses to the currency in which the sales are denominated. The Department will use the actual borrowing rates obtained by a respondent, either directly, or through related affiliates. Where there is no borrowing in a particular currency, the Department may use external information about the cost of borrowing in that currency. (*See Brass Sheet and Strip From Germany* 60 FR at 38545,46 (1995)) Because respondent did not supply the Department with an actual U.S. borrowing rate, for the preliminary results, we turned to external information and applied the average of the *Federal Reserve Statistical Release* one-month commercial paper rates in effect during the POR to calculate U.S. credit expenses and inventory carrying costs.

For the final results, we have reconsidered our use of the commercial paper rate. BHP provided no evidence that it would have had access to commercial paper rates in the United States during the POR. To show access to a U.S. rate, BHP provided the Department a letter from a U.S. bank stating the prime and LIBOR rates in effect during the POR. (*See* Verification Exhibit BT–32) However, this document does not state that this bank would have lent funds at/above/below these rates had BHP sought to borrow funds during the POR. This document also does not speak to the availability of commercial paper rates.

In the absence of U.S. dollar borrowings, we need to arrive at a reasonable surrogate for imputing U.S. credit expense. There are many and varied factors that determine at what rate a firm can borrow funds, such as the size of the firm, its creditworthiness, and its relationship with the lending bank. Without actual U.S. dollar borrowings and without substantial evidence on the record indicating what rates a firm is likely to have received if it had borrowed dollars, it is impossible to predict the rate at which a company would have borrowed dollars. Therefore, we chose the average short-term lending rate as calculated by the Federal Reserve. Each quarter the Federal Reserve collects data on loans made during the first full week of the mid-month of each quarter by sampling 340 commercial banks of all sizes. The sample data are used to estimate the terms of loans extended during that week at all insured commercial banks. This rate represents a reasonable surrogate for an actual dollar interest rate because it is calculated based on actual loans to a variety of actual customers.

For these reasons, we have recalculated BHP's imputed U.S. credit expense based on the average lending rate during the POR, as published by the Federal Reserve. (*See* the Final Analysis Memorandum for this review, which is on file in room B–099 of the main building of the Commerce Department)

Comment 8: Petitioners state that in the preliminary results the Department erred when it used gross unit price in calculating home market inventory carrying costs, but used average cost of manufacture (TCOMU) when it calculated U.S. inventory carrying costs. Petitioners state it is not the Department's practice to calculate inventory carrying cost based on cost in the U.S. market and price in the home market. Petitioners state inventory carrying costs should be compared on a fair apples-to-apples basis based on cost of the merchandise in both markets. In addition, petitioners note that the Department erred in calculating U.S. inventory carrying costs by averaging the cost of the merchandise rather than using the actual product-specific costs, because it is the Department's practice to use actual product-specific costs. Therefore, petitioners argue that the Department should recalculate inventory carrying cost based on total cost of manufacture in both markets.

Respondent states that the Department did not calculate U.S. inventory carrying costs based on prices, but based on average costs. Respondent notes that BHP submitted data in its responses pursuant to that methodology and the data was verified by the Department. Respondent also states that while gross price does appear in the Department's program with respect to inventory carrying cost, it is used (to no effect) only to "convert" BHP's inventory carrying expense, not to calculate it. Respondent argues that no change is required in the program because the Department did not calculate inventory carrying cost based upon home market gross unit price.

Department's Position: We agree with petitioners. Contrary to the respondent's claim, in the preliminary results the Department erred in relying upon home market prices in calculating home market carrying costs, while calculating U.S. inventory carrying costs based on the cost of manufacture. It is the Department's practice to calculate inventory carrying costs based on costs of the merchandise in both markets (*See Canned Pineapple Fruit from Thailand,* 60 Fed. Reg. 29553 (June 5, 1995)). Moreover, it is our practice to base the calculation on product-specific rather than average costs (*See, Television Receivers, Monochrome and Color From Japan,* 56 FR 38417, 423 (1991)). Therefore, for the final results the Department will calculate inventory carrying costs based on the product-specific costs of the merchandise in both markets.

Comment 9: Petitioners state that in the preliminary results the Department incorrectly included pre-sale transportation expenses from the U.S. port to the warehousing and manufacturing operations of BHP Coated Steel Corporation (Coated) and Building Products as indirect selling expenses. Petitioners state that on those ESP sales that are further manufactured, the questionnaire and Department practice require that these transportation costs be included in the cost of further manufacture. On ESP sales that are not further manufactured, Section 772(d)(2)(A) of the Act clearly instructs the Department to treat theses expenses as direct expenses. Accordingly, petitioners argue that on these sales by Coated and Building Products the pre-sale freight should be deducted as a cost of manufacture or direct expense.

Department's Position: Section 772(d)(2)(A) requires that the Department deduct from USP all movement expenses incurred in bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States, regardless of whether sales of the merchandise are purchase price or ESP transactions. The Department does not treat these movement expenses as selling expenses, either direct or indirect, such as are incurred pursuant to section 772(e)(2). (*See e.g. Television Receivers, Monochrome and Color, From Japan,* 56 FR 37,078 (1991)); and *Sharp Corporation* v. *United States,* 63 F. 3d 1092 (August 1995)(upholding the Department's practice of distinguishing U.S. movement expenses from U.S. selling expenses and of limiting the ESP offset cap in adjusting FMV to the indirect selling expenses incurred in the U.S. that are deducted under 772(e)(2).) Therefore, for the final results, the Department will deduct pre-sale transportation expenses from these ESP sales that were not further manufactured. We note that for expenses for the movement of the imported product to the place of further manufacture prior to sale will be deducted as part of the cost of further manufacture (*See e.g., Stainless Steel Hollow Products From Sweden,* 59 FR 43810, 43813 (1994)).

Comment 10: Petitioners state that in the preliminary results the Department incorrectly included as indirect selling expenses slitting and painting costs that BHP Trading, Inc. (Trading) paid to unrelated parties for certain sales. Petitioners state that because these costs are directly identified with specific sales these expenses must be deducted from USP under section 772(d)(2)(A).

Department's Position: Section 772 (e)(3), which states that the exporter's sales price will be reduced by "any increased value, including additional material and labor, resulting from a process of manufacture or assembly performed on the imported merchandise after the importation of the merchandise and before its sale to a person who is not the exporter of the merchandise," applies here. Pursuant to that provision, for the final results, the Department will correct the margin calculation program and will deduct from ESP Trading's further processing expenses including slitting and painting costs. For a full discussion of how we arrived at the total cost of manufacturing of these further manufactured sales, see the Final Analysis Memorandum for this review, which is on file in room B–099 of the main building of the Commerce Department.

Comment 11: For the preliminary results, petitioners state that the Department had to recalculate U.S. credit expenses because BHP's inaccurate reporting of payment and shipment dates caused the Department's margin computer program to calculate incorrect credit amounts on thousands of sales. Petitioners state that the miscalculation was caused by BHP reporting a zero in the payment date field for sales by Building Products, and the reporting of obviously incorrect shipment dates between June 1995 and December 1999 on sales by Building Products. Petitioners argue that for the final results the Department should follow its standard practice of using as BIA the highest credit cost calculated on any U.S. sale by Building Products which has a zero entered as the payment date, or an incorrect shipment date (*See, Calcium Aluminate Cement and Cement Clinker From France,* 58 FR 58683, 58684 (1993)).

Respondent agrees that certain missing Building Products payment dates or incorrect shipping dates on its computer tape should be corrected. However, respondent contends that standard Department practice is to replace the missing or incorrect data with the weighted-average credit cost for U.S. sales and cites to *Stainless Steel Threaded Pipe Fittings From Taiwan,* 59 FR 10784, 10786 (1994) in support. Respondent argues that a large number of Building Products transactions had correctly reported credit expenses which BHP states supports the accuracy and reliability of a weighted average. Respondent argues that using the highest credit expense as petitioners call for would result in a credit expense that will go beyond the highest non-aberrant rate and, therefore, would not be appropriate. Respondent argues that if the Department chooses to use BIA, it should use the partial BIA practice outlined in *Anti-Friction Roller Bearings From France,* 57 FR 28360, 28379 (1992).

Department's Position: Before the Department may find non-compliance on the part of a respondent, there must be a clear and adequate communication requesting information. *See e.g., Daewoo Elecs. Col* v. *United States,* 712 F. Supp 931, 945 (1985). BHP failed to provide credit expense data for certain sales in Building Products database even though the Department provided numerous opportunities to Building Products to correct its credit expense (*See* Supplemental Questionnaires dated December 27, 1994 and February 10, 1995).

The Department applies two types of BIA, partial BIA, which is used when a respondent's submission is deficient in limited respects, but is otherwise complete and reliable; and total BIA, which is used for a respondent who fails to timely respond or whose submission contains fundamental errors that render the entire submission unreliable. The

use of partial rather than total BIA reflects the fact that, in general, the respondent has been cooperative. Thus, it is the nature of the deficiency, rather than the level of cooperation that the Department considers in exercising its discretion to select partial BIA. *See e.g., Steel Flat Products From France,* 58 FR at 37,129 (1993) (applying highest margin to certain sales of cooperative respondent); *Ad Hoc Committee* v. *United States,* 865 F. Supp. 857 (1994). In this review, because respondent failed to provide a substantial portion of the total credit expense data in its possession, we have used the highest credit cost calculated on any U.S. sales (*See e.g., Antifriction Bearings (other Than Tapered Roller Bearings) and Parts Thereof From France,* 60 FR 10900, 10907 (1995) "*AFBs*") (*See e.g., Calcium Aluminate Cement and Cement Clinker From France,* 58 FR 58683, 58684 (1993)).

Comment 12: Petitioners contend that the Department must deduct antidumping duties paid by the respondent or related party importers. Section 1677a(d)(1994) states that the purchase price and exporter's sales price shall be reduced by United States import duties. According to the petitioners antidumping duties are "incident to bringing the subject merchandise from the place of shipment in the country of exportation to the place of delivery in the United States" and are therefore properly classified as import duties. Furthermore, petitioners claim "duties" or "import duties" in trade laws are to be read as antidumping or countervailing duties unless the provision specifically indicates otherwise.

Petitioners claim that the CIT has never explicitly held that section 1677 (c)(2)(A) covers actual antidumping duties in addition to normal import duties, but argue that the court implicitly so held in *Federal-Mogul* v. *United States,* 813 F. Supp. 856,872 (1993). Petitioners claim that the court distinguished actual antidumping duties from estimated antidumping duties, which they point to as support for the notion the actual antidumping duties are part of the normal import duties to be deducted under section 1677a(d)(2)(A). Lastly, petitioners claim that language in the legislative history of the newly enacted Uruguay Round Agreements Act (URAA) which states that duty absorption is not intended to provide for the treatment of antidumping duties as cost does not mean that under the new law antidumping duties cannot be treated as normal duties, that is, as cost.

Respondent argues that the Department's well-established practice of not deducting duty as a cost is not only required by law but this issue is also pending on appeal at the Court of International Trade. Therefore, respondent asserts it would be inappropriate for the Department to reverse its practice in this investigation without prior notice or comment.

Department's Position: While section 772(d)(2)(A) requires the deduction of normal "import duties," cash deposits of estimated antidumping duties are not normal import duties, and do not qualify for deduction under section 772. Contrary to petitioners" argument, the CIT in *Federal-Mogul* v. *United States* 813 F. Supp. 856, 872 (CIT 1993), recognized that the actual amounts of normal duties to be assessed upon liquidation are known because they are based upon rates published in the Harmonized Tariff Schedule and the actual entered value of the merchandise. In contrast, deposits of estimated antidumping duties are based upon past dumping margins and may bear little relation to the actual current dumping margin. Thus, the CIT recognized the distinction between estimated antidumping duties and "normal" import duties for purposes of section 772(d)(2(A).

Petitioners' methodology also conflicts with the holding of the CIT in *PQ Corp.* v. *United States,* 652 F. Supp 724 (CIT 1987), in which the court addressed the issue of deduction of estimated antidumping duties under section 772(d)(2)(A). The court cited with approval the Department's policy of not allowing estimated antidumping duties, based upon past margins, to alter the calculation of present margins. The court explained "[i]f deposits of estimated antidumping duties entered into the calculation of present dumping margins, then those deposits would work to open up a margin where none otherwise exists." *Id.* At 737.

Petitioners argue at length that the Department should not distinguish between purchase price and ESP transactions in deducting antidumping duties. However, because the Department does not deduct estimated antidumping duties from any transaction, this argument is inapposite.

The Department agrees with petitioners that statements made in the URAA are not relevant in this review, which is being conducted under pre-URAA law.

Comment 13: Petitioners state that the Department's calculation of Total Cost of Manufacture (TOTCOM) and Total Cost of Production (TOTCOP) is incorrect as a result of a clerical error and affects the cost test and the allocation of profit.

Respondent agrees with petitioners that certain clerical errors were made regarding TOTCOM. Respondent also claims that the Department made an error in calculating BHP's general and administrative expense.

Department's Position: We agree with petitioners. For the final results, the Department will correct the calculation of TOTCOM, thereby correcting the calculation of TOTCOP in section 1 of the margin calculation program. In addition, we agree with respondent and the Department will correct its error in calculating BHP's general and administrative expense.

Comment 14: Petitioners state that the definition of TOTCOP inadvertently omits the packing costs incurred at SCPD on sales shipped to BHP's steel service centers throughout Australia. Respondent agrees with petitioners.

Department's Position: We agree. For the final results, the Department will incorporate packing costs incurred at SCPD into its calculation of TOTCOP in section 1 of the margin calculation program.

Comment 15: Petitioners note that Building Products and Trading reported the quantities of their sales in terms of short tons, while Coated claimed that it reported its sales in pounds. Petitioners state that the Department attempted to place all U.S. sales on the same weight basis by dividing Coated's reported weight by 2000 (lbs/ton). However, petitioners allege the Department mistakenly applied the computer code to Trading's sales instead of Coated's sales. In addition, petitioners state that Coated appears to have actually reported its quantities in short tons, not in pounds.

Department's Position: We agree. Coated did report its sales on a short ton basis. Therefore, we will correct our error in the margin calculation program because there is no need to adjust Coated's sales to place all U.S. sales on the same weight basis.

Comment 16: Petitioners state that the Department must put the home market COP and the U.S. further manufacturing costs on the same weight basis in order to arrive at an accurate allocation of profit on further manufactured sales. Petitioners note that BHP reported home market cost on a metric ton basis, while U.S. further manufacturing costs were reported on a per short ton basis.

Department's Position: We agree. For the final results, the Department will convert U.S. further manufacturing costs to a metric ton basis when calculating further manufacturing costs.

Comment 17: Petitioners state that the Department incorrectly multiplied the U.S. warranty expenses by the exchange rate on Trading's U.S. sales twice.

Department's Position: We agree. For the final results, the Department will correct the margin calculation program.

Comment 18: Petitioners state that the Department mistakenly added three incorrect programming lines to its standard margin calculation program which is simply a ministerial error. However, petitioners note that the middle line should be kept and inserted at different places in the program.

Respondent asserts that the Department's apportionment of U.S. selling expenses to U.S. sales in the computer lines in question are correct. However, to avoid double-counting U.S. selling expenses, direct and indirect, it is necessary to apply a ratio which counts only the expenses which have not already been deducted as U.S. further manufacturing G&A costs.

Department's Position: We agree with petitioners that the Department in its preliminary results inadvertently included this language in its computer program. However, we disagree with the petitioners that the Department should keep the middle line in order to properly calculate the home market indirect selling expense cap. For the final results, the Department will drop these three lines from its computer program. The program as written applies a ratio of U.S. selling (direct and indirect) expenses, where appropriate, to the ESP cap and offset section of our programming. The program will not be double-counting thoses U.S. selling expenses which BHP reported for ESP transactions with further manufacturing costs. For a full discussion of how we treated these specific programming changes in this review, see the Final Analysis Memorandum for this review, which is on file in room B–099 of the main building of the Commerce Department.

Comment 19: Petitioners state that the U.S. packing costs for all further manufactured sales are reported in U.S. dollars per short ton. However, the program incorrectly multiplies these U.S. dollar amounts by the exchange rate in calculating Foreign Unit Price in Dollars (FUPDOL).

Department's Position: We agree. For the final results, the Department will correct section 2 of the margin calculation program and will not multiply the U.S. packing costs by the exchange rate when calculating FUPDOL.

Comment 20: Petitioners state that in the preliminary results the Department applied BIA to sales from Building Products that had missing customer codes and customer level of trade information. Petitioners argue that the Department should apply the higher of either the margin from the investigation, or highest non-aberrant margin to these sales.

Department's Position: For certain sales, Building Products did not report customer level of trade and customer code in its database. Therefore, we were unable to match these sales to the home market database in the preliminary results, and we applied the final weighted-average margin from the less than fair value (LTFV) investigation as BIA. However, for the final results, in accordance with *AFBs* and Department practice we are using the highest weighted-average margin from this review for these sales.

Final Results of Review

As a result of this review, we have determined that the following margin exists for the period February 2, 1993, through July 31, 1994:

Manufacturer/Exporter	Margin (percent)
BHP	39.11

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. The Department shall issue appraisement instructions directly to the Customs Service.

Furthermore, the following deposit requirements shall be effective, upon publication of this notice of final results of administrative review, for all shipments of the subject merchandise from Australia that are entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(1) of the Tariff Act: (1) the cash deposit rate for BHP will be the rate established above; (2) for previously investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, or the original investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 24.96 percent, the all others rate established in the final results of the less than fair value investigation (58 FR 44161, August 19, 1993).

The deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with section 353.34(d) of the Department's regulations. Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulation and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: March 20, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

[FR Doc. 96–7615 Filed 3–28–96; 8:45 am]

BILLING CODE 3510–DS–P

[A–570–842]

Notice of Final Determination of Sales at Less Than Fair Value; Polyvinyl Alcohol From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Everett Kelly or David J. Goldberger, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–4194 or (202) 482–4136, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act)

by the Uruguay Rounds Agreements Act (URAA).

Final Determination

As explained in the memoranda from the Assistant Secretary for Import Administration dated November 22, 1995, and January 11, 1996, the Department of Commerce (the Department) has exercised its discretion to toll all deadlines for the duration of the partial shutdowns of the Federal Government from November 15 through November 21, 1995, and December 16, 1995, through January 6, 1996. Thus, the deadline for the final determination in this investigation has been extended by 28 days, i.e., one day for each day (or partial day) the Department was closed. As such, the deadline for this final determination is no later than March 21, 1996.

We determine that polyvinyl alcohol (PVA) from the People's Republic of China (PRC) is being sold in the United States at less than fair value (LTFV), as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the preliminary determination on October 2, 1995 (60 FR 52647, October 10, 1995), the following events have occurred:

On October 13 and 17, 1995, Guangxi GITIC Import and Export Corporation (Guangxi), Guangxi Vinylon Plant (Guangxi Vinylon) and Sinopec Sichuan Vinylon Works (Sichuan), respectively, requested a postponement of the final determination pursuant to 19 CFR 353.20. The Department has determined that such requests contain an implied request to extend the provisional measures period, during which liquidation is suspended, to six months (*see Extension of Provisional Measures* memorandum dated February 7, 1996). Accordingly, on October 19, 1995, the Department postponed the final determination until February 22, 1996. (*Postponement of Final Antidumping Duty Determinations: Polyvinyl Alcohol from Japan, Taiwan, and the People's Republic of China* 60 FR 54667, October 25, 1995).

On November 3, 1995, Isolyser Co., Inc. (Isolyser), an importer of the subject merchandise, entered an appearance in this investigation, and submitted a request for clarification to the scope of this investigation, to exclude PVA fiber.

On November 20, 1995, in response to concerns of Isolyser, petitioner clarified that the scope does not include polyvinyl alcohol fiber.

In October and November, we verified the respondents' questionnaire responses. Additional publicly available published information (PAPI) on surrogate values was submitted by petitioner and respondents on January 19, 1996. Petitioner, respondents, and Isolyser submitted case briefs on January 30, 1996. Petitioner and respondents filed rebuttal briefs on February 6, 1996. A public hearing was held on February 14, 1996.

Scope of Investigation

The merchandise under investigation is polyvinyl alcohol. Polyvinyl alcohol is a dry, white to cream-colored, water-soluble synthetic polymer. Excluded from this investigation are polyvinyl alcohols covalently bonded with acetoacetylate, carboxylic acid, or sulfonic acid uniformly present on all polymer chains in a concentration equal to or greater than two mole percent, and polyvinyl alcohols covalently bonded with silane uniformly present on all polymer chains in a concentration equal to or greater than one-tenth of one mole percent. Polyvinyl alcohol in fiber form is not included in the scope of this investigation.

The merchandise under investigation is currently classifiable under subheading 3905.30.00 of the *Harmonized Tariff Schedule of the United States* (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.

Period of Investigation

The period of investigation is October 1, 1994, through March 31, 1995.

Separate Rates

As stated in our preliminary determination, the PRC is a non-market economy (NME). Each of the responding PRC exporters, Sichuan and Guangxi, has requested a separate, company-specific rate. According to both respondents' business licenses, each is "owned by all the people". As stated in the *Final Determination of Sales at Less than Fair Value: Silicon Carbide from the People's Republic of China* 59 FR 22585, (May 2, 1994) (*Silicon Carbide*), and the *Final Determination of Sales at Less than Fair Value: Furfuryl Alcohol from the People's Republic of China* 60 FR 22545 (May 8, 1995) (*Furfuryl Alcohol*), ownership of a company by all the people does not, in itself, require the application of a single PRC-wide rate. Accordingly, both respondents are eligible for consideration for a separate rate.

To establish whether a firm is sufficiently independent from government control to be entitled to a separate rate, the Department analyzes each exporting entity under a test arising out of the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China* 56 FR 20588 (May 6, 1991) (*Sparklers*) and amplified in *Silicon Carbide*. Under the separate rates criteria, the Department assigns separate rates in nonmarket economy cases only if respondents can demonstrate the absence of both *de jure* and *de facto* governmental control over export activities.

1. Absence of De Jure Control

The respondents have placed on the administrative record a number of documents to demonstrate absence of *de jure* control, including laws, regulations and provisions enacted by the State Council of the central government of the PRC. Respondents have also submitted documents which establish that PVA is not included on the list of products that may be subject to central government export constraints (*Export Provisions*). The Department has reviewed these and other enactments in prior cases and has previously determined that these laws indicate that the responsibility for managing state-owned enterprises has been shifted from the government to the enterprise itself (See *Silicon Carbide* and *Furfuryl Alcohol*).

However, as stated in previous cases, there is some evidence that the PRC central government enactments have not been implemented uniformly among different sectors and/or jurisdictions in the PRC (See *Silicon Carbide* and *Furfuryl Alcohol*). Therefore, the Department has determined that an analysis of *de facto* control is critical in determining whether respondents are, in fact, subject to a degree of governmental control which would preclude the Department from assigning separate rates.

2. Absence of De Facto Control

The Department typically considers four factors in evaluating whether each respondent is subject to *de facto* governmental control of its export functions: (1) whether the export prices are set by or subject to the approval of a governmental authority; (2) whether the respondent has authority to negotiate and sign contracts and other agreements; (3) whether the respondent has autonomy from the government in making decisions regarding the selection of management; and (4) whether the respondent retains the proceeds of its export sales and makes independent decisions regarding

disposition of profits or financing of losses (*see Silicon Carbide* and *Furfuryl Alcohol*).

Each respondent has asserted the following: (1) it establishes its own export prices; (2) it negotiates contracts, without guidance from any governmental entities or organizations; (3) it makes its own personnel decisions; and (4) it retains the proceeds of its export sales, uses profits according to its business needs and has the authority to sell its assets and to obtain loans. In addition, respondents' questionnaire responses indicate that company-specific pricing during the POI does not suggest coordination among exporters. During verification proceedings, Department officials viewed such evidence as sales documents, company correspondence, and bank statements. This information supports a finding that there is a *de facto* absence of governmental control of export functions. Consequently, we have determined that Sichuan and Guangxi have met the criteria for the application of separate rates (*see*, also Comment 1 under *Interested Party Comments* section below).

Fair Value Comparisons

To determine whether sales of PVA from the PRC to the United States by Guangxi and Sichuan were made at less than fair value, we compared Export Price (EP) to the Normal Value (NV), as specified in the "Export Price" and "Normal Value" sections of this notice.

Export Price

For both Guangxi and Sichuan, we calculated EP in accordance with section 772(a) of the Act, because the subject merchandise was sold directly to the first unaffiliated purchaser in the United States prior to importation and because constructed export price under section 772(b) is not otherwise warranted on the basis of the facts of this investigation.

Petitioner has claimed that certain U.S. customers of the respondents are affiliated with respondents, pursuant to section 771(33) of the Act, through common PRC government control. However, there is no information on the record that supports the claim that the U.S. customers are affiliated with the PRC government. Further, respondents have been deemed free of government control. Therefore, we find no basis to consider these customers as affiliated with respondents.

We calculated EP based on packed, FOB PRC port or CIF U.S. port prices to unaffiliated purchasers in the United States, as appropriate, based on the same methodologies in the preliminary determination with the following exceptions:

We excluded all U.S. sales by Sichuan and Guangxi that were reported as having been made through third country resellers, as we determined that, at the time of sale, respondents were unaware of the final destination of the subject merchandise (*see* Comment 6). For Guangxi, we valued ocean freight based on the actual price paid for this expense, as we determined at verification that Guangxi used market economy carriers and paid with market economy currencies. We also included in the final determination a sale by Guangxi that was excluded from our preliminary determination, because we verified that this sale was, in fact, made during the POI.

Normal Value

As in our preliminary determination, we are relying on India as the surrogate country in accordance with section 773(c)(4) of the Act. Accordingly, we have continued to calculate normal value (NV) using Indian prices for the PRC producers' factors of production. We have obtained and relied on published, publicly-available information wherever possible.

In accordance with section 773(c) of the Act, we calculated NV based on factors of production reported by Sichuan, and by Guangxi Vinylon, which produced the PVA for Guangxi. To calculate NV, the reported unit factor quantities were multiplied by Indian values. Except as noted below, we applied surrogate values to the factors of production in the same manner as in our preliminary determination. For a complete discussion of surrogate values, *see Valuation Memorandum*, dated March 21, 1996. We then added amounts for overhead, general expenses (including interest) and profit, based on the experience of two Indian PVA producers (*see* also Comment 3), and packing expenses.

For both Sichuan and Guangxi, we have corrected the affected factors of consumption to reflect verification results. For Sichuan, these revisions include changes to PVA production stage based on actual PVA production levels, rather than the standards of the industry, (*see* Comment 8), and changes to the acetic acid consumption factors to net out regained acetic acid. For Guangxi, we revised calcium carbide factors to reflect actual rather than standard consumption (*see* Comment 7).

All-Others Rate

The Department requested the PRC Ministry of Foreign Trade and Economic Corporation (MOFTEC) to identify all exporters of subject merchandise. MOFTEC identified two PRC companies as the only known PRC exporters of PVA to the United States during the POI. Both of these identified exporters have responded in this investigation, and both were found to meet the criteria for application of separate rates. We compared the respondents' sales data with U.S. import statistics for time periods including the POI, and found no indication of unreported sales, with the possible exception of re-sales made by a third country reseller. This reseller was not investigated as a respondent in this proceeding because it was not identified as a potential respondent until after the preliminary determination. All known PRC exporters responded to our questionnaires and qualified for separate rates. We have no evidence that there are any other PRC exporters that may be subject to common government control. Therefore, we have not calculated a PRC-Wide rate in this investigation. We have calculated an all-others rate in accordance with section 735 (c)(5) of the Act.

Verification

As provided in section 776(b) of the Act, we verified the information submitted by respondents for use in our final determination. We used standard verification procedures, including examination of relevant accounting and production records and original source documents provided by respondents.

Interested Party Comments

Comment 1: Separate Rate for Sichuan Vinylon

Petitioner states that Sichuan did not demonstrate the absence of *de jure* or *de facto* governmental control and thus should not be granted a separate rate. Petitioner claims the Department found evidence at verification to indicate a relationship between Sichuan and China National Petrochemical Corporation (Sinopec), which petitioner identifies as a state-owned petroleum company. According to the petitioner, as Sichuan is a subsidiary of Sinopec, the Department's analysis of *de jure* and *de facto* governmental control should have been at the Sinopec level. Further, petitioner contends that Sichuan's questionnaire response should be considered incomplete and incorrect, since it did not disclose its business relationship with Sinopec. Therefore, petitioner asserts that the Department should rely on the facts available for calculating a margin for Sichuan, Sinopec and all other PRC entities except Guangxi.

Sichuan argues that, at the outset of this investigation, it fully disclosed its past relationship with Sinopec. Sichuan argues that, under recent PRC law, Sichuan is an independent legal person with its own management and is not related to any level of government or to Sinopec. Additionally, Sichuan states that, in past cases, the Department recognized the 1988 laws and the 1992 regulations as sufficient evidence of the absence of *de jure* government control. Further, Sichuan asserts that verification revealed no evidence of affiliation with Sinopec or *de facto* governmental control. Additionally, Sichuan contends that the name Sinopec is attached to Sichuan Vinylon Works only as a trademark used for international business recognition, a practice used by other PRC companies, and not as an indication of a continued business relationship.

DOC Position

We have calculated a separate margin rate for Sichuan. All evidence on the record supports Sichuan's assertion that there is no current relationship between Sichuan and Sinopec. Accordingly, examination of whether Sinopec was subject to government control was not necessary in considering whether to give Sichuan a separate rate. At verification, we reviewed a wide variety of sales documents including contracts, invoices, records of payments, and correspondence and found that Sichuan acted independently from Sinopec and any other entities in its day to day business activities. We found that Sichuan officials made all decisions regarding sales pricing and contracting, appointment of management personnel, and disposition of profits, and that these decisions were neither reviewed nor approved by Sinopec or any other entity. Accordingly, we determine that Sichuan has satisfactorily met the Department's criteria for showing an absence of *de jure* and *de facto* governmental control.

Comment 2: Separate Like Product for Certain PVA Grades

Isolyser, an importer of the subject merchandise, asserts that PVA hydrolyzed at a level of 98% should be considered a separate domestic like product. Thus, Isolyser contends that the Department should calculate a separate antidumping margin for PVA with a hydrolysis level of at least 98% in order for the International Trade Commission (ITC) to analyze the magnitude of the domestic margin on the domestic producers for each specific like product.

DOC Position

There is no evidence on the record to show that PVA hydrolyzed at a 98% level has physical characteristics and uses different from the subject merchandise for separate consideration as a domestic like product pursuant to section 771(10) of the Act. Therefore, we are rejecting Isolyser's request.

Comment 3: Application of Factory Overhead

Petitioner claims that the Department understated NV for both Sichuan and Guangxi in the preliminary determination by applying factory overhead only at the final stage of production, rather than to the upstream stages of the vertically integrated production processes. Petitioner argues that both respondents incur overhead costs throughout the production process, rather than simply at the final stage, because both are involved in processing and producing many of the inputs used in PVA production. Petitioner contends that the Indian PVA manufacturers are not as vertically integrated as the PRC respondents and thus the factory overhead percentage derived from the Indian companies' financial statements does not fully capture the factory overhead incurred by the PRC producers. In order to fully account for the overhead incurred, petitioners claim that an appropriate surrogate factory overhead percentage must be applied to both respondents at each upstream stage of production.

Sichuan and Guangxi argue that if factory overhead were applied to each stage of production, the Department would engage in "double counting." Each respondent states that its production processes are continuous and although overhead costs are incurred throughout, by applying the overhead percentage to the factors of production at the final stage, the Department captures the total overhead cost for the entire production process.

DOC Position

We disagree with the petitioner. Our analysis of the information on the record, including the financial statements of the Indian PVA producers, does not support the assumptions made by petitioner regarding the level of vertical integration of the Indian surrogate PVA producers. There is no evidence on the record to indicate that the Indian producers are any less vertically integrated than the PRC PVA producers.

To support its claim, petitioner states that the Indian producers must purchase such inputs as acetylene gas, oxygen, nitrogen, and treated water, while the PRC producers manufacture or process these materials themselves. However, the Indian financial statements state only that the Indian producers consume such inputs, but contain no information as to whether or not such consumption is derived from internal manufacture or outside manufacture. Further analysis of these documents indicates that the Indian producers have considerable investment in PVA production facilities. Such investment may, in fact, represent vertical integration at the same level or close to that of the PRC producers.

There is no basis to assume that applying factory overhead percentage once, at the final stage of production of the PRC producers, undervalues factory overhead. By applying the factory overhead to the final stage of production we have captured all appropriate factory overhead expenses incurred in the manufacture of PVA. Therefore, we have continued our preliminary determination methodology for calculating overhead expenses.

Comment 4: Surrogate Value Source for Factory Overhead, General Expenses and Profit

Petitioner contends that the Department should continue to rely on the Annual Report of VAM Organic Chemicals Ltd. (VAM Organic), an Indian producer of VAM and PVA, as the sole source to calculate factory overhead, general expenses, and profit. Petitioner argues that VAM Organic produces mostly VAM and PVA, and its experience is the most comparable among available sources to that of the PRC producers. Petitioner argues further that the VAM Organic report is more representative of the PRC industry experience than the financial statement of a second Indian producer, Polychem Limited (Polychem), because PVA related production is a relatively smaller part of Polychem's business. If, however, the Department were to consider using both VAM Organic and Polychem data, petitioner contends that the data should be weight-averaged based on the production of VAM and PVA at each company.

Sichuan contends that the surrogate value used for factory overhead, general expenses and profit should be based on the experience of India's chemical industry as a whole, using aggregate data compiled by the Reserve Bank of India (RBI), as applied in past Department cases (*see, e.g., Saccharin*). Sichuan contends that this data is more representative than the data from VAM Organic, which Sichuan claims is aberrational. Sichuan's next preferred methodology is to base these surrogate values on Polychem's experience as Polychem's total PVA sales and VAM sales are greater than the total sales of VAM Organic's PVA and VAM sales, and thus Polychem's experience is more representative of the Indian experience. Finally, Sichuan contends that if the Department chooses to use both VAM Organic and Polychem data, the data should be weight-averaged based on each company's total sales volume of PVA.

DOC Position

For valuing such factors as factory overhead, general and administrative expenses and profit, the Department seeks to base surrogate values on industry experience closest to the product under investigation. In this case, we have information from two producers of the subject merchandise. Thus, there is no need to rely on the experience of the chemical industry as a whole. Between the two Indian producers, we found no significant difference in the quality and representativeness of the data contained in the financial statements. Thus we find both Polychem and VAM Organic to be equally representative of the PVA industry in India. Because there is nothing in this case to indicate that one factor (*i.e.* sales volume or production volume) is more important than the other in valuing factory overhead, general and administrative expenses and profit, we determine that weight-averaging the data from both companies on the basis of either factor is inappropriate. Accordingly, we have weighted the data equally between each company and calculated factory overhead, general and administrative expenses and profit percentages using a simple average of the percentages derived from each producer, and applied these percentages to the factors of production.

Comment 5: Classification of Certain Labor and Overhead Expenses

Petitioner states that the Department should follow the methodology outlined in *Final Determination of Sales at Less than Fair Value: Manganese Metal from the People's Republic of China* (60 FR 56045, November 6, 1995) (*Manganese Metal*), where the Department determined that the surrogate value for labor did not include contributions to the provident fund and employee welfare expenses and thus these contributions and expenses were added to the factory overhead calculation. Petitioner also contends that the data used to derive the value for overhead should be re-allocated to properly include research and development expenses.

Sichuan and Guangxi argue that the Department's past practice has been to include provident fund and employee welfare expenses as components of total labor cost (*see, e.g. Saccharin*) and not as part of overhead expenses. Sichuan states that the example in *Manganese Metal* was an aberration and should not be a precedent for this investigation. Sichuan asserts that the International Labor Organization (ILO) data, used by the Department in the preliminary determination, is fully loaded to include employee benefits such as provident fund contributions and employee welfare expenses. In addition, Sichuan argues that there is insufficient evidence to support petitioner's re-allocation of research and development in the factory overhead calculation. Sichuan maintains that if VAM Organic data is used, no adjustment for research and development is warranted.

DOC Position

We agree with Sichuan. As in the cases cited by Sichuan, we consider the ILO statistics to be fully loaded with respect to all labor expenses, incorporating such costs as contributions to the provident fund and employee welfare expenses. In contrast, the labor value used in *Manganese Metal* was from a different source, and did not include these expenses. We also agree there is insufficient evidence to support petitioner's assumptions for basing re-allocation of research and development expenses.

Comment 6: Sales to Non-PRC Trading Company

Petitioner contends that at the time of sale, Sichuan and Guangxi were unaware of the final destination for sales made to a third country trading company. Petitioner states these sales should be excluded from the calculation of the PRC producer's export price and assigned an antidumping rate separate from that of the respondents.

While Sichuan states the exclusion of these sales would have minimal effect on the final margin calculations, Sichuan states it knew at the time of sale that the sales to the trading company were destined to the United States. Sichuan contends that it had numerous sales documents that would have supported its claim that it knew at the time of sale the final destination of the sales made to trading companies. Guangxi agrees that it did not know the final destination of the sales made through the trading companies.

DOC Position

We reviewed numerous sales documents at the verification of Sichuan and in no instance did we find that *at the time of sale,* Sichuan knew or had any reason to believe the destination of the subject merchandise was the United States. There is no further information on the record that supports Sichuan's claim that, at the time of sale, it knew the destination of the subject merchandise. Although each respondent may have had some indication of the destination prior to the time of shipment, all of the sales documents reviewed at each company showed no information identifying the United States as the ultimate destination of the subject merchandise. We have therefore excluded the trading company sales from each company's margin calculation.

Comment 7: Guangxi Vinylon Reporting of Calcium Carbide Factor

Petitioner argues the Department should revise Guangxi's reported calcium carbide factors based on information discovered at verification, which revealed that Guangxi Vinylon had reported this factor based on an industrial standard, rather than the actual consumption of calcium carbide for PVA production.

Guangxi argues that it reported its calcium carbide factor consumption consistent with the legally required PRC industry standard for production of PVA and its production accounting system.

DOC Position

We agree with the petitioner. We have revised the calcium carbide consumption factors to reflect actual consumption, based on information discovered at verification. Actual consumption in a production process is more accurate than a standard figure.

Comment 8: Sichuan Reporting of PVA Production

Petitioner claims that the Department should reject as new information verification findings that Sichuan's reported concentration percentage of PVA used to calculate consumption factors of inputs used at the PVA production stage was inaccurate. Additionally, petitioner argues that Sichuan has not demonstrated that such an adjustment is appropriate.

Sichuan argues it provided numerous submissions and complete accurate and timely responses to the Department. Further, Sichuan states the Department was able to verify, within the time specified, the completeness of this factual information. Therefore, Sichuan argues that the Department should use

the verified evidence on record to calculate an antidumping margin for Sichuan.

DOC Position

The information discovered at verification, regarding the concentration percentages of PVA production, represents a relatively minor correction of data already provided by Sichuan, rather than new information not previously provided. Moreover, we find that using the actual concentration percentages of PVA production will yield more accurate results. Therefore, we have revised affected input factors based on the actual PVA production data.

Comment 9: Surrogate Value for Electricity

Petitioner argues that the Department should use data on electricity prices issued by the Centre for Monitoring the Indian Economy (CMIE), from March 1, 1995, for the electricity surrogate value. In applying the rates, petitioner suggests the surrogate value should be calculated as the weighted-average of rates from the Indian states where the Indian chemical industry is located.

Sichuan and Guangxi argue that the electricity prices submitted by the petitioner are effective beginning with the last month of the POI, while all of their PVA production during the POI occurred earlier. Therefore, they claim that the petitioners proposed value is inappropriate for use as a surrogate value because it reflects prices in effect subsequent to their PVA production. Sichuan suggests that the Department use either data on an electricity rate for India issued by the International Energy Agency (IEA), or the CMIE value from June 1994 used in the preliminary determination. Sichuan contends that the IEA figure, when adjusted to the POI, is an appropriate measure of the cost of electricity.

DOC Position

We agree in part with the petitioner that the March 1995 CMIE data is the most contemporaneous value relative to the POI and is the appropriate source for deriving the electricity surrogate value. Petitioners and respondents are both incorrect in stating that these rates are "effective" on March 1, 1995. Rather, the source shows that these were the rates "as of" March 1, 1995, and thus represent Indian price levels contemporaneous with the POI. However, we disagree with the petitioner's weighted average methodology. There is insufficient basis to assume that the electricity rates from the Indian states selected by petitioner are more appropriate for surrogate value than electricity rates in other states. Other factors beside chemical production levels, such as methods of generation and transmission as well as overall demand, are determinants of price. Since there is not sufficient information on the record to weigh the appropriateness of using one Indian state's electricity rates over those in another, we have based the surrogate value on the simple average of all Indian state rates found in the 1995 CMIE source.

Comment 10: Surrogate Value for Natural Gas

Petitioner contends that the Department should use the data on natural gas costs derived from 1994–1995 Gujarat Narmada Valley Fertilizer Co. Ltd (Gujarat) Annual Report as a surrogate for valuing natural gas because this value reflects the actual POI cost to an Indian chemical producer of this input.

Sichuan maintains that the value submitted by petitioner is not sufficiently representative of Indian prices as it is taken from a single Indian company's experience. Sichuan supports the use of an India-wide price rate obtained for 1994–1995 from *Hydrocarbon Perspective: 2010*, as used in the preliminary determination.

DOC Position

We agree with Sichuan and have used a rate obtained from *Hydrocarbon Perspective: 2010* as the surrogate value for natural gas. In determining the most appropriate surrogate value to apply to an input factor, the Department considers such elements as the specificity of the value as compared to the factor used, the contemporaneity of the value with respect to the POI, and the representativeness of the value for the industry in the surrogate country. In this instance, both values are equally specific with respect to the natural gas input, and equally contemporaneous with respect to the POI. For this factor, we consider the *Hydrocarbon Perspective: 2010* value to be more representative than a value from an annual report of a single company.

Comment 11: Surrogate Value for Coal

Petitioner states that the Department should use a surrogate value for steam coal derived from the annual report of Sukhjit Starch & Chemical Ltd (Sukhjit), an Indian chemical manufacturer. Petitioner contends that this value is specifically for steam coal, an input used by the respondents, and the value is contemporaneous with the POI.

Sichuan contends that the Department should derive a surrogate value for steam coal using average numbers for the Indian chemical industry as a whole rather than use a price quote from specific companies whose primary production is not PVA.

DOC Position

We valued steam coal inputs using an average price derived from the Sukhjit annual report and the 1994–95 annual report for Gujarat report, identified in Comment 10, which also is on the record. Both of these sources are equally contemporaneous with the POI and are publicly available. Although the fertilizer company's annual report does not specifically classify the coal consumed as "steam coal", it is clear from its inclusion in a table relating to power and fuel consumption that the coal consumed is for generating steam, and thus can be considered steam coal. Therefore both values are equally specific with regard to the input. As we have no basis to determine that one of these sources is superior to the other, we have weighted them equally in calculating a surrogate value.

We agree with Sichuan that where surrogate values cannot be based on the experiences of Indian producers of subject merchandise, a surrogate value based on a broader sample of Indian experience would be preferable, where all other relevant factors are equal. However, we consider the contemporaneity to the POI of the two annual reports to be more important for valuing this factor. While Sukjhit and Gujarat are not producers of PVA, we do not consider that fact to be relevant for considering surrogate values of commodity inputs such as coal, where the prices from PAPI typically represent the overall price level for that input in the surrogate country. Further, in comparing the average of the two companies to other, non-contemporaneous values on the record, we find that our average is reasonably comparable with respect to the other inflation-adjusted coal values, including those derived from the annual reports of the Indian PVA producers.

Comment 12: Sichuan Indirect Labor Factors

Petitioner claims that Sichuan significantly underreported its indirect labor cost by reporting indirect labor only for the final stage of the production process. Petitioner contends that the Department must apply a value for indirect labor to all upstream production stages, as in *Manganese Metal*.

Sichuan contends that it reported, and the Department verified, all of its indirect labor factors and no further adjustment is warranted.

DOC Position

We agree with Sichuan. We verified Sichuan's indirect labor reporting and found no basis to add additional factors for this input. Petitioner's reliance on the *Manganese Metal* case is misplaced. In *Manganese Metal*, the respondent did not report any separate factors for indirect labor, and the factory overhead value did not include indirect labor factors. Thus, an adjustment was warranted. In this case, both Sichuan and Guangxi reported all indirect labor factors and no further accounting for this input is needed.

Comment 13: Valuation of Guangxi Vinylon's Water Consumption

Petitioner argues that Guangxi Vinylon's water factor should be considered as a direct manufacturing cost. Petitioner states that Guangxi's water factor is distinguishable from the Department's treatment of water in past cases. Petitioner argues that, in past cases, water was considered an overhead item, since there was no information in the Reserve Bank of India Bulletin data to indicate otherwise. In this case, petitioner contends that water is a direct manufacturing cost of producing PVA. Further, Petitioner argues that the Indian producers of PVA treat water as a component of power and fuel, thus identifying water as a direct manufacturing cost. Therefore, water should be calculated separately from factory overhead.

Guangxi Vinylon states that the Department's treatment of water as a factory overhead item is consistent with past practice (*see, e.g. Saccharin*) and should continue in this investigation.

DOC Position

We agree with Guangxi Vinylon. There is no information on the record that supports petitioners claim that water must be treated as a direct manufacturing cost. Consistent with our practice in such cases as *Saccharin*, which involved a chemical product and relied on a similar type of factory overhead data, we have considered Guangxi's Vinylon's water consumption factor to be part of factory overhead.

Continuation of Suspension of Liquidation

For Sichuan, we calculated a zero margin. Consistent the with *Notice of Final Determination of Sales at Less Then Fair Value: Certain Cased Pencils from the People's Republic of China* (59 FR 55625, November 8, 1994), merchandise that is sold by Sichuan but manufactured by other producers will not receive the zero margin. Instead, such entries will be subject to the "All-Others" rate.

In accordance with section 733(d)(1) and 735(c)(4)(B) of the Act, we are directing the Customs Service to continue to suspend liquidation of all entries of polyvinyl alcohol (except those entries that represent U.S. sales by Sichuan of PVA that Sichuan has manufactured) from the PRC, that are entered, or withdrawn from warehouse for consumption, on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the normal value exceeds the export price as shown below. These suspension of liquidation instructions will remain in effect until April 7, 1996.

The weighted-average dumping margins are as follows:

Manufacturer/Producer/Exporter	Weighted-average margin percentage
Guangxi GITIC Import and Export Corp	116.75
Sichuan Vinylon Works	0.00
All-Others Rate	116.75

The All-Others rate applies to all entries of subject merchandise except for entries from Guangxi and entries of merchandise manufactured by Sichuan.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. As our final determination is affirmative, the ITC will, within 45 days, determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry. If the ITC determines that material injury, or threat of material injury does not exist, the proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on all imports of the subject merchandise entered for consumption on or after the effective date of the suspension of liquidation.

This determination is published pursuant to section 735(d) of the Act.

Dated: March 21, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

[FR Doc. 96–7634 Filed 3–28–96; 8:45 am]

BILLING CODE 3510–DS–P

[A–588–836]

Notice of Final Determination of Sales at Less Than Fair Value; Polyvinyl Alcohol From Japan

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Ellen Grebasch or Erik Warga, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230; telephone: (202) 482–3773 or (202) 482–0922, respectively.

The Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA).

Final Determination

As explained in the memoranda from the Assistant Secretary for Import Administration dated November 22, 1995, and January 11, 1996, the Department of Commerce (the Department) has exercised its discretion to toll all deadlines for the duration of the partial shutdowns of the Federal Government from November 15 through November 21, 1995, and December 16, 1995, through January 6, 1996. Thus, the deadline for the final determination in this investigation has been extended by 28 days, *i.e.*, one day for each day (or partial day) the Department was closed. As such, the deadline for this final determination is no later than March 21, 1996.

We determine that polyvinyl alcohol (PVA) from Japan is being sold in the United States at less than fair value (LTFV), as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the preliminary determination of sales at less than fair value in this investigation on October 2, 1995, (60 FR

52651, October 10, 1995), the following events have occurred:

On October 17, 1995, respondent, Kuraray Co., Ltd. requested that the final determination be postponed until March 21, 1996. The Department has determined that such requests contain an implied request to extend the provisional measures period, during which liquidation is suspended, to six months (see, *Extension of Provisional Measures* memorandum dated February 7, 1996).

On November 20, 1995, the petitioner, Air Products and Chemicals, Inc., clarified its position that polyvinyl alcohol fiber was not intended to be within the scope of this investigation.

On February 2, 1996, respondent, Kuraray Co., expressly requested extension of the four month provisional measures period.

No hearing was requested or held, and no party filed a case brief.

Scope of Investigation

The merchandise under investigation is polyvinyl alcohol. Polyvinyl alcohol is a dry, white to cream-colored, water-soluble synthetic polymer. This product consists of polyvinyl alcohols hydrolyzed in excess of 85 percent, whether or not mixed or diluted with defoamer or boric acid. Excluded from this investigation are polyvinyl alcohols covalently bonded with acetoacetylate, carboxylic acid, or sulfonic acid uniformly present on all polymer chains in a concentration equal to or greater than two mole percent, or polyvinyl alcohols covalently bonded with silane uniformly present on all polymer chains in a concentration equal to or greater than one-tenth of one mole percent. Polyvinyl alcohol in fiber form is not included in the scope of this investigation.

The merchandise under investigation is currently classifiable under subheading 3905.30.00 of the *Harmonized Tariff Schedule of the United States* (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.

Period of Investigation

The period of investigation (POI) is April 1, 1994, through March 31, 1995.

Facts Available

For reasons discussed in the preliminary determination, the Department has, pursuant to section 776 of the Act, used the facts available. As discussed in the preliminary determination, the Department used as the facts available the margin in the petition. For a discussion of the reasons for application of the facts available, and the selection of the petition margin as the facts available, see *Notice of Preliminary Determination of Sales at Less Than Fair Value: Polyvinyl Alcohol from Japan*, 60 FR 52649, 52650 (October 10, 1995). The Department has not received any comments since the preliminary determination on its application of facts available.

Fair Value Comparisons

As noted above, as in our preliminary determination, this final determination has been made using the margin in the petition as the facts available.

All-Others Rate

Under section 735(c)(5) of the Act, the "all-others rate" will normally be a weighted average of the weighted-average dumping margins established for all exporters and producers, but excluding any zero or *de minimis* margins, or any margins based entirely on the facts available. However, this provision also states that if all weighted-average margins are zero, *de minimis*, or based on the facts available, the Department may use other reasonable methods to calculate the all-others rate, including a weighted-average of such margins. In this case, as discussed above, the margin assigned to all companies is 77.49 percent, based on the facts available, the Department determines the all-others rate to be 77.49 percent.

Continuation of Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the Customs Service to continue to suspend liquidation of all entries of polyvinyl alcohol from Japan, that are entered, or withdrawn from warehouse for consumption, on or after October 10, 1995, the date of publication of our preliminary determination in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the normal value exceeds the export price as shown below. These suspension of liquidation instructions will remain in effect until April 7, 1996, in accordance with section 733(d) of the Act.

The dumping margins are as follows:

Exporter/Manufacturer	Margin percentage
Kuraray	77.49
Nippon Goshei	77.49
Unitika	77.49
Shin-Etsu	77.49
All others	77.49

The all others rate applies to all entries of subject merchandise except for entries from exporters that are identified above.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. As our final determination is affirmative, the ITC will within 45 days determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry. If the ITC determines that material injury, or threat of material injury does not exist, the proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on all imports of the subject merchandise entered, for consumption on or after the effective date of the suspension of liquidation.

This determination is published pursuant to section 735(d) of the Act and 19 CFR 353.20(a)(4).

Dated: March 21, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

[A–583–824]

Notice of Final Determination of Sales at Less Than Fair Value: Polyvinyl Alcohol From Taiwan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Barbara Wojcik-Betancourt or David J. Goldberger, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230; telephone: (202) 482–0629 or (202) 482–4136, respectively.

THE APPLICABLE STATUTE: Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA).

FINAL DETERMINATION: As explained in the memoranda from the Assistant Secretary for Import Administration dated November 22, 1995, and January 11, 1996, the Department of Commerce (the Department) has exercised its discretion to toll all deadlines for the duration of the partial shutdowns of the Federal Government from November 15 through November 21, 1995, and December 16, 1995, through January 6, 1996. Thus, the deadline for the final determination in this investigation has been extended by 28 days, *i.e.*, one day for each day (or partial day) the Department was closed. As such, the deadline for this final determination is no later than March 21, 1996.

We determine that polyvinyl alcohol (PVA) from Taiwan is being sold in the United States at less than fair value (LTFV), as provided in section 735 of the Act. The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the preliminary determination of sales at less than fair value in this investigation on October 2, 1995, (60 FR 52651, October 10, 1995), the following events have occurred:

On October 10, 1995, Chang Chun Petrochemical Co., Ltd. (Chang Chun), the sole Taiwan producer of the subject merchandise, and the respondent in this investigation, timely requested a postponement of the final determination until not later than 135 days after publication of the preliminary determination in the **Federal Register**. The notice postponing the final determination was published on October 25, 1995 (60 FR 54667). The Department has determined that such requests contain an implied request to extend the provisional measures period, during which liquidation is suspended, to six months (*see Extension of Provisional Measures* memorandum dated February 7, 1996.).

We conducted verification of Chang Chun's sales and cost questionnaire responses in Taiwan during October.

On November 20, 1995, the petitioner, Air Products and Chemicals, Inc., stated that polyvinyl alcohol fiber was not intended to be within the scope of this investigation.

Monsanto Company (Monsanto), a party to the proceeding in this investigation, submitted comments on the cost of production verification report on December 18, 1995. National Starch and Chemical Company, Perry Chemical Corp., and Rhône-Poulenc, importers of the subject merchandise, submitted comments on the sales verification report on January 11, 1996.

Chang Chun and the petitioner, Air Products and Chemicals, Inc., submitted case briefs on January 16, 1996, and rebuttal briefs on January 24, 1996. Monsanto also submitted a rebuttal brief on January 24, 1996. At the request of both the petitioner and Chang Chun, a public hearing was held on February 26, 1996.

Scope of Investigation

The merchandise under investigation is polyvinyl alcohol. Polyvinyl alcohol is a dry, white to cream-colored, water-soluble synthetic polymer. This product consists of polyvinyl alcohols hydrolyzed in excess of 85 percent, whether or not mixed or diluted with defoamer or boric acid. Excluded from this investigation are polyvinyl alcohols covalently bonded with acetoacetylate, carboxylic acid, or sulfonic acid uniformly present on all polymer chains in a concentration equal to or greater than two mole percent, and polyvinyl alcohols covalently bonded with silane uniformly present on all polymer chains in a concentration equal to or greater than one-tenth of one mole percent. Polyvinyl alcohol in fiber form is not included in the scope of this investigation.

The merchandise under investigation is currently classifiable under subheading 3905.30.00 of the *Harmonized Tariff Schedule of the United States* (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.

Period of Investigation

The period of investigation (POI) is April 1, 1994, through March 31, 1995.

Product Comparisons

For purposes of determining appropriate product comparisons to U.S. sales, we compared identical merchandise, or where there were no sales of identical merchandise in the home market to compare to U.S. sales, we made comparisons based on the characteristics listed in the Department's antidumping questionnaire, as had been applied in the preliminary determination, and in accordance with section 771(16) of the Act.

In its case brief, petitioner claimed that the Department should determine that "targeted dumping" exists under section 777A(d)(1)(B) because of a pattern of export prices, which petitioner alleged differed significantly across time. Pursuant to section 777A(d)(1)(B), the Department may compare weighted-average normal values (NV) to transaction-specific export prices, if there is a pattern of *export prices* (EP) for comparable merchandise that differ significantly among purchases, regions, or periods of time (*see* section 777A(d)(1)(B)(i)) (emphasis added) when these differences cannot be taken into account by using an average to average or transaction to transaction comparison (*see* section 777A(d)(1)(B)(ii)). Petitioner requested that the Department compare monthly average NV to monthly EP averages to alleviate the significant price distortions occurring in the *home market* at the end of the POI. Petitioner, however, failed to provide any evidence or argument as to why the alleged pattern of *export prices* constitute targeted dumping. Consequently, we have rejected petitioner's allegation of targeted dumping. However, the Department has found significant differences over time in home market pricing. Those differences have been taken into account in price averaging. For discussion of the price averaging issue, *see* Comment 3 in the *Interested Party Comments* section of this notice below.

Level of Trade

As set forth in section 773(a)(1)(B)(i) of the Act and in the Statement of Administrative Action (SAA) accompanying the URAA, to the extent practicable, the Department will calculate normal values based on sales at the same level of trade as U.S. sales.

Pursuant to 773(a)(7)(A)(i), level of trade involves the performance of different selling activities by the producer/exporter. On September 22, 1995, we sent Chang Chun supplemental questions requesting that Chang Chun establish any claimed levels of trade based on selling functions performed and services offered by Chang Chun to each customer or customer class, and to document and explain any claims for a level of trade adjustment. Chang Chun provided no additional information regarding its selling functions and continued to claim that, pursuant to section 773(a)(7) (A) and (B), levels of trade are based on customer classification.

We examined the record evidence on the selling functions performed by Chang Chun on sales in each market and found that Chang Chun provides nearly all of the same or very similar selling functions to all customers including: packing and freight services, warranty claims, advertising, technical services, and inventory maintenance. As a result,

we rejected the level of trade claim because, pursuant to section 773(a)(7)(A)(i), differences in level of trade must involve the performance of different selling activities by the seller (*i.e.* the respondent producer/exporter) (*see* Comment 4). Therefore, we determine that the selling functions performed among home market sales are sufficiently similar for us to consider the home market to be one level of trade.

For the U.S. market, Chang Chun reported payment of commissions on certain U.S. sales. It reported, and we verified, that the commissions paid did not reflect payments for any services provided by the commissionaire. Apart from tolled sales, which are not used in our final determination (*see* Comment 7), we also found that the selling functions performed by the respondent in the U.S. are sufficiently similar for all sales for us to consider the U.S. market to be one level of trade.

Fair Value Comparisons

In accordance with section 772(a) of the Act, to determine whether Chang Chun's sales of PVA to the United States were made at less than fair value, we used EP because the subject merchandise was sold to the first unaffiliated purchaser in the United States prior to importation and because constructed export price (CEP) under section 772(b) is not otherwise warranted based on the facts of this investigation.

Export Price

We calculated EP based on the same methodology used in the preliminary determination. Furthermore, as in the preliminary determination, we did not include tolled sales.

Normal Value

In accordance with section 773(a)(1)(B) of the Act, we have based NV on sales in Taiwan, or, where appropriate, on constructed value (CV). We compared all home market sales to the cost of production (COP), as described below. Where home market prices were above COP, we calculated NV based on the same methodology used in the preliminary determination, with the following exceptions: (1) we recalculated reported quantity discounts and special discounts on certain sales (*see* Comment 5); and (2) we made an additional circumstance of sale adjustment for bank charges made on certain U.S.sales, based on information obtained at verification.

Cost of Production Analysis

As discussed in the preliminary determination notice, the Department conducted an investigation to determine whether Chang Chun made home market sales during the POI at prices below COP within the meaning of section 773(b) of the Act. Before making any fair value comparisons, we conducted the COP analysis described below.

A. Calculation of COP

We calculated the COP based on the sum of Chang Chun's cost of materials and fabrication for the foreign like product, plus amounts for home market general, and administrative expenses (G&A) and packing costs in accordance with section 773(b)(3) of the Act. We relied on the reported COP amounts with the following exceptions: (1) we allocated joint production costs to PVA and acetic acid (AA) based upon relative sales values (*see* comment 8); (2) we adjusted the reported cost of manufacturing (COM) to account for the difference in the COM per Chang Chun's internal records examined at the verification; (3) we adjusted the COM to include PVA's share of the difference between Chang Chun's depreciation expense for tax purposes (the amount that Chang Chun reported in its response to section D of our questionnaire), and its depreciation expense for financial statement purposes; and (4) we recalculated general and administrative expenses based on the revised COM.

B. Test of Home Market Prices

We compared the adjusted weighted-average COP figures to home market sales of the foreign like product on a product-specific basis, in order to determine whether these sales had been made at below-cost prices within an extended period of time in substantial quantities, and at prices that did not permit recovery of all costs within a reasonable period of time. The home market prices compared were exclusive of any applicable movement charges, discounts, rebates, packing, and direct and indirect selling expenses.

C. Results of COP Test

Pursuant to section 773(b)(2)(c), where less than 20 percent of sales during the POI of a given product are at prices less than the COP, we do not disregard any below-cost sales of that product because the below-cost sales are not made in substantial quantities within an extended period of time. Where 20 percent or more of sales of a given product are at prices less than the COP, we disregard only the below-cost sales because such sales are found to be made within an extended period of time, in accordance with section 773(b)(2)(B) of the Act, and at prices which would not permit recovery of all costs within a reasonable period of time, in accordance with section 773(b)(2)(D) of the Act. Where all sales of a specific product are at prices below the COP, we disregard all sales of that product, and calculate NV based on CV, in accordance with section 773(a)(4) of the Act.

We found that, for certain PVA products, more than 20 percent of Chang Chun's home market sales were sold at below COP prices within the POI. Further, no evidence was presented indicating that these sales provided for the recovery of costs within a reasonable period of time. We therefore determined that these below cost sales were made in substantial quantities within an extended period of time and we excluded these sales and considered the remaining above-cost sales in determining NV, if such sales existed, in accordance with section 773(b). For those U.S. sales of PVA products for which there were no above-cost sales, we compared export prices to CV.

D. Calculation of CV

In accordance with section 773(e)(1) of the Act, we calculated CV based on the sum of Chang Chun's cost of materials, fabrication, selling, general and administrative expenses (SG&A) and U.S. packing costs as reported in the U.S. sales database. In accordance with sections 773(e)(2)(A), we based SG&A and profit on the amounts incurred and realized by the respondent in connection with the production and sale of the foreign like product in the ordinary course of trade for consumption in the foreign country. Where appropriate, we calculated CV based on the methodology described above in the calculation of COP and added an amount for profit. For selling expenses, we used the weighted-average home market selling expenses.

Comparison Methodology

In accordance with section 777A(d)(1)(A)(i) of the Act, we calculated weighted-average EPs for comparison to weighted average NVs or, as discussed above, to CV, where appropriate. The weighted averages were calculated and compared by the time period of the sale, product characteristics, and the class of the customer involved.

Chang Chun classified one of its U.S. customers as both an end-user and a distributor. Based on information in the questionnaire response, we considered this customer as an end-user for purposes of price averaging because Chang Chun reported that it sold the majority of its PVA sales to this customer for the customer's internal consumption.

The bases for establishing averaging groups according to time period and class of customer are discussed in detail below under Comments 3 and 4, respectively.

Currency Conversion

We made currency conversions into U.S. dollars based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank. Section 773A(a) of the Act directs the Department to use a daily exchange rate in order to convert foreign currencies into U.S. dollars. Further, section 773A(b) directs the Department to allow a 60-day adjustment period when a currency has undergone a sustained movement. A sustained movement has occurred when the weekly average of actual daily rates exceeds the weekly average of benchmark rates by more than five percent for eight consecutive weeks. The benchmark is defined as the moving average of rates for the past 40 business days. (For an explanation of this method, *see Policy Bulletin 96–1: Currency Conversions*, 61 FR 9434, March 8, 1996). Such an adjustment period is required only when a foreign currency is appreciating against the U.S. dollar. The use of an adjustment period was not warranted in this case because the Taiwan dollar did not undergo a sustained movement, nor were there currency fluctuations during the POI.

Verification

As provided in section 788(i) of the Act, we verified information provided by Chang Chun using standard verification procedures, including the examination of relevant sales and financial records, and selection of original source documentation containing relevant information.

Interested Party Comments

Comment: Date of Sale for Home Market Long-Term Purchase Orders.

Petitioner argues that the date of sale for home market sales made according to long-term purchase orders should not be the purchase order date, but rather the purchase order log date as used for other home market sales. Petitioner claims that the verification demonstrated that the long-term purchase orders did not constitute a binding agreement on quantity. Thus, petitioner contends, these purchase orders failed to satisfy the requirement that both price and quantity be agreed upon by the buyer and the seller for purposes of establishing date of sale. Petitioner alleges that: (1) significant amounts of purchase order quantities were unfulfilled as of the time of the Department's verification; (2) the purchase orders resemble "blanket purchase orders", which set sales terms and conditions over a time period for a maximum quantity of merchandise, but involve no commitment to purchase a fixed quantity and still require further communication to specify the quantity to be delivered; and (3) the purchase orders did not set quantities because Chang Chun did not meet the specified delivery period.

Chang Chun argues that the long-term purchase orders set the key terms of sale—price and quantity—and, therefore, the date of sale for these transactions should be the purchase order date. Chang Chun states that delivery terms are material only if the parties treat them as such—which the parties did not in this case. Further, Chang Chun maintains that even if purchase order quantities were not fully shipped in accordance with the delivery schedule, it does not mean that the terms of the purchase order were not met. Chang Chun cites *Final Determination of Sales at Less Than Fair Value: Stainless Steel Bar from India* (59 FR 66915, December 28, 1994), where the purchase order date was used as the date of sale even though part of the purchase order quantity was canceled; and *Final Determination of Sales at Less Than Fair Value: Crankshafts from Germany* (52 FR 28170, July 28, 1987) (*Crankshafts*), where price and quantity changes after the POI did not affect the sale date for those sales shipped under the original terms.

Monsanto and U.S. importers Rhône-Poulenc, Perry Chemical, and National Starch also contend that the delivery date is not an essential term of sale, and that delays in meeting delivery date do not affect the establishment of price and quantity as of the purchase order date.

DOC Position: We agree with respondent Chang Chun that the sales made under what Chang Chun describes as "long term purchase orders" were made pursuant to valid contracts, and thus we are treating the date of the purchase order as the date of sale.

Neither the statute nor the Department's regulations detail how the Department is to determine the date of sale of a transaction. Therefore, under principles of administrative law, the agency is obliged to fill in the statutory gaps, either by regulation or through developing a practice. In determining the date of sale, the Department has a well-established and long-standing practice that a sale is completed within the meaning of the Act when the essential terms, *i.e.*, usually price and quantity, are definite and firm (*see, e.g., Final Results of Antidumping Administrative Review: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from the Federal Republic of Germany*, (56 FR 31692, July 11, 1991) (Department's established practice to use date when price and quantity terms are set as the date of sale); *see* also *Mitsubishi Elec. Corp.* v. *United States*, 700 F. Supp. 538, 561 (CIT 1988), aff'd. 898 F.2d 1577 (Fed. Cir. 1990)). The essential terms of price and quantity are firm when they are no longer within the control of the parties to alter (*see, e.g., Final Determination of Sales at Less Than Fair Value: Brass Sheet and Strip From France*, (52 FR 812, January 9, 1987) (price term pegged to publicly quoted metal prices considered definite and fixed); *Voss International* v. *United States*, 628 F.2d 1328 (CCPA 1980) (price set in dollars was definite despite provision for adjustment for currency fluctuations because the parties had nothing more to negotiate regarding price); *Final Results of Antidumping Administrative Review: Titanium Sponge From Japan*, (54 FR 13403, April 3, 1989) (absolute quantity was fixed and definite because contract required customer to purchase all that customer required)). Additionally, the Department often looks to the course of conduct between the parties in evaluating whether a written document represents a binding agreement (*see, e.g., Final Determination of Sales at Less Than Fair Value: Grey Portland Cement and Clinker from Mexico*, 55 FR 29244, July 18, 1990) (parties had begun performance pursuant to a letter agreement that Department found established a definite price and quantity); *Crankshafts*, at 28175 (the parties clearly acted in a manner consistent with a meeting of the minds that there was a binding agreement because production, acceptance of delivery and payment were in accord with the price and quantity of the written purchase order)).

Evidence on the record demonstrates that each of the contracts Chang Chun entered into during mid-February 1995 were binding agreements for purposes of establishing date of sale. Each of these written agreements, referred to by respondent as long-term purchase orders, set definite price and quantity terms and were signed by the seller Chang Chun and by each purchaser.

Moreover, for each agreement, the parties' later course of conduct evidenced that there was a meeting of the minds as to the essential terms, the price and quantity, because neither price nor quantity were altered in the course of performance.

Petitioner argues that Chang Chun had not fully delivered all of the quantity to any of the purchasers within the stated delivery period, and points to this fact as evidence that none of the long-term contracts had set firm quantities, hence, none were binding agreements. However, each long-term contract merely set out a delivery schedule wherein deliveries were to be made in installments which Chang Chun was to deliver when inventory was sufficient and its capacity to transport was available. Such language demonstrates that delivery was not intended by either party to be an essential term in the agreement. Unlike a circumstance where the parties intentionally make time of the essence, these long-term contracts did not provide that delivery within a date certain was material (*see, e.g., Final Determination of Sales at Less Than Fair Value: Oil Country Tubular Goods From Argentina*, 60 FR 33539, June 28, 1995)(*OCTG from Argentina*) (where the Department found that a change in delivery terms did not alter the date of sale because the parties themselves did not treat the delivery terms as material to the long-term contract)). The fact that at the end of the delivery time period Chang Chun sent out written extensions of delivery to each purchaser, and that each purchaser accepted deliveries of PVA pursuant to the delivery extension, is consistent with the conclusion that delivery terms were not essential to the contract. The Department has often found that changes in non-essential terms do not alter the date of sale. *See Final Determination of Sales at Less Than Fair Value: Aramid Fiber Formed of Poly-Phenylene Terephthalamide From the Netherlands*, (59 FR 23684, May 6, 1994); *see* also *General Electric Co.* v. *United States*, Slip. Op. 93–55 (CIT 1993)).

Moreover, record evidence demonstrates that Chang Chun had substantially performed on each long-term contract within the time set out in the delivery schedule and that every purchaser had accepted late delivery of remaining quantities at the price set out in the contracts. This course of conduct indicates that the parties acted in a manner consistent with their respective obligations under these agreements, even though all quantities were not delivered in strict accordance with the delivery schedule.

Lastly, we do not view the fact that respondent continued to record shipments made pursuant to the long-term contracts as it had recorded shipments made pursuant to spot sales as evidence that the long-term contracts were not binding agreements. The record-keeping was not inconsistent with the long-term contracts. For these reasons, we find that the purchase orders at issue are binding contracts. Therefore, we have used the date of the purchase orders as the date of sale.

Comment 2: Long-term Purchase Orders in the Ordinary Course of Trade.

Petitioner argues that, if the Department accepts the home market long-term purchase orders as POI sales, shipments made pursuant to these orders should be considered outside the ordinary course of trade. According to petitioner, these sales represent a significant deviation from Chang Chun's prior sales practice in terms of the manner in which sales are negotiated, and in the large volume covered. In addition, petitioner notes that these long-term orders are the first and only ones in the home market during the POI.

Chang Chun, supported by Monsanto, contends that the sales are in the ordinary course of trade because: (1) the purchase orders covered all standard grades of PVA and involved a large percentage of POI sales; (2) additional purchase orders were issued subsequent to the original ones; (3) the products were sold through Chang Chun's major channel of distribution; and (4) the sales were not unrepresentative or aberrational in nature. Furthermore, Chang Chun states that, although these purchase orders were part of a new sales and marketing strategy in response to growing competition, they are not uncommon in this industry.

DOC Position: We disagree with petitioner. It is the Department's established practice to include home market sales of such or similar merchandise unless it can be established that such sales were not made in the ordinary course of trade (*see Final Determination of Sales at Less Than Fair Value: Stainless Steel Angles from Japan*, 60 FR 16608, March 31, 1995). Section 773(a)(1)(B)(i) of the Act provides that NV shall be based on the price at which the foreign like product is sold in the exporting country in the ordinary course of trade for home market consumption. Section 771(15) of the Act states that "* * * 'ordinary course of trade' means the conditions and practices which, for a reasonable time prior to the exportation of the subject merchandise, have been normal in the trade under consideration with respect to the merchandise of the same class or kind * * *".

In determining whether sales are made outside the ordinary course of trade, the Department typically examines several factors taken together with no one factor dispositive. Further, the SAA at 842–843 states that sales are outside the ordinary course of trade when the "* * * sales or transactions have characteristics that are not ordinary as compared to sales or transactions generally made in the same market." This statement also provides guidance to the Department in considering unusual product specifications, aberrational prices, unusual terms of sale, or other factors that may make sales extraordinary for the market in question. None of these sales involved unusual product specifications, rather, the contracts covered all standard grades of PVA. The purchasers were established PVA customers that Chang Chun had dealt with in the past. Although the prices under these contracts differed from spot-sale prices offered previously, we do not consider such prices to be unusual given the nature of a long-term contract.

Although the long-term purchase orders may have been new to Chang Chun, there is no evidence that such long-term contracts are unusual or extraordinary for the Taiwan PVA market. Further, we found that, following the institution of the purchase order system, Chang Chun consistently conducted business according to this system.

While the volume of these long-term contract sales was much greater than what Chang Chun had been selling previously on a spot sale basis, there is no evidence on the record that indicates that high volume sales were not part of the normal course of trade in the Taiwan market for a reasonble time prior to the exportation of the subject merchandise. In the past, the Department has said that the number of sales or the volume sold are not, in and of themselves, dispositive (*see Final Results of Antidumping Administrative Review: Certain Welded Carbon Steel Standard Pipes and Tubes From India*, 56 FR 64753, December 12, 1991). Therefore, we have determined that these sales were made in the ordinary course of trade and included these sales in our normal value calculation.

Comment 3: Price Averaging and Time Periods.

Petitioner argues that calculating a single POI weighted- average price for each product results in distortive comparisons between EP and NV due to the high volume of home market sales

at the end of the POI pursuant to the long-term purchase orders. Petitioner submitted a number of statistical analyses to demonstrate the relationship between time and U.S. prices. Based on these analyses, petitioner contends that the price changes over the POI are significant and warrant the use of monthly, rather than POI, weighted-averages for price comparisions. In support of its position, petitioner argues that there is no statutory preference for using POI price averages, and that the monthly average methodology will satisfy the requirement of the URAA regarding contemporaneous sales comparisons.

Chang Chun, supported by Monsanto, responds that POI averages should be used in this case. Both parties contend that the Department was correct in the preliminary determination by establishing POI averages as the normal methodology for investigations. Based on its own statistical analyses, Monsanto asserts that the petitioner's analyses are faulty and that the relationship between time and price is relatively weak. Monsanto also contends that the petitioner's application of a statistical analysis methodology used in adminstrative reviews is inappropriate for this investigation, because petitioner limited the analysis to certain sales and based its results on criteria applicable to administrative reviews, but not investigations. Based on all of these factors, Monsanto contends that there is no basis to conclude that the price changes over the POI are significant, and thus no reason for the Department to abandon POI averages in favor of monthly averages.

DOC Position: Section 777A(d)(1)(A) gives the Department the explicit authority to use certain methods for comparing prices in determining whether sales at less than fair value exist. The Department may employ an average-to-average comparison of U.S. sales to the relevant home market or third country sales or rely on individual sales transactions for comparisons in both markets (*see* section 777A(d)(1)(A)(i) & (ii)). In applying an averaging approach, the SAA states that, in determining sales comparability for purposes of inclusion in a particular average, time is a factor which may affect the comparability of sales (SAA at 842–843).

As stated in our *Notice of Proposed Rulemaking and Requests for Public Comment*, 61 FR 7308, 7349 (February 27, 1996) (*Proposed Regulations*), the Department proposes that normally we will calculate an average to average comparison by weight-averaging sales during the entire POI. However, the Deparment may resort to shorter time periods where the normal values, export prices, or constructed export prices for sales included in an averaging group differ significantly over the course of the POI.

We agree with petitioner that time significantly influences price comparability in this case. An analysis of the record evidence indicates that price trends in the United States and Taiwan were essentially moving in tandem, *i.e.*, steadily rising over the POI, as were cost trends (*see Price Analysis Memorandum* dated March 20, 1996). This data tends to support the fact that prices of PVA and costs for its main input, vinyl acetate monomer (VAM), were influenced to a significant extent by world market prices. Notwithstanding this fact, and in the face of an upwardly moving cost trend during the POI, in the last six weeks of the POI Chang Chun departed from its normal spot sale selling practice and entered into several long-term contracts at prices which diverged significantly from the price trends in the first ten and a half months, and for considerably different quantities than what respondent had been selling previously through spot sales over a comparable time period.

The record evidence shows a distinct dividing line between price trends in the home market prior to February 15, 1995, when the first of the long-term contracts was entered into. While the price trend in the United States did not significantly differ in the last month and a half from the price trend evident throughout the first ten and a half months of the POI, the price trend in Taiwan in the last month and a half of the POI changed significantly from that of the first ten and a half months. Therefore, we find that price trends for NV differed significantly over time. This approach is consistent with the Department's past practice in such cases as *Final Determination of Sales at Less Than Fair Value: Nitrocellulose From Brazil*, 55 FR 23120 (June 6, 1990) (influence of time on home market sales in hyperinflationary economy), and *Final Determination of Sales at Less Than Fair Value: Fresh Kiwi Fruit From New Zealand*, 57 FR 13695 (April 17, 1992) (influence of time on home market sales of perishable agricultural products).

Moreover, the change in the home market price trends was accompanied by a change in selling practice from selling PVA on a spot sale basis to entering into long-term contracts for quantities to be delivered over a substantially longer time period. Thus, the change in selling practice enhanced the effect of time on price comparability. Because time affects price comparability, we have used two averaging periods: period 1, encompassing sales from April 1, 1994 to February 14, 1995, and period 2, covering sales from February 15, 1995 to March 31, 1995. These averages calculated by the Department effectively take into account the effect of time on price comparability.

The monthly averaging proposed by petitioner is unnecessary. Because price trends in both markets closely tracked each other except in the last 6 weeks of the POI, as described above, the evidence indicates that price comparability is unaffected by time in the first ten and half months of the POI. We reviewed the data submitted by petitioner and found insufficient information concerning the assumptions petitiioner relied upon to perform its statistical tests. As a result, we have concluded that the monthly averages proposed by petitioner are unwarranted (*see Price Analysis Memorandum*).

Comment 4: Level of Trade.

Chang Chun and Monsanto argue that comparisons should be made at the same level of trade, which they define as the position of the customer within the channels of distribution. Both parties contend that, pursuant to section 773(a)(7)(A), the "functions of the seller" analysis is only relevant when examining whether a level of trade adjustment should be applied. Accordingly, these parties contend that comparisons should be made at the same level of trade, defining "distributors", "end-users", and "retailers" as distinct levels of trade. These parties further assert that a "retailer" level of trade exists as a separate level of trade in the home market. In support of this argument, Monsanto adds that a pattern of consistent price differences supports consideration of customer groups as a separate level of trade and, in this regard, sales to retailers qualify as a distinct level of trade.

Petitioner claims that a "retail" level of trade does not exist for this industry and therefore sales to such customers should not be considered to be at a separate level of trade.

DOC Position: Levels of trade are defined by the functions of the seller, not the class of customer. Level of trade is defined as the ". . . difference between the actual functions performed by the sellers at the different levels of trade in the two markets" (section 773(a)(7)(A)(i) of the Act; *see* also *Preliminary Determination of Sales at Less Than Fair Value: Certain Pasta from Italy* (61 FR 7472, February 28,

1996) and *Preliminary Results of Antidumping Administrative Review: Stainless Steel Wire Rod from France* (61 FR 8915, March 6, 1996). As discussed above, we found no differences in selling functions between the customer categories defined by Chang Chun, nor did Chang Chun claim any differences in selling functions between these categories.

Accordingly, we find no basis for considering any of these categories to be separate levels of trade.

Although we have rejected the contention that the class of the customer forms the basis for level of trade, in composing an averaging group, customer classification is a factor the Department may take into account (*see SAA*). The record establishes that there are distinct customer classifications in both markets, and that Chang Chun offered significantly different prices, depending on the customer category (including different prices to home market retailers). Therefore, we have made comparisons of average prices within the same customer class wherever possible. Where such comparisons were not possible, we made comparisons without regard to customer class.

Comment 5: Discounts and Rebates on Home Market Sales.

Petitioner contends that, because the Department was unable to verify reported per-unit amounts of "quantity discounts" and "special discounts" on home market sales, all such discount claims should be rejected. Further, petitioner notes that some of these "discounts", which we considered as rebates in the preliminary determination, were granted after the filing of the petition and therefore should be rejected in accordance with Department practice (*see Final Determination of Sales at Less Than Fair Value: Color Negative Photographic Paper and Chemical Components Thereof from Japan*, 59 FR 16177, April 6, 1994).

Chang Chun responds that, although the classification of a discount as a "quantity" or "special" discount may have been incorrect, the Department was able to verify that the customer received discounts equal to the amount claimed on each transaction. Chang Chun adds that its discount policy was consistent between the period prior to the filing of the petition, and the period subsequent to it. Thus, Chang Chun contends that there is no relationship between its discount programs and the filing of the petition and, therefore, Chang Chun's discount claims should be accepted as claimed.

DOC Position: We were unable to verify the specific discount amounts claimed for individual home market transactions. Therefore, we cannot accept the transaction-specific amounts claimed for these transactions. We were able to verify, however, that certain customers received credits after sales that equalled the total amounts of "quantity" or "special" discounts claimed for sales to that customer. Further, we verified that Chang Chun's normal practice was to grant its customers periodic discounts in the form of credits, or rebates, based on the volume of PVA purchases (*see* Chang Chun Sales Verification Report at pages 10 and 11).

While Chang Chun may have granted some of these discounts after the filing of the petition, in most cases, the discounts were granted for sales made prior to the petition filing on the same basis, and in the same manner as such payments had been made, and credits had been granted prior to the filing of the petition. We found no evidence to conclude that post-petition discounts were granted for programs established after the filing of the petition. Thus, we find no basis to reject these discount claims solely because the customer received them after the petition was filed.

Because Chang Chun's revenues from PVA sales were reduced by these discounts amounts, we have revised the "quantity" and "special" discount amounts in the calculation of normal value by allocating the total of these discounts equally among eligible sales to each eligible customer on the basis of the respective total discount amounts and sales value to that customer.

Comment 6: Quantity Discount Claim.

Chang Chun argues that, because it granted quantity discounts on at least 20% of its sales, NV should be calculated based on sales with quantity discounts, as provided for under 19 CFR 353.55(b)(1) of the Department's pre-URAA regulations. Accordingly, Chang Chun states that EP should be adjusted to reflect the quantity discount granted to comparable sales in the home market.

Petitioner contends that the quantity discounts claimed on home market sales should be rejected because the Department was unable to verify that quantity discounts were actually granted on a unified basis to substantially all of Chang Chun's home market customers. Petitioner also argues that the Department was unable to verify that such discounts actually applied to 20% of home market sales.

DOC Position: We agree with petitioner. To be eligible for a quantity-based discount, a respondent must demonstrate that the discounts reflect savings specifically attributable to the production of the different quantities, or that the respondent granted quantity discounts of at least the same magnitude on 20% or more of sales of such or similar merchandise (*see* 19 CFR 353.55(b)). If either of these tests is met, the Department applies a discount adjustment equal to the minimum discount given.

As discussed in Comment 5, Chang Chun could not demonstrate that the specific amounts claimed as "quantity discounts" on specific transactions had any connection to the quantity sold, but rather, as described above, these discounts were in the nature of volume rebates. Moreover, the Department also requires a respondent to establish that it gave discounts on a uniform basis, which were made available to substantially all home market customers (*see, e.g., Final Determination of Sales at Less Than Fair Value: Brass Sheet and Strip from the Netherlands*, 53 FR 23431, June 22, 1988). This requirement was expressed in the Department's antidumping questionnaire at pages B–15 and B–16. However, Chang Chun made no attempt to demonstrate this; indeed, Chang Chun specifically stated that only customers classified as "distributors" were eligible for the "home market quantity discount program" (*see, e.g.*, letter from Ablondi, Foster, Sobin & Davidow to Ronald Brown of September 19, 1995, at page 3). Accordingly, we have disallowed this claimed adjustment.

Comment 7: Treatment of U.S. Tolled Sales.

Chang Chun argues that the Department should follow its "long established past practice" and estimate a separate dumping margin for its tolled sales (*i.e.*, vinyl acetate monomer owned by a U.S. customer but further processed into PVA by Chang Chun) by comparing Chang Chun's price for tolling to Chang Chun's tolling cost.

Petitioner states that the Department should not analyze these tolled transactions because the U.S. customer withdrew its request that a separate margin be calculated for these sales, and the Department has already determined not to analyze these sales (*See* Memorandum to Barbara Stafford dated August 8, 1995).

DOC Position: We agree with petitioner. As stated in the memorandum cited by the petitioner, as a result of the customer's withdrawal of its request for a separate rate in the investigation, and that the customer's participation is not otherwise essential to this investigation, we have not included tolled transactions in our

investigation. We note that our past practice of analyzing tolling transactions has changed. The party contracting for the tolling, rather than the processor, will be considered the producer/exporter of the merchandise (*see Proposed Regulations*, section 353.401(h) at 7381, as well as discussion at 7330).

Comment 8: Allocation of Acetic Acid Costs for COP Analysis.

Petitioner does not object to Chang Chun's treatment of PVA and acetic acid as coproducts of a joint production process. Petitioner does, however, object to the respondent's allocation of the joint production costs on the basis of the two product's relative production volumes. Petitioner asserts that because PVA has a significantly higher per-unit value than acetic acid, production costs should be allocated to the coproducts based upon their relative sales values. Petitioner adds, however, that if the Department determines not to apply a value-based allocation methodology in computing the costs of PVA and acetic acid, then it should treat acetic acid as a byproduct by allocating all costs to PVA and offsetting such costs by revenues earned from acetic acid sales.

Chang Chun defends its treatment of acetic acid as a coproduct as well as its volume-based cost allocation methodology and urges the Department to rely on these methodologies in order to compute PVA costs for the final determination. According to Chang Chun, acetic acid is a coproduct of PVA because it meets each of the Department's criteria for identifying and accounting for jointly-produced merchandise as either byproducts or coproducts. Chang Chun also maintains that the production volume allocation methodology it used to compute PVA costs for COP and CV is the same method used by the company to compute both PVA and acetic acid costs in its normal books and records. Chang Chun adds that its volume-based cost allocation method is acceptable under Taiwan's generally accepted accounting principles (GAAP), and it was in place at the company for several months prior to the filing of the petition.

Monsanto supports Chang Chun's accounting treatment of PVA and acetic acid as coproducts, and agrees with the respondent that its volume-based allocation methodology is appropriate in this case.

DOC Position: We agree with both petitioner and Chang Chun that acetic acid should be treated as a coproduct of PVA production. As discussed in our preliminary determination, we analyzed four of the five specific factors that the Department relies on in determining whether a product should be treated as a coproduct (*see* Memorandum from Art Stein to Chris Marsh, September 29, 1995). Based on our analysis and our verification findings, we have now examined all of these factors and have concluded that acetic acid is a coproduct in the production process of polyvinyl alcohol (*see*, also, *Elemental Sulphur from Canada; Final Results of Antidumping Finding Administrative Review*, 61 FR 8239, March 4, 1996). Having made that determination, however, we disagree with Chang Chun's contention that its volume-based cost allocation methodology is appropriate in this instance.

Like other joint production processes, PVA production is characterized by certain joint costs which cannot readily be identified or traced to the individual products resulting from the joint processing performed in the manufacture of PVA. In PVA production, chemical inputs are mixed together in a process that results in two distinct products: PVA and acetic acid. These products are produced simultaneously up to a point, the split-off point, after which they become physically separated from one another. This situation presents a unique cost allocation issue because prior to the physical split-off point, the production costs, like the joint products themselves, are commingled. We note that this situation differs from cost allocations found in a batch production process which yields two or more grades of a single product (*e.g.*, steel bar). In such situations, the individual units of production can be identified, apart from one another, throughout the production process, thus presenting a readily identifiable basis upon which to allocate costs. In contrast, where a single process commingles inputs up to a split-off point, allocating joint costs to the distinct products becomes more difficult.

While there are several acceptable methods of allocating joint costs among simultaneously produced coproducts, in general, each of these acceptable methods is based on either some measure of relative value or on the physical units produced (*e.g.*, number of units, weight, etc.) (*See Cost Accounting: A Managerial Emphasis*, Charles T. Horngren, 5th edition, Prentice-Hall Inc., pp. 531–539). The choice of allocation method can have a profound impact on the outcome of relative costs, depending on the significance of the joint costs involved and the nature of the products resulting from the process.

This case presents an additional complication because of the involvement of Dairen, an affiliated supplier, which produces VAM and sells it to Chang Chun. VAM is the major raw material input in PVA production. Chang Chun, in turn, uses the VAM (from Dairen) to produce PVA and acetic acid. Chang Chun then sells much of its acetic acid production back to Dairen which, in turn, uses it as a major input in its production of VAM. Because of the nature of this cycle and the affiliation between Chang Chun and Dairen, it is important that the method used to allocate joint costs not distort the cost of PVA and acetic acid.

Section 773(f)(1)(A) of the Act provides that the Department will calculate costs based on the records of the producer of the merchandise, if such records are kept in accordance with the GAAP of the exporting country and reasonably reflect the costs associated with the production and sale of the merchandise (*see* also *Final Determination of Sales at Less Than Fair Value: Canned Pineapple Fruit From Thailand, (Canned Pineapple)*, 60 FR 29559, June 5, 1995, where we stated that the Department's practice is to adhere to an individual firm's recording of costs in accordance with GAAP of its home country if the Department is satisfied that such principles reasonably reflect the costs of producing the subject merchandise). The Department's practice has been sustained by the Court of International Trade (CIT) (*see, e.g., Laclede Steel Co.* v. *United States, Slip Op.* 94–160 at 21–25 (CIT October 12, 1994), where the CIT upheld the Department's decision to reject respondent's reported depreciation expenses in favor of verified information obtained directly from the company's financial statements that was consistent with Korean GAAP). In addition, pursuant to section 773(f)(1)(A), the Department may only consider evidence from an exporter or producer regarding the proper allocation of costs if such allocations have been used historically by the exporter or producer (emphasis added).

Under its current accounting system, Chang Chun allocates joint production costs based on the relative production volumes of PVA and acetic acid. According to the company's financial statements, the current allocation methodology is accepted under Taiwan's GAAP. Although the company's financial statements indicate that this allocation methodology is in accordance with its home country GAAP, we note that Taiwan's GAAP does not endorse this methodology as the only acceptable cost allocation methodology. In fact, during verification, company officials stated

that they did not know how costs had been allocated under the earlier method (see Cost Verification Report at page 2), however, they stated that the company's previous allocation methodology was also in accordance with Taiwan's GAAP.

Chang Chun's current cost allocation methodology was adopted in 1994. Prior to 1994, the company relied upon a different methodology to allocate costs between PVA and acetic acid. As noted above, company officials could not explain the basis for the earlier methodology. Accordingly, based on our verification findings, we cannot conclude that a volume-based allocation has been used historically by Chang Chun.

Moreover, we find that in this case, the allocation of costs equally to each kilogram produced results in an unreasonable division of joint production costs between PVA and acetic acid. Basing the allocation of costs solely on production volume ignores the vastly different revenue-producing powers of the joint products at issue in this case. Specifically, while the relative volumes of Chang Chun's PVA and acetic acid output are almost equal, the price commanded by PVA is much greater than that of acetic acid. Thus, the company's volume-based cost allocation results in large profits accruing to PVA, while significant losses result from the sale of acetic acid. The Department, therefore, has determined that it is appropriate to reject Chang Chun's volume-based allocation methodology because it does not reasonably reflect the costs associated with the production and sale of PVA, as required by statute (*see* also *Canned Pineapple*, where the Department rejected respondent's argument for a weight-based joint cost allocation for pineapple and used a value-based cost allocation, citing as one of its reasons the relationship of the revenue-producing powers of the joint products that resulted from the pineapple production process).

As noted above, the need for an appropriate allocation method for joint costs is made all the more important in this case because of the unique nature of the transactions between Chang Chun and its affiliated supplier, Dairen. Because costs are over-allocated to acetic acid as a result of Chang Chun's volume-based methodology, such costs may not be fully recovered when the acetic acid is sold to Dairen. In turn, the cost of VAM produced from acetic acid may be understated when it is resold to Chang Chun for PVA production.

Given the fact that we cannot rely upon Chang Chun's own allocation methodology, the vastly different revenue-producing powers of the two joint products, and the fact that the affiliation between Chang Chun and Dairen has the potential to result in understatement of certain PVA costs, we believe a value-based allocation methodology produces a more reasonable and accurate reflection of costs in this case.

Therefore, we are allocating joint production costs between PVA and acetic acid using the relative value of each product calculated on the basis of a two-year period prior to the POI (*see Canned Pineapple*). We believe that by using sales of both products over an extended period prior to this investigation, prices can reasonably be relied upon to form the basis for allocating joint production costs, particularly in this case where acetic acid and PVA are commodity products, and their selling prices are influenced by world market forces of supply and demand.

Comment 9: Chang Chun's VAM Cost.

Petitioner claims that Chang Chun incorrectly valued VAM that it purchased from Dairen, an affiliated supplier of VAM, at the transfer price for those months in which the transfer price was less than Dairen's COP. Accordingly, petitioner contends that the Department should adjust Chang Chun's VAM cost for the specific purchases of VAM that were made at less than Dairen's monthly COP.

DOC Position: We disagree with petitioner. We verified that, for each month of the POI, the transfer price paid by Chang Chun for its VAM purchases from Dairen exceeded Dairen's COP. We therefore relied on the transfer price between the two affiliated companies as the basis for valuing VAM in our calculation of Chang Chun's COP.

Comment 10: Unreconciled Differences Between Chang Chun's Records and Questionnaire Response.

Petitioner notes that during verification, the Department found unreconciled differences in PVA costs between Chang Chun's internal books and the costs as submitted to the Department in its questionnaire response. Most of these discrepancies related to the cost of material inputs for PVA production. Petitioner maintains that the Department should increase Chang Chun's reported PVA costs to reflect the additional costs that result from these discrepancies.

DOC Position: We agree with petitioner. At verification, Chang Chun informed the Department that it had detected a clerical error in its submission which underreported its material costs. For the final determination, we increased material costs to account for this error. Our correction of this error resolves the discrepancies noted by petitioner.

Comment 11: Depreciation.

Petitioner claims that the Department should adjust depreciation expense incurred for PVA production to reflect the amount reported in Chang Chun's financial statements, rather than the amount reported for tax purposes (which Chang Chun reported in its questionnaire response). Petitioner contends that the Department's normal methodology is to rely on costs recorded for financial statement purposes unless there is reason to believe that such costs are distortive.

Chang Chun claims that petitioner's suggested depreciation adjustment relates to the boiler department's cogeneration equipment, which produces power and steam used by not only the PVA/acetic acid cost center, but also by non-subject product cost centers. Therefore, Chang Chun asserts that any depreciation adjustment should be limited to PVA/acetic acid's percentage share of the costs of the boiler department.

DOC Position: We agree with petitioner that Chang Chun underreported its submitted depreciation expense. The Department normally requires that a respondent report depreciation expense calculated based on the methods it normally uses for financial statement purposes, unless such methods distort production costs. We also agree with Chang Chun that PVA/acetic acid production should only be allocated with its share of the costs associated with the co-generation equipment. Based on our review of Chang Chun's fixed asset and depreciation records during verification, we found no reason to believe that Chang Chun's method of computing depreciation expense for financial statement purposes distorts the company's PVA production costs. We therefore adjusted the company's submitted tax basis depreciation expense to reflect depreciation computed for PVA/acetic acid production assets based on Chang Chun's normal financial statement depreciation method.

Comment 12: Over-packing.

Petitioner asserts that because Chang Chun systematically over-packs PVA above the nominal weight and the customer pays for only the nominal weight, PVA's COP should be adjusted in order to equate the cost of the product as packed with the price of the product as sold.

Chang Chun claims that because sales are recorded on the basis of nominal quantities rather than the over-packed quantities, in order to be consistent, Chang Chun records production based on nominal quantities. Thus, Chang Chun asserts that there is no need for the Department to adjust the company's costs to reflect the over-packed quantities.

DOC Position: We verified that both production and sales were reported based on nominal weight, therefore, no further adjustment is necessary.

Comment 13: Dairen's VAM Costing Issues.

Petitioner notes that Dairen shut down its plant in January 1994 and asserts that the costs of the shutdown should be included as part of Dairen's 1994 VAM production costs. Petitioner also claims that Dairen's VAM COP should be increased to account for the cost of purchased liquid nitrogen. Furthermore, petitioner contends that the Department should reject Dairen's allocation of engineering and indirect labor costs to non-subject merchandise because it represents a deviation from Dairen's 1994 audited financial statements and is merely an internal management estimate founded upon no verifiable, objective criteria.

Chang Chun maintains that, since Dairen's plant maintenance shutdown occurred prior to the POI, no adjustment to include any portion of these costs is necessary. Chang Chun also claims that Dairen's purchased nitrogen was sold at a profit and that the cost of the nitrogen should not be charged to VAM production because the sales revenue was not deducted from the production costs. Furthermore, Chang Chun asserts that, because both its engineering and indirect labor costs benefit VAM and PVA emulsions production, its allocation of these costs to both products is appropriate.

DOC Position: We agree with petitioner that a portion of Dairen's plant shutdown costs should be added to Dairen's reported cost of producing VAM because we consider the shutdown costs a form of major maintenance which benefits production over the entire POI. Accordingly, a *pro rata* share of the shutdown costs incurred in the one month of 1994 that is part of the POI should be allocated to the cost of producing VAM during the POI.

Because the cost of VAM used in the production of PVA is based upon the transfer price, no adjustment is required. Dairen's transfer price to Chang Chun exceeds its COP for VAM (including the cost of purchased liquid nitrogen). Therefore there would be no impact on Chang Chun's COP for PVA.

Lastly, we disagree with petitioner that Dairen's allocation of engineering and indirect labor costs to non-subject merchandise should be rejected. During verification, we found that these engineering and indirect labor costs do benefit certain non-subject products. Accordingly, we consider it reasonable to allocate these costs to non-subject merchandise.

Continuation of Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the Customs Service to continue to suspend liquidation of all entries of PVA from Taiwan, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse for consumption, on or after October 10, 1995, the date of publication of our preliminary determination in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated amount by which the normal value exceeds the export price, as shown below. This suspension of liquidation will remain in effect until April 7, 1996 (i.e., six months after the effective date of these instructions), in accordance with section 733(d) of the Act.

The weighted-average dumping margins are as follows:

Exporter/manufacturer	Weighted-average margin percentage
Chang Chun Petrochemical Co., Ltd	19.21
All others	19.21

The all others rate applies to all entries of subject merchandise except for entries of merchandise produced by Chang Chun.

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. As our final determination is affirmative, the ITC will determine whether these imports are causing material injury, or threat of material injury, to the industry within 45 days. If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated and all securities posted will be refunded or cancelled. If the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

This determination is published pursuant to section 735(d) of the Act.

Dated: March 21, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

Certain Forged Stainless Steel Flanges From India; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request from one respondent, the Department of Commerce (the Department) has conducted an administrative review of the antidumping duty order on certain forged stainless steel flanges (flanges) from India. The review covers one manufacturer/exporter of the subject merchandise to the United States for the period February 9, 1994 through January 31, 1995.

We have preliminarily determined that U.S. sales have been made below the normal value (NV). If these preliminary results are adopted in our final results of administrative review, we will instruct U.S. Customs to assess antidumping duties equal to the difference between the United States price (USP) and the NV. Interested parties are invited to comment on these preliminary results. Parties who submit arguments in this proceeding are requested to submit with the argument (1) a statement of the issue, and (2) a brief summary of the argument.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: John Kugelman, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone: (202) 482–5253.

SUPPLEMENTARY INFORMATION:

Background

On February 9, 1994, the Department published in the **Federal Register** (59

FR 5994) the antidumping duty order on certain forged stainless steel flanges from India. On January 12, 1995, the Department published in the **Federal Register** a notice of "Opportunity to Request an Administrative Review" of this antidumping duty order for the period of February 9, 1994 through January 31, 1995 (60 FR 6524). We received a timely request for review from the respondent, Akai Impex, Ltd. (Akai). On February 15, 1995, the Department initiated a review of Akai (60 FR 8629). The period of review (POR) is February 9, 1994 through January 31, 1995.

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act.

Scope of the Review

The products covered by this order are certain forged stainless steel flanges both finished and not-finished, generally manufactured to specification ASTM A–182, and made in alloys such as 304, 304L, 316, and 316L. The scope includes five general types of flanges. They are weld neck, used for butt-weld line connection, threaded, used for threaded line connections, slip-on and lap joint, used with stub-ends/butt-weld line connections, socket weld, used to fit pipe into a machined recession, and blind, used to seal off a line. The sizes of the flanges with the scope range generally from one to six inches; however, all sizes of the above described merchandise are included in the scope. Specifically excluded from the scope of this order are cast stainless steel flanges. Cast stainless steel flanges generally are manufactured to specification ASTM–A–351. The flanges subject to this order are currently classifiable under subheading 7307.21.1000 and 7307.21.5000 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of this order remains dispositive.

The review covers one Indian manufacturer/exporter, Akai, and the period February 9, 1994 through January 31, 1995.

United States Price (USP)

In calculating USP for Akai, the Department treated respondent's sales as export price (EP), as defined in section 772(a) of the Act, because the subject merchandise was sold to unaffiliated U.S. purchasers prior to the date of importation.

We calculated EP based on packed, delivered, duty-paid prices to unaffiliated customers in the United States. We made deductions from the gross unit price, where appropriate, for inland freight-plant/warehouse to port of exit, brokerage and handling, international freight, and U.S. customs duty, in accordance with section 772(c)(2)(A) of the Act. We added to the gross unit price packing costs for shipment to the United States, where applicable, pursuant to section 772(c)(1)(A) of the Act.

No other adjustments to USP were claimed or allowed.

Normal Value (NV)

A. Viability

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating NV, we compared Akai's volume of home market sales of the foreign like product to the volume of U.S. sales of the subject merchandise, in accordance with section 773(a)(1)(C) of the Act. Because Akai's aggregate volume of home market sales was less than five percent of its aggregate volume of U.S. sales for the subject merchandise, we determined that the aggregate quantity of the foreign like product sold in the exporting country is insufficient to permit a proper comparison with the sales of the subject merchandise to the United States. Therefore, in accordance with section 773(a)(1)(B), we chose Canada as the most appropriate third country market for comparison.

B. Model Match

We first searched for the third country model which is identical in characteristics with each U.S. model. When there were no contemporaneous sales of identical merchandise, we searched for the third country model which is most like or most similar in characteristics with each U.S. model. To perform the model match, we first searched for the most similar third country model with regard to alloy. If there were several third country models with identical alloy, we then searched among the models with identical alloy for the most similar third country model with regard to size. We continued this process with regard to type and standard. If, as a result of this analysis, several third country models were deemed equally similar, we chose the third country model which, when compared to the U.S. model, had the lowest difference in variable cost of manufacturing (difmer), provided the difmer did not exceed 20 percent of the total cost of manufacturing of the U.S. model.

For those U.S. models where no foreign like product was found with a difmer of less than 20 percent, we resorted to CV as the basis of NV, in accordance with section 773(a)(4) of the Act.

C. Constructed Value

In accordance with section 773(e) of the Act, we calculated CV based on Akai's cost of materials and fabrication employed in producing the subject merchandise, selling, general and administrative expense (SG&A) and profit incurred and realized in connection with the production and sale of the foreign like product, and U.S. packing costs. We used the costs of materials, fabrication, and G&A as reported in the CV portion of Akai's questionnaire response.

We used the U.S. packing costs as reported in the U.S. sales portion of Akai's questionnaire response. We based selling expenses and profit on the information reported in the third country sales portion of Akai's questionnaire response. See Certain Pasta from Italy; Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination, 61 FR 1344, 1349 (January 19, 1996). For SG&A expenses and actual profit, we used the average of actual amounts incurred and realized by Akai, in connection with the production and sale of the foreign like product in the ordinary course of trade, for consumption in the foreign country, in accordance with section 773(e)(2)(B)(ii) of the Act.

D. Price-to-Price Comparisons

For those price-to-price comparisons where we did not resort to CV, we based NV on the prices at which the foreign like products were first sold for consumption in the third country market to an unrelated party, in the usual commercial quantities and in the ordinary course of trade and, to the extent practicable, at the same level of trade as the EP, in accordance with section 773(a)(1)(B)(ii) of the Act. Akai made all third country and EP sales of subject merchandise to the same level of trade. Pursuant to section 777A(d)(2) of the Act, we compared the EPs of individual transactions to the monthly weighted-average price of sales of the foreign like product. We made adjustments, where applicable, for expenses incident to placing the foreign like product in condition packed ready for shipment to the place of delivery to the purchaser, and for third country credit expenses, in accordance with section 773(a)(6)(B)(ii) of the Act. We increased third country price by U.S. packing costs in accordance with section 773(a)(6)(A) of the Act and reduced it by third country packing costs in accordance with section 773(a)(6)(B) of the Act. Prices were reported net of value-added taxes (VAT) and, therefore, no adjustment for VAT was necessary. In accordance with section 773(a)(6)(C) of the Act, we increased NV by adding U.S. credit expense. No other adjustments were claimed or allowed.

Preliminary Results of the Review.

As a result of this review, we preliminary determine that the following weighted-average dumping margin exists:

Manufacturer/ exporter	Period	Margin (percent)
Akai Impex, Ltd.	2/09/94–1/31/95	11.04

Parties to the proceeding may request disclosure within five days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication, or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in the case briefs and comments, may be filed not later than 37 days after the date of publication. Parties who submit argument in this proceeding are requested to submit with the argument (1) a statement of the issue and (2) a brief summary of the argument. The Department will issue the final results of the administrative review, including the results of its analysis of issues in any such written comments or at hearing, within 180 days of issuance of these preliminary results.

The Department shall determine, and Customs shall assess, antidumping duties on all appropriate entries. Individual differences between USP and NV may vary from the percentages stated above. The Department will issue appraisement instructions directly to Customs. The final results of this review shall be the basis for the assessment of antidumping dumping duties on entries of merchandise covered by the determination and for future deposits of estimated duties.

Furthermore, the following deposit requirements will be effective upon completion of the final results of these administrative reviews for all shipments of Flanges from India entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Act: (1) the cash deposit rate for Akai will be the rate established in the final results of administrative review; (2) for merchandise exported by manufacturers or exporters not covered in these reviews but covered in the original less-than-fair-value (LTFV) investigation or a previous review, the cash deposit will continue to be the most recent rate published in the final determination or final results for which the manufacturer or exporter received a company-specific rate; (3) if the exporter is not a firm covered in these reviews, or the original investigation, but the manufacturer is, the cash deposit rate will be that established for the manufacturer of the merchandise in the final results of these reviews, or the LTFV investigation; and (4) if neither the exporter nor the manufacturer is a firm covered in these or any previous reviews, the cash deposit rate will be 162.14 percent, the "all others" rate established in the LTFV investigation (59 FR 5994, February 9, 1994).

This notice serves as a preliminary reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

This notice serves as a preliminary reminder to importers of their responsibility to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)).

Dated: March 21, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

Court Decision and Continuation of Suspension of Liquidation: 1989–1990 Administrative Review of Tapered Roller Bearings and Parts Thereof From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: John Beck, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 482–3464.

SUMMARY: On February 27, 1996, in the case of *UCF America Inc. and Universal Automotive Co., Ltd.* v. *United States and the Timken Company*, Cons. Ct. No. 92–01–00049, Slip Op. 96–42 (UCF), the United States Court of International Trade (the Court) affirmed in part the Department of Commerce's (the Department's) results of redetermination on remand of the *Final Results of Sales at Less Than Fair Value: 1989–1990 Administrative Review of Tapered Roller Bearings and Parts Thereof from the People's Republic of China*. Consistent with the decision of the United States Court of Appeals for the Federal Circuit (Federal Circuit) in *Timken Co.* v. *United States*, 893 F.2d 337 (Fed. Cir. 1990) (*Timken*), the Department will not order the liquidation of the subject merchandise entered or withdrawn from warehouse for consumption prior to a "conclusive" decision in this case.

SUPPLEMENTARY INFORMATION:

Background

During 1987, the Department completed its investigation of tapered roller bearings from the People's Republic of China (*Final Determination of Sales at Less Than Fair Value: Tapered Roller Bearings From the People's Republic of China* (52 FR 19748, May 27, 1987)). In addition to setting a rate for Premier Bearing (a Hong Kong trading company), the Department issued an "all others" rate of 0.97 percent.

Subsequently, interested parties challenged the final determination. The

Court remanded the case and, on February 26, 1990, the Department issued an amendment to the final determination (*Amendment to Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order in Accordance With Decision Upon Remand: Tapered Roller Bearings From the People's Republic of China* (55 FR 6669, Feb. 26, 1990)). In its amendment, the Department issued a new "all others" rate of 2.96 percent.

On July 26, 1990, the Department initiated the third administrative review of tapered roller bearings from the People's Republic of China, covering the period June 1, 1989 through May 31, 1990 (*Initiation of Antidumping Duty Administrative Reviews* (55 FR 30490, July 26, 1990)). The Department initiated on CMEC (a state trading company) and Premier.

In 1991, the Department established a new policy concerning non-market economies. Under this policy, all non-market economy exporters are presumed to be a single enterprise controlled by the central government, which receives a single rate (the "PRC rate") (*see* the *Final Determination of Sales At Less Than Fair Value: Heavy Forged Hand Tools, Finished or Unfinished, With or Without Handles, From the People's Republic of China* (56 FR 241, Jan. 3, 1991); and *Final Results of Antidumping Duty Administrative Review: Iron Construction Castings from the People's Republic of China* (56 FR 2742, Jan. 24, 1991)). A company is entitled to a separate rate only if it establishes that it is not subject to de jure or de facto control by the central government (*see* the *Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China* (59 FR 22585, May 2, 1994)).

The Department issued its preliminary results for the third administrative review of TRB's from the PRC on October 4, 1991 (*Preliminary Results of Antidumping Duty Administrative Review: Tapered Roller Bearings and Parts Thereof From the People's Republic of China* (56 FR 50309, Oct. 4, 1991)). The Department preliminarily issued separate rates to all reviewed companies. *Id.* at 50310.

On December 31, 1991, the Department issued its final results (*Final Results of Antidumping Duty Administrative Review: Tapered Roller Bearings and Parts Thereof From the People's Republic of China* (56 FR 67590, Dec. 31, 1991)). The Department issued separate rates for all companies participating in the review. For non-reviewed companies, the Department issued "an 'all others' rate equal to the highest rate for any company in this administrative review." *Id.* at 67597.

Interested parties challenged the results of the third administrative review. On December 5, 1994, the CIT issued its opinion in *UCF America* v. *United States*, 870 F. Supp. 1120 (CIT 1994), remanding the results to the Department. The CIT instructed the Department to: 1) reinstate the "all others" cash deposit rate to unreviewed companies which was applicable prior to the final results for entries which have not become subject to assessment pursuant to a subsequent administrative review; and 2) eliminate the arithmetic error with regard to Jilin's foreign inland freight costs.

The Department filed its remand results on March 6, 1995. In the remand results, the Department: 1) reinstated the PRC rate for the third review at 2.96 percent and 2) corrected the error in the foreign inland freight calculation for Jilin. However, the Department stated that while it agreed that it incorrectly established an "all others" rate of 8.83 percent in the final results of the review, its reasoning differed from that of the Court.

On February 27, 1996, the Court sustained the Department's remand results (*see UCF America Inc. and Universal Automotive Co., Ltd.* v. *United States and the Timken Company*, Cons. Ct. No. 92–01–00049, Slip Op. 96–42. The Court stated that it "sees no basis for a "PRC rate" but finds that Commerce properly 1) reinstated the "all others" cash deposit rate of 2.96% to unreviewed companies for entries which have not become subject to assessment pursuant to a subsequent administrative review; and 2) corrected the arithmetic error related to foreign inland freight costs for Jilin Machinery Import and Export Corporation." Thus, the Court sustained the rate applied by the Department but rejected the "PRC rate" terminology. .

Continuation of Suspension of Liquidation

In its decision in *Timken*, the Federal Circuit held that, pursuant to 19 U.S.C. 1516a(e), the Department must publish notice of a decision of the Court or Federal Circuit which is "not in harmony" with the Department's determination. Publication of this notice fulfills this obligation. The Federal Circuit also held that in such a case, the Department must suspend liquidation until there is a "conclusive" decision in the action. A "conclusive" decision cannot be reached until the opportunity to appeal expires or any appeal is decided by the Federal Circuit. Therefore, the Department will continue to suspend liquidation at the current rates pending the expiration of the period to appeal or pending a final decision of the Federal Circuit if *UCF* is appealed.

Dated: March 21, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

[C–201–001]

Leather Wearing Apparel From Mexico; Notice of Intent To Terminate the Countervailing Duty Administrative Review and Notice of Intent To Amend the Revocation of the Countervailing Duty Order

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Intent to Terminate the Countervailing Duty Administrative Review and Notice of Intent to Amend the Revocation of the Countervailing Duty Order.

SUMMARY: On September 6, 1995, the Court of Appeals for the Federal Circuit (CAFC) ruled that, absent an injury determination by the International Trade Commission, the Department of Commerce (the Department) may not assess countervailing duties under section 1303(a)(1) on entries of dutiable merchandise which occurred on or after April 23, 1985, the effective date of Mexico's Bilateral Agreement with the U.S. *Ceramica Regiomontana* v. *U.S.*, Court No. 95–1026 (Fed. Cir., Sept. 6, 1995) (*Ceramica*). As a result, we intend to terminate this administrative review, which covers the period January 1, 1994 through December 31, 1994, and amend the effective date of the revocation of the countervailing duty order on Mexican leather wearing apparel. The amended revocation would apply to all unliquidated entries of subject merchandise entered, or withdrawn from warehouse, for consumption on or after April 23, 1985. We invite interested parties to comment on our intent to terminate this administrative review and to amend the revocation of the order.

EFFECTIVE DATE: March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Brian Albright or Cameron Cardozo, Office of Countervailing Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–2786.

SUPPLEMENTARY INFORMATION:

Background

The countervailing duty order on leather wearing apparel from Mexico was issued on April 10, 1981 pursuant to section 303 of the Tariff Act of 1930, as amended (the Act). No injury determination was required for cases conducted pursuant to section 303. In the Uruguay Round Agreements Act of 1994 (URAA), which amended the Act, section 303 was repealed because the new Agreement on Subsidies and Countervailing measures (SCM Agreement) prohibits the assessment of countervailing duties on imports from a member of the WTO without an affirmative injury determination. The URAA added section 753 to the Act which provided domestic interested parties an opportunity to request an injury investigation for orders that had been issued pursuant to section 303.

Because no domestic interested parties exercised their right under section 753(a) of the Act to request an injury investigation on Mexican leather wearing apparel, the International Trade Commission made a negative injury determination with respect to this order, pursuant to section 753(b)(4) of the Act. As a result, the Department revoked this countervailing duty order, effective January 1, 1995, pursuant to section 753(b)(3)(B) of the Act. *Revocation of Countervailing Duty Orders*, 60 FR 40,568 (August 9, 1995). Administrative reviews of periods prior to January 1, 1995 could still be conducted, and on April 28, 1995 an administrative review of this order was requested for the period January 1, 1994 through December 31, 1994. 60 FR 25885 (May 15, 1995).

On September 6, 1995, in a case involving the countervailing duty order on ceramic tile from Mexico, the CAFC ruled that, absent an injury determination by the International Trade Commission (ITC), the Department may not assess countervailing duties under section 1303(a)(1) on entries from Mexico of dutiable merchandise which occurred on or after April 23, 1985, the effective date of Mexico's Bilateral Agreement with the U.S. (*Ceramica* at 8). On February 21, 1996, the Department implemented the CAFC's ruling in the case of Mexican ceramic tile. 61 FR 6630. Because the order on leather wearing apparel is a Mexican order and involves the same set of pertinent facts (i.e., the ITC did not make an injury determination), the CAFC's decision applies to the order on leather wearing apparel from Mexico.

As a result, we intend to terminate the instant review of this countervailing duty order. Also, we intend to amend the previous revocation of this order to make the revocation for all unliquidated entries effective April 23, 1985, rather than January 1, 1995, in recognition of the *Ceramica* decision.

Scope of the Review

Imports covered by this review are shipments of Mexican leather wearing apparel. These products include leather coats and jackets for men, boys, women, girls, and infants, and other leather apparel products including leather vests, pants, and shorts. Also included are outer leather shells and parts and pieces of leather wearing apparel. This merchandise is currently classifiable under *Harmonized Tariff Schedule* (HTS) item numbers 4203.10.4030, 4203.10.4060, 4203.10.4085 and 4203.10.4095. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

Notice of Intent To Terminate the Countervailing Duty Administrative Review and Notice of Intent To Amend the Revocation of the Countervailing Duty Order

This notice serves as notification to the public of our intent to terminate the instant administrative review and amend the revocation of the countervailing duty order on Mexican leather wearing apparel to be effective April 23, 1985. If our final determination remains unchanged from this notice of intent, the revocation will apply to all unliquidated entries of subject merchandise entered, or withdrawn from warehouse, for consumption on or after April 23, 1985.

Therefore, we intend to instruct the U.S. Customs Service to terminate the suspension of liquidation and liquidate all unliquidated entries of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after April 23, 1985, without regard to countervailing duties. We intend to instruct the U.S. Customs Service to refund with interest any estimated countervailing duties collected with respect to those entries. We note that the requirements for a cash deposit of estimated countervailing duties were previously terminated in conjunction with the section 753 determination.

Interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on this notice of intent within 21 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted five days after the time limit for filing the case brief. Parties who submit argument in this proceeding are requested to submit with the argument (1) a statement of the issue, and (2) a brief summary of the argument. Any hearing, if requested, will be held two days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e).

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under section 355.38(c), are due. The Department will publish its final determination with respect to this intended termination and revocation, including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

This notice is published in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: March 21, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

Export Trade Certificate of Review

ACTION: Notice of Application.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: W. Dawn Busby, Director, Office of Export Trading Company Affairs, International Trade Administration, (202) 482–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal

government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination of whether a Secretary of Commerce should issue a Certificate to the applicant. An original and five (5) copies of such comments should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 1800H, Washington, D.C. 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 96–00002."

Summary of the Application

Applicant: U.S. Leaf Tobacco Exporter, L.L.C., c/o Henry Babb, Jr., Esq., Narron, Holdford, Babb, Harrison & Rhodes, PA, Wilson, North Carolina 27894–0279, Contact: Laurence T. Sorkin, Esq., Telephone: (212) 701–3209.

Application No.: 96–00006

Date Deemed Submitted: March 18, 1996.

Members (in addition to applicant): Universal Leaf Tobacco Company, Incorporated, Richmond, Virginia; DIMON International, Inc., Farmville, North Carolina; Unitob Inc., Greenville, North Carolina; Standard Commercial Corporation, Wilson, North Carolina; G.F. Vaughan Tobacco, Co., Inc., Lexington, Kentucky.

Note: This application is made on behalf of the Members listed above, as well as any U.S. tobacco dealer which is a wholly owned or majority owned subsidiary of a Member or of its controlling entity. A list of the subsidiaries of each Member or its controlling entity is attached hereto as Attachment I.

U.S. Leaf Tobacco Exporters, L.L.C. seek a Certificate to cover the following specific Export Trade, Export Markets, and Export Trade Activities and Methods of Operations.

Export Trade

Products

Green leaf tobacco (SIC 5159)

Services

Processing and shipment of green leaf tobacco (SIC 2141)

Export Trade Facilitation Services (as they relate to the Export of Products and Services.)

Consulting, market research, advertising, marketing, insurance, product research and design, legal assistance, transportation (including trade documentation and freight forwarding), communication and processing of orders, warehousing, foreign exchange, financing, and taking title to goods.

Export Markets

The Export Markets are foreign government-owned purchasers known as State Trading Entities ("STEs") and are limited to the following: Algeria, China, Egypt, Korea, Lebanon, Morocco, Thailand, Taiwan, Turkey, Tunisia, and Vietnam.

Export Trade Activities and Methods of Operation

1. In connection with the promotion and sale of Members' Products and Services into the Export Markets, U.S. Leaf Tobacco Exporters, L.L.C. and/or one or more of its Members may:

a. Solicit orders or bids from STEs in Export Markets.

b. Design and execute foreign marketing strategies for sales in Export Markets.

c. Quote charges to STEs for processing, shipping and handling services relating to the sale of U.S. grown tobacco to such buyers. Such quotes may be made by one or more Members individually or by Applicant on behalf of such Members as may be interested in participating in such transactions or opportunities.

d. Collect and exchange information about Applicant's or Members' export operations and prior export sales by Members, including export price information with respect to STEs.

e. Collaborate in the preparation and submission of individual or joint bids for processing, shipping and handling charges relating to the sale of tobacco to STEs in Export Markets.

f. Collect and exchange information and conduct joint negotiations with STEs concerning estimated yields for the processing of green leaf tobacco into redried tobacco.

g. Allocate export sales and/or export markets among Members to STEs.

h. Engage in joint promotional activities aimed at increasing sales in existing Export Markets and identifying new Export Markets, such as: arranging trade shows and marketing trips; providing advertising services; providing brochures, industry newsletters and other forms of product, service and industry information; conducting international market and product research; procuring international marketing, advertising and promotional services; and sharing the cost of these joint promotional activities among the Members.

i. Collect and exchange information with respect to transportation services utilized by the Members in the export of U.S. grown tobacco, including overseas freight transportation, inland freight transportation from the Members' processing plants to the U.S. port of embarkment, storage and warehousing, stevedoring, wharfage and handling, insurance, forwarder services, trade documentation and services, customer clearance, financial instruments and foreign exchange.

j. Collect and exchange information and conduct joint negotiations with STEs regarding contractual terms for export sales.

Definitions

1. "Member" means a person who has membership in U.S. Leaf Tobacco Exporters, L.L.C. and who has been certified as a "Member" within the meaning of Section 325.2(1) of the Regulations.

Dated: March 25, 1996.

W. Dawn Busby,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510–DR–P

National Oceanic and Atmospheric Administration

Evaluation of Coastal Zone Management Program and National Estuarine Research Reserves

AGENCY: Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), DOC.

ACTION: Notice of intent to evaluate.

SUMMARY: The NOAA Office of Ocean and Coastal Resource Management (OCRM) announces its intent to evaluate the performance of the Narragansett Bay (RI) and Delaware National Estuarine Research Reserve Programs.

These evaluations will be conducted pursuant to sections 312 and 315 of the Coastal Zone Management Act of 1972 (CZMA), as amended. The CZMA requires a continuing review of the performance of states with respect to coastal program implementation and reserve management. Evaluation of Coastal Zone Management Programs and National Estuarine Research Reserves requires findings concerning the extent to which a state has met the national objectives, adhered to its coastal program document or reserve Management Plan approved by the Secretary of Commerce, and adhered to the terms of financial assistance awards funded under the CZMA. The evaluations will include a site visit, consideration of public comments, and consultations with interested Federal, State, and local agencies and members of the public. Public meetings are held as part of the site visits.

Notice is hereby given of the dates of the site visits for the listed evaluations, and the dates, local times, and locations of public meetings during the site visits.

The Narragansett Bay National Estuarine Research Reserve, Rhode Island, site visit will be from May 13–17, 1996. A public meeting will be held on Wednesday, May 15, 1996, at 9:00 A.M., at the Reserve Field Station, 55 South Reserve Drive, South Prudence, Rhode Island 02872.

The Delaware National Estuarine Research Reserve site visit will be from May 20–24, 1996. A public meeting will be held on Wednesday, May 22, 1996, at 7:00 P.M., at the Department of Natural Resources and Environmental Control Auditorium, Richardson and Robins Building, 89 Kings Highway, Dover, Delaware.

The States will issue notice of the public meeting(s) in a local newspaper(s) at least 45 days prior to the public meeting(s), and will issue other timely notices as appropriate.

Copies of the State's most recent performance reports, as well as OCRM's notifications and supplemental request letters to the States, are available upon request from OCRM. Written comments from interested parties regarding these Programs are encouraged and will be accepted until 15 days after the public meeting. Please direct written comments to Vickie A. Allin, Chief, Policy Coordination Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1305 East-West Highway, Silver Spring, Maryland 20910. When the evaluation is completed, OCRM will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings.

FOR FURTHER INFORMATION CONTACT: Vickie A. Allin, Chief, Policy Coordination Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1305 East-West Highway, Silver Spring, Maryland 20910, (301) 713–3090, ext. 126.

Federal Domestic Assistance Catalog 11.419, Coastal Zone Management Program Administration.

Dated: March 18, 1996.

W. Stanley Wilson,

Assistant Administrator for Ocean Services and Coastal Zone Management.

[FR Doc. 96–7633 Filed 3–28–96; 8:45 am]

BILLING CODE 3510–08–M

[I.D. 032196C]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Council) Pacific Whiting Allocation Committee will hold a public meeting.

DATES: The meeting will be held on April 2, beginning at 1 p.m. and may go into the evening until business for the day is completed, and on April 3 from 8 a.m. until 5 p.m.

ADDRESSES: The meeting will be held at the Pacific Fishery Management Council, 2130 SW Fifth Avenue, Suite 224, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: Jim Glock, Groundfish Fishery Management Coordinator; telephone: (503) 326–6352.

SUPPLEMENTARY INFORMATION: The Council appointed this committee to negotiate an agreement for management of the Pacific whiting fishery beginning in 1997. This is expected to be the final meeting of this committee. The committee will continue to work towards narrowing the alternatives and achieving consensus on a single proposal.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Eric W. Greene at (503) 326–6352 at least 5 days prior to the meeting date.

Dated: March 22, 1996.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 96–7658 Filed 3–28–96; 8:45 am]

BILLING CODE 3510–22–F

National Weather Service Modernization and Associated Restructuring

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice and Opportunity for Public Comment.

SUMMARY: The National Weather Service (NWS) is publishing proposed certifications for the proposed consolidations of:

(1) Residual Indianapolis Weather Service Office (RWSO) into the future Indianapolis WFO;

(2) Dubuque Weather Service Office (WSO) into the future Quad Cities and Milwaukee Weather Forecast Offices (WFOs);

(3) Allentown WSO into the future Philadelphia, Central Pennsylvania and Binghamton WFOs;

(4) Beckley WSO into the future Charleston and Roanoke WFOs;

(5) Bridgeport WSO into the future New York City WFO;

(6) Residual Charleston, WV WSO into the future Charleston, WV WFO;

(7) Elkins WSO into the future Charleston, WV, Pittsburgh and Baltimore, MD/Washington, DC WFOs;

(8) Huntington WSO into the future Charleston, WV and Cincinnati WFOs;

(9) Wilkes-Barre WSO into the future Binghamton and Central Pennsylvania WFOs;

(10) Residual Atlanta WSO into the future Atlanta WFO;

(11) Bakersfield WSO into the future San Joaquin Valley WFO; and

(12) Residual Las Vegas WSO into the future Las Vegas WFO.

In accordance with Public Law 102–567, the public will have 60-days in which to comment on these proposed consolidation certifications.

DATES: Comments are requested by May 28, 1996.

ADDRESSES: Requests for copies of the proposed consolidation packages should be sent to Janet Gilmer, Room 12316, 1325 East-West Highway, Silver Spring, MD 20910, telephone 301–713–0276. All comments should be sent to Janet Gilmer at the above address.

FOR FURTHER INFORMATION CONTACT: Julie Scanlon at 301–713–1413.

SUPPLEMENTARY INFORMATION: NWS anticipates consolidating:

(1) the Residual Indianapolis Weather Service Office (RWSO) with the future Indianapolis WFO;

(2) the Dubuque Weather Service Office (WSO) with the future Quad Cities and Milwaukee Weather Forecast Offices (WFOs);

(3) the Allentown WSO with the future Philadelphia, Central Pennsylvania and Binghamton WFOs;

(4) the Beckley WSO with the future Charleston and Roanoke WFOs;

(5) the Bridgeport WSO with the future New York City WFO;

(6) the Residual Charleston, WV WSO with the future Charleston, WV WFO;

(7) the Elkins WSO with the future Charleston, WV, Pittsburgh and Baltimore, MD/Washington, DC WFOs;

(8) the Huntington WSO with the future Charleston, WV and Cincinnati WFOs;

(9) the Wilkes-Barre WSO with the future Binghamton and Central Pennsylvania WFOs;

(10) the Residual Atlanta WSO with the future Atlanta WFO;

(11) the Bakersfield WSO with the future San Joaquin Valley WFO; and

(12) the Residual Las Vegas WSO with the future Las Vegas WFO.

In accordance with section 706 of Pub. Law 102–567, the Secretary of Commerce must certify that these consolidations will not result in any degradation of service to the affected areas of responsibility and must publish the proposed consolidation certifications in the FR. The documentation supporting each proposed certification includes the following:

(1) a draft memorandum by the meteorologist-in-charge recommending the certification, the final of which will be endorsed by the Regional Director and the Assistant Administrator of the NWS if appropriate, after consideration of public comments and completion of consultation with the Modernization Transition Committee (the Committee);

(2) a description of local weather characteristics and weather-related concerns which affect the weather services provided within the service area;

(3) a comparison of the services provided within the service area and the services to be provided after such action;

(4) a description of any recent or expected modernization of NWS operation which will enhance services in the service area;

(5) an identification of any area within the affected service area which would not receive coverage (at an elevation of 10,000 feet) by the next generation weather radar network;

(6) evidence, based upon operational demonstration of modernized NWS operations, which was considered in reaching the conclusion that no degradation in service will result from such action including the WSR–88D Radar Commissioning Report(s), User Confirmation of Services Report(s), and the Decommissioning Readiness Report (as applicable); and

(7) a letter appointing the liaison officer.

These proposed certifications do not include any report of the Committee which could be submitted in accordance with sections 706(b)(6) and 707(c) of Pub. Law 102–567. At their December 14, 1995 meeting the members "* * * resolved that the MTC modify its procedure to eliminate proposed certification consultations of noncontroversial closings, consolidations, relocations, and automation certifications but will provide final consultation on certifications after public comment and before final submission to the Secretary of Commerce."

Documentation supporting the proposed certifications is too voluminous to publish in its entirety. Copies of the supporting documentation can be obtained through the contact listed above.

Attached to this Notice are draft memoranda by the respective meteorologists-in-charge recommending the certifications.

Once all public comments have been received and considered, the NWS will complete consultation with the Committee and determine whether to proceed with the final certifications. If decisions to certify are made, the Secretary of Commerce must publish the final certifications in the FR and transmit the certifications to the appropriate Congressional committees prior to consolidating the offices.

Dated: March 22, 1996.

Elbert W. Friday, Jr.,

Assistant Administrator for Weather Services.

6900 West Hanna Avenue
Indianapolis, IN 46241–9526
February 12, 1996.

Memorandum For: Richard P. Augulis, Director, Central Region

From: John T. Curran, MIC NWSFO Indianapolis

Subject: Recommendation for Consolidation Certification

In August 1993 a change of operations occurred when most personnel and most services provided by the WSFO at Indianapolis International Airport were transferred 1.5 miles southwest to the future WFO site in Indianapolis, Indiana. At that time a Residual Weather Service Office (RWSO) was left at the airport to continue the surface and radar observational programs. Since that time the Indianapolis International Airport ASOS has been commissioned and the WSR–74C radar has been decommissioned.

After reviewing the attached documentation, I have determined, in my professional judgement, that consolidation of the Indianapolis Residual Weather Service Office (RWSO) with the future Indianapolis Weather Forecast Office (WFO) in Indianapolis will not result in any degradation in weather services to the Indianapolis service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, I am recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary of Commerce for approval and transmittal to Congress.

My recommendation is based on my review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the pre-modernized Indianapolis service area is included as attachment A. As discussed below, I find that providing the service which addresses these characteristics and concerns from the future Indianapolis WFO will not degrade these services.

2. A list of services currently provided from the Indianapolis RWSO and a list of comparable services to be provided from the future Indianapolis WFO location after consolidation is included as attachment B. Comparison of these lists shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the pre-modernized WSFO Indianapolis area of responsibility (i.e. "affected service area") and the future WFO Indianapolis area of responsibility. As discussed below, I find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSFO Indianapolis service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing the planned NEXRAD coverage at an elevation of 10,000 feet for Indiana is included as attachment D. NWS operational radar coverage for the Indianapolis service area will be increased, and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of services:

A. The WSR–88D Radar Commissioning Report, attachment E, validates that the WSR–88D meets technical specifications (acceptance test); is fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services, attachment F, documents that all comments have been answered to the satisfaction of the commentors as stated in the Service Confirmation Report. One of the commentors was concerned about inaccurate radar observations (ROBs) and substantial false echo returns. We have discussed these concerns with those people and they are satisfied the NWS is working toward a solution. An emergency management agency responded negatively regarding the availability of an 800 phone line. An 800 phone line is available to all emergency management in the Indianapolis service area. Another emergency management official responded negatively regarding the wording of our products and specifically mentioning his county seat. We informed him we would specifically mention his county seat whenever we can, if appropriate. Two other responses were for informational purposes. We provided these individuals the information they desired.

C. The Decommissioning Readiness Report, attachment G, verifies that the existing WSR–74C radar is no longer needed to support services or products for local office operations.

6. A memorandum assigning the liaison officer for the Indianapolis service area is included as attachment H.

I have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). I believe all negative comments have been addressed to the satisfaction of our customers and I continue to recommend this certification.

Endorsement

I, Richard P. Augulis, Director, Central Region, endorse this consolidation certification.

Richard P. Augulis

Date

Memorandum For: Richard P. Augulis, Director, Central Region

From: Charles T. Fenley, MIC, NWSO Quad Cities, IA; Kenneth R. Rizzo, MIC, NWSFO Milwaukee, WI

Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, we have determined, in our professional judgment, consolidation of the Dubuque, Iowa Weather Service Office (WSO) with the future Quad Cities (Davenport, Iowa) and Milwaukee (Dousman, Wisconsin) Weather Forecast Offices (WFOs) will not result in any degradation in weather services to the Dubuque, Iowa, service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, we are recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward certification to the Secretary for approval and transmittal to Congress.

Our recommendation is based on our review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided to the pre-modernized Dubuque, Iowa, service area is included as Attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Quad Cities (Davenport, Iowa) and Milwaukee (Dousman, Wisconsin) WFOs will not degrade these services.

2. A detailed list of the services currently provided within the Dubuque, Iowa, service area from the Dubuque, Iowa WSO location and a list of services to be provided from the future Quad Cities (Davenport, Iowa) and Milwaukee (Dousman, Wisconsin) WFOs locations after the proposed consolidation is included as Attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO Dubuque, Iowa Area of Responsibility (i.e. "Affected Service Area") and the future Quad Cities (Davenport, Iowa) WFO Area of Responsibility. As discussed below, we find that there will be no degradation in the quality of those services as a result of consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO Dubuque, Iowa, service area is included as Attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed, and will enhance services.

4. A map showing planned NEXARD coverage at an elevation of 10,000 feet for northeast Iowa, southwest Wisconsin and northwest Illinois is included as Attachment D. NWS operation radar coverage for the WSO Dubuque, Iowa, service area will be increased and no area will be missed in coverate.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D Radar Commissioning Reports from the Quad Cities (Davenport, Iowa) and Milwaukee (Dousman, Wisconsin) future WFOs, Attachment E, validates that the WSR–88Ds meet technical specifications (acceptance test); are fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from the Quad Cities (Davenport, Iowa) and

Milwaukee, Wisconsin (Dousman, Wisconsin, Attachment F, document that no negative comments were received from the Quad Cities service area. Only one negative comment was received from the Milwaukee service area and it was answered to the satisfaction of the commentor.

C. The Decommissioning Readiness Report, Attachment G, verifies that the old WSR–74C radar at Moline, Illinois is no longer needed to support services or products for local operations.

6. A memorandum assigning the liaison officer for the Dubuque, Iowa service area is included as Attachment H.

We have considered recommendations of the Modernization Transition Committee (Attachment I) and the _____ public comments received during the comment period (Attachment J). On _____, the Committee voted to endorse the proposed consolidation (Attachment K). We believe all negative comments have been addressed to the satisfaction of our customers and we continue to recommend certification.

Endorsement

I, Richard P. Augulis, Director, Central Region, endorse this consolidation certification.

Richard P. Augulis

Memorandum For: W/ER—John T. Forsing
From: G.C. Henricksen, AM/MIC NWSFO Philadelphia, PA; Bruce Budd, MIC NWSO Central Pennsylvania, PA; Peter R. Ahnert, MIC NWSO Binghamton, NY
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, we have determined, in our professional judgment, consolidation of the Allentown Weather Service Office (WSO ABE) with the future Philadelphia, Central Pennsylvania and Binghamton Weather Forecast Offices (WFOs) will not result in any degradation in weather services to the Allentown service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, we are recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

Our recommendation is based on our review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Allentown service area is included as attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Philadelphia, Central Pennsylvania, and Binghamton WFOs, will not degrade these services.

2. A detailed list of the services currently provided within the Allentown service area from the WSO ABE location and list of services to be provided from the future Philadelphia, Central Pennsylvania, and Binghamton WFO locations after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO ABE Area of Responsibility (i.e. "Affected Service Area") and the future WFO Philadelphia Area of Responsibility. As discussed below, we find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO ABE service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for Pennsylvania and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Allentown service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. the WSR–88D RADAR Commissioning Reports from the Philadelphia, Central Pennsylvania, and Binghamton areas, attachment E, validate that the WSR–88Ds meet technical specifications (acceptance test); are fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from the future Philadelphia, Central Pennsylvania, and Binghamton WFO areas, attachment F, document that a total of five comments required follow-up. All negative comments have been answered to the satisfaction of the users as reflected in the report.

C. The Decommissionary Readiness Report, attachment G, is not necessary as WSO ABE does not have a radar.

6. A memorandum assigning the liaison officer for the Allentown service area is included at attachment H.

We have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). We believe all negative comments have been addressed to the satisfaction of our customers and we continue to recommend this certification.

Endorsement

I, John T. Forsing, Director, Eastern Region, endorse this consolidation certification.

Memorandum For: W/ER—John T. Forsing
From: Alan Rezek, AM/MIC NWSFO Charleston, WV; John Wright, MIC MWSO Roanoke, VA
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, we have determined, in our professional judgment, consolidation of the Beckley Weather Service Office (WSO BKW) with the future Charleston and Roanoke Weather Forecast Offices (WFOs) will not result in any degradation in weather services to the Beckley service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, we are recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

Our recommendation is based on our review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Beckley service area is included as attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Charleston and Roanoke WFOs, will not degrade these services.

2. A detailed list of the services currently provided within the Beckley service area from the WSO BKW location and list of services to be provided from the future Charleston and Roanoke WFO locations after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO BKW Area of Responsibility (i.e. "Affected Service Area") and the future WFO Charleston Area of Responsibility. As discussed below, we find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO BKW service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for West Virginia and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Beckley service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D RADAR Commissioning Reports from the Charleston and Roanoke areas, attachment E, validate that the WSR–88Ds meet technical specifications (acceptance test); area fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from the future Charleston and Roanoke WFO areas, attachment F, document that a total of eleven comments required follow-up. All negative comments have been answered to the satisfaction of the users as reflected in the report.

C. The Decommissioning Readiness Report, attachment G, verifies that the existing Beckley local warning radar, WSR–74C, is no longer needed to support services or products for local office operations.

6. A memorandum assigned the liaison officer for the Beckley service area is included at attachment H.

We have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). We believe all negative comments have been addressed to the satisfaction of our customers and we continue to recommend this certification.

Endorsement

I, John T. Forsing, Director, Eastern Region, endorse this consolidation certification.

Memorandum For: W/ER—John T. Forsing
From: Michael E. Wyllie, AM/MIC NWSFO New York City
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, I have determined, in my professional judgment, consolidation of the Bridgeport Weather Service Office (WSO BDR) with the future New York City Weather Forecast Office (WFO) will not result in any degradation in weather services to the Bridgeport service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, I am recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

My recommendation is based on my review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Bridgeport service area is included as attachment A. As discussed below, I find that providing the services which address these characteristics and concerns from the future New York City WFO will not degrade these services.

2. A detailed list of the services currently provided within the Bridgeport service area from the WSO BDR location and a list of services to be provided from the future New York City WFO locations after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO BDR Area of Responsibility (i.e. "Affected Service Area") and the future WFO New York city Area of Responsibility. As discussed below, I find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO BDR service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for Connecticut and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Bridgeport service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D RADAR Commissioning Report from New York City, attachment E validate that the WSR–88Ds meet technical specifications (acceptance test); are fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from New York City, attachment F, document that three negative comments were received. All negative comments have been answered to the satisfaction of the users as reflected in the reports.

C. The Decommissioning Readiness Report, attachment G, is not necessary as WSO BDR does not have a radar.

6. A memorandum assigning the liaison officer for the Bridgeport service area is included at attachment H.

I have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). I believe all negative comments have been addressed to the satisfaction of our customers and I continue to recommend this certification.

Endorsement

I, John T. Forsing, Director, Eastern Region, endorse this consolidation certification.

Memorandum for: W/ER—John T. Forsing
From: Alan Rezek, AM/MIC NWSFO Charleston, WV; Kenneth Haydu, MIC NWSO Cincinnati, OH
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, we have determined, in our professional judgement, consolidation of the Huntington Weather Service Office (WSO HTS) with the future Charleston and Cincinnati Weather Forecast Offices (WFOs) will not result in any degradation in weather services to the Huntington service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, we are recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

Our recommendation is based on our review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Huntington service area is included as attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Charleston and Cincinnati WFOs, will not degrade these services.

2. A detailed list of the services currently provided within the Huntington service area

from the WSO HTS location and list of services to be provided from the future Charleston and Cincinnati WFO locations after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO HTS Area of Responsibility (i.e. "Affected Service Area") and the future WFO Charleston Area of Responsibility. As discussed below, we find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO HTS service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for West Virginia and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Huntington service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D RADAR Commissioning Reports from the Charleston and Cincinnati areas, attachment E, validate that the WSR–88Ds meet technical specifications (acceptance test); are fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from the future Charleston and Cincinnati WFO areas, attachment F, document that a total of eight comments required follow-up. All negative comments have been answered to the satisfaction of the users as reflected in the report.

C. The Decommissioning Readiness Report, attachment G, is not necessary as WSO HTS does not have a radar.

6. A memorandum assigning the liaison officer for the Huntington service area is included at attachment H.

We have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). We believe all negative comments have been addressed to the satisfaction of our customers and we continue to recommend this certification.

Memorandum For: W/ER—John T. Forsing
From: Alan Rezek, AM/MIC NWSFO Charleston, WV; Theresa Rossi, AM/MIC NWSFO Pittsburgh, PA; James Travers, AM/MIC NWSFO Baltimore, MD/Washington DC
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, we have determined, in our professional judgment, consolidation of the Elkins Weather Service Office (WSO EKN) with the future Charleston, Baltimore, MD/Washington DC and Pittsburgh Weather Forecast Offices (WFOs) will not result in any degradation in weather services to the Elkins service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, we are recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

Our recommendation is based on our review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Elkins service area is included as attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Charleston, Baltimore, MD/Washington DC and Pittsburgh WFOs, will not degrade these services.

2. A detailed list of the services currently provided within the Elkins service area from the WSO BKW location and list of services to be provided from the future Charleston, Baltimore, MD/Washington DC and Pittsburgh WFO locations after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO EKN Area of Responsibility (i.e. "Affected Service Area") and the future WFO Charleston Area of Responsibility. As discussed below, we find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO EKN service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for West Virginia and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Elkins service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D RADAR Commissioning Reports from the Charleston, Baltimore, MD/Washington DC and Pittsburgh areas, attachment E, validate that the WSR–88Ds meet technical specifications (acceptance test); area fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from the future Charleston, Baltimore, MD/Washington DC and Pittsburgh WFO areas, attachment F, document that a total of ten comments required follow-up. All negative comments have been answered to the satisfaction of the users as reflected in the report.

C. The Decommissioning Readiness Report, attachment G, is not necessary since WSO EKN does not have a radar.

6. A memorandum assigned the liaison officer for the Elkins service area is included at attachment H.

We have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). We believe all negative comments have been addressed to the satisfaction of our customers and we continue to recommend this certification.

Memorandum For: W/ER—John T. Forsing
From: Alan Rezek, AM/MIC NWSFO Charleston, WV
Subject: Recommendation for Consolidation Certification

A change of operations occurred at the Charleston Weather Service Forecast Office (WSFO), located at Yeager Airport, in May 1995 when most personnel were transferred to the facility of the future Charleston Area Weather Forecast Office (WFO) in Ruthdale, WV to operate the WSR–88D and assume forecast and warning responsibility for the Charleston service area. At the same time the Yeager Airport (CRW) location was designated a Residual Weather Service Office (RWSO) to continue operating the existing WSR–74S radar and taking surface airways observations.

After reviewing the attached documentation, I have determined, in my professional judgment, consolidation of the RWSO CRW with the future Charleston Area Weather Forecast Offices (WFO) will not result in any degradation in weather services to the Charleston service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, I am recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

My recommendation is based on my review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Charleston service area is included as attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Charleston Area WFO will not degrade these services.

2. A detailed list of the services currently provided within the Charleston service area from the RWSO CRW location and a list of services to be provided from the future Charleston WFO location after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the RWSO CRW Area of Responsibility (i.e., "Affected Service Area") and the future WFO Charleston Area of Responsibility. As discussed below, I find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the RSWO CRW service area is included as attachment C. The new technology (i.e., ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for West Virginia and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Charleston service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D RADAR Commissioning Reports from the Charleston area, attachment E, validate that the WSR–88Ds meet technical specifications (acceptance test); are fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from Charleston, attachment F, document that four negative comments were received. All negative comments have been answered to the satisfaction of the users as reflected in the report.

C. The Decommissioning Readiness Report, attachment G, verifies that the existing Charleston WSR–74S radar is no longer needed to support services or products for local office operations.

6. A memorandum assigned the liaison officer for the Charleston service area is included at attachment H.

I have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). I believe all negative comments have been addressed to the satisfaction of our customers and I continue to recommend this certification.

Endorsement

I, John T. Forsing, Director, Eastern Region, endorse this consolidation certification.

Memorandum For: W/ER—John T. Forsing
From: Peter Ahnert, MIC NWSO Binghamton, NY; Bruce Budd, MIC NWSO Centrai Pennsylvania, PA
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, we have determined, in our professional judgment, consolidation of the Wilkes-Barre Weather Service Office (WSO BKW) with the future Binghamton and Central Pennsylvania Weather Forecast Offices (WFOs) will not result in any degradation in weather services to the Wilkes-Barre service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, we are recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

Our recommendation is based on our review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Wilkes-Barre service area is included as attachment A. As discussed below, we find that providing the services which address these characteristics and concerns from the future Binghamton and Central Pennsylvania WFOs, will not degrade these services.

2. A detailed list of the services currently provided within the Wilkes-Barre service area from the WSO BKW location and list of services to be provided from the future Binghamton and Central Pennsylvania WFO locations after the proposed consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO AVP Area of Responsibility (i.e. "Affected Service Area") and the future WFO Binghamton Area of Responsibility. As discussed below, we find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO AVP service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for Pennsylvania and portions of surrounding areas is included as attachment D. NWS operational radar coverage for the Wilkes-Barre service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service:

A. The WSR–88D RADAR Commissioning Reports from the Binghamton and Central Pennsylvania areas, attachment E, validate that the WSR–88Ds meet technical specifications (acceptance test); are fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed but two national work-arounds remain in effect.

B. The User Confirmation of Services from the future Binghamton and Central Pennsylvania WFO areas, attachment F, document that a total of eleven comments required follow-up. All negative comments have been answered to the satisfaction of the users as reflected in the report.

C. The Decommissioning Readiness Report, attachment G, is not necessary as WSO AVP does not have a radar.

6. A memorandum assigning the liaison officer for the Wilkes-Barre service area is included at attachment H.

We have considered recommendations of the Modernization Transition Committee (attachment I) and the _____ public comments received during the comment period (attachment J). On _____, the Committee voted to endorse the proposed consolidation (attachment K). We believe all negative comments have been addressed to the satisfaction of our customers and we continue to recommend this certification.

Endorsement

I, John T. Forsing, Director, Eastern Region, endorse this consolidation certification.

Four Falcon Drive
Peachtree City, GA 30269
(date)

Memorandum For: Harry S. Hassel, Director, Southern Region
From: Carlos Garza, Jr., AM/MIC NWSFO Atlanta, GA
Subject: Recommendation for Consolidation Certification

A change of operations occurred at the Atlanta Weather Service Forecast Office (WSFO) in April 1994, when most personnel were transferred to the facility of the future Atlanta Weather Forecast Office (WFO) in Peachtree City, Georgia, to operate the WSR–88D and assume forecast and warning responsibility for the Atlanta service area. The office at the original WSFO location was designated a Residual Weather Service Office (RWSO) and continued to be the site for recording surface observations and operating the WSR–74C.

Based on the attached documentation and my professional judgment, I have determined that consolidation of the RWSO Altanta with the future WFO Atlanta will not result in any degradation in weather services to the Atlanta service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, I am recommending that you approve this action in accordance with Section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary of Commerce for approval and transmittal to Congress.

My recommendation is based on my review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Atlanta service area is included as Attachment A. As discussed below, I find that providing the services from WFO Atlanta which address these characteristics and concerns will not degrade these services.

2. A detailed list of services currently provided within the Atlanta service area from the RWSO Atlanta location and a list of services to be provided from the WFO Atlanta location after consolidation is included in Attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. The enclosed map shows the old Atlanta area of responsibility (i.e., "affected service area") and the new future WFO Atlanta area of responsibility. As discussed below, I find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the Atlanta service area is included as Attachment C. The new technology (i.e., ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned WSR–88D radar coverage at an elevation of 10,000 feet over Georgia is included as Attachment D. NWS operational radar coverage for the specific service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service.

a. The WSR–88D Radar Commissioning Report, Attachment E, validates that the WSR–88D meets technical specifications (acceptance test) and is fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services), service back-up capabilities are functioning properly, and a full set of operations and maintenance documentation is available, and spare parts and test equipment and trained operations and maintenance personnel are available on site. Two national work-arounds remain in effect.

b. The User Confirmation of Services, Attachment F, documents that no negative comments were received. Additional calls were made to weathercasters in the Atlanta metropolitan area to make sure that services continue to conform to national guidelines. All comments expressed satisfaction with our services as stated in the Service Confirmation Report.

c. The Decommissioning Readiness Report, Attachment G, verifies that the existing Atlanta WSR–74C radar is no longer needed to support services or products for local office operations.

6. A memorandum assigning the liaison officer for the Atlanta service area is included as Attachment H.

I have considered recommendations of the Modernization Transition Committee (Attachment I) and the _____, public comments received during the comment period (Attachment J). On _____, the Committee voted to endorse the proposed consolidation (Attachment K). I believe all negative comments have been addressed to the satisfaction of our customers and I continue to recommend this certification.

Endorsement

I, Harry S. Hassel, Director, Southern Region, endorse this consolidation certification.

Memorandum for: W/WR—Thomas D. Potter, Director, Western Region
From: Steven W. Mendenhall, MIC, NWSO San Joaquin Valley, CA
Subject: Recommendation for Consolidation Certification

After reviewing the attached documentation, I have determined, in my professional judgement, consolidation of the Bakersfield Weather Service Office (WSO) with the future San Joaquin Valley Weather Forecast Office (WFO) will not result in any degradation in weather services to the Bakersfield service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, I am recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

My recommendation is based on my review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Bakersfield service area is included as attachment A. As discussed below, I find that providing the services which address these characteristics and concerns from the future San Joaquin Valley WFO will not degrade these services.

2. A detailed list of the services currently provided within the Bakersfield service area from the Bakersfield WSO location and a list of services to be provided from the future San Joaquin Valley WFO after consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclosed map shows the WSO Bakersfield Area of Responsibility (i.e. "Affected Service Area"), and the future WFO San Joaquin Valley Area of Responsibility. As discussed below, I find that there will be no degradation in the quality of these services as a result of the consolidation.

3. A description of the recent or expected modernization of National Weather Service (NWS) operations which will enhance services in the WSO Bakersfield service area is included as attachment C. The new technology (i.e. ASOS, WSR–88D, and AWIPS) has or will be installed and will enhance services.

4. A map showing planned NEXRAD coverage at an elevation of 10,000 feet for California is included as attachment D. NWS operational radar coverage for the Bakersfield service area will be increased and no area will be missed in coverage.

5. The following evidence, based upon operational demonstration of modernized NWS operations, played a key role in concluding there will be no degradation of service.

A. The WSR–88D RADAR Commissioning Report, attachment E, validates that the WSR–88D meets technical specifications (acceptance test); is fully operational (satisfactory operation of system interfaces and satisfactory support of associated NWS forecasting and warning services); service backup capabilities are functioning properly; a full set of operations and maintenance documentation is available; and spare parts and test equipment and trained operations and maintenance personnel are available on site. Training was completed, but one national workaround remains in effect.

B. The User Confirmation of Services, attachment F, documents that one negative comment was received, but did not impact the WSO Bakersfield service area. This negative comment was answered to the satisfaction of the commentor, as stated in the User Confirmation of Services Report.

C. The Decommissioning Readiness Report, attachment G, is not needed as there is no radar to decommission at Bakersfield.

6. A memorandum assigning the liaison officer for the Bakersfield service area is included as attachment H.

I have considered recommendations of the Modernization Transition Committee (Committee) (attachment I) and the _____ public comments received during the comment period (attachment J). On _____ the Committee voted to endorse the proposed consolidation (attachment K). I believe all negative comments have been addressed to the satisfaction of our customers and I continue to recommend this certification.

Endorsement

I, Thomas D. Potter, Director, Western Region, endorse this consolidation certification.

Thomas D. Potter

Memorandum For: Thomas D. Potter, Director, Western Region
From: Larry Jensen, MIC, NWSO Las Vegas, NV
Subject: Recommendation for Consolidation Certification

A change of operations occurred at the Las Vegas Weather Service Office (WSO) in March 1995. During this month, most personnel were transferred to the new facility of the future Las Vegas Weather Forecast Office (WFO) in Las Vegas, Nevada to operate the WSR–88D, and assume forecast and warning responsibility for the Las Vegas service area. At that same time, the original WSO office was designated a Residual Weather Service Office (RWSO) to continue operating the WSR–74C.

After reviewing the attached documentation, I have determined, in my professional judgment, consolidation of the Las Vegas Residual Weather Service Office (RWSO) with the future Las Vegas Weather Forecast Office (WFO) will not result in any degradation in weather services to the Las Vegas service area. This proposed certification is in accordance with the advance notification provided in the National Implementation Plan. Accordingly, I am recommending you approve this action in accordance with section 706 of Public Law 102–567. If you concur, please endorse this recommendation and forward this package to the Assistant Administrator for Weather Services for final certification. If Dr. Friday approves, he will forward the certification to the Secretary for approval and transmittal to Congress.

My recommendation is based on my review of the pertinent evidence and application of the modernization criteria for consolidation of a field office. In summary:

1. A description of local weather characteristics and weather-related concerns affecting the weather services provided in the Las Vegas service area is included as attachment A. As discussed below, I find that providing the services which address these characteristics and concerns from the future Las Vegas WFO will not degrade these services.

2. A detailed list of the services currently provided within the Las Vegas service area from the Las Vegas WSO location and a list of services to be provided from the future Las Vegas WFO after consolidation is included as attachment B. Comparison of these services shows that all services currently provided will continue to be provided after the proposed consolidation. Also, the enclose map shows the WSO Las Vegas Area of Responsibility (i.e. "Affected Service Area") and the future WFO Las Vegas Area of Responsibility.

Endorsement

I, Thomas D. Potter, Director, Western Region, endorse this consolidation certification.

Thomas D. Potter

BILLING CODE 3510–12–M

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 29, 1996.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities. I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities and services.

3. The action will result in authorizing small entities to furnish the commodities and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities and services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodities and services have been proposed for addition to Procurement List for

production by the nonprofit agencies listed:

Commodities

Pad, Energy Dissipating
1670–00–753–3928
NPA: Tarrant County Association for the Blind, Fort Worth, Texas
Strap, Shoring Assembly
5340–03–000–9382
5340–03–000–9383
5340–03–000–9384
5340–03–000–9385
NPA: Mississippi Industries for the Blind, Jackson, Mississippi
Tape, Pressure-Sensitive Adhesive
7510–00–680–2395
7510–00–680–2450

DEPARTMENT OF DEFENSE

Department of the Air Force

Proposed Collection; Comment Request

AGENCY: Department of the Air Force, Department of Defense Medical Examination Review Board.

ACTION: Notice.

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Department of Defense Medical Examination Review Board announces the proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on; (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by May 28, 1996.

ADDRESSES: Written comments and recommendations on the proposed information collection should be sent to Department of Defense Medical Examination Review Board (DoDMERB), 8034 Edgerton Drive, Suite 132, USAF Academy CO 80840–2200, ATTN: CMSgt Darrell W. Cornett.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the above address, or call DoDMERB at (719) 472–3560.

Title and Associated Forms: Medical Examination Review Board (DoDMERB) Report of Medical Examination, DD Forms 2351, 2370, 2372, 2374, 2375, 2378, 2379, 2380, 2381, 2382, 2383, 2480, 2489, and 2492.

Needs and Uses: The information collection requirement is necessary to determine the medical qualification of applicants to the five Service academies, the Four Year Reserve Officer Training Corps Scholarship Program, Uniformed Services University of the Health Sciences, and the Army, Navy, and Air Force Scholarship Program. The collection of medical history of each candidate is used to determine if applicants meet medical standards outlined in Department of Defense Directive 6130.3, Physical Standards for Appointment, Enlistment and Induction.

Affected Public: Individuals or Households.

Annual Burden Hours: 19,500.

Number of Respondents: 19,500.

Responses Per Respondent: 1.

Average Burden Per Response: 60 Minutes.

Frequency: On occasion.

SUPPLEMENTARY INFORMATION:

Summary of Information Collection

Respondents are individuals who are interested in applying to attend one of the five Service academies, the Four year Reserve Officer Training Corps Scholarship Program, Uniformed Services University of the Health Sciences or Army, Navy, and Air Force Scholarship Programs. The completed form(s) is processed through medical reviewers representing their respective services to determine a medical qualification status. Associated forms may or may not be required depending on the medical information contained in the medical examination. If the medical examination and necessary associated forms are not accomplished, individuals reviewing the medical qualification status cannot be readily assured of the medical qualifications of the individual. Without this process the individual applying to any of these programs could not have the medical qualification determination essential to ensure compliance with the physical standards established for the respective military service program.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–M

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Department of Energy/Los Alamos National Laboratory

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site-Specific Advisory Board (EM SSAB), Los Alamos National Laboratory.

DATES: Tuesday, April 9, 1996: 6:30 p.m.–9:30 p.m.; 9:00 p.m. to 9:30 p.m. (public comment session).

ADDRESSES: Pojoaque Pueblo Tribal Office Council Chambers, Rt. 11, Box 71, Santa Fe, New Mexico 87501, 505–455–2278.

FOR FURTHER INFORMATION CONTACT: Ms. Kimberly Roybal, Los Alamos National Laboratory Citizens' Advisory Board Support, Northern New Mexico Community College, 1002 Onate Street, Espanola, NM 87352, (800) 753–8970, or (505) 753–8970.

SUPPLEMENTARY INFORMATION: Purpose of the Board: The purpose of the Advisory Board is to make recommendations to DOE and its regulators in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

Tuesday, April 9, 1996

6:30 p.m.—Call to Order and Welcome
7:00 p.m.—Work Plan Discussion
9:00 p.m.—Public Comment
9:30 p.m.—Adjourn

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Ms. Lisa Roybal, at the telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Official is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585 between 9:00 a.m. and 4 p.m., Monday–Friday, except Federal holidays. Minutes will also be available by writing to Herman Le-Doux, Department of Energy, Los Alamos Area Office, 528 35th Street, Los Alamos, NM 87185–5400.

Issued at Washington, DC on March 25, 1996.

Rachel M. Samuel,

Acting Deputy Advisory Committee Management Officer.

[FR Doc. 96–7740 Filed 3–28–96; 8:45 am]

BILLING CODE 6450–01–P

Eclipse Energy Systems Inc.

AGENCY: Department of Energy, Office of the General Counsel.

ACTION: Notice of Intent to Grant Exclusive Patent License.

SUMMARY: Notice is hereby given of an intent to grant to Eclipse Energy Systems Inc., of Tampa, FL, an exclusive license to practice the invention described in U.S. Patent No. 4,687,560, entitled "Method of Synthesizing a Plurality of Reactants and Producing Thin Films of Electro-Optically Active Transition Metal Oxides." The invention is owned by the United States of America, as represented by the Department of Energy (DOE).

DATES: Written comments or nonexclusive license applications are to be received at the address listed below no later than May 28, 1996.

ADDRESSES: Office of Assistant General Counsel for Technology Transfer and Intellectual Property, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION: Robert J. Marchick, Office of the Assistant General Counsel for Technology Transfer and Intellectual Property, U.S. Department of Energy, Forrestal Building, Room 6F–067, 1000 Independence Avenue, 20585; Telephone (202) 586–4792.

SUPPLEMENTARY INFORMATION: 35 U.S.C. 209(c) provides the Department with authority to grant exclusive licenses in Department-owned inventions, where a determination can be made, among other things, that the desired practical application of the invention has not been achieved, or is not likely expeditiously to be achieved, under a nonexclusive license. The statute and implementing regulations (37 C.F.R. 404) require that the necessary determinations be made after public notice and opportunity for filing written objections.

Eclipse Energy Systems Inc., of Tampa, FL, has applied for an exclusive license to practice the invention embodied in U.S. Patent No. 4,687,560, and has a plan for commercialization of the invention.

The exclusive license will be subject to a license and other rights retained by the U.S. Government, and other terms and conditions to be negotiated. DOE intends to grant the license, upon a final determination in accordance with 35 U.S.C. 209(c), unless, within 60 days of this notice, the Assistant General Counsel for Technology Transfer and Intellectual Property, Department of Energy, Washington, DC 20585, receives in writing any of the following, together with supporting documents:

(i) A statement from any person setting forth reasons why it would not be in the best interests of the United States to grant the proposed license; or

(ii) An application for a nonexclusive license to the invention, in which applicant states that he already has brought the invention to practical application or is likely to bring the invention to practical application expeditiously.

The Department will review all timely written responses to this notice, and will grant the license if, after consideration of written responses to this notice, a determination is made, that the license grant is in the public interest.

Issued in Washington, DC, on March 22, 1996.

Agnes P. Dover,

Deputy General Counsel.

March 21, 1996.

Action: Publication in **Federal Register** of Notice of Intent to Grant Exclusive Patent License (Re: U.S. Patent No. 4,687,560

Agnes P. Dover,

Deputy General Counsel for Technology Transfer and Procurement

Background and Discussion

35 U.S.C. 209(c) provides the Department with authority to grant exclusive or partially exclusive licenses in Department-owned inventions, where a determination can be made, among other things, that the desired practical application of the invention has not been achieved, or is not likely expeditiously to be achieved, under a nonexclusive license. The statute and implementing regulations require that the necessary determinations to be made after public notice and opportunity for filing written objections.

Eclipse Energy Systems, Inc., of Tampa, Florida, has applied for an exclusive license form commercial practice of U.S. Patent No. 4,687,560, entitled "Method of Synthesizing a Plurality of Reactants and Producing Thin Films of Electro-Optically Active Transition Metal Oxides." A memorandum which more fully discusses the present license application is attached.

This Action Memorandum transmits for signature of the Deputy General Counsel and Publication in the **Federal Register** a notice of intent to grant an exclusive license to the named applicant. The notice provides for a 60-day period during which the public may bring forth information as to why the proposed exclusive license would not be in the public interest.

Recommendation

We recommend that the Deputy General Counsel sign and forward for publication the attached **Federal Register** notice of intent to grant an exclusive patent license.

Paul A. Gottlieb,

Assistant General Counsel for Technology Transfer and Intellectual Property.

[FR Doc. 96–7736 Filed 3–28–96; 8:45 am]

BILLING CODE 6450–01–P

Bonneville Power Administration

Policy on Excess Federal Power

AGENCY: Bonneville Power Administration (Bonneville), Department of Energy (DOE).

ACTION: Proposed policy and request for comment.

SUMMARY: As part of the 1996 Energy and Water Development Appropriations Act (Public Law 104–46 or P.L. 104–46), Congress passed legislation that provides new marketing authority to Bonneville. Section 508 (a) and (b) of

P.L. 104–46, provides the Administrator of Bonneville (the Administrator) new authority to market a category of surplus federal power called "excess federal power" without certain statutory restrictions. The Administrator's policy implementing this new marketing authority could potentially impact regional and out-of-region customers and other utilities. In the interests of a fair and workable policy, and to ensure the success of the new legislation, Bonneville seeks public comment on its proposed implementation policy.

DATES: Comments must be received by May 28, 1996.

ADDRESSES: Comments should be addressed to David J. Armstrong—MPF, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208–3621, phone number 503–230–3658, fax number 503–230–7568.

SUPPLEMENTARY INFORMATION:

Background and Purpose

Section 508(a)(3) of P.L. 104–46 provides in general that the term "excess federal power" means such electric power that has become surplus to the firm contractual obligations of the Administrator under section 5(f) of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839c(f)) due to either: any reduction in the quantity of electric power that the Administrator is contractually required to supply under subsections (b) and (d) of section 5 of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839c), due to the election by customers of the Bonneville Power Administration to purchase electric power from other suppliers, as compared to the quantity of electric power that the Administrator was contractually required to supply as of January 1, 1995; or those operations of the Federal Columbia River Power System that are primarily for the benefit of fish and wildlife affected by the development, operation, or management of the system.

Section 508(b) provides in general that notwithstanding section 2, subsections (a), (b), and (c) of section 3, and section 7 of P.L. 88–552 (16 U.S.C. 837a, 837b, and 837f), and section 9(c) of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839f(c)), the Administrator may, as permitted by otherwise applicable law, sell or otherwise dispose of excess federal power: outside the Pacific Northwest on a firm basis for a contract term not to exceed 7 years, if the excess federal power is first offered for a reasonable period of time and under the same essential rate, terms and conditions to those Pacific Northwest public body, cooperative and investor-owned utilities and those direct service industrial customers identified in subsection (b) or (d)(1)(A) of section 5 of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839c); and in any region without the prohibition on resale established by the second sentence of section 5(a) of the Act entitled "An Act to Authorize the Completion, Maintenance, and Operation of the Bonneville Project for Navigation, and for Other Purposes," approved August 20, 1937 (commonly known as the "Bonneville Project Act of 1937") (16 U.S.C. 832d(a)).

In the conference report accompanying this new legislation,[1] Congress recognized that current Bonneville authorizing legislation severely limits the agency's flexibility to market federal power placing it at a marketing disadvantage and restricting potential revenues. In order to increase Bonneville's revenues and its competitiveness, Congress enacted this new legislation which removes some of those marketing restrictions from sales of excess federal power. Excess federal power is any power generated by routine power operations, or fish and wildlife operations of either the Federal Columbia River Power System or other electric power plants from which Bonneville is contractually obligated to acquire electric power and that is made surplus to the Administrator's firm requirements contractual obligations in two instances: (1) By requirements customers decisions to remove load from Bonneville; or (2) because of hydrosystem operations primarily for the benefit of fish and wildlife affected by the development, operation, or management of the system.

This excess federal power can be sold or otherwise disposed of outside the region for up to 7 years without the Regional Preference Act call back provisions upon 60-days notice for energy sales and 60-months notice for capacity sales.[2] This power also can be sold in any region without the Bonneville Project Act restriction on the resale of federal power by private entities not in the business of selling power in the retail market.[3] In addition, the existing requirement that Bonneville provide notice to existing regional customers is made more flexible for sales of excess federal power to reflect the current competitive market and the type of transaction. In all cases, however, Bonneville must first offer the excess federal power to regional customers for a reasonable period of time and under the same essential rate, terms and conditions as the proposed out-of-region sales.

It is Bonneville's preliminary view as a matter of policy that Bonneville should make retail sales outside the Pacific Northwest region to purchasers, other than preference customers and federal agencies, only where such sales are consistent with the state law that would apply if Bonneville were not a federal agency. Bonneville specifically seeks comment on this policy.

Process

This notice announces Bonneville's initiation of a procedure to establish policy on the implementation of the new marketing authority in P.L. 104–46. Bonneville is interested in and will take public comment on the attached proposed implementation policy. All comments should be submitted before May 28, 1996 to be considered prior to issuance of a final policy. Submit written comments to David J. Armstrong—MPF, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208–3621. Bonneville will conduct two public meetings, one in the Pacific Northwest region and one outside the region.[4] After close of the public comment period, Bonneville will evaluate all comments and issue a final implementation policy.

General Approach

Bonneville intends the scope of this policy making to be limited to the development of a policy necessary to implement the relevant provisions of P.L. 104–46; including processes and specific determinations required to be made of the amount of excess federal power as defined by this law, and how notice will be provided to Pacific Northwest customers of extraregional sales of excess federal power.

Bonneville believes that this proposal is fully consistent with the letter and intent of P.L. 104–46. In proposing interpretations of and processes for implementing P.L. 104–46, Bonneville is proposing those that result in the most efficient, simple, straight-forward, and administratively least-burdensome implementation of the law.

Determination of Excess Federal Power

Section 508(a)(3) of P.L. 104–46 defines excess federal power as federal power made surplus to the Administrator's firm contractual obligations under section 5(f) of the Northwest Power Act[5] in two instances. First, excess federal power includes reductions in the quantity of power the Administrator is contractually required to supply under sections 5(b) and 5(d) of the Northwest Power Act (5(b) and 5(d) obligations) because of elections by the Administrator's firm requirements customers, that is, Pacific Northwest public agency, federal agency, investor-owned utility, and direct service industry customers, to purchase power from other suppliers, as compared to the Administrator's 5(b) and 5(d) obligations as of January 1, 1995. Second, excess federal power is that power made excess due to operation of the federal hydrosystem, whether generated or purchased, primarily for the benefit of fish and wildlife affected by that system.

In order to implement this new marketing authority, Bonneville must make three determinations: (1) the amount of reductions in the Administrator's 5(b) and 5(d) obligations relative to those obligations as of January 1, 1995, which can further be broken into two findings: (a) The actual amount of the Administrator's 5(b) and 5(d) obligations as of January 1, 1995, and (b) a yearly forecast of the Administrator's current 5(b) and 5(d) obligations to serve Pacific Northwest firm requirements power loads; (2) the amount of excess power that results from operating the hydrosystem primarily for fish and wildlife; and (3) a process for making annual determinations of excess federal power.

1. Reductions in the Administrator's Firm Contractual Obligations Under 5(b) and 5(d) of the Northwest Power Act

(a) *5(b) and 5(d) Obligations as of January 1, 1995:* Bonneville's contractual obligations under sections 5(b) and 5(d) of the Northwest Power Act are comprised of and limited to the Administrator's sale of firm requirements power for consumer loads of public body, cooperative, federal agency customers, investor-owned utilities,[6] and for direct consumption by existing direct service industrial customers in the Pacific Northwest.[7] All other remaining firm contractual obligations are not sales of power for the general requirements of utility customers or direct service industrial customers and are not governed by sections 5(b) and 5(d) of the Northwest Power Act. Therefore these other sales are not included in this determination of the Administrator's contractual obligations as of January 1, 1995.

The Administrator's 5(b) and 5(d) obligations as of January 1, 1995, are the amounts based on the sum of the following calculations:

- *Actual and Planned Computed Requirements Customers:* Obligations for the actual and planned computed requirements customers[8] are the annual average of the customers' monthly energy requirements in average megawatts for calendar year 1994 submitted to Bonneville for the Pacific Northwest Coordination Agreement for operating years 1993–94 and 1994–95.
- *Metered Requirements Customers:* Obligations for the metered requirements customers[9] are the calendar year 1994 annual average firm energy sales in average megawatts to this customer class as reported in Bonneville's Generation and Power Sales Report.
- *Direct Service Industrial Customers:* Obligations for the direct service industrial customers are the annual average of the customers' monthly Operating Demands for calendar year 1994 submitted to and approved by Bonneville for contract years 1993–94 and 1994–95.
- *Regional Investor-Owned Utilities:* Obligations for the investor-owned utilities are the calendar year 1994 annual average sales under the New Resource Firm Power Rate in average megawatts to this customer class as reported in Bonneville's Generation and Power Sales Report.

Based on the above calculations, the Administrator's total 5(b) and 5(d) obligations as of January 1, 1995, were 8309 average megawatts. Consistent with P.L. 104–46, this amount will be the baseline for all annual calculations of excess federal power. This is a fixed determination and will not change once the final implementation policy is issued.

(b) *Current Contractual Obligations:* Each year Bonneville will determine the Administrator's current 5(b) and 5(d) contractual obligations based upon executed contracts. In order to accommodate power deliveries of up to 7 years, Bonneville will produce a 10-year annual average energy forecast of its current 5(b) and 5(d) obligations.

(c) *Reductions in Contractual Obligations:* Reductions in the Administrator's 5(b) and 5(d) obligations will be calculated in each annual determination of excess federal power. On an average annual energy (average megawatts) basis for each year of the 10-year forecast period, the reductions in 5(b) and 5(d) obligations will be the difference between the forecasted current obligation in that year and the Administrator's contractual obligation as of January 1, 1995, or 8309 average megawatts. In order to determine the amount of excess capacity available for marketing, Bonneville will calculate an average annual load factor based on its remaining 5(b) and 5(d) obligations. This load factor will be applied to the difference between the forecasted current obligations and the obligations as of January 1, 1995, to determine the amount of capacity in average megawatts which the Administrator may market as excess federal power.

2. Fish and Wildlife Operations: Bonneville has run two 50-year continuous water year studies to determine the amount of excess generation in average megawatts caused by hydrosystem operations primarily for fish and wildlife. The first study removes all fish and wildlife requirements. This study shows the firm energy production capability of the federal system in each month. The second study includes all fish and wildlife restrictions and also provides monthly firm energy production. Each study was run with the rule curves and resource operations which simulate the most efficient operation for their specific conditions and limitations. The difference in monthly energy production between the two studies was

[4] Additional public meetings may be held, if necessary.

[5] Pacific Northwest Electric Power Planning and Conservation Act, Pub. L. No. 96–501, § 5(f), 94 Stat. 2697 (1980). Section 5(f) of the Northwest Power Act provides: The Administrator is authorized to sell, or otherwise dispose of, electric power, including power acquired pursuant to this and other Acts, that is surplus to his obligations incurred pursuant to subsections (b), (c), and (d) of this section in accordance with this and other Acts applicable to the Administrator, including the Bonneville Project Act of 1937 (16 U.S.C. 832 and following), the Federal Columbia River Transmission System Act (16 U.S.C. 836 and following), and the Act of August 31, 1964 (16 U.S.C. 837–837h).

[6] All of the investor-owned utilities in the region have signed long-term firm power sales contracts that obligate Bonneville, upon compliance with certain notice requirements, to deliver power in amounts requested by the investor-owned utilities to meet a portion of their loads in the region. These utilities have not elected to place loads on Bonneville under these agreements, with the exception of a relatively small amount of electric power loads placed on Bonneville under the New Resource Firm Power Rate schedule(s). These obligations will be included in the determination of excess federal power due to load reductions.

[7] "Pacific Northwest" as defined in the Regional Preference Act, 1(b), 78 Stat. 756, as amended by Pacific Northwest Electric Power Planning and Conservation Act, 8(e), 94 Stat. 2729.

[8] As of January 1,1995, Grant County PUD No. 2, Chelan County PUD No. 1, Cowlitz County PUD, Douglas County PUD No. 1, Eugene Water and Electric Board, Pend Oreille PUD No. 1, Seattle City Light, Snohomish County PUD No. 1, Tacoma Public Utilities.

[9] Small and Non-Generating Public Utilities, including Federal Agencies.

averaged over the 50-year period for each month. The positive monthly averages, representing the increased generation due to fish and wildlife operations, were summed to determine the annual average energy amount in average megawatts of excess federal power due to fish and wildlife operations. A 100 percent load factor was assumed for determining the capacity amount of excess federal power due to fish and wildlife operations. BPA relied on two studies that were developed in support of the implementation of the BPA fish spending limitation. The results from those two studies established an amount of excess federal power due to hydrosystem operations primarily for the benefit of fish and wildlife of 129 average megawatts annually. Unless further changes in the future are required in the scope and magnitude of hydrosystem operations for the benefit of fish and wildlife, this amount of excess federal power due to such operations will not be revisited in each annual determination of excess federal power. If future changes impact hydrosystem operations Bonneville may revise the amount of excess federal power by reopening this policy.

3. *Process:* Each year Bonneville will determine the total amount of excess federal power on its system. Each annual determination will be based on a revised 10-year forecast of Bonneville's then-current section 5(b) and 5(d) contractual obligations. The net of each year's forecast and 8309 average megawatts will be the amount of excess federal power due to forecasted reductions in those contractual obligations. This amount will be added to the amount of excess federal power due to fish and wildlife obligations in order to determine the total amount of excess federal power that may be marketed in any year of the forecast. This total amount of excess federal power will be reduced by the amount of any current sales of excess federal power to determine the total amount available to the Administrator for marketing. The results of this determination will be included in an annual notification to Bonneville's then existing Pacific Northwest customers of Bonneville's intent to market excess federal power or surplus power outside the region. Bonneville's date of issuance of the notification may vary from year to year.

Sales of Excess Federal Power

1. *Sales Outside the Region:* In section 508(b) of P.L. 104–46, excess federal power may be sold or otherwise disposed of outside the Pacific Northwest region without the marketing restrictions contained in sections 3(a), (b) and (c) of the Regional Preference Act and section 9(c) of the Northwest Power Act.[10] The Administrator is authorized to sell excess federal power without the requirement that energy or capacity deliveries to an out-of-region customer be subject to termination of deliveries (recall) upon 60-days notice for energy and 60-months notice for capacity if the Administrator determines it is needed to meet the requirements of the Administrator's regional customers.

In addition, the notice required for out-of-region sales in section 2 of the Regional Preference Act is made inapplicable to sales of excess federal power.[11] The new law conditions the sale of excess federal power outside the region upon the requirement that the Administrator first offer the power to Pacific Northwest public body, cooperative, and investor-owned utilities and direct service industrial customers for a reasonable period of time and under the same essential rate, terms, and conditions. This notice requirement provides the Administrator with considerable flexibility in providing Bonneville's existing regional customers with notice of sales to out-of-region customers.[12]

P.L. 104–46 provides the Administrator with the authority to sell excess federal power outside the region for a period of up to 7 years. In all sales of excess federal power Bonneville will limit the actual delivery of excess federal power to 7 years. Such contracts may contain a provision for renewal and be renewed, subject to the availability of excess federal power at the time the purchaser must provide a renewal notice.

An annual notification of the availability of excess federal power will be given to existing regional customers. This notification will specify a range of rates, and basic terms and conditions for a sale of excess federal power on which Bonneville will enter into bilateral discussions with out-of-region customers.

For contracts having a term of one year or greater, regional customers interested in purchasing excess federal power will have 30 days from the date of the annual notice to contact Bonneville. If a subsequent agreement for the sale of excess federal power to an out-of-region customer is negotiated under a rate or under terms and conditions different from the range of rates, terms, and conditions specified in the annual notice, Bonneville will provide interested regional customers notice of the pending sale. Regional customers interested in purchasing excess federal power under the same rate, terms and conditions in the pending out-of-region sale will have 5 days from the date of this subsequent notice to contact Bonneville. In order to enter into such an agreement, regional customers must agree to the identical terms and conditions in the agreement for pending out-of-region sale, except those which clearly do not apply to the particular utility (such as points of delivery).

For contracts having a duration of less than 1 year, the annual notification of the availability of excess federal power will serve as the only notification of the availability of excess federal power. Any interested regional customers may contact Bonneville to purchase such short-term excess federal power based on the general rate, terms and conditions proposed by Bonneville in the annual notification after bilateral negotiations with Bonneville. If a subsequent agreement for a short term sale of excess federal power to an out-of-region customer is negotiated under a rate or under terms and conditions different from the range of rates, terms and conditions specified in the annual notice, Bonneville will provide interested regional customers notice of the pending sale. Regional customers interested in purchasing excess federal power under the same rate, terms and conditions in the pending out-of-region sale will have up to 5 days, depending on the effective delivery date and the duration of the short-term sale, from the date of this subsequent notice of contact Bonneville.

2. *Sales in Any Region:* Section 508(b)(2) authorizes the sale of excess federal power in any region without the restriction on resale established in the second sentence of section 5(a) of the Bonneville Project Act which provides that contracts for the sale of electric energy to any private person or agency other than a privately owned public utility engaged in selling electric energy to the general public, shall contain a provision forbidding such private purchaser to resell any such electric energy so purchased to any private utility or agency engaged in the sale of electric energy to the general public, and requiring the immediate canceling of such contract of sale in the event of violation of such provision.

This provision requires that contracts for the sale of power by the Administrator to private entities or agencies thereof, other than investor-owned utilities, contain a provision that prohibits the resale of that power to investor owned utilities or other private entities or their agents engaged in the sale of electricity to the general public. Consistent with the removal of this requirement in P.L. 104–46, contracts for the sale of excess federal power will not contain any provision prohibiting the resale of such power to investor-owned utilities or other private entities or their agents.

Issued in Washington, D.C. on March 22, 1996.

Stephen Wright,

Assistant Administrator, Bonneville Power Administration.

BILLING CODE 6450–01–P

[10] The Pacific Northwest Electric Power Planning and Conservation Act, Pub. L. No. 96–501, 9(c), 94 Stat. 2697 (1980).

[11] Section 2 of the Regional Preference Act provides that at least 30 days prior to the execution of any contract for the sale, delivery, or exchange of surplus energy or surplus peaking capacity for use outside the Pacific Northwest, the Secretary shall give the then customers of the Bonneville Power Administration written notice that negotiations for such a contract are pending, and thereafter, at any customer's request, make available for its inspection current drafts of the proposed contract.

[12] In the conference report, Congress states that "this flexibility may include shorter notice periods and less detailed information on in-program negotiations. Notice periods may be very short for short-term sales (for example, notice to accommodate hourly sales) and for transactions that must be negotiated quickly. BPA may also provide seasonal notice with price ranges requesting interested parties to contact BPA to purchase power." H.R. 1905, Conf. Rep. No. 293, 104th Cong., 1st Sess. 94 (1995).

Kalispel Tribe Resident Fish Project

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of Floodplain and Wetlands Involvement.

SUMMARY: This notice announces BPA's proposal to construct a warm water bass hatchery and create two bass nurseries on the "Flying Goose Ranch" in northeastern Washington State. The action is being undertaken to mitigate partially for salmon and steelhead losses incurred as a result of the construction and operation of Chief Joseph and Grand Coulee dams. The action proposed within the floodplain of the Pend Oreille River is to construct, operate, and maintain water control structures to create two bass nursery sloughs adjacent to the Pend Oreille River in Pend Oreille County in northeastern Washington. In accordance with DOE regulations for compliance with floodplain and wetlands environmental review requirements (10 CFR Part 1022), BPA will prepare a floodplain and wetlands assessment and will perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain and wetlands. The assessment will be included in the environmental assessment being prepared for the proposed project in accordance with the requirements of the National Environmental Policy Act. A floodplain statement of findings will be included in any finding of no significant impact that may be issued following the completion of the environmental assessment.

DATES: Comments are due to the address below no later than April 15, 1996.

ADDRESSES: Submit comments to the Public Involvement and Information Manager, Bonneville Power Administration—CKP, P.O. Box 12999, Portland, Oregon 97212. Internet address: comment@bpa.gov.

FOR FURTHER INFORMATION, CONTACT: Gene Lynard—ECN, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon, 97208–3621, phone 503–230–3790, fax 503–230–3212.

SUPPLEMENTARY INFORMATION: The wetlands and floodplain involved are located in sections 17, 18, 19 and 20, T34N, R44E, Willamette Meridian.

Maps and further information are available from BPA at the address above.

Issued in Portland, Oregon, on March 21, 1996.

Nancy H. Weintraub,

Fish and Wildlife Team Lead, Environment, Fish and Wildlife Group.

Federal Energy Regulatory Commission

[Project No. 1417; Project No. 1835]

Central Nebraska Public Power and Irrigation District and Nebraska Public Power District; Notice of Public Conference

March 25, 1996.

In response to a request by the U.S. Department of the Interior (Interior), FERC staff will host a technical conference on the questions raised by Interior economists regarding the economic analysis in the Biological Assessment. The conference is scheduled for April 3, 1996, from 9:00 a.m. until 5:00 p.m. in Room No. 3M–2A, located on the third floor of 888 First Street NE., Washington, D.C. If necessary, the conference will reconvene at 9:00 a.m. on April 4, 1996.

This conference is neither a hearing nor a settlement conference. It will provide an opportunity for representatives of Interior and the Commission staff to raise questions and exchange information concerning the Commission's economic analysis. Interested parties are welcome to attend and observe the conference, but participation will be limited to the Commission and Interior.

Anyone wishing to comment in writing on the conference must do so no later than April 17, 1996. Comments should be addressed to: Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, D.C. 20426.

Reference should be clearly made to: the Kingsley Dam (Project No. 1417) and North Platte/Keystone Diversion Dam (Project No. 1835).

For further information, please contact Frankie Green at (202) 501–7704.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Project No. 3913–001]

Puget Sound Power & Light Company; Notice of Effective Date of Withdrawal of License Application

March 25, 1996.

On July 19, 1983, Puget Sound Power & Light Company (Puget Power) filed a license application for the proposed Thunder Creek Project No. 3913, to be located on Thunder Creek in Skagit County, Washington. On March 4, 1996, Puget Power filed a letter withdrawing its license application. No motion in opposition to the withdrawal was filed, and the Commission took no action to disallow the withdrawal. Accordingly, pursuant to Rule 216 of the Commission's Rules of Practice and Procedure,[1] the withdrawal became effective on March 19, 1996.

Lois D. Cashell,

Secretary.

[Project No. 2514–021]

City of Hamilton; Ohio and Kentucky; Notice of Availability of Final Environmental Assessment

March 25, 1996.

A final environmental assessment (FEA) is available for public review. The FEA is for a license amendment application to relocate a portion of a transmission line for the Greenup

[1] 18 CFR 385.216.

Project. The FEA finds that approval of the application would not constitute a major federal action significantly affecting the human environment. The Greenup Project is located on the Ohio River in Greenup County, Kentucky and Scioto County, Ohio.

The FEA was written by staff in the Office of Hydropower Licensing, Federal Energy Regulatory Commission. Copies of the FEA are available for review at the Commission's Public Reference and Information Center, Room 2–A, 888 First Street NE., Washington, DC 20426. Copies can also be obtained by calling the project manager, Jon Cofrancesco at (202) 219–0079.

BILLING CODE 6717–01–M

Notice of Application Filed With the Commission

March 25, 1996.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. Type of Application: Non-project Use of Project Lands and Waters.

b. Project No.: 184–050.

c. Date filed: March 13, 1996.

d. Applicant: Pacific Gas and Electric Company.

e. Name of Project: El Dorado Project.

f. Location: The project is located on the South Fork American River in El Dorado and Alpine Counties in California..

g. Filed pursuant to: Federal Power Act, 16 U.S.C. § 791(a)–825(r).

h. Applicant Contact: Ms. Rhonda Shiffman, Pacific Gas and Electric Company, P.O. Box 770000, P10A, San Francisco, CA 94177, (415) 973–5852.

i. FERC Contact: Jon E. Confrancesco, (202) 219–0079.

j. Comment Date: April 29, 1996.

k. Description of Amendment: Pacific Gas and Electric Company (licensee), proposes to grant permission to Kirkwood Associates, Inc. to divert water from a project reservoir (Caples Lake) for snow making purposes at the Kirkwood Ski Resort. The proposal involves the construction and operation of a water intake facility at Caples Lake and the withdrawal of up to 500 acre-feet of water during the ski season. The proposal is part of the Kirkwood Water Rights and Snowmaking Project previously reviewed by the U.S. Forest Service, Alpine County, and other federal, state, and local agencies. During the review process, a final environmental impact report and environmental assessment was prepared for the project. On September 18, 1995, the U.S. Forest Service issued a Decision Notice approving the project.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Notice of Application Filed With the Commission

March 25, 1996.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. Type of Application: Request for Commission Approval to Grant a Permit for the Construction and Operation of a Marina Facility.

b. Project No.: 1494–116.

c. Dated Filed: February 12, 1996.

d. Applicant: Grand River Dam Authority (licensee).

e. Name of Project: Pensacola Project.

f. Location: The Duck Creek arm of Grand Lake O' The Cherokees, Delaware County, Afton Oklahoma.

g. Filed Pursuant to Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Robert W. Sullivan, Jr., Grand River Dam Authority, P.O. Box 409, Drawer G, Vinita, OK 74301, (918) 256–5545.

i. FERC Contact: Joseph C. Adamson, (202) 219–1040.

j. Comment Date: April 30, 1996.

k. Description of Proposed Action: The licensee requests Commission approval to grant a permit to Mr. John Mullen, d/b/a Thunder Bay Marina for the construction and operation of a marina facility. The proposed facility includes the addition of 151 boat slips to an existing facility with 3 floating docks containing 58 boat slips, for a total of 209 boat slips.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP96–254–000, et al.]

Distrigas of Massachusetts Corporation, et al.; Natural Gas Certificate Filings

March 22, 1996.

Take notice that the following filings have been made with the Commission:

1. Distrigas of Massachusetts Corporation

[Docket No. CP96–254–000]

Take notice that on March 15, 1996, Distrigas of Massachusetts Corporation (DOMAC), 75 State Street, Boston, Massachusetts 02109, filed in Docket No. CP96–254–000, an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7 and Part 157 of the Commission's Regulations for a certificate of public convenience and necessity to install additional vaporization capacity and to install and construct additional facilities appurtenant thereto at DOMAC's liquefied natural gas (LNG) terminal in Everett, Massachusetts, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

DOMAC seeks authorization to construct and install additional LNG vaporization facilities wholly within the existing boundary of DOMAC's Everett Marine Terminal. DOMAC states that the new LNG vaporization system will be located in the same general area of the plant as the existing vaporization facilities. There will be two vaporization trains, each with a nominal capacity rating of 75,000 Mcf/d to be delivered through a new 750 psig send-out system. In addition to providing new vaporization capacity of 150,000 Mcf/d, the new system can serve as a back-up to existing vaporizer facilities. DOMAC states that it anticipates the project will have an approximate cost of $15.5 million and will be financed by DOMAC using cash on hand. DOMAC further states that the proposed facilities will be installed to meet the anticipated need for increased vaporization capacity in the fall of 1998. DOMAC states that it will assume 100 percent of the cost recovery risk related to the project and that the project will have no impact on the rates charged for DOMAC's sales services.

DOMAC also states that it anticipates the construction of a pipeline interconnection between its facilities and those of Tennessee Gas Pipeline Company (Tennessee) which is the subject of a pending certificate application, Docket No. CP96–164–000, that is before the Commission. DOMAC states that Tennessee's proposed 7.5-mile, 20-inch pipeline will directly connect Tennessee's existing Revere Lateral line in Saugus, Massachusetts with DOMAC's facilities in Everett. DOMAC further states that although DOMAC's proposed vaporization facilities are necessary to deliver vaporized LNG into Tennessee's new pipeline at 750 psig, DOMAC's need for additional vaporization capacity is independent of Tennessee's proposal to directly connect to the facilities. DOMAC states that it intends to proceed with the expansion of its vaporization capacity even in the absence of the Tennessee interconnection.

Comment date: April 12, 1996, in accordance with Standard Paragraph F at the end of this notice.

2. Northwest Pipeline Corporation

[Docket No. CP96–258–000]

Take notice that on March 18, 1996, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP96–258–000 a request pursuant to Sections 157.205, 157.211 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.211 and 157.216) for authorization to abandon certain facilities and to construct and operate upgraded replacement facilities at an existing delivery point in Benton County, Washington, to accommodate deliveries of natural gas to Cascade Natural Gas Company (Cascade), under Northwest's blanket certificate issued in Docket No. CP82–433–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest requests authorization to abandon facilities at the Kennewick Meter Station consisting of 2 2-inch regulators, 2 4-inch orifice meters and appurtenant piping and valves and a 2-inch tap. Northwest proposes to abandon the regulators and meters by removal and to abandon the tap in place. It is stated that Northwest proposes to replace these facilities because they are undersized for the existing maximum daily delivery obligation to Cascade of 12,092 dt equivalent of natural gas per day.

To replace the facilities proposed for abandonment, Northwest proposes to install 2 3-inch regulators, 2 6-inch turbine meters and appurtenant piping and valves and a 4-inch tap. These proposed facilities would increase the maximum design capacity of the meter station from 8,900 dt equivalent per day to approximately 21,830 dt equivalent per day. It is estimated that the cost to remove the old facilities would be $13,000, and the cost to install the replacement facilities would be $371,800. It is asserted that Northwest makes deliveries to Cascade under its Rate Schedules TF–1 and TF–2.

It is stated that no customers would lose service as a result of the proposed abandonment and replacement. It is further stated that Northwest's tariff does not prohibit the upgrade of delivery point facilities and that there would be no impact on Northwest's peak day and annual deliveries. It is explained that deliveries at the Kennewick delivery point would be within authorized entitlements of Cascade or other shippers.

Comment date: May 6, 1996, in accordance with Standard Paragraph G at the end of this notice.

3. Williams Natural Gas Company

[Docket No. CP96–260–000]

Take notice that on March 18, 1996, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP96–260–000 a request pursuant to Sections 157.205, 157.208 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.208 and 157.216) for authorization to abandon certain pipeline facilities and to construct and operate replacement facilities located in Cowley County, Kansas, under Williams' blanket certificate issued in Docket No. CP82–479–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Williams requests authorization to abandon partly by reclaim and partly in place approximately 7.5 miles of Williams' Dilworth-Cambridge 16-inch pipeline and to construct and operate

7.5 miles of replacement 6-inch pipeline. It is stated that this proposal is a continuation of the replacement of the Dilworth-Cambridge Line begun in Docket No. CP95–682–000. It is asserted that the replacement of the line by 6-inch pipe will allow for more efficient use of Williams' facilities. Williams proposes to uprate the line on completion of its replacement from its present maximum allowable operating pressure (MAOP) of 315 to 265 psig to a proposed MAOP of 720 psig. It is stated that the uprating of the line will eliminate the need for pressure regulation and reduce related maintenance costs. It is estimated that the cost to reclaim facilities would be $1,000, the cost to construct the replacement facilities would be $1,644,000, and the estimated salvage value would be $3,000. It is asserted that Williams has sufficient capacity to make the changes without detriment or disadvantage to its customers. It is stated that the present volume of gas transported on the Dilworth-Cambridge pipeline is 13,400 Mcf of gas per day.

Comment date: May 6, 1996, in accordance with Standard Paragraph G at the end of this notice.

4. Texas Gas Transmission Corporation

[Docket No. CP96–262–000]

Take notice that on March 19, 1996, Texas Gas Transmission Company (Texas Gas), P.O. Box 20008, Owensboro, Kentucky 42304, filed in Docket No. CP96–262–000 a request pursuant Sections 157.205(b) and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205(b) and 157.212) for authorization to add a new delivery point in Henderson County, Kentucky, to serve Western Kentucky Gas Company (Western), a local distribution company, under Texas Gas' blanket certificate issued in Docket No. CP82–407–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas states that it has received a request from Western for a new delivery point on Texas Gas' Slaughters-Evansville 10-inch Line in Henderson County, Kentucky, to enable Western to render natural gas service to a new customer, Hudson Foods, Inc. It is also stated that the natural gas delivered to the proposed delivery point would be used for service to Hudson's new chicken processing plant. Texas Gas states that Western would reimburse Texas Gas for the cost of this delivery point, which cost is estimated to be $81,100.

Texas Gas further states that Western would not require any increase in existing firm contract quantities to accommodate service to the new delivery point. Since no increase in contract quantities has been requested by Western, Texas Gas states that the service to the proposed delivery point could be accomplished without detriment to Texas Gas' other customers.

It is further asserted that the natural gas volumes that would be delivered at the proposed delivery point would be a maximum daily quantity of 4,500 MMBtu, with a maximum annual quantity of 1,200,000 MMBtu.

Comment date: May 6, 1996, in accordance with Standard Paragraph G at the end of this notice.

5. Michigan Gas Storage Company

[Docket No. CP96–263–000]

Take notice that on March 20, 1996, Michigan Gas Storage Company (MGSCo), 212 West Michigan Avenue, Jackson, Michigan 49201, filed in Docket No. CP96–263–000 an application pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain pipeline facilities in the Cranberry Lake Storage Field in Clare County, Michigan and pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the pipeline facilities being replaced, all as more fully set forth in the application on file with the Commission and open to public inspection.

MGSCo requests authorization to construct and operate 5.2 miles of 20-inch pipeline to replace 1.3 miles of 10-inch, 3.9 miles of 16-inch and 5.2 miles of 8-inch pipeline in the Cranberry Lake Storage Field from Station 60 to the Muskegon River Compressor Station, all located in Clare County, Michigan. MGSCo states that the purpose of the proposed project is to replace deteriorating pipeline and to allow for efficient cleaning/inspection of the header pipeline for the storage field.

MGSCo estimates the cost of the proposed project to be $3,550,000. MGSCo states that it proposes to recover the construction and operation costs of the 20-inch piping replacement in a future Section 4 rate filing with the Commission, on a rolled-in basis.

Comment date: April 12, 1996, in accordance with Standard Paragraph F at the end of this notice.

6. Sea Robin Pipeline Company

[Docket No. CP96–266–000]

Take notice that on March 20, 1996, Sea Robin Pipeline Company (Sea Robin), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed a request with the Commission in Docket No. CP96–266–000 pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to construct and operate a new delivery point, to enable Sea Robin to deliver gas to Equitable Storage Company (Equitable), authorized in blanket certificate issued in Docket No. CP82–429–000, all as more fully set forth in the request on file with the Commission and open to public inspection.

Sea Robin proposes to construct, install and operate a new delivery point at its existing Erath Compressor Station site. The delivery point would be located in Sea Robin's Erath Compressor Station yard in Section 41, Township 13 South, Range 4 East, in Vermillion Parish, Louisiana. The delivery point would be used to deliver gas to Equitable. Sea Robin states that the estimated cost of the construction and installation of the delivery point facilities would be approximately $434,148. Equitable has agreed to reimburse Sea Robin for the total actual cost of the facilities.

Comment date: May 6, 1996, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[ER–FRL–5414–9]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 11, 1996 Through March 15, 1996 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564–7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in the **Federal Register** dated April 14, 1996 (60 FR 19047).

Draft EIS's

ERP No. D–AFS–J02033–UT Rating LO, Dixie National Forest Oil and Gas Leasing on Federal Lands, Implementation, Garfield, Kane, Iron, Washington, Piute and Wayne Counties, UT.

Summary: EPA provided no formal written comments. EPA has no objection to the preferred alternative as described in the EIS.

ERP No. D–AFS–L65254–AK Rating LO, 1995 Mendenhall Glacier Recreation Area Management Plan, Implementation, Tongass National Forest, Juneau Ranger District, Chatham Area, AK.

Summary: EPA expressed a lack of objections for the proposed action.

ERP No. D–BLM–G65064–TX Rating LO, Texas Land and Resource Management Plan (RMP), Implementation, Split Estates Federal Mineral Ownership (FMO), Several Counties, TX.

Summary: EPA had no objection to the selection of the preferred alternative described in the draft EIS.

ERP No. D–FHW–E40763–NC Rating EC2, Winston-Salem Northern Beltway, (Eastern Section) from US 52 North of Winston-Salem to US 421/I–40 Business east of Winston-Salem, Construction, Funding and COE Section 404 Permit, Forsyth County, NC.

Summary: EPA had environmental concerns that the 12 mile long Bypass evaluated in the draft EIS is only one of two segments of a planned Northern Bypass. The NEPA review should have been comprehensive. EPA is also concerned about secondary impacts to a water supply.

ERP No. D–FHW–E40765–FL Rating EC2, East-West Multimodal Corridor Transportation Improvements, Beginning at the Tamiami Campus of Florida International University (FIU) extending the length of FL 836, Port of Miami, Dade County, FL.

Summary: EPA's review found that all of the proposed alternatives will have relatively minor impact to the natural environment, but did express concerns for impacts to the urban human environment in the form of noise and relocations.

ERP No. D–FHW–K40215–CA Rating EC2, East Sonora Bypass/CA–108 Construction, CA–108 from Post Mile

M1.8 to Post Mile R6.9, Funding and COE Section 404 Permit Issuance, Tuolumne County, CA.

Summary: EPA expressed environmental concerns regarding cumulative impacts of the project on the environment and development plans along the alignment, water quality, and hazardous waste found at sites within the corridor.

ERP No. D–FRC–A08030–00 Rating EU2, Promoting Wholesale Competition through Open Access Non-Discriminatory Transmission Service by Public Utilities (RM95–8–000) and Recovery of Strandred Costs by Public Utilities and Transmitting Utilities (Docket No. RM–94–7–001), Proposed Rulemaking.

Summary: EPA raised environmental concerns over the potential for the proposed rule to significantly increase air pollution, the need for additional information to better assess the potential impacts, the need for further analysis and consideration of mitigation options, and the absence of an appropriate mitigation mechanism to prevent the pollution increases. EPA believed that by working with FERC, the Department of Energy and other agencies, practical mitigation steps can be developed.

ERP No. D–USA–K11065–CA Rating EC2, Miramar Naval Air Station (NAS) Realignment or Conversion to Miramar Marine Corps Air Station, Implementation, San Diego, CA.

Summary: EPA expressed environmental concerns regarding the loss of vernal pools and endangered species habitat, as well as noise analysis.

ERP No. DA–FTA–K51035–CA Rating EC2, Bay Area Rapid Transit District (BART) Transportation Improvements, San Francisco to San Francisco International Airport Extension, Alternative VI Aerial Design Option, Approval, Funding, COE Section 404 and Possible FHWA Encroachment Permits Issuance, San Mateo County, CA.

Summary: EPA expressed environmental concerns with the project's possible impacts to wetland, endangered species, and minority neighborhoods.

Final EIS's

ERP No. F–AFS–K65154–CA Mendocine National Forest Land and Resource Management Plan, Implementation, Colusa, Glenn, Lake, Mendocino, Tehama and Trinity Counties, CA.

Summary: Review of the final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F–AFS–K65157–CA Paper Reforestation and Resource Recovery Project, Implementation, Stanislaus National Forest, Mi-Wok Ranger District, Tuolumne County, CA.

Summary: EPA expressed environmental concerns regarding level of aerial spraying of hexazinone.

ERP No. F–AFS–L65172–ID Idaho Panhandle National Forests Noxious Weed Management Projects, Implementation, Bonners Ferry Ranger District, Boundary County, ID.

Summary: EPA had no objection to the action as proposed. ERP No. F–FHW–E40740–NC US 1 Improvements, Secondary Road 1853 at Lakeview to Secondary Road 1180 south of Sanford, Funding and COE Section 404 Permit Issuance, Lee and Moore Counties, NC.

Summary: EPA expressed environmental concerns with the US 1 Highway Improvement Project primarily because of insufficient commitment to wetlands mitigation.

ERP No. F–FHW–K40134–CA CA–180 Transportation Project, Construction, between Temperance Avenue and Cove Road, Funding and COE Section 404 Permit, Fresno County, CA.

Summary: EPA's environmental concerns with the draft EIS were adequately addressed in the FEIS. Also, EPA recommended that FHWA continue their coordination with the other interesed state and local agencies.

ERP No. F–MMS–G02005–00 1996 Central and Western Gulf of Mexico Outer Continental Shelf (OSC) Oil and Gas Lease Sales No. 157 (March 1996) and No. 161 (August 1996), Lease Offerings, Offshore coastal counties and parishes of AL, MS, LA and TX.

Summary: EPA had no objections to the selection of the preferred alternative.

ERP No. F–NOA–A29004–00 Programmatic EIS—Coastal Nonpoint Pollution Control Program, Implementation, Approval for 29 States and Territories Coastal Nonpoint Program.

Summary: Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F–NOA–A91061–00 Atlantic Mackerel, Squid and Butterfish Fisheries, Fishery Management Plan, Amendment No. 5, Implementation, Exclusive Economic Zone (EEZ) off the US Atlantic Coast.

Summary: EPA had no objections to the proposed program.

ERP No. F–UAF–K11061–GU Andersen Air Force Base (AFB) Solid Waste Management Facility, Construction, Island of Guam, GU.

Summary: EPA continued to express environmental concerns regarding stability and monitorability of the landfill site and reiterated the need for additional information regarding monitoring, air emissions, pretreatment and runoff controls before the Air Force signs a ROD.

ERP No. F–USN–G11028–TX Mine Warfare Center of Excellance (MWCE) Establishment, Construction and Operations, Magnitic Silencing Facility (MSF), Aviation Mine Count Measures (AMCM) and Sled Facility, Possible NPDES Permit, COE Section 10 and 404 Permits, Corpus Christi Bay Area, TX.

Summary: EPA had no objection to the selection of the preferred alternative described in the Final EIS.

ERP No. F–USN–K11062–CA San Diego Homeporting Facilities Construction and Operation to Support Berthing One NIMITZ Class Aircraft Carrier, Implementation, San Diego County, CA.

Summary: EPA had no objection to the final EIS.

ERP No. FR–UAF–B11015–ME Loring Air Force Base (AFB) Disposal and Reuse, Implementation, Aroostook County, ME.

Summary: EPA environmental concerns have been resolved satisfactorily in the 1995 revised documents.

Other

ERP No. LF–NPS–L61204–OR.

Adoption: Wallowa River Wild and Scenic River Study from the Confluence of the Minam and Wallowa Rivers to the Confluence of the Wallowa River and the Wild and Scenic Grande Ronde River for Designation or Nondesignation into the National Wild and Scenic River System, Union and Wallowa Counties, OR.

Summary: Review of the final EIS has been completed and the project found to be satisfactory. EPA provided no formal written comments. EPA had no objection to the preferred alternative as described in the EIS.

Dated: March 26, 1996.

William D. Dickerson,

Director, NEPA Compliance Division, Office of Federal Activities.

Trichoderma harzianum Rifai Strain KRL-AG2; Notice of filing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of filing.

SUMMARY: EPA has received a petition (PP 6F4650) for a revision of the current exemption from the requirement of tolerances for *Trichoderma harzianum* Rifai strain KRL-AG2 (40 CFR 180.1102) to include all raw agricultural commodities. The request was filed by TGT Inc., 122 North Genesee Street, Geneva, N.Y. 14456.

DATES: Written comments, identified by the docket control number [PP 6F4650/PF646], must be submitted to EPA by April 29, 1996.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by docket number [PP 6F4650/PF646]. No CBI should be submitted through e-mail. Electronic comments on this notice of filing may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in the SUPPLEMENTARY INFORMATION section of this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Shanaz Bacchus, Biopesticides and Pollution Prevention Division (7501W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington DC 20460. Office location and telephone number: 5th Floor, CS #1, 2805 Jefferson Davis Hwy., Arlington, VA, 703–308–8097; e-mail address: bacchus.shanaz@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

PP 6F4650. This notice announces that EPA has received from TGT Inc., 122 North Genesee Street, Geneva, N.Y. 14456, a notice of filing under section 408 of the Federal Food, Drug, and Cosmetic Act (21 (U.S.C. 346a) for pesticide petition (PP) 6F4650 to amend 40 CFR part 180 to revise the current exemption from the requirement of tolerances for the microbial pesticide *Trichoderma harzianum Rifai strain* KRL-AG2. The current exemption from the requirement of a tolerance (40 CFR 180.1102) is established for residues of this biofungicide in or on beans (green and dry), cabbage, corn (field and sweet), cotton, cucumbers, peanuts, potatoes, sorghum, soybeans, sugar beets, and tomatoes when used as a fungicide for the treatment of seeds of these crops in accordance with good agricultural practices.

This petition requests that the current exemption from tolerances be revised to include all raw agricultural commodities which have been sprayed or otherwise treated with *Trichoderma harzianum* Rifai strain KRL-AG2. The pesticide is to be applied as seed treatment, for pot filling, as a dip for cuttings and transplants, as an in-furrow spray, and as a sprayable formulation. Rates of application vary from 4 to 8 ounces per hundredweight of seed; and up to 10 pounds per acre (in furrow) for row crops at planting. Field and greenhouse crops may be sprayed at rates of 1 pound per acre and up to 5 applications per year.

A record has been established for this notice of filing under docket number [PP 6F4650/PF646] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA.

Electronic comments can be sent directly to EPA at:
opp-Docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice of filing, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collections being Reviewed by the Federal Communications Commission; Comments Requested

March 25, 1996.

SUMMARY: The Federal Communications, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commissions burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before May 28, 1996. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESS: Direct all comments to Dorothy Conway, Federal Communications, Room 234, 1919 M St., NW., Washington, DC 20554 or via internet to dconway@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Dorothy Conway at 202–418–0217 or via internet at dconway@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060–0003.

Title: Application for Amateur Operator/Primary Station License.

Form No.: FCC 610.

Type of Review: Extension of a currently approved collection.

Resopondents: Individuals or households.

Number of Respondents: 93,000.

Estimated Time Per Response: 10 minutes.

Total Annual Burden: 15,438 hours.

Needs and Uses: FCC Rules require that applicants file the FCC 610 to apply for a new,renewed or modified license. The form is required by the Communications Act of 1934, as amended; International Treaties and FCC Rules - 47 CFR 97.17, 97.19, 97.511, and 97.519.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712–01–F

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act, including whether the acquisition of the nonbanking company can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair con petition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 22, 1996.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. Pennwood Bancorp, Inc., Pittsburgh, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of Pennwood Savings Bank, Pittsburgh, Pennsylvania.

B. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. The Colonial BancGroup, Inc., Montgomery, Alabama; to merge with Commercial Bancorp of Georgia, Inc., Lawrenceville, Georgia, and thereby indirectly acquire Commercial Bank of Georgia, Lawrenceville, Georgia.

C. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. Marlin Holdings, Ltd., Marlin, Texas; to become a bank holding company by retaining 67.93 percent of the voting shares of Central Financial Bancorp, Inc., Lorena, Texas; and thereby indirectly retain shares of Central Delaware Financial Bancorp, Dover, Delaware; Lorena State Bank, Lorena, Texas; and Bank of Troy, Troy, Texas.

D. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Central Coast Bancorp, Salinas, California; to acquire 100 percent of the voting shares of Cypress Coast Bank, Seaside, California.

Board of Governors of the Federal Reserve System, March 25, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

Sunshine Meeting

TIME AND DATE: 10:00 a.m., Wednesday, April 3, 1996.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 27, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

GENERAL SERVICES ADMINISTRATION

Placement of Commercial Antennas on Federal Property

AGENCY: General Services Administration.

ACTION: Notice.

SUMMARY: On August 10, 1995, President Clinton signed an Executive Memorandum directing the heads of all departments and agencies to facilitate access to Federal property for the purpose of siting mobile services antennas. The General Services Administration, in coordination with other Government departments and agencies as well as wireless telecommunications industry representatives, has developed the following procedures in Attachment A. The President's memorandum and these procedures implement the requirements of section 704(c) of the Telecommunications Act of 1996, P.L. 104–104.

FOR FURTHER INFORMATION CONTACT: James Herbert, Office of Property Acquisition and Realty Services, Public Buildings Service, General Services Administration, 18th & F Streets, NW., Washington, DC 20405, telephone 202–501–0376.

Dated: March 25, 1996.

David J. Barram,

Acting Administrator of General Services.

Attachment A—Government-Wide Procedures for Placing Commercial Antennas on Federal Properties

In accordance with section 704(c) of the Telecommunications Act of 1996, Public Law 104–104, and President Clinton's August 10, 1995, memorandum entitled "Facilitating Access to Federal Property for the Siting of Mobile Services Antennas" the following procedures shall be followed by Executive departments and agencies:

Guiding Principles

1. Requests for the use of property, rights-of-way, and easements by duly authorized providers should be granted absent unavoidable direct conflict with the department's or agency's mission, or the current or planned use of the property, rights-of-way, and easements in question.

2. Upon request, and to the extent permitted by law and where practicable, executive departments and agencies shall make available Federal Government buildings and lands for the siting of mobile services antennas. This should be done in accordance with Federal, State and local laws and regulations, and consistent with national security concerns (including minimizing mutual electromagnetic interactions), public health and safety concerns, environmental and aesthetic concerns, preservation of historic buildings and monuments, protection of natural and cultural resources, protection of national park and wilderness values, protection of National Wildlife Refuge systems, and subject to any Federal requirements promulgated by the agency managing the facility and the Federal Communications Commission, the Federal Aviation Administration, National Telecommunications and Information Administration, and other relevant departments and agencies.

3. Antennas on Federal buildings or land may not contain any advertising.

4. Federal property does not include lands held by the United States in trust for individual or Native American tribal governments.

5. Agencies shall retain discretion to reject inappropriate siting requests, and assure adequate protection of public property and timely removal of equipment and structures at the end of service.

6. All procedures and mechanisms adopted regarding access to Federal property shall be clear and simple so as to facilitate the efficient and rapid build out of the national wireless communications infrastructure.

7. Unless otherwise prohibited by or inconsistent with Federal law, agencies shall charge fees based on market value for siting antennas on Federal property and may use competitive procedures if not all applicants can be accommodated.

8. The siting of mobile services antennas should not be given priority over other authorized uses of Federal buildings or land.

9. All independent regulatory commissions and agencies are requested to comply with these procedures.

Implementing Actions

1. Each Executive department and agency which operates and controls real property under specific statutory authority is responsible individually for determining the programmatic impact of placing commercially owned antennas on their properties.

2. Each department and agency should review their rules, policies, and procedures for allowing commercial use of their properties and modify them as necessary to assure they fully support the siting of commercial antennas as provided in these procedures.

3. Each department and agency should assure that appropriate officials within local, regional, and national offices who are responsible for the siting of commercial mobile services antennas are aware of and support the President's directives on facilitating access to Federal property.

4. Preliminary decisions on the acceptability of proposed sitings should be rendered as soon as possible but no later than 60 days after receipt of a request. Denials of requests should provide the applicant with an explanation of the reasons for denial. Preliminary approvals should cite all conditions which must be met to render final approval. Final decisions should be rendered in a timely manner consistent with the degree of complexity of the case.

5. Firms and individuals interested in placing commercial mobile services antennas on Federal properties should contact the department or agency which has custody and control of the property. (Generally, Federal buildings and courthouses are controlled by the General Services Administration; military posts and bases, by the Department of Defense; Veterans' hospitals and clinics, by the Department of Veteran's Affairs; and, National Parks, by the Department of Interior.)

Below is a comprehensive listing of the offices in the headquarters of each property holding department and agency. Individuals and firms interested in placing antennas on specific Federally-owned properties should contact the appropriate office in writing indicating their interests, identify the property, and providing specific information on their proposal. These offices will advise applicants on specific application procedures/criteria, as well as appeals processes and refer them to local site managers to make determinations on suitability and other arrangements for leases, licenses, permits or other legal instruments for the siting of commercial antennas.

In the instances where the identity of the department or agency which has custody and control of a property is unknown, individuals and firms may contact the General Services Administration's Office of Real Property. This office maintains a listing of all properties owned by the Federal Government world-wide and will refer inquirers to the appropriate department or agency. Contact can be made by writing the Office of Real Property (MP), Room 1300, General Services Administration, 18th & F Streets, NW., Washington, DC 20405 or by telephone at (202) 501–0176. To assist in identifying the appropriate department or agency inquirers should provide the state, city/county, building/property name and mailing address of the property in question.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Dietary Supplement Labels Commission; Meetings

AGENCY: Office of Disease Prevention and Health Promotion, HHS.

ACTION: Commission on Dietary Supplement Labels: Notice of Meeting #3; Opportunity to Provide Comments.

SUMMARY: The Department of Health and Human Services (HHS) is (a) providing notice of the second meeting of the Commission on Dietary Supplement Labels, and (b) soliciting oral and written comments.

DATES: (1) The Commission will meet April 26, 1996, from 8:30 a.m. to 4:30 p.m. Pacific Standard Time at the Holiday Inn Fisherman's Wharf, 1300 Columbus Avenue, San Francisco, California 94133; (2) Written comments on the scope and intent of the Commission's objectives may be submitted up to 5:00 p.m. E.S.T. on June 30, 1996.

FOR FURTHER INFORMATION CONTACT: Kenneth D. Fisher, Ph.D., Executive Director, Commission on Dietary Supplement Labels, Office of Disease Prevention and Health Promotion, Room 738G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C. 20201, (202) 205–5988.

SUPPLEMENTARY INFORMATION:

Commission's Task

Public Law 103–417, Section 12, authorized the establishment of a Commission on Dietary Supplement Labels whose seven members have been appointed by the President. The appointments to the Commission by the President and the establishment of the Commission by the Secretary of Health and Human Services reflect the commitment of the President and the Secretary to the development of a sound and consistent regulatory policy on labeling of dietary supplements.

The Commission is charged with conducting a study and providing recommendations for regulation of label claims and statements for dietary supplements, including the use of supplemental literature in connection with their sale and, in addition, procedures for evaluation of label claims. The Commission is expected to evaluate how best to provide truthful, scientifically valid, and non-misleading information to consumers in order that they may make informed health care choices for themselves and their families. The Commission's study report may include recommendations on legislation, if appropriate and necessary.

Announcement of Meeting

The Commission's second meeting will be March 8, 1996, 8:30 a.m. to 4:30 p.m. Central Time. The meeting will be held at the Radisson Hotel Salt Lake City Airport Coventary Room (Utah). The agenda will include (a) oral comments from interested parties and the general public, (b) identification of additional information needs, and (c) discussion of dietary supplement label information.

Public Participation at Meeting

The meeting is open to the public. However, space is limited. Both oral and written comments from the public will be accepted, but oral comments at the meeting will be limited to a maximum of five minutes per presenter; thus, organizations and persons that wish to make their views known to the Commission should use the time for oral presentation to summarize their written comments. Members of the Commission may wish to question the presenters following each oral presentation. Please request the opportunity to present oral comments in writing and provide nine (9) copies of the written comments from which the oral presentation is abstracted to the address above by March 4, 1996. If you will require a sign language interpreter, please call Sandra Saunders (202) 260–0375 by 4:30 E.S.T. on March 4, 1996.

Written Comments

By this notice, the Commission is soliciting submission of written comments, views, information and data pertinent to Commission's task. Comments should be sent to Kenneth D. Fisher, Executive Director of the Commission at the Office of Disease Prevention and Health Promotion, Room 738G, Hubert Humphrey Building, 200 Independence Ave., SW., Washington D.C. 20201, by 5:00 p.m. E.S.T. on June 30, 1996.

Dated: March 26, 1996.

Claude Earl Fox,

Deputy Assistant Secretary for Health (Disease Prevention and Health Promotion), Department of Health and Human Services.

Centers for Disease Control and Prevention

Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Savannah River Site Health Effects Subcommittee and Savannah River Site Environmental Dose Reconstruction Project—Phase II Public Workshop: Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Agency for Toxic Substances and Disease Registry (ATSDR) and the Centers for Disease Control and Prevention (CDC), announce the following meetings.

Name: Citizens Advisory Committee on Public Health Service Activities and Research at DOE Sites: Savannah River Site Health Effects Subcommittee (SRS).

Times and Dates: 9 a.m.–5 p.m., April 15, 1996; 9 a.m.–12 noon, April 16, 1996.

Place: Holiday Inn Oceanfront, One South Forest Beach Drive, Hilton Head Island, South Carolina 29928, telephone 803/842–4402, fax 803/842–3323.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Background: Under a Memorandum of Understanding (MOU) signed in December 1990 with DOE, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other person potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, an MOU was signed in October 1990 and renewed in November 1992 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This subcommittee is charged with providing advice and recommendations to the Director, CDC, and the Administrator, ATSDR, regarding community, American Indian Tribes, and labor concerns pertaining to CDC's and ATSDR's public health activities and research at respective DOE sites. Activities shall focus on providing a forum for community, American Indian, and labor interaction and serve as a vehicle for community concern to be expressed as advice and recommendations to CDC and ATSDR.

Matters To Be Discussed: Agenda items include: presentations from the National Center for Environmental Health (NCEH), the National Institute for Occupational Safety and Health, and the Agency for Toxic Substances and Disease Registry on the progress of current studies; an update on the workgroup selection criteria process; an update from the Radiological Assessments Corporation, and public involvement activities.

Agenda items are subject to change as priorities dictate.

Name: Savannah River Site Environmental Dose Reconstruction Project—Phase II: Public Workshop.

Time and Date: 7 p.m.–9 p.m, April 15, 1996.

Place: Holiday Inn Oceanfront, One South Forest Beach Drive, Hilton Head Island, South Carolina 29928, telephone 803/842–4402, fax 803/842–3323.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Purpose: The Savannah River Site (SRS) Dose Reconstruction Project supports research which evaluates past releases of radioactive materials and chemicals from the SRS to the surrounding environment. The Project has already undergone a first phase. Phase I involved searching the site to identify and retrieve important documents to be used for dose reconstruction. Phase II will use this information to calculate chemical and radiological source terms and identify possible intake pathways (eating, drinking, and inhalation) for people who have lived in the SRS area. This workshop will focus on the information being collected to support the reconstruction of SRS-related historical doses to members of the public. Individuals with information of possible value to the study are encouraged to attend.

Agenda items are subject to change as priorities dictate.

Contact Persons for More Information: Paul G. Renard or Nadine Dickerson, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, NCEH, CDC, 4770 Buford Highway, NE, (F–35), Atlanta, Georgia 30341–3724, telephone 770/488–7040, FAX 770/488–7044.

Dated: March 23, 1996.

Carolyn J. Russell,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

Food and Drug Administration

[Docket No. 91F–0002]

Milliken & Co.; Withdrawal of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to a future filing, of a food additive petition (FAP 1B4241), filed by Milliken & Co. proposing that the food additive regulations be amended to provide for the safe expanded use of dibenzylidene sorbitol (DBS) as a clarifying agent for olefin polymers intended for use in contact with food.

FOR FURTHER INFORMATION CONTACT: Ellen M. Waldron, Center for Food Safety and Applied Nutrition (HFS–216), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–606–0202.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of February 4, 1991 (56 FR 4295), FDA announced that a food additive petition (FAP 1B4241) had been filed on behalf of Milliken & Co., P.O. Box 1927 M–400, Spartanburg, SC 29304 (currently c/o Keller and Heckman, 1001 G St. NW., suite 500 West, Washington, DC 20001). The petition proposed to amend the food additive regulations in § 178.3295 *Clarifying agents for polymers* (21 CFR 178.3295) to provide for the safe expanded use of DBS as a clarifying agent for olefin polymers intended for use in contact with food. Milliken & Co. has now withdrawn the petition without prejudice to a future filing (21 CFR 171.7).

Dated: March 18, 1996.

George H. Pauli,

Acting Director, Office of Premarket Approval, Center for Food Safety and Applied Nutrition.

National Institutes of Health

National Cancer Institute; Notice of Meeting

Notice is hereby given of the meeting of the National Cancer Institute Board of Scientific Advisors Prevention Program Working Group, April 17, 1996 at The Bethesda Ramada, 8400 Wisconsin Avenue, Bethesda, Maryland.

This meeting will be open to the public on April 17, from 8 a.m. to 3:30 p.m. for overview and discussion of the Institute's Prevention Program.

The meeting will be closed to the public on April 17, from 3:45 p.m. to adjournment for discussion of confidential issues relating to the review, discussion and evaluation of individual programs and projects conducted by the Clinical Trials Extramural Program. These discussions will reveal confidential trade secrets or commercial property such as patentable material, and personal information including consideration of personnel qualifications and performance, the competence of individual investigators and similar matters, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Information pertaining to the meeting may be obtained from Dr. Jack Gruber, Executive Secretary, National Cancer Institute Prevention Program Working Group, National Cancer Institute, 6130 Executive Blvd., EPN, Rm. 540, Bethesda, MD 20892, (301–496–9740). Individuals who plan to attend and need special assistance such as sign language interpretation or other reasonable accommodations should contact Dr. Jack Gruber in advance of the meeting.

Dated: March 25, 1996.

Susan K. Feldman,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

National Cancer Institute; Notice of Closed Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting of the National Cancer Institute Initial Review Group:

Agenda/Purpose: To review and evaluate grant applications.

Committee Name: NCI Initial Review Group, Subcommittee D (Clinical Studies).

Date: April 12, 1996.

Time: 8:00 a.m.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, MD 20814.

Contact Person: John W. Abrell, Ph.D., 6130 Executive Blvd., Room 635B, Bethesda, Md 20892. Telephone: 301–496–9767.

The meeting will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

National Heart, Lung, and Blood Institute; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following Heart, Lung, and Blood Special Emphasis Panel (SEP) meetings:

Name of SEP: Refinement of New Assays for Direct Detection of Viral Nucleic Acids in Donated Blood.

Date: April 11, 1996.

Time: 7:30 p.m.

Place: Ramada Inn, 1775 Rockville Pike, Rockville, Maryland.

Contact Person: Ivan Baines, Ph.D., Two Rockledge Center, Room 7184, 6701 Rockledge Drive, Bethesda, MD 20892–7924, (301) 435–0277.

Purpose/Agenda: To review and evaluate contract proposals.

Name of SEP: Refinement of New Assays for Direct Detection of Viral Nucleic Acids in Donated Organs.

Date: April 12, 1996.

Time: 8:00 a.m.

Place: Ramada Inn, 1775 Rockville Pike, Rockville, Maryland.

Contact Person: Ivan Baines, Ph.D., Two Rockledge Center, Room 7184, 6701 Rockledge Drive, Bethesda, MD 20892–7924, (301) 435–0277.

Purpose/Agenda: To review and evaluate contract proposals.

These meetings will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than fifteen days prior to the above meetings due to the urgent need to meet timing limitations imposed by the review and funding cycle.

National Heart, Lung, and Blood Institute; Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the following Heart, Lung, and Blood Special Emphasis Panel.

This meeting will be open to the public to provide concept review of proposed contract or grant solicitations.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should inform the Contact Person listed below in advance of the meeting.

Name of Panel: Substitute Heart Valve Working Group.

Dates of Meeting: April 30–May 1, 1996.

Time of Meeting: 8 p.m.

Place of Meeting: Washington Hilton Hotel, 1900 Connecticut Avenue NW., Washington, DC.

Agenda: To discuss topics in bioengineering, biomaterials, fabrication, cardiology, cardiac surgery, hematology, pathology and tissue engineering related to substitute heart valves and develop recommendations for future NHLBI-supported research.

Contact Person: Paul Didisheim, M.D., NIH/NHLBI/DHVD, Rockledge II Building, Rm. 9180, 6701 Rockledge Drive, Bethesda, Maryland 20892–7940, (301) 435–0513.

National Institutes of Health

National Institute of Mental Health; Notice of Closed Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting of the National Institute of Mental Health Special Emphasis Panel:

Agenda/Purpose: To review and evaluate grant applications.

Committee Name: National Institute of Mental Health Special Emphasis Panel.

Date: April 10, 1996.

Time: 2 p.m.

Place: Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857.

Contact Person: Sheri L. Schwartzback, Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, MD 20857. Telephone: (301) 443–4843.

The meeting will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than fifteen days prior to the meeting due to the urgent need to meet timing limitations imposed by the review and funding cycle.

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Notice of Closed Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 United States Code Appendix 2), notice is hereby given of the following meeting:

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel.

Date: April 22, 1996.

Time: 10:00 a.m. to 2:00 p.m.

Place: Executive Plaza South, Room 400C, Bethesda, MD, (telephone conference call).

Contact Person: Marilyn Semmes, Ph.D., Acting Chief, Scientific Review Administrator, NIDCD/DEA/SRB, EPS Room 400C, 6120 Executive Boulevard, MSC 7180, Bethesda, MD 20892–7180, 301–496–8683.

Purpose/Agenda: To review and evaluate contract proposals. The meeting will be closed in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title, 5, United States Code. The applications and/or proposals and the discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which could constitute a clearly unwarranted invasion of personal privacy.

National Institute of Diabetes and Digestive and Kidney Diseases; Notice of Meeting of the Board of Scientific Counselors

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), May 1–3, 1996, National Institutes of

Health, Building 5, Room 127, Bethesda, Maryland 20892.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S.C and section 10(d) of Public Law 92–463, the meeting will be closed to the public for the review, discussion and evaluation of individual intramural programs and projects conducted by the NIDDK, including consideration of personnel qualifications and performance, the competence of individual investigations, and similar items, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

A summary of the meeting and roster of members will be provided, upon request, by the Committee Management Office, National Institute of Diabetes and Digestive and Kidney Diseases, Building 31, Room 9A07, Bethesda, Maryland 20892.

For any further information, and for individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, please contact Dr. Allen Spiegel, Scientific Review Administrator, Board of Scientific Counselors, National Institutes of Health, Building 10, Room 9N–222, Bethesda, Maryland 20892, (301) 496–4128, prior to the meeting.

BILLING CODE 4140–01–M

National Institute of Neurological Disorders and Stroke; Notice of Meeting, Board of Scientific Counselors

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Neurological Disorders and Stroke, Division of Intramural Research on May 19–21, 1996, at the National Institutes of Health, Building 36, Rm. 1B07–13, 36 Convent Drive, Bethesda, Maryland, 20892.

This meeting will be open to the public from 8:30 a.m. to 12:30 p.m. and from 1:30 p.m. to 5:00 p.m. on May 20th, and from 8:15 a.m. to 12:30 p.m. on May 21st, to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S.C. and section 10(d) of Public Law 92–463, the meeting will be closed to the public from 8:00 p.m. to 10:00 p.m. on May 19th, and from 1:30 p.m. until adjournment on May 21st, for the review, discussion and evaluation of individual programs and projects conducted by the NINDS. The programs and discussions include consideration of personnel qualifications and performances, the competence of individual investigators and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Freedom of Information Coordinator, Ms. Mary Whitehead, Federal Building, Room 1012, 7550 Wisconsin Avenue, Bethesda, MD 20892, telephone (301) 496–9231 or the Executive Secretary, Dr. Story Landis, Director, Division of Intramural Research, NINDS, Building 36, Room 5A05, National Institutes of Health, Bethesda, MD 20892, telephone (301) 435–2232, will furnish a summary of the meeting and a roster of committee members upon request. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the Executive Secretary in advance of the meeting.

BILLING CODE 4140–01–M

National Institute of Diabetes and Digestive and Kidney Diseases; Meeting of the National Diabetes and Digestive and Kidney Diseases Advisory Council and its Subcommittees

Pursuant to Public Law 92–463, notice is hereby given of a meeting of the National Diabetes and Digestive and Kidney Diseases Advisory Council and its subcommittees, National Institute of Diabetes and Digestive and Kidney Diseases, on May 29–30, 1996. The meeting of the full Council will be open to the public on May 29, from 8:30 a.m. to 12 p.m. in Conference Room 6, Building 31C, National Institutes of Health, Bethesda, Maryland, to discuss administrative issues relating to Council business and special reports. The following subcommittee meetings will be open to the public May 29 from 1 p.m. to 2 p.m.: Diabetes, Endocrine and Metabolic Diseases Subcommittee meeting will be held in Conference Room 6, Building 31C; Digestive Diseases and Nutrition Subcommittee meeting will be held in Conference Room 7, Building 31C; and Kidney, Urologic and Hematologic Diseases Subcommittee meeting will be held in Conference Room 8, Building 31C. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Public Law 92–463, the meetings of the subcommittees and full Council will be closed to the public for the review, discussion and evaluation of individual grant applications. The following subcommittees will be closed to the public on May 29, from 2 p.m. to 5 p.m.: Diabetes, Endocrine and Metabolic Diseases Subcommittee; Digestive Diseases and Nutrition Subcommittee; and Kidney, Urologic and Hematologic Diseases Subcommittee. The full Council will meet in closed session on May 30 from 8:30 a.m. to 10 a.m. in Conference Room 6, Building 31C. These deliberations, whether held in a subcommittee or in the full council, could reveal confidential trade secrets or commercial property, such as patentable materials, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

A final open session of the full Council will be held from 10 a.m. to 12 p.m. to hear reports from the Division Directors.

For any further information, and for individuals who plan to attend and need special assistance such as sign language interpretation or other reasonable accommodations, please contact Dr. Walter Stolz, Executive Secretary, National Diabetes and Digestive and Kidney Diseases Advisory Council, NIDDK, Natcher Building, Room 6AS–25C, Bethesda, Maryland 20892, (301) 594–8834, in advance of the meeting.

In addition, upon request, a summary of the meeting and roster of the members may be obtained from the Committee Management Office, NIDDK, Building 31, Room 9A07, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–6623.

(Catalog of Federal Domestic Assistance Program No. 93.847–849, Diabetes, Endocrine and Metabolic Diseases; Digestive Diseases and Nutrition; and Kidney Diseases, Urology and Hematology Research, National Institutes of Health.)

BILLING CODE 4140–01–M

National Library of Medicine; Notice of Meetings of the Board of Regents and the Extramural Programs Subcommittee

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Board of Regents of the National Library of Medicine on May 21–22, 1996, in the Board Room of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland. The Extramural Programs Subcommittee will meet on May 20 in Conference Room B, Building 38A, from 2 p.m. to approximately 3:30 p.m., and will be closed to the public.

The meeting of the Board will be open to the public from 9 a.m. to approximately 4:30 p.m. on May 21 and from 9 a.m. to adjournment on May 22 for administrative reports and program discussions. Attendance by the public will be limited to space available. Individuals who plan to attend and need special assistance, such as sign-language interpretation or other reasonable accommodations, should contact Mrs. Kimberly Caraballo at 301–496–4621 two weeks before the meeting.

In accordance with provisions set forth in sections 552b(c)(4), 552b(c)(6), Title 5, U.S.C. and section 10(d) of Public Law 92–463, the entire meeting of the Extramural Programs Subcommittee on May 20 will be closed to the public from 2 p.m. to approximately 3:30 p.m., and the regular Board meeting on May 21 will be closed from approximately 4:30 p.m. to 5 p.m. for the review, discussion, and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property, such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. Robert B. Mehnert, Chief, Office of Inquiries and Publications Management, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20894, Telephone Number: 301–496–6308, will furnish a summary of the meeting, rosters of Board members, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program No. 93.879—Medical Library Assistance, National Institutes of Health.)

Dated: March 25, 1996.

Division of Research Grants; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following Division of Research Grants Special Emphasis Panel (SEP) meetings:

Purpose/Agenda: To review individual grant applications.

Name of SEP: Clinical Sciences.
Date: April 11, 1996.
Time: 1:00 p.m.
Place: NIH, Rockledge 2, Room 4216, Telephone Conference.
Contact Person: Dr. Harold Davidson, Scientific Review Administrator, 6701 Rockledge Drive, Room 4216, Bethesda, Maryland 20892, (301) 435–1776.

Name of SEP: Biological and Physiological Sciences.
Date: April 12, 1996.
Time: 2:00 p.m.
Place: NIH, Rockledge 2, Room 6168, Telephone Conference.
Contact Person: Dr. Syed Amir, Scientific Review Administrator, 6701 Rockledge Drive, Room 6168, Bethesda, Maryland 20892, (301) 435–1043.

Name of SEP: Microbiological and Immunological Sciences.
Date: April 12, 1996.
Time: 1:00 p.m.
Place: NIH, Rockledge 2, Room 4210, Telephone Conference.
Contact Person: Dr. Bruce A. Maurer, Scientific Review Administrator, 6701 Rockledge Drive, Room 4210, Bethesda, Maryland 20892, (301) 435–1225.

Name of SEP: Microbiological and Immunological Sciences.
Date: April 12, 1996.
Time: 3:00 p.m.
Place: NIH, Rockledge 2, Room 4210, Telephone Conference.
Contact Person: Dr. Bruce A. Maurer, Scientific Review Administrator, 6701 Rockledge Drive, Room 4210, Bethesda, Maryland 20892, (301) 435–1225.

This notice is being published less than 15 days prior to the above meetings due to the urgent need to meet timing limitations imposed by the grant review and funding cycle.

Name of SEP: Microbiological and Immunological Sciences.
Date: April 16, 1996.
Time: 1:00 p.m.
Place: NIH, Rockledge 2, Room 4194, Telephone Conference.
Contact Person: Dr. Sami Mayyasi, Scientific Review Administrator, 6701 Rockledge Drive, Room 4194, Bethesda, Maryland 20892, (301) 435–1216.

Name of SEP: Biological and Physiological Sciences.
Date: April 23, 1996.
Time: 1:00 p.m.
Place: NIH, Rockledge 2, Room 4148, Telephone Conference.
Contact Person: Dr. Philip Perkins, Scientific Review Administrator, 6701 Rockledge Drive, Room 4148, Bethesda, Maryland 20892, (301) 435–1718.

Name of SEP: Chemistry and Related Sciences.
Date: April 24, 1996.
Time: 8:30 a.m.
Place: Ramada Inn, Bethesda, MD.
Contact Person: Dr. Asher Hyatt, Scientific Review Administrator, 6701 Rockledge Drive, Room 4160, Bethesda, Maryland 20892, (301) 435–1724.

Name of SEP: Clinical Sciences.
Date: April 25, 1996.
Time: 2:00 p.m.
Place: NIH, Rockledge 2, Room 4106, Telephone Conference.
Contact Person: Ms. Josephine Pelham, Scientific Review Administrator, 6701 Rockledge Drive, Room 4106, Bethesda, Maryland 20892, (301) 435–1786.

Name of SEP: Clinical Sciences.
Date: April 30, 1996.
Time: 10:00 a.m.
Place: NIH, Rockledge 2, Room 4138, Telephone Conference.
Contact Person: Dr. Anthony Chung, Scientific Review Administrator, 6701 Rockledge Drive, Room 4138, Bethesda, Maryland 20892, (301) 435–1213.

Purpose/Agenda: To review Small Business Innovation Research.

Name of SEP: Behavioral and Neurosciences.
Date: April 20, 1996.
Time: 8:30 a.m.
Place: Embassy Suites, Ft. Lauderdale, FL.
Contact Person: Dr. Samuel C. Rawlings, Scientific Review Administrator, 6701 Rockledge Drive, Room 5160, Bethesda, Maryland 20892, (301) 435–1243.

The meetings will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

BILLING CODE 4140–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. FR–3774–N–05]

Announcement of Funding Awards for the Comprehensive Improvement Assistance Program, FY 1995

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Announcement of funding awards.

SUMMARY: In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, this announcement notifies the public of funding decisions made by the Department in a competition for funding under the Notice of Funding Availability (NOFA) for the Comprehensive Improvement Assistance Program (CIAP) for Fiscal Year 1995. The announcement contains the names and addresses of the competition awardees and the amount of the awards.

FOR FURTHER INFORMATION CONTACT: William Flood, Director, Office of Capital Improvements, Department of Housing and Urban Development, 451 Seventh Street, SW., Room 4134, Washington, DC 20410, telephone (202) 708–1640. [This is not a toll-free number].

IHAs may contact Dom Nessi, Director, Office of Native American Programs, Department of Housing and Urban Development, 451 Seventh Street, SW., Room B–133, Washington, DC 20410, telephone (202) 755–0032. [This is not a toll-free number]. Hearing or speech impaired persons may use the Telecommunications Devices for the Deaf (TDD) by contacting the Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: The Comprehensive Improvement Assistance Program is authorized by sec. 14, United States Housing Act of 1937 (42 U.S.C. 14371); sec. 7(d) Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

The objective of the Comprehensive Improvement Assistance Program (CIAP) is to provide funds to improve the physical condition and upgrade the management and operation of existing Public and Indian Housing projects to assure that they continue to be available to serve low-income families.

On January 20, 1995 (60 FR 4352), the Department published a NOFA in the **Federal Register** informing Public Housing Agencies and Indian Housing Authorities that own or operate fewer than 250 units of the availability of FY 1995 CIAP funding. The FY 1995 awards announced in this Notice were selected for funding consistent with the provisions of the NOFA.

In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, the Department is hereby publishing, in this notice, the names and addresses of the PHAs and IHAs that received funding awards under the FY 1995 CIAP NOFA, and the amount of the awards. This information is set forth in Appendix A to this notice.

Dated: March 25, 1996.

Michael B. Janis,

General Deputy Assistant, Secretary for Public and Indian Housing.

BILLING CODE 4210–33–P

[Docket No. FR–3778–N–78]

Office of the Assistant Secretary for Community Planning and Development; Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708–1226; TDD number for the hearing- and speech-impaired, (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies,

and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brian Rooney, Division of Property Management, Program Support Center, HHS, room 5B–41, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the day of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll-free information line at 1–800–927–7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including ZIP CODE), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following address: U.S. Army: Mr. Derrick Mitchell, CECPW–FP, U.S. Army Center for Public Works, 7701 Telegraph Road, Alexandria, VA 22310–3862; (703) 428–6083 (these are not toll-free numbers).

Dated: March 22, 1996.

Mark C. Gordon,

General Deputy Assistant Secretary for Community Planning and Development.

Title V. Federal Surplus Property Program, Federal Register Report for 03/29/96

Suitable/Available Properties

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Central Utah Project Completion Act; Uintah Unit, Central Utah Project; Irrigation Water Contract Negotiation

AGENCY: Office of the Assistant Secretary—Water and Science, Department of the Interior.

ACTION: Notice of intent to negotiate a contract among the Central Utah Water Conservancy District (CUWCD), Dry Gulch Irrigation Company, and the Department of the Interior (DOI) for transferring storage rights of irrigation water held in high mountain lakes in a Wilderness Area in the Uinta Mountains to storage facilities being planned for the Uintah Unit of the Central Utah Project.

SUMMARY: Public Law 102–575 Section 201(c) extended the authorization of the Uintah Unit of the Central Utah Project for 5 years from time of enactment. This contract is intended to provide replacement storage for irrigation water presently held in the upper drainage areas of the Uinta Mountains in the proposed Lower Uintah Reservoir that is being planned as part of the Uintah Unit of the Central Utah Project. The reservoirs being vacated in the Wilderness Areas will be stabilized at near natural sizes and will be managed by the U.S. Forest Service for environmental utilization. A negotiated contract among CUWCD, Dry Gulch Irrigation Company, and DOI will establish the operating criteria and assure that the water rights of Dry Gulch Irrigation Company are maintained in quantity and priority.

DATES: Dates for public negotiation sessions will be announced in local newspapers.

FOR FURTHER INFORMATION: Additional information on matters related to this **Federal Register** notice can be obtained at the address and telephone number set forth below: Mr. Michael Hansen, Program Coordinator, CUP Completion Act Office, Department of the Interior, 302 East 1860 South, Provo, UT 84606–6154, Telephone: (801) 379–1194

Dated: March 25, 1996.

Ralph Swanson,

Acting CUP Program Director, Department of the Interior.

Central Utah Project Completion Act; Upalco Unit, Central Utah Project; Irrigation Water Contract Negotiation

AGENCY: Office of the Assistant Secretary—Water and Science, Department of the Interior.

ACTION: Notice of intent to negotiate a contract among the Central Utah Water Conservancy District (CUWCD), Moon Lake Water Users Association, and Department of the Interior (DOI) for transferring storage of irrigation water from high mountain lakes in the Wilderness Area in the Uinta Mountains to storage facilities being planned for the Upalco Unit of the Central Utah Project.

SUMMARY: Public Law 102–575, Section 201(c) extended the authorization of the Upalco Unit of the Central Utah Project for 5 years from time of enactment. This contract is intended to provide replacement storage for irrigation water presently held in the upper drainage areas of the Uinta Mountains in the proposed Crystal Ranch Reservoir that is being planned as part of the Upalco Unit of the Central Utah Project. The reservoirs being vacated in the Wilderness Areas will be stabilized at near natural sizes and will be managed by the U. S. Forest Service for environmental utilization. A negotiated contract among CUWCD, Moon Lake Water Users Association, and DOI will establish the operating criteria and assure that the water rights of the Moon Lake Water Users Association are maintained in quantity and priority.

DATES: Dates for public negotiation sessions will be announced in local newspapers.

Bureau of Land Management

[OR–050–1110–00:G6–0104]

Closure of Public Lands; (Prineville District) Oregon.

March 22, 1996.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice is hereby given that all roads and trails as legally described below are closed to all motorized vehicle use.

LEGAL DESCRIPTION: This closure order applies to all roads and trails located in township 15 South, Range 11 East, Section 16, SE of the SW and SW of the SE; and Section 21 NE of the NW and NW of the NE, with the exception of Jordan Road. Jordan Road originates where it intersects Fryrear Road at Township 15 South, Range 11 East, Section 16 NW of the SW.

All roads and trails as described above, except for Jordan Road, are closed to all motorized vehicle use. The purpose of this closure is to protect wildlife resources. More specifically, this closure is ordered to reduce negative impacts to a nesting pair of golden eagles. Golden eagles are extremely sensitive to motorized disturbance within the sensitive habitat area surrounding the nest site during the nest season. Current uses at the site jeopardize the persistence and nesting success of golden eagles at this location. Exemptions to this closure order apply to administrative personnel of the Central Oregon Co-op for access along and maintenance of the existing powerline right-of-way (Serial #OR–012676). Other exemptions to this closure order may be made on a case-by-case basis by the authorized officer. This emergency order will be evaluated in the Urban Interface Plan Amendment to the 1989 Brothers/La Pine Resource Management Plan. The authority for this closure is 43 CFR 8364.1: Closure and restriction orders.

FOR FURTHER INFORMATION CONTACT: Sarah Nichols, Wildlife Biologist, BLM Prineville District, P.O. Box 550, Prineville Oregon 97754, telephone (541) 416–6725.

SUPPLEMENTARY INFORMATION: Violation of this closure order is punishable by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months as provided in 43 CFR 8360.0–7.

Dated: March 22, 1996.

James G. Kenna,

Deschutes Resource Area Manager, Prineville District Office.

BILLING CODE 4310–33–M

[WY–010–1220–00]

Emergency Seasonal Closure of Public Land in the Bald Ridge Area, Park County, WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Emergency Seasonal Closure of Public Land in the Bald Ridge Area, Park County, Wyoming.

SUMMARY: Notice is hereby given that effective March 18, 1996, the Bald Ridge area located south of the Clarks Fork of the Yellowstone River and west and north of Hogan Reservoir of Park County, Wyoming on public land administered by the Bureau of Land Management (BLM), Worland District, Cody Resource Area, was closed from December 15 through April 30 to all use (such as hiking, horseback riding, mountain bike riding, crosscountry skiing, and all motorized use) except permitted activities. This action is being taken for resource protection of essential wintering habitat of elk and mule deer. No access into this area will be allowed unless permitted by the Authorized Officer (BLM Cody Resource Area Manager).

EFFECTIVE DATE: This emergency seasonal closure was effective March 18, 1996 and will remain in effect until modified or rescinded by the Authorized Officer.

FOR FURTHER INFORMATION CONTACT: Bob Dieli, Recreation Planner or Duane Whitmer, Area Manager, Cody Resource Area, P.O. Box 518, 1002 Blackburn Avenue, Cody, Wyoming 82414–0518. Telephone (307) 587–2216.

SUPPLEMENTARY INFORMATION: The Cody Resource Area is responsible for the management of essential wildlife habitat in the Bald Ridge area of the Absaroka Front and other crucial habitat areas located throughout the Bighorn Basin. These essential habitat areas and management thereof are covered under the Cody Resource Management Plan (RMP), which was signed on November 8, 1990. "Seasonal restrictions will be applied as appropriate to surface-disturbing and disruptive activities and land uses on big game crucial habitat, including winter ranges and elk calving areas." (Cody RMP, p. 40)

The Bald Ridge area is crucial wintering habitat for big game. Increasing visitor activity, such as horseback riding, hiking, and antler hunters are causing unacceptable impacts to the wintering elk and deer herds. These activities are causing anxiety during a period when the animals are most susceptible to stress-related health affects that could cause death. These activities also force the herds to be displaced from their winter habitat. The Cody Resource Area will analyze a proposal for facility development at Hogan Reservoir as well as travel management of the Bald Ridge area to be investigated in the near future. This emergency seasonal closure is needed to address an immediate concern.

The following described BLM-administered lands south of the Clarks Fork of the Yellowstone River and west of Hogan Reservoir are included in this seasonal closure: T. 56 N., R. 103 W., sections 7, 8, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, and 33 from the west end of Hogan Reservoir. Hogan Reservoir remains open for fishing and nonmotorized travel within 100 yards of the reservoir's high-water line. Authority for closure and restriction orders is provided under 43 CFR subpart 8341.2 (a and b), 8364.1, 8372.0–7, 8372.1–2. Violations of this closure are punishable by a fine not to exceed $1,000 and (or) imprisonment not to exceed 12 months.

Dated: March 15, 1996.

Duane Whitmer,

Cody Resource Area Manager, Worland District.

BILLING CODE 4310–22–P

[MT–060–05–1990–01]

Availability of the Final Environmental Impact Statement for the Zortman and Landusky Mines Reclamation Plan Modifications and Mine Life Extensions, Phillips County, Montana

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of availability of the final environmental impact statement (EIS) for the Zortman and Landusky mines reclamation plan modifications and mine life extensions.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4327), and the Montana Environmental Policy Act, the Bureau of Land Management (BLM) and the Montana Department of Environmental Quality (DEQ), as lead agencies, have prepared, through a third party contractor, a Final EIS on the impacts of the Zortman Mining, Inc. proposal to expand mining and processing of ore reserves at the Zortman and Landusky mines. The Zortman and Landusky mines are located in southwestern Phillips County about 50 miles south of Malta, Montana, near the southern boundary of the Fort Belknap Indian Reservation. The Final EIS presents a preferred alternative and six other alternatives including the company proposed action. The Final EIS discloses the possible environmental consequences associated with each alternative.

A number of changes have been made to the preferred alternative between the Draft EIS and Final EIS, largely in response to public comments. Major changes include: removal of the Peregrine Falcon reintroduction study for the pit highwalls, relocation of the limestone quarries to avoid impacts to northern drainages, routing of all post-reclamation pit runoff to the south, updating of the water quality improvement plan, completion of a Programmatic Agreement for mitigation of impacts to cultural resources, and the inclusion of an aquatic ecosystem mitigation plan.

DATES: A record of decision will be prepared no earlier than 30 days after the Notice of Receipt of the Final EIS is published in the **Federal Register**.

ADDRESSES: Copies of the Final EIS are available from the Bureau of Land Management, Phillips Resource Area, HC 65 Box 5000, Malta, Montana, 59538 or the State of Montana, Department of Environmental Quality, P.O. Box 200901, Helena, Montana 59620–0901. Public reading copies will be available for review at the following locations: Bureau of Land Management, Office of External Affairs, Main Interior Building, Room 5600, 18th and C Streets NW, Washington, DC; Bureau of Land Management, External Affairs Office, Montana State Office, 222 North 32nd Street, Billings, Montana; Bureau of Land Management, Phillips Resource Area, 501 South 2nd Street East, Malta, Montana; and the State of Montana, Department of Environmental Quality, Helena, Montana.

FOR FURTHER INFORMATION CONTACT: Jim Robinson, Team Leader, Montana Department of Environmental Quality, Hard Rock Bureau, P.O. Box 200901, Helena, Montana, 59620–1601 (406–444–2544) or Scott Haight, Team Leader, Bureau of Land Management, Lewistown District Office, P.O. Box 1160, Lewistown, Montana 59457–1160 (406–538–7461).

SUPPLEMENTARY INFORMATION: On May 11, 1992, Zortman Mining, Inc. (ZMI) filed an application with the Bureau of Land Management, Lewistown District Office, and the Montana Department of State Lands (part of the Montana Department of Environmental Quality as of July 1, 1995), to expand mining operations at the Zortman Mine in the Little Rocky Mountains, Montana. The

proposal includes: expansion of existing mine pits to access sulfide ore; a 150-acre, 60-million ton waste rock disposal area; crushing facilities; a 2.5-mile conveyor system; a 200-acre, 80-million ton capacity leach pad; a new processing plant and ponds; a limestone quarry; and other associated facilities. Total disturbance would increase from the existing 401 acres to about 1,292 acres. The operation is located on private and public land. Issues include Native American religious concerns, acid rock drainage, reclamation, and socioeconomic.

In a March 9, 1994, Decision Record, the BLM and DEQ included the analysis of acid rock drainage corrective measures for the nearby Landusky Mine within the scope of the EIS for Zortman Mine expansion, since acid rock drainage has been a problem at both mines. The Final EIS addresses additional mining at the Landusky and Zortman mines, as well as modified reclamation plans for both facilities to address acid rock drainage.

Public participation has occurred throughout the EIS process. A Notice of Intent was published in the **Federal Register** in November 1992 followed by a supplemental notice in April 1994 expanding the scope of the EIS for the Landusky Mine. Public meetings, informational mailings, and briefings were conducted to solicit comments for the scope of the EIS. About 400 copies of the Draft EIS were distributed to the public and other federal and state agencies. A Notice of Availability of the Draft EIS was published in the **Federal Register** on August 14, 1995. This was followed by a Notice of Receipt by the Environmental Protection Agency published in the **Federal Register** on August 18, 1995. The public comment period extended from August 18, 1995 through November 1, 1995 (75 days). During the public comment period the BLM and DEQ held five open houses/public hearings to receive oral and written comments. These meetings were also the forum for the U.S. Army Corps of Engineers to collect public comments on the Zortman Mining, Inc. 404 permit application for the Zortman and Landusky Mine expansions. In addition to oral comments, about 368 letters were received on the Draft EIS. All comments, written and oral, were reviewed and considered in preparation of the Final EIS.

Dated: March 19, 1996.

David L. Mari,

District Manager.

Green River Basin Advisory Committee Meeting, Colorado and Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting of the Green River Basin Advisory Committee.

SUMMARY: This notice sets forth the schedule and agenda for a meeting of the Green River Basin Advisory Committee (GRBAC).

DATES: April 16, 1996, from 8:00 a.m. until 7 p.m. and April 17, 1996, from 8:00 a.m. until 4 p.m.

ADDRESSES: Sweetwater County Events Complex, 3320 Yellowstone, Rock Springs, WY 82902.

FOR FURTHER INFORMATION CONTACT: Terri Trevino, GRBAC Coordinator, Wyoming Bureau of Land Management, P.O. Box 1828, Cheyenne, WY 82003, (307) 775–6020.

SUPPLEMENTARY INFORMATION: The topics for the meeting will include:

1. Discussion, categorizing, and prioritizing of identified issues.
2. Dissemination of GRBAC information requests.
3. Public comment

This meeting is open to the public. Interested persons may make oral statements to the Committee or file written statements for the committee's consideration. The Committee will hear public comments on Tuesday afternoon, April 16, 1996. Anyone wishing to make an oral statement should notify the GRBAC Coordinator, at the above address by April 9, 1996. The committee may establish a time for oral statements.

Alan R. Pierson,

State Director.

[CA–010–1220–00]

Meeting of the Bakersfield Resource Advisory Council

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Meeting of the Bakersfield Resource Advisory Council.

SUMMARY: Pursuant to the authorities in the Federal Advisory Committee Act (Pub. L. 92–463) and the Federal land Policy and Management Act of 1976 (sec. 309), the Bureau of Land Management Bakersfield District Resource Advisory Council will meet in Bakersfield, with a field trip to the Carrizo Plain Natural Area.

DATES: April 11–12–13–14, 1996.

ADDRESSES: Washburn Ranch, Carrizo Plain Natural Area, April 11–12; Ramada Inn, 3535 Rosedale Highway, Bakersfield, California, April 13; BLM Bakersfield District Office, 3801 Pegasus Drive, Bakersfield, April 14.

SUPPLEMENTARY INFORMATION: The Bakersfield Resource Advisory Council is a 12 member council appointed by the Secretary of the Interior to give counsel and advice regarding planning and management of public land resources to the District Manager of the Bureau of Land Management Bakersfield District Office, 3801 Pegasus Drive, and then proceed by government vehicle to the Carrizo Plain Natural Area in eastern San Luis Obispo County.

On the way, the Council will visit the oil fields of western kern county, and be briefed on the Bureau's oil and gas program. After a tour of the Carrizo Plain and a discussion of the native plants of the area, the council will have dinner and spend the night at the Washburn Ranch, the administrative headquarters for BLM at Carrizo Plain. Friday, April 12, at the Washburn Ranch, the Council will receive training in rangeland management from BLM staff. The training will consist of 4 hours of classroom study, followed by a field discussion of standards and guidelines for grazing on federal land.

The council will return to Bakersfield Friday evening,a nd will meet at the Ramada Inn beginning at 8 a.m. Saturday, April 13. The Council will hear testimony about Caliente Resource Area issues such as the impact of threatened and endangered species issues on land management decisions. A public comment period is scheduled for 11 a.m. The Council will spend Saturday afternoon discussing its role and responsibilities concerning grazing and land management issues. If necessary, the Council will continue its discussion beginning at 8 a.m. Sunday, April 14, at the BLM Bakersfield District Office.

The entire meeting of the council is open to the public. Please make arrangements in advance by calling the number below if you wish to attend any part of the meeting at the Carrizo Plain. Anyone wishing to address the Council about any public land issue may do so during the public comment period at 11 a.m. Saturday, April 13, 1996 or at any time during the meeting at the discretion of the Council Chairman. Written comments may be submitted at the meeting, or to the address below.

FOR FURTHER INFORMATION CONTACT: Larry Mercer, Public Affairs Officer, Bureau of Land Management, Bakersfield District, 3801 Pegasus Drive, Bakersfield, CA 93308, telephone 805–391–6010.

Dated: March 21, 1996.

Sierra Front/Northwest Great Basin Resource Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting of the Sierra Front/Northwest Great Basin Resource Advisory Council Meeting Location and Time.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972 (FACA, 5 U.S.C.), the Department of the Interior, Bureau of Land Management (BLM) Council meetings will be held as indicated below. The agenda for each meeting includes approval of minutes of the previous meeting, discussion and development of Guidelines for management of the public lands within the jurisdiction of the Council and determination of the subject matter for future meetings.

There will be a public scoping meeting to comment on the proposal to modify the affected Resource Management Plans. Public comment is sought on the issues to be analyzed, the alternatives that may be considered, the standards and guidelines to be addressed, as well as the level of analysis which would be appropriate under the National Environmental Policy Act (NEPA). Implementation of Standards and Guidelines may require some form of planning modification, ranging from simple plan maintenance to plan amendment. It is uncertain what level of plan modification will be needed, if any.

The public may also present written comments to the Council. The Council meeting, public comment period and scoping meeting are listed below.

DATES: Sierra Front/Northwest Great Basin Resource Advisory Council, BLM Nevada State Office, 835 Harvard Way, Reno, NV 89520: April 22, beginning at 8:00 a.m.; public comment will be at 1:30 p.m. The scoping meeting will be held at 7:00 p.m. The working meeting will continue on April 23 beginning at 8:00 a.m. At the discretion of the Chairman, additional public comments may be made at the conclusion of business April 23rd .

FOR FURTHER INFORMATION CONTACT: Joan Sweetland, BLM Public Affairs Officer, 1535 Hot Springs Road, Carson City, NV 89706–0638. (Phone: 702–885–6000.)

(Dated this 13th day of March, 1996.

Notice of Realty Action, Sale of Public Land in Maricopa County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Sale of public land in Maricopa County.

SUMMARY: The following described public land has been examined and through the land use planning process have been determined to be suitable for disposal by direct sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976 at no less than the appraised fair market value. The land will not be offered for sale until at least 60 days after the date of publication of this notice in the **Federal Register**.

Gila and Salt River Meridian

T. 3 S., R. 4 W.,
Sec. 2, S½NW¼,SW¼.

The area described contains 240 acres in Maricopa County.

The patent, when issued, will be subject to the following terms, conditions and reservations:

1. A right-of-way for ditches and canals constructed by the authority of the United States.

2. Those rights for transmission line purposes granted to U.S. West Communications by Right-of-Way Numbers AZA–011068 and AZAR–0032095.

3. Those rights for the use of highways purposes granted to Arizona State Highways Department by Right-of-Way Number AZA–0005251.

4. Those rights the grazing permittee, John F. and Cecilia Siebert, may have to continue his current grazing use for two years from receipt of a cancellation notice. (Grazing Record No.022346).

DATES: Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from appropriation under the public land laws, including the mining laws, except the sale provisions of the Federal Land Policy and Management Act. The segregative effect will end upon issuance of patent or 270 days from the date of publication, whichever occurs first.

ADDRESS: Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

FOR FURTHER INFORMATION CONTACT: Bob Hale, Realty Specialist, at the address shown above or (602) 780–8090.

SUPPLEMENTARY INFORMATION: The land is being offered by direct sale to State of Arizona; Arizona Department of Administration, Phoenix, Arizona. Failure or refusal of the State of Arizona to submit the required amount, will result in cancellation of the sale.

A mineral value determination will be made and if there are known mineral values the mineral interest will be conveyed simultaneously under Section 209 of the Federal Land Policy and Management Act. A separate nonrefundable filing fee of $50 is required from the purchasers for conveyance of the mineral interests.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, who may vacate or modify this realty action to accommodate the protest. If the protest is not accommodated, the comments are subject to review of the State Director who may sustain, vacate,or modify this realty action. This realty action will become the final determination of the Department of the Interior.

Dated: March 22, 1996.

David J. Miller,

Associate District Manager.

BILLING CODE 4310–JB–M

Minerals Management Service

Modification to the Bid Adequacy Procedures

AGENCY: Minerals Management Service, Interior.

ACTION: Notification of procedural changes.

SUMMARY: The Minerals Management Service (MMS) has modified its existing bid adequacy procedures for ensuring receipt of fair market value on Outer Continental Shelf (OCS) oil and gas leases. This procedure eliminates in Phase 1 the number of bids rule, which effectively allowed for immediate acceptance of high bids on confirmed or wildcat tracts receiving three or more bids.

DATES: This modification is effective March 29, 1996.

FOR FURTHER INFORMATION CONTACT: Dr. Marshall Rose, Chief, Economic Evaluation Branch; Minerals Management Service; Mail Stop 4220, 381 Elden Street, Herndon, Virginia 22070–4817; telephone: (703) 787–1536.

SUPPLEMENTARY INFORMATION: Previous changes in the February 1983 bid adequacy procedures were made in February, March, and July 1984, May 1985, and May 24, 1991 (56 FR 23978). The following complete set of bid adequacy procedures incorporates those earlier changes and this most recent change.

The MMS uses a two-phase process to determine bid adequacy. In Phase 1, we classify tracts into two groups: drainage and development or wildcat and confirmed. The MMS also identifies nonprospective tracts, i.e., those tracts judged not to be located on a viable prospect. All legal high bids [1] on such nonprospective tracts are accepted. The MMS passes the high bids on all other tracts directly to Phase 2 for further evaluation. Phase 1 is conducted tract-by-tract and is generally completed within 2 weeks of the bid opening.

Phase 2 applies criteria designed to further determine bid adequacy on a tract-specific basis. Prospective wildcat and confirmed tracts that are not accepted in Phase 1 may receive further mapping and/or analysis in Phase 2. Subsequently, MMS reviews the viability determinations of these tracts. Those wildcat and confirmed tracts later determined to be nonviable can be eliminated from the set of tracts undergoing a full-scale MONTCAR evaluation and the high bids on them accepted. The remaining tracts, including all drainage and development tracts, receive further evaluation by comparing the high bids with the Mean Range of Values (MROV) and the Adjusted Delay Value (ADV). In addition, if in the judgment of the Regional Director a tract is or may be subject to drainage, the relevant costs due to delays associated with bid rejection are considered in computing the ADV.

All drainage and development tracts which received three or more adjusted bids [2] and prospective wildcat and confirmed tracts which received two or more adjusted bids will be compared with the Geometric Average Evaluation of Tract (GAEOT). For drainage and development tracts, the GAEOT will not be used when the high bid is equal to or less than one-sixth of the MROV.

The MMS conducts most evaluations based upon data and analysis available at the time of the sale. However, we may gather additional data and perform further analyses after the sale at the discretion of the Regional Director to ensure a fair return to the Government.

The MMS normally completes the bid adequacy recommendations for acceptance/rejection developed in Phase 2 sequentially over a period ranging between 14 and 90 days after the sale. Upon acceptance, the high bidders must pay the balance of the bonus bid (80 percent) along with the first year's annual rental within 15 days. The MMS returns the deposits, with interest, on all rejected high bids.

Dated: March 22, 1996.

Thomas Gernhofer,

Associate Director for Offshore Minerals Management.

[FR Doc. 96–7645 Filed 3–28–96; 8:45 am]

BILLING CODE 4310–MR–M

[1] "Legal high bids" mens those high bids which comply with MMS regulations and the Notice of Sale.

[2] Anomalous bids are not included in the bid number in Phase 2. Anomalous bids include all but the highest bid submitted for a tract by the same company, bidding alone or jointly, and the lowest bid on a tract when it is less than one-eight of the next lowest bid. The "one-eighth rule" can exclude no more than one bid for a given tract.

National Park Service

Jean Lafitte National Historical Park and Preserve; Meeting

ACTION: Public meeting for Draft Barataria Boundary Study and the availability for public review of the study.

SUMMARY: Notice is hereby given that the Draft Barataria Boundary Study has been completed by the National Park Service and will be available for public review from April 1, 1996 through May 1, 1996. Copies of the draft study can be obtained from the National Park Service at the following address: National Park Service, Denver Service Center, Attn. Ann Van Huizen, 12795 West Alameda Parkway, Denver, Colorado 80227–0287. Telephone: (303) 969–2451. All written comments on the draft study should be addressed to the National Park Service, attention Ann Van Huizen, at the above address and must be postmarked no later than May 1, 1996. Additional notice is hereby given that three public meetings will be held in Louisiana, on the dates and at the locations and times provided in this Notice, to receive public comment on the draft study. The draft study will also be available for public review at the Preserve headquarters between the hours of 8:30 a.m. to 4:30 p.m. Central Standard time.

DATES:

April 9, 1996, From 6 p.m. to 9 p.m. at the University Center, Room 211B, University of New Orleans, New Orleans, Louisiana

April 10, 1996, From 2 p.m. to 5 p.m., West Bank Regional Library, 2751 Manhattan Blvd., Harvey, Louisiana

April 10, 1996, From 6:30 p.m. to 9:30 p.m., Environmental Education Center, Barataria Preserve Unit, Jean Lafitte National Historical Park, and Preserve, Highway 45, Marrero, Louisiana.

FOR FURTHER INFORMATION CONTACT:

Mr. Roberts Belous, Superintendent, Jean Lafitte National Historical Park and Preserve, 365 Canal Street, Suite 3080, New Orleans, Louisiana 70130–1142, (504 589–3882, extension 128).

SUPPLEMENTARY INFORMATION: The boundary for the Barataria Preserve Unit of Jean Lafitte National Historical Park and Preserve was established through congressional legislative action in 1978. During the intervening years there have been significant changes in land uses along this area not currently part of the park that could merit inclusion. The analysis in the Draft Barataria Boundary Study will provide objective information for consideration in any future action by the Department of Interior or the U.S. Congress to revise the park's original legislative boundary.

Dated: March 21, 1996.

Frank Catroppa,

Superintendent, Gulf Coast System Support Office.

BILLING CODE 4310–70–M

DEPARTMENT OF LABOR

Employment Standards Administration Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis–Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing fro delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register** or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S–3014, Washington, DC 20210.

New General Wage Determination Decisions

The number of the decisions added to the Government Printing Office document entitled "General Wage Determinatin Issued Under the Davis-Bacon and related Acts" are listed by Volume and State:

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the county.

The general wage determinations issued under the Davis-Bacon and

related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, DC this 22nd day of March 1996.

Philip J. Gloss,

Chief, Branch of Construction Wage Determinations.

NUCLEAR REGULATORY COMMISSION

Atomic Safety and Licensing Board

[No. 50–160–Ren; ASLBP No. 95–704–01–Ren]

Georgia Institute of Technology, Atlanta, Georgia; Georgia Tech Research Reactor; Renewal of Facility License R–97

March 25, 1996.

Notice of Prehearing Conference

Notice is hereby given that a prehearing conference will be held in this proceeding on Wednesday, April 24, 1996, beginning at 2:00 p.m., at the United States Court of Appeals, Courtroom 338, 56 Forsyth Street, Atlanta, Georgia 30303.

As outlined in the Atomic Safety and Licensing Board's Memorandum and Order dated March 21, 1996, the conference will concern matters bearing upon the preparation for the hearing commencing on May 20, 1996, as set forth in 10 CFR 2.752(a), including a final list of witnesses and the order and scheduling of those witnesses, the obtaining of stipulations and admissions of fact and of the contents and authenticity of documents to avoid unnecessary proof, the numbers of copies of documents to be distributed to the Board, parties and the reporter, the marking of those documents, and such other matters as may aid in the orderly disposition of the proceeding.

Members of the public are invited to attend the conference but may not otherwise participate in the proceeding.

Dated: March 25, 1996.

For the Atomic Safety and Licensing Board.

Charles Bechhoefer,

Chairman, Administrative Judge.

PENSION BENEFIT GUARANTY CORPORATION

Customer Satisfaction Surveys and Focus Groups

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of submission for OMB review; comment request.

SUMMARY: The Pension Benefit Guaranty Corporation has requested that the Office of Management and Budget approve a series of new collections of information under the Paperwork Reduction Act. The purpose of the information collections, which will be conducted through focus groups and surveys over a three-year period, is to help the PBGC assess the efficiency and effectiveness with which it serves its customers and to design actions to address identified problems.

DATES: All comments must be submitted to OMB by April 29, 1996.

ADDRESSES: All written comments should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for the Pension Benefit Guaranty Corporation, 725 17th Street NW., Room 10235, Washington, DC 20503. The request for approval will be available for public inspection at the PBGC Communications and Public Affairs Department, suite 240, 1200 K Street NW., Washington, DC 20005, between the hours of 9 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Marc L. Jordan, Attorney, Office of the General Counsel, Suite 340, 1200 K Street NW., Washington, DC 20005, 202–326–4026 (202–326–4179 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) establishes policies and procedures for controlling the paperwork burdens imposed by Federal agencies on the public. The Act vests the Office of Management and Budget (OMB) with regulatory responsibility over these burdens, and OMB has promulgated rules on the clearance of collections of information by Federal agencies.

Executive Order 12862, Setting Customer Service Standards, states that, in order to carry out the principles of the National Performance Review, the Federal Government must be customer-driven. It directs all executive departments and agencies that provide significant services directly to the public to provide those services in a manner that seeks to meet the customer service standards established in the Executive Order.

The PBGC intends to establish a mechanism through which it will be able to explore issues of mutual concern (*e.g.*, kind and quality of desired services) with its major outside client groups, *i.e.*, participants and beneficiaries, plan sponsors and their affiliates, plan administrators, pension practitioners and others involved in the establishment, operation and termination of plans covered by the PBGC's insurance program.

The areas of concern to the PBGC and its client groups will change over time, and it is important that the PBGC have the ability to evaluate customer concerns quickly. Accordingly, the PBGC is requesting that OMB grant "generic" approval, for a three-year period, of focus groups and surveys of the PBGC's outside client groups. Participation in the focus groups and surveys will be voluntary. The PBGC will consult with OMB regarding each specific information collection during the approval period.

On December 29, 1995, the PBGC published in the **Federal Register** a notice of intention to request OMB approval of these collections. No comments were received in response to the notice.

This voluntary collection of information will put a slight burden on a very small percentage of the public. The PBGC expects to conduct focus groups involving a total of approximately 225 persons each year, with a total annual burden of approximately 675 hours, including travel time. (Some portion of this time may be spent completing surveys at focus group meetings.) In addition, the PBGC expects to distribute written surveys to approximately 1,600 persons each year (in most cases as an adjunct to a focus group), with a total annual burden of approximately 200 hours.

Issued at Washington, D.C., this 26th day of March 1996.

Martin Slate,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–P

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of April 1, 1996.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at the closed meeting.

Commissioner Johnson, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Wednesday, April 3, 1996, at 10:00 a.m., will be:

Institution and settlement of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Formal orders of investigation.
Opinions.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary at (202) 942–7070.

Dated: March 27, 1996.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–37007; File No. SR–Amex–95–39, SR–CBOE–95–67, and SR–Phlx–95–76]

Self-Regulatory Organizations; Order Approving Proposed Rule Changes and Notice of Filing and Order Granting Accelerated Approval of Amendments Thereto by the American Stock Exchange, Inc., Chicago Board Options Exchange, Inc., and Philadelphia Stock Exchange, Inc., Relating to the Establishment of Uniform Listing and Trading Guidelines for Narrow-Based Stock Index Warrants

March 21, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] the American Stock Exchange, Inc. ("Amex"), Chicago Board Options Exchange, Inc. ("CBOE"), and Philadelphia Stock Exchange, Inc. ("Phlx") (collectively "Exchanges") submitted to the Securities and Exchange Commission ("Commission" or "SEC") proposed rule changes ("proposals") to establish uniform listing and trading guidelines for narrow-based stock index warrants.[3]

Notice of the proposals, and Amendment No. 1 thereto, were published for comment and appeared in the **Federal Register**.[4] No comment letters were received.

The Amex subsequently submitted Amendments No. 2, 3, and 4 to the proposal on January 22, 1996 ("Amex Amendment No. 2"), January 30, 1996 ("Amex Amendment No. 3"), and January 31, 1996 ("Amex Amendment No. 4").[5] The CBOE subsequently submitted Amendments No. 2, 3, and 4 to the proposal on December 27, 1995 ("CBOE Amendment No. 2"), February 2, 1996 ("CBOE Amendment No. 3"), and February 27, 1996 ("CBOE Amendment No. 4").[6] The Phlx subsequently submitted Amendment No. 2 ("Phlx Amendment No. 2") (collectively with all of the Exchange's Amendments that have not been noticed to date "Amendments") to the proposal on January 31, 1996.[7]

CBOE Amendment No. 2 addresses index maintenance standards. Amex Amendment No. 2 was superseded by Amex Amendment No. 3. Amex and CBOE Amendments No. 3 and Phlx Amendment No. 2 address position limit related issues. Amex Amendment No. 4 reduces the originally proposed position limit applicable to certain narrow-based index warrants and CBOE Amendment No. 4 clarifies an example contained in CBOE Amendment No. 3 with respect to position limit aggregation. This order approves the proposals, as amended, and solicits comments on the Amendments.

I. Description of the Proposal

On August 29, 1995, the Commission approved rule changes for the Exchanges which established uniform listing and trading guidelines for broad-based stock index, currency, and currency index warrants ("broad-based regulatory framework").[8] Those standards govern all aspects of the listing and trading of index warrants, including issuer eligibility, customer suitability and account approval procedures, position and exercise limits, reportable positions, automatic exercise, settlement, margin, and trading halts and suspensions.

The purpose of this proposal is to allow for the listing and trading of warrants on narrow-based stock index groups. With the exceptions of separate higher margin requirements and reduced position limits, the broad-based regulatory framework will fully apply to the listing, trading, and surveillance of narrow-based index warrants. This includes a heightened suitability standard for recommendations in index warrants as well as requiring all

[2] 17 CFR 240.19b–4 (1994).

[3] The Amex, CBOE, and Phlx rule filings were submitted on September 9, 1995, November 9, 1995, and October 27, 1995, respectively. On November 1, 1995, November 20, 1995, and November 22, 1995, Amex, CBOE, and Phlx, respectively, each submitted Amendment No. 1 ("Amendment No. 1") to their proposals to address issues relating to settlement value for warrants. *See* Letters from William Floyd-Jones, Amex, to Michael Walinskas, SEC, dated October 30, 1995 ("Amex Amendment No. 1"), Timothy Thompson, CBOE, to Stephen M. Youhn, SEC, dated November 15, 1995 ("CBOE Amendment No. 1"), and Shelle Weisbaum, Phlx, to Michael Walinskas, SEC, dated November 22, 1995 ("Phlx Amendment No. 1"). Amex and Phlx Amendment No. 1 also address issues relating to index maintenance standards.

[4] *See* Securities Exchange Act Release Nos. 36448 (Nov. 1, 1995), 60 FR 56180 (Nov. 7, 1995) (Amex); 36525 (Nov. 29, 1995), 60 FR 62512 (Dec. 6, 1995) (CBOE); and 36524 (Nov. 29, 1995), 60 FR 62521 (Dec. 6, 1995) (Phlx).

[5] *See* Letters from William Floyd-Jones, Amex, to Stephen M. Youhn, SEC, dated January 19, 1996, January 29, 1996, and January 30, 1996, respectively.

[6] *See* Letters from Timothy Thompson, CBOE, to Stephen M. Youhn, SEC, dated December 21, 1995, February 1, 1996, and February 27, 1996, respectively.

[7] *See* Letter from Shelle Weisbaum, Phlx, to Michael Walinskas, SEC, dated January 30, 1996.

[8] On August 29, 1995, the Commission approved uniform listing and trading guidelines for stock index, currency and currency index warrants for the New York Stock Exchange ("NYSE"), Pacific Stock Exchange ("PSE"), Phlx, Amex, and CBOE. *See* Securities Exchange Act Release Nos. 36165, 36166, 36167, 36168, and 36169 (Aug. 29, 1995), respectively. The PSE, to date, has not submitted a narrow-based index warrant filing and the NYSE is not being approved in this order.

purchasers of index warrants to be options approved. The proposed changes from the broad-based regulatory framework are outlined as follows:

(a) *Position Limits.* The Exchanges note that position limits for broad-based index warrants were set at levels approximately equal to 75 percent the then applicable corresponding limits applicable to options on the same index. In turn, the Exchanges propose to establish narrow-based index warrant position limits at a level equal to 75 percent of those recently approved for narrow-based index options.[9] As a result, narrow-based position limits would be governed by three tiers, using the same qualifications criteria as used for narrow-based index option position limits:

(i) 4,500,000 warrants where one stock in the group accounts, on average, for 30% or more of the numerical index value during the 30-day period immediately preceding the review.

(ii) 6,750,000 warrants where either a single stock in the group accounts for 20 percent or more of the group's numerical index value, or any five stocks in the group together account for 50 percent or more of the group's numerical index value, during the immediately preceding 30 days.

(iii) 9,000,000 warrants if the underlying group does not fall within the criteria set forth in either of the other two tiers.

The Exchanges propose to make the determinations described above when a particular issuance first commences trading the twice a year thereafter. An Exchange may establish uniform dates on which to make those semi-annual determinations in order to make them for all of its Exchange-listed narrow-based index warrants at the same time. After an issuance of warrants commences trading, an Exchange would begin to make the subsequent semi-annual determinations on the first of the uniform dates thereafter.

If the subsequent semi-annual determinations indicate that an index qualifies for a larger position limit, an Exchange may increase the limit to the new number immediately. Once a position limit is established for a particular warrant issuance, however, it will not be reduced. As a result, position limits for issuances of warrants overlying the same index may be different. In the event there is more than one issuance overlying an index, the Exchanges have proposed that there be an additional position limit applicable to all those warrant issuances on the same narrow-based index in the aggregate ("overall position limit"). This overall position limit for warrants on a narrow-based index shall be equal to the largest individual position limit then applicable to any warrant issuance of that same narrow-based index.[10]

(b) *Margin Requirements.* Margin will be similar to that required for narrow-based index options. Accordingly, all purchases of narrow-based index warrants must be paid in full. Additionally, the minimum margin required for each narrow-based index warrant carried short in a customer's account would be 100% of the current market value of each warrant plus 20% of the current index group value. Narrow-based index warrants would also be subject to the same spread margin treatment recently approved for broad-based index warrants.[11]

Listing Warrants on Approved Indexes

The proposed narrow-based index warrant regulatory framework would also allow the Exchanges to list a warrant on a narrow-based stock index without prior Commission approval if the Commission has already approved the underlying stock index for warrant or options trading. Furthermore, the Exchanges propose to incorporate certain generic initial listing and maintenance criteria which, when satisfied, provide for the expedited approval of warrants based on narrow-based indexes. The expedited approval process is nearly identical to that approved for narrow-based index options[12] except as provided below:

(i) the index must contain a minimum of nine stocks at all times; [13] and

(ii) allow for the use of closing ("p.m.") prices in determining the value of an index warrant except that, where 25 percent or more of the value of an index underlying a warrant consists of stocks that trade primarily in the United States, opening price ("a.m. settlement") must be used at (1) the warrant's expiration, and (2) on any date in which the warrant's settlement value will be based on prices on either of the two business days preceding expiration.[14]

II. Findings and Conclusions

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[15] Specifically, the Commission finds that the Exchanges' proposals to establish uniform listing and trading standards for narrow-based stock index warrants strike a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest. In addition, the proposed listing standards for warrants for warrants are consistent with the Section 6(b)(5) requirements that rules of an exchange be designed to prevent fraudulent and manipulative acts, to promote just and equitable principles of trade, and are not designed to permit unfair discrimination among issuers.

The Exchanges' proposed generic listing standards for narrow-based stock index warrants set forth a regulatory framework for the listing of such products. Generally, listing standards serve as a means for an exchange to screen issuers and to provide listed status only to *bona fide* issuances that will have sufficient public float, investor based, and trading interest to ensure that the market has the depth and liquidity necessary to maintain fair and orderly markets. Adequate standards are especially important for warrant issuances given the leveraged and contingent liability they represent.

The Commission notes that, with certain exceptions listed below, the Exchanges will apply to narrow-based index warrants the same regulatory framework which recently was approved for broad-based index warrants. In approving the broad-based index warrant regulatory framework, the Commission found that the framework provides an adequate regulatory structure for the trading of such warrants, including appropriate trading rules, sales practice requirements, margin requirements, position and exercise limits and surveillance procedures. The Commission also found that the applicable framework is designed to minimize the potential for manipulation, thereby helping to ensure that such index warrants do not have a negative market impact. Finally, the Commission also indicated that the framework adequately addressed the special risks to customers arising from the trading of such warrants.[16]

The Commission believes it is reasonable for the Exchanges to apply a nearly identical regulatory structure to narrow-based index warrants as broad-based index warrants, particularly given the substantial similarities that exist between them.[17] Both broad and narrow-based stock index warrants represent a leveraged investment in a portfolio or group of equity securities. However, broad-based index products generally have a large number of component securities and represent a certain overall equities market or a substantial segment thereof. Narrow-based index products, on the other hand, generally are comprised of fewer component securities that often are concentrated in a particular industry group. These differences heighten concerns with leveraged narrow-based index products regarding market impact, manipulation and volatility, dictating that narrow-based indexes be subject to lower position limits and more restrictive margin treatment.[18]

Accordingly, the Exchanges have proposed separate margin and position limit treatment for narrow-based index warrants. The proposed margin levels are analogous to those currently in place for narrow-based stock index options. The Commission believes these requirements will provide adequate customer margin levels sufficient to account for the potential volatility of these products. In addition, the Commission believes that it is appropriate to apply options margin treatment given the options-like market risk posed by warrants.[19]

The proposed position limits are also similar to those in place for narrow-based index options.[20] In addition, the Exchanges have proposed aggregation requirements to address multiple issuances of warrants on the same narrow-based index.[21] The Commission believes that the position limits and aggregation requirements are reasonable and will serve to minimize potential manipulation and other market impact concerns while not unduly restricting liquidity in warrant issuances.

The Commission believes the Exchanges' existing surveillance procedures applicable to broad-based index warrants are adequate to surveil the trading of narrow-based index warrants. The Commission found that the Exchanges' broad-based surveillance procedures were adequate to surveil for manipulation and other abuses involving the warrant market and the underlying component securities. Given the functional similarities between narrow and broad-based index warrants, the Commission believes it is reasonable to apply the same surveillance procedures to both.

Similarly, for the same reasons noted in our order approving broad-based index warrants, the Commission believes that heightened customer suitability standards, options account approval requirements, and sales practice procedures which are modelled after index options should be extended to narrow-based index warrants. The Commission notes that, upon approval of this filing, the Exchanges may list a warrant upon any narrow-based index that the Commission has previously approved for options or warrant trading. Additionally, in order to expedite SEC review of a particular warrant issuance, the Exchanges have proposed employing accelerated listing procedures similar to those adopted for listing options on narrow-based indexes.[22]

The Commission notes that these proposed accelerated listing standards for index warrants differ from the standards applicable to narrow-based index options in that there is a minimum nine stock requirement for index warrants (*i.e.*, an index must initially and at all times thereafter be comprised of at least nine stocks) and that index warrants may, at certain times, utilize a p.m. settlement methodology, as discussed above. The Commission believes the proposed differences are reasonable in the warrant context for several reasons.

With respect to p.m. settlement, index warrants are issuer-based products whose terms are individually set by the issuer, with the number of warrants on a given index being fixed at the time of issuance. Accordingly, it is not certain that there will be a significant number of warrants in indexes with similar components expiring on the same day. This may reduce pressure from liquidation of warrant hedges at settlement. Second, the Commission authorized the same settlement methodology for broad-based index warrants and believes it is reasonable that narrow-based index warrants operate in the same manner. With respect to the nine stock requirement, the Commission does not believe that this difference is such that it will subject narrow-based index warrants to increased manipulation. In fact, narrow-based index options impose the same maintenance requirement of nine stocks. The Commission does not believe that the creation of a nine stock index, as opposed to a ten stock index, will lead to increased manipulation, per se, provided the other listing criteria are satisfied. The Commission notes that this requirement precludes the issuance of index warrants pursuant to the accelerated listing procedures upon any index comprised of less than nine stocks.

The Commission believes that the accelerated listing procedures will provide a sufficient opportunity for it to examine narrow-based index warrant

[9] Currently, depending on the characteristics of the index, position limits for narrow-based index options are either 12,000, 9,000, or 6,000 contracts on the same side of the market.

[10] For example, assume a firm issues warrants on a narrow-based index in July 1996 ("Issuance 1") and, at the time, the applicable position limit for that issuance is 9 million warrants. The following year, in July 1997, the same firm completes a new issuance of warrants on the same index ("Issuance 2"). At the time of the second issuance, however, the composition of the index has changed such that it now qualifies for a position limit of 6.75 million warrants. An investor would still be permitted to hold 9 million warrants of Issuance 1. Any aggregate position including warrants from Issuance 1 and 2 would be subject to an overall 9 million warrant position limit, with no more than 6.75 million of those warrants coming from Issuance 2. Under no circumstances could an investor hold more than 6.75 million warrants from Issuance 2.

[11] *See, e.g.*, Amex Rule 462(d)(2)(F) and (G).

[12] *See* Securities Exchange Act Release No. 34157 (June 3, 1994).

[13] The generic narrow-based index option standard requires ten stocks initially and nine stocks thereafter.

[14] The generic index option standard requires the use of opening ("a.m.") price settlement.

[15] 15 U.S.C. § 78f(b)(5) (1988).

[16] Pursuant to Section 6(b)(5) of the Act, the Commission is required to find, among other things, that trading in warrants will serve to protect investors and contribute to the maintenance of fair and orderly markets. In this regard, the Commission must predicate approval of any new derivative product upon a finding that the introduction of such derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. As discussed below, the Commission believes narrow-based index warrants will serve an economic purpose by providing an alternative product that will allow investors to participate in the price movements of the underlying securities in addition to allowing investors holding positions in some or all of such securities to hedge the risks associated with their portfolios.

[17] The regulatory framework for broad-based index warrants is similar to the approach used in regulating index options. Because the same risks exist in trading of narrow-based index options, the Commission believes it is appropriate to utilize the same approach.

[18] This is similar to the approach taken in regulating narrow-based and broad-based index options.

[19] The customer spread margin rules applicable to broad-based stock index and currency warrants were approved subject to a one year pilot program. The Commission notes that narrow-based index warrants will be subject to the same pilot program and, upon expiration of that program, it will determine whether to revise or approve on a permanent basis the proposed spread margin rules.

[20] The Commission notes that position limits for broad-based stock index warrants were set at a level roughly equivalent to 75% of broad-based index options. In the absence of trading experience with U.S. equities market based index warrants, the Commission believes it would be imprudent to establish position limits for positions greater than those currently applicable (on an equivalent basis) to stock index options on the same index.

[21] Because each individual warrant issuance is assigned a separate identification symbol, the Exchanges have the ability to monitor the aggregation of separate issuances of warrants on the same underlying index.

[22] Accelerated listing procedures allow the Exchange to permit issuances of warrants on a particular narrow-based index pursuant to a filing submitted to the Commission for effectiveness immediately upon filing under Section 19(b)(3)(A) of the Act. In the event that a proposed index does not qualify for expedited approval under these standards, the Exchanges are not precluded from filing a proposed rule change for Commission review pursuant to Section 19(b)(2).

products based on new indexes (which require that a filing be made pursuant to Section 19(b)(3)(A) of the Act). Specifically, the Commission believes that the seven day prefiling requirement gives the Commission staff an opportunity to discuss with an Exchange whether its proposal to list and trade particular narrow-based index warrants properly qualifies for effectiveness upon filing. In addition, the Commission finds that the 30 day delay in the commencement of trading of proposed narrow-based index warrants will provide a meaningful opportunity for public comment prior to the commencement of trading, while also providing an Exchange with the opportunity to inform market participants in advance of the proposed trade date for new index warrants. In accordance with Section 19(b)(3)(C) of the Act, if the Commission determines that the rule change proposal is inconsistent with the requirements of the Act and the rules and regulations thereunder, the 30 day delay would allow the Commission to abrogate the rule change before trading commences, which will minimize disruption on market participants. This authority could be utilized if, for example, it is determined that the proposed narrow-based index warrant does not satisfy the applicable accelerated listing standards.

III. Conclusion

The Commission believes that the adoption of these proposed uniform listing and trading standards for narrow-based index warrants will provide an appropriate regulatory framework. These standards will also benefit the Exchanges by providing them with greater flexibility in structuring narrow-based index warrant issuances and a more expedient process for listing narrow-based index warrants without further Commission review pursuant to Section 19(b) of the Act. As noted above, additional Commission review of specific warrant issuances will generally only be required for warrants overlying any non-approved narrow-based index that has not been previously approved by the Commission for narrow-based index warrant or options trading. If Commission review of a particular warrant issuance is required, the Commission expects that, to the extent that the warrant issuance complies with the uniform criteria adopted herein, its review should generally be limited to issues concerning the newly proposed index. This should help ensure that such additional Commission review could be completed in a prompt manner without causing any unnecessary delay in listing new narrow-based index warrant products.

The Commission finds good cause for approving the Exchanges' Amendments to the proposals prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**. The Commission notes that the Amendments primarily relate to position limits and aggregation of multiple issuances of warrants on the same index. The Commission notes that the Amendments ensure that multiple issuances of index warrants on the same narrow-based index will be aggregated together and subject to an overall limit. The Commission believes it is appropriate to aggregate holdings in multiple issuances together since, despite the difference in expiration dates, warrants which overlie the same index are fundamentally the same instrument. Furthermore, aggregation provisions will ensure that an investor (or group) may not circumvent the applicable position limits by merely purchasing warrants from different issuances.

The Amendments also provide that once a position limit is established for a particular warrant issuance, it will not be reduced for the duration of that particular issuance. Given the limited duration of warrants (one to five years), and that any new index warrants on the same index could not exceed the lowered position limits, the Commission believes it is appropriate for position limits to not be reduced during their duration.

CBOE Amendment No. 2 imposes a minimum nine stock requirement for all narrow-based indexes which underlie a warrant issuance. This provision brings CBOE into conformity with the other exchanges. The Amex and Phlx provisions regarding this requirement have already been noticed and no comments were received. Accordingly, this provision does not raise any new or unique regulatory issues. Finally, Amex Amendment No. 4 reduces the lowest position limit tier to 4.5 million warrants from 4.875 million. The Commission notes that this brings the Amex into conformity with the other Exchanges. Finally, CBOE Amendment No. 4 clarifies an example contained in CBOE Amendment No. 3 with respect to position limit aggregation. Because this example is explanatory in nature and does not alter any of its rules, the provision does not raise any new or unique issues. For these reasons, the Commission believes there is good cause, consistent with Section 19(b)(2)[23] of the Act, to approve the Exchanges' Amendments to the proposals on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the Exchanges' Amendments. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal offices of the above-mentioned self-regulatory organizations. All submissions should refer to the file number in the caption above and should be submitted by April 19, 1996.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[24] that the proposed rule changes (SR–Amex–95–39, SR–CBOE–95–67, and SR–Phlx–95–76) are approved, as amended.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[25]

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change by the American Stock Exchange, Inc. Relating to the Listing and Trading of Options and Long-Term Options on the Networking Index and Long-Term Options on a Reduced-Value Networking Index

March 22, 1996.

I. Introduction

On January 23, 1996, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on The Networking Index ("Index"). Notice of the proposed rule change appeared in the **Federal Register** on February 13, 1996.[3] No comment letters were received on the proposed rule change. This order approves the Exchange's proposal.

II. Description of Proposal

A. General

The Amex proposes to trade options on The Networking Index, a modified equal-dollar weighted index developed by the Amex comprised of 15 computer and telecommunication networking stocks which are traded on the Amex, the New York Stock Exchange, Inc. ("NYSE"), or through the facilities of the National Association of Securities Dealers Automated Quotation system and are reported national market system securities ("NASDAQ/NMS"). In addition, the Amex proposes to amend rule 901C, Commentary .01, to reflect that 90% of the Index's numerical value will be accounted for by stocks that meet the current criteria and guidelines set forth in Rule 915.

B. Eligibility Standards for Index Components

The Networking Index currently conforms with Exchange Rule 901C, which specifies criteria for inclusion of stocks in an index on which standardized options will be traded. In addition, the Index also currently conforms to all the criteria set forth in Rule 901C, Commentary .02, which provides for the commencement of trading of options on an index thirty days after the date of filing, with the exception that the Index is calculated using a modified version of the equal-dollar weighting method. Therefore, the component securities all meet the following eligibility standards: (1) They are traded on the Amex or NYSE, or are NASDAQ/NMS securities; (2) component stocks comprising the top 90% of the Index by weight have a minimum market capitalization of $75 million, and those component stocks constituting the botton 10% of the Index by weight have a market capitalization of at least $50 million; and (3) stocks constituting the top 90% of the Index by weight have minimum monthly volume of 1,000,000 shares over the six months preceding this filing, and stocks constituting the bottom 10% of the Index by weight have a minimum monthly volume of at least 500,000 shares over the six months preceding this filing.

C. Index Calculation

The Index is calculated using a "modified equal-dollar weighting" methodology. Four of the fifteen component securities are given higher weightings to reflect their higher market capitalizations relative to the rest of the group, while not allowing their weightings to dominate the Index to the extent they would in a straight market capitalization weighted Index. According to the Amex, this method of cacluation is important given the great disparity in market value of a few of the Index's components. It has been the Exchange's experience that options on market value weighted indexes dominated by relatively few component stocks are less useful to investors, since the index will tend to represent these few components and not the industry as a whole. At the same time, the increase in Index weight for the smaller, less liquid stocks is lower than if the index had been straight equal-dollar weighted; and the decrease in Index weight of the larger, more liquid stocks also is less dramatic than using straight equal-dollar weighting.

The following is a description of how the modified equal-dollar weighting calculation method works. As of the market close on October 20, 1995, a portfolio of networking stocks was established representing an investment of $12,000 in each of the four most highly capitalized securities in the Index and $4,727.27 in each of the 11 remaining stocks (rounded to the nearest whole share). The value of the Index equals the current market value (i.e., based on U.S. primary market prices) of the sum of the assigned number of shares of each of the stocks in the Index portfolio divided by the Index divisor. The Index divisor was initially determined to yield the benchmark value of 200.00 at the close of trading on October 20, 1995. Each quarter thereafter, following the close of trading on the third Friday of January, April, July and October, the Index portfolio will be ranked in descending market capitalization order and the Index portfolio adjusted by changing the number of whole shares of each component stock so that the four largest capitalized stocks in the Index each represents 12% of the Index value for a total of 48%, and the remaining 52% of the Index value is evenly distributed over the remaining securities. At the inception of the Index, each of the remaining 11 components had a weight of approximately 4.73%. The Exchange has chosen to rebalance following the close of trading on the quarterly expiration cycle because it allows an option contract to be held for up to three months without a change in the Index portfolio being effected, while at the same time maintaining the equal-dollar weighting feature of the Index. If necessary, a divisor adjustment is made at the rebalancing to ensure continuity of the Index's value. The newly adjusted portfolio becomes the basis for the Index's value on the first trading day following the quarterly adjustment.

As noted above, the number of shares of each component stock in the Index portfolio remain fixed between quarterly reviews except in the event of certain types of corporate actions such as the payment of a dividend other than an ordinary cash dividend, stock distribution, stock split, reverse stock split, rights offering, distribution, reorganization, recapitalization, or similar event with respect to the component stocks.[4] In a merger or consolidation of an issuer of a component stock, if the stock remains in the Index, the number of shares of that security in the portfolio may be adjusted, to the nearest whole share, to maintain the component's relative weight in the Index at the level immediately prior to the corporate action. In the event of a stock replacement, the average dollar value of the remaining portfolio components in the same weighting tier of the stock being replaced (*i.e.*, either the top four stocks by market capitalization as of the last rebalance, or the remaining stocks) will be calculated and that amount invested in the stock of the new component, to the nearest whole share. In all cases, the divisor will be adjusted, if necessary, to ensure Index continuity.

Similar to other stock index values published by the Exchange, the value of the Index will be calculated continuously and disseminated every 15 seconds over the Consolidated Tape Association's Network B.

D. Maintenance of the Index

The Exchange will review the Index quarterly,[5] and maintain it so that: (1) The total number of component securities will not increase or decrease by more than 33⅓% from the number

[5] *Id.*

of components in the Index at the time of its initial listing, and in no event will the Index have fewer than nine components; (2) component stocks constituting the top 90% of the Index by weight will have a minimum market capitalization of $75 million and the component stocks constituting the bottom 10% of the Index by weight will have a minimum market capitalization of $50 million; (3) the monthly trading volume for each of the past six months[6] for each component security shall be at least 500,000 shares, or, for each of the lowest weighted components in the Index that in the aggregate account for no more than 10% of the weight of the Index, the monthly trading volume shall be at least 400,000 shares; (4) no single component will represent more than 25% of the weight of the Index and the five highest weighted components will represent no more than 60% of the Index at each quarterly rebalancing; and (5) at least 90% of the index's numerical index value and at least 80% of the total number of component securities individually will meet the then current criteria for standardized option trading set forth in Exchange rule 915;[7]

The Exchange will notify promptly Commission staff at any time it determines that the Index fails to satisfy any of the foregoing maintenance critera. Moreover, in such an event, the Exchange shall not open for trading any additional option series, unless such failure is determined by the Exchange not to be significant and Commission staff concurs in that determination.

E. Expiration and Settlement

The proposed options on the Index will be European style (i.e., exercises permitted at expiration only), and cash settled. Standard option trading hours (9:30 a.m. to 4:10 p.m. New York time) will apply. Networking Index options will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). The last trading day in an expiring option series normally will be the second to last business day preceding the Saturday following the third Friday of the expiration month (normally a Thursday). Trading in expiring options will cease at the close of trading on the last trading day.

The Exchange plans to list options series with expirations in the three near-term calendar months and in the two additional calendar months in the January cycle. In addition, longer term option series having up to thirty-six months to expiration may be traded. In lieu of such long-term options on a full-value Index level, the Exchange may instead list long-term, reduced-value put and call options based on one-tenth (1/10th) the Index's full value. In either event, the interval between expiration months for either a full-value or reduced-value long-term option will be not less than six months. The trading of any long-term options would be subject to the same rules which goven the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures, and all options will have European style exercise. Position limits on reduced-value long-term Networking Index options will be equivalent to the position limits for regular (full-value) Index options and would be aggregated with such options (for example, if the position limit for the full-value options is 9,000 contracts on the same side of the market, then the position limit for the reduced-value options will be 90,000 contracts on the same side of the market).

The exercise settlement value for all of the Index's expiring options will be calculated based upon the primary exchange regular way opening sale prices for the component stocks. In the case of securities traded through the NASDAQ/NMS, the first reported regular way sale price will be used. If any component stock does not open for trading on its primary market on the last trading day before expiration, then the prior day's last sale price will be used in the calculation.

F. Exchange Rules Applicable to Stock Index Options

The Index is deemed to be a Stock Index Option under Rule 901C(a) and a Stock Index Industry Group under Rule 900C(b)(1). Exchange rules governing margin requirements, position and exercise limits, and trading halt procedures applicable to the trading of narrow-based index options will apply to options traded on the Index. For example, the Exchange expects that the review required by Rule 904C(c) will result in a position limit of 9,000 contracts with respect to options on the Index. Surveillance procedures currently used to monitor trading in each of the Exchange's other index options also will be used to monitor trading in options on The Networking Index. With respect to Rule 903C(b), the Exchange proposes to list near-the-money option series on the Index at 2½ point strike (exercise) price intervals when the value of the Index is below 200 points.

G. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options also will be used to monitor trading in Index options and full-value and reduced-value Index long-term options. Further, the Intermarket Surveillance Group ("ISG") Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[8]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[9] Specifically, the Commission finds that the trading of Networking Index options, including full-value and reduced-value long-term Index options, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with an additional means to hedge exposure to market risk associated with stocks in the networking industry.[10]

[6] *Id.*

[7] Currently, all Index component securities are the subject of standardized options trading.

[8] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983, the most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990. The members of the ISG are: the Amex; the Boston Stock Exchange, Inc.; the Chicago Board Options Exchange, Inc.; the Chicago Stock Exchange, Inc.; the National Association of Securities Dealers, Inc. ("NASD"); the NYSE; the Pacific Stock Exchange, Inc.; and the Philadelphia Stock Exchange, Inc. Because of potential opportunities for trading abuses involving stock index futures, stock options, and the underlying stock; and the need for greater sharing of surveillance information for these potential intermarket trading abuses, the major stock index futures exchanges (e.g., the Chicago Mercantile Exchange and the Chicago Board of Trade) joined the ISG as affiliate members in 1990.

[9] 15 U.S.C. § 78f(b)(5) (1988).

[10] Pursuant to Section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks representing companies in the networking sector in the U.S. stock markets.

The trading of options on The Networking Index and on a reduced-value Index, however, raises several issues relating to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the Amex has addressed these issues adequately.

A. Index Design and Structure

The Commission believes it is appropriate for the Exchange to designate the Index as a narrow-based index for purposes of index options trading. The Index is comprised of 15 stocks intended to track the networking sector of the stock market. The Commission also finds that the reduced-value Index is a narrow-based index because it is composed of the same component securities as the Index, and merely dividing the Index value by ten will not alter its basic character. Accordingly, the Commission believes that it is appropriate for the Amex to apply its rules governing narrow-based index options to trading in the Index options and long-term full-value and reduced-value Index options.[11]

The Commission also believes that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the stocks that comprise the Index are actively traded, with a mean and median average monthly trading volume for the period between July 1995 and December 1995 of 22.9 million and 10.0 million shares, respectively. Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $20.9 billion to a low of $1.3 billion as of January 2, 1996, with the mean and median being $5.5 billion and $3.6 billion, respectively. Third, because the index is modified equal dollar-weighted, as described above, no one particular stock or group of stocks dominates the Index. Specifically, as of January 2, 1996, no one stock accounted for more than 13.94% of the Index's total value and the percentage weighting of the five highest weighted stocks in the Index accounted for 50.63% of the Index's value.

Fourth, the proposed maintenance criteria will serve to ensure that: (1) The Index remains composed substantially of liquid highly capitalized securities; and (2) the Index is not dominated by one or several securities that do not satisfy the Exchange's options listing criteria. Specifically, in considering changes to the composition of the Index, 90% of the weight of the Index and 80% of the number of components in the Index must at all times comply with the listing criteria for standardized options trading set forth in Amex Rule 915.

The Amex will notify Commission staff promptly at any time the Amex determines that the Index fails to satisfy any of the foregoing maintenance criteria.[12] Further, in such an event, the Exchange will not open for trading any additional series of Index options or Index long-term options unless the Exchange determines that such failure is not significant, and Commission staff concurs in the determination.

Finally, the Commission believes that the existing mechanisms to monitor trading activity in the component stocks of the Index, or options on those stocks, will help deter as well as detect any illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Index options (including full-value and reduced-value long-term Index options), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index long-term full-value and reduced-value options will be subject to the same regulatory regime as the other standardized index options currently traded on the Amex, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Index options and full-value or reduced-value Index long-term options.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[13] In this regard, the Commission notes that the Amex, NYSE, and NASD are all members of the ISG.[14] The Commission believes that this arrangement ensures the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the Index options and full-value and reduced-value long-term Index options less readily susceptible to manipulation.[15]

D. Market Impact

The Commission believes that the listing and trading of Index options, including full-value and reduced-value Index LEAPS on the Amex, will not adversely affect the underlying securities markets. First, because of the "modified equal dollar-weighting" method that will be used, as described above, no one security or group of securities represented in the Index will dominate the weight of the Index immediately following a quarterly rebalancing. Second, the Index maintenance criteria ensure that the Index will be substantially comprised of securities that satisfy the Exchange's listing standards for standardized options trading, and that one or a few stocks do not dominate the Index. Third, the currently applicable 9,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the Index options and Index long-term options will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Networking Index options (including full-value and reduced-value long-term Index options) based on the opening prices of component securities is reasonable and consistent with the Act. As has been noted previously, valuing index options for exercise settlement on expiration based on opening rather than closing

BILLING CODE 8010–01–M

[Release No. 34–37008; File No. SR–Amex–95–53]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment No. 2 Thereto by the American Stock Exchange, Inc., Relating to Options on the Morgan Stanley Healthcare Product Companies Index, the Morgan Stanley Healthcare Providers Index and the Morgan Stanley Healthcare Payors Index

March 21, 1996.

I. Introduction

On December 19, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on three new indexes developed by Morgan Stanley & Co. Incorporated ("Morgan Stanley") relating to three different subsectors within the healthcare sector: the Morgan Stanley Healthcare Providers Index ("Providers Index"); the Morgan Stanley Healthcare Payors Index ("Payors Index"); and the Morgan Stanley Healthcare Product Companies Index ("Product Companies Index") (collectively the "Indexes"). On January 2, 1996, the Amex filed Amendment No. 1 to its proposal.[3] Notice of the proposed rule change and Amendment No. 1 appeared in the **Federal Register** on January 23, 1996.[4] No comment letters were received on the proposed rule change. On March 20, 1996, the Exchange filed Amendment No. 2.[5] This order approves the Amex's proposal as amended.

II. Description of Proposal

A. General

The Amex proposes to trade standardized options on the Indexes, each of which is comprised of stocks that are traded on the Amex, the New York Stock Exchange, Inc. ("NYSE"), or are National Market securities traded through Nasdaq. In addition, the Amex proposes to amend Amex Rule 902C(d) to include the Amex proposes to amend Amex Rule 902C(d) to include the Indexes in the disclaimer provisions of that rule.[6] The Amex also proposes to list long-term options on the Indexes having up to 36 months to expiration. In lieu of such long-term options on the full value of the Indexes, the Amex may instead list long-term options based on one-tenth of the value of each of the Indexes. These long-term options on either the full or reduced-value of the Indexes are referred to as "LEAPS." LEAPS on the Indexes will trade independent of and in addition to regular Index options traded on the Exchange. However, as discussed below, position and exercise limits of LEAPS on the Indexes (both full and reduced-value) and regular options on the Indexes will be aggregated.

B. Composition of the Indexes

The Indexes have been developed by Morgan Stanley to represent a portfolio of large, actively traded, healthcare sector stocks. As of December 1, 1995, the Providers Index was comprised of 15 stocks of companies engaged in the hospital management and medical/nursing services industries, with market capitalizations ranging from $494 million to $23 billion, and six month average daily trading volumes ranging from 95,000 to 995,000 shares. The market capitalization of all of the stocks in the Providers Index on that date was approximately $45.2 billion. The total number of shares outstanding for the stocks in the Providers Index ranged from 19 million shares to 445 million shares.

The Payor's Index, as of December 1, 1995, was comprised of 12 stocks of companies conducting business in the managed health care and health industry services industries, with market capitalizations ranging from $622 million to $10 billion and six month average daily trading volumes ranging from 170,000 to 1,700,000 shares. The market capitalization of all of the stocks in the Payor's Index on that date was approximately $36.3 billion. The total number of shares outstanding for the stocks in the Payor's Index ranged from 18 million shares to 174 million shares.

Finally, as of this same date, the Product Companies Index was comprised of 25 equity issues of companies engaged in the major pharmaceuticals, biotechnology, medical specialities, medical electronics, and medical/dental distributors industries. The market capitalizations of these 25 companies range from $1.6 billion to $56.1 billion and the six month average daily trading volumes range from 124,000 to 2,800,000 shares. The market capitalization of all the stocks in the Product Companies Index on that date was approximately $475 billion. The total number of shares outstanding for the stocks in the Product Companies Index ranged from 29 million shares to 1.5 billion shares.

The Exchange will use an "equal dollar-weighted" method to calculate the value of each of the Indexes.[7] The Indexes were each initialized at a level of 200 as of the close of trading on December 16, 1994. As of the close of trading on February 27, 1996, the Providers Index, the Payors Index, and the Product Companies Index were valued at 306.66, 260.46, and 357.07, respectively.[8]

C. Eligibility Standards for the Inclusion of Component Stocks in the Indexes

The Amex represents that the Indexes conform with Exchange Rule 901C, which specifies criteria for the inclusion of stocks in an index on which standardized options will be traded on the Exchange. In addition, for each of the Indexes, Morgan Stanley has included, and will include, only those stocks that initially meet the following standards: (1) a minimum price of $7.50 at the time of announcement of entry into the Index; (2) a minimum market capitalization of $75 million; (3) average monthly trading volume in the component security of at least one million shares during the preceding six months; (4) each component security must be traded on the Amex, NYSE or must be a National Market security traded through the facility of Nasdaq; and (5) upon annual rebalancing, at least 90% of the Index numerical value and at least 80% of the total number of component securities must meet the then current criteria for standardized option trading set forth in Exchange Rule 915 for component securities not currently the subject of standardized options trading and Rule 916 for components which currently are the subject of standardized options trading.[9] Also, because the Indexes are equal-dollar weighted, no component security will represent more than 25% of the weight of any of the Indexes, nor will the five highest weighted component securities in any of the Indexes, in the aggregate, account for more than 60% of the weight of that Index upon annual rebalancing. The criteria set forth above are the same as or exceed many of the criteria established for the expedited listing of options on stock industry indexes pursuant to Exchange Rule 901C Commentary .02.

D. Calculation of the Indexes

The Indexes will be calculated using an "equal dollar-weighted" methodology designed to ensure that each of the component stocks are represented in approximately "equal" dollar amounts in each Index. In calculating the initial "equal dollar-weighting" of component stocks, the Amex, using closing prices on December 16, 1994, calculated the number of shares that would represent an investment of $300,000 in each of the stocks contained in the Indexes (to the nearest whole share). The value of each Index equals the current market value (*i.e.*, based on U.S. primary market prices) of the sum of the assigned number of shares of each of the stocks in the Index portfolio divided by the current Index divisor. Each Index divisor was initially calculated to yield a benchmark value of 200.00 at the close of trading on December 16, 1994. Annually thereafter, following the close of trading on the third Friday of December, each Index portfolio will be adjusted by changing the number of whole shares of each component stock so that each company is again represented in "equal" dollar amounts.[10] If necessary, a divisor adjustment is made at the rebalancing to ensure continuity of an Index's value. The newly adjusted portfolio becomes the basis for the Index's value on the first trading day following the annual adjustment.

Subject to the maintenance criteria discussed below, for each Index the number of shares of each component stock in such Index will remain fixed between annual reviews except in the event of certain types of corporate actions, such as the payment of a dividend (other than an ordinary cash dividend), stock distribution, stock split, reverse stock split, rights offering, distribution, reorganization, recapitalization, or similar event with respect to an Index component stock. In a merger or consolidation of an issuer of a component security, if the security remains in the Index, the number of shares of that security will be adjusted, if necessary, to the nearest whole share, to maintain the component's relative weight in the Index at the level immediately prior to the corporate action. In the event of a stock replacement, the dollar value of the security being replaced will be calculated and that amount invested in the stock of the new component, to the nearest whole share. In all cases, the divisor will be adjusted, if necessary, to ensure Index continuity.

Additionally, for each of the Indexes, if at any time between annual rebalancings, the top five stocks in the Index by weight represent in the aggregate more than 60% of the Index's value, the Exchange will rebalance the Index after the close of trading on Expiration Friday in the next month in the March cycle. For example, if in July it is determined that the top five components in the Morgan Stanley Healthcare Product Companies Index account for more than 60% of the Index's weight, then the Index will be rebalanced after the close of trading on expiration Friday in September.[11]

Similar to other stock index values published by the Exchange, the value of each Index will be calculated continuously and disseminated every 15 seconds over the Consolidated Tape Association's Network B and to the Options Price Reporting Authority ("OPRA").

E. Maintenance of the Indexes

The Indexes will be calculated and maintained by the Amex in consultation with Morgan Stanley which may, from time to time, suggest changes in the industry categories represented in any or all of the Indexes or changes in the number of component stocks in an industry category to properly reflect the changing conditions in the healthcare sector. In addition, the Amex will replace component securities in each Index that fail to meet the following maintenance criteria on quarterly review: (1) a minimum market capitalization of $75 million; (2) average monthly trading volume in the component security of at least 500,000 shares during the preceding six months; (3) at least 90% of the Index's numerical value and at least 80% of the total number of component securities meet the then current criteria for standardized option trading set forth in Exchange Rule 915 for securities not currently the subject of standardized options trading and Rule 916 for securities which are currently the subject of standardized options trading;[12] and (4) a share price of $5.00 or greater for a majority of business days during the preceding quarter for those limited number of component securities that do not meet Rule 915 or 916.[13]

At the beginning of each calendar quarter, Morgan Stanley will provide the Amex with a current list of replacement stocks for each Index from which to draw in the event that a component in an Index must be replaced due to merger, takeover, failure to satisfy the above maintenance

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 200.30–3(a)(12) (1994).

[3] In Amendment No. 1, the Amex states that for each of the Indexes, if at any time between annual rebalancings, the top five stocks in an Index by weight represent in the aggregate more than 60 percent of the Index's value, the Exchange will rebalance the Index after the close of trading on Expiration Friday in the next month in the March cycle. *See* Letter from Claire P. McGrath, Managing Director and Special Counsel, Derivatives Securities, Amex, to Michael Walinskas, Branch Chief, Office of Market Supervision ("OMS"), Division of Market Regulation ("Division"), Commission, dated January 2, 1996 ("Amendment No. 1").

[4] *See* Securities Exchange Act Release No. 36715 (January 16, 1996), 61 FR 1796 (January 23, 1996).

[5] In Amendment No. 2 the Exchange clarifies that for each of the Indexes, both eligibility standards and maintenance criteria require that upon annual rebalancing, at least 90 percent of each Index's numerical value and 80 percent of the total number of component securities must meet the then current criteria for standardized options trading set forth in either Exchange Rule 915 for component securities not currently the subject of standardized options trading or Exchange Rule 916 for components currently the subject to standardized options trading. In addition, stocks on each quarterly replacement list will be selected and ranked by Morgan Stanley based on a number of criteria, including conformity to Exchange Rule 915 for securities not currently the subject of standardized options trading and conformity to Rule 916 for securities currently the subject of standardized options trading. *See* Letter from Clifford J. Weber, Managing Director, New Products Development, Amex, to Michael Walinskas, Branch Chief, OMS, Division, Commission, dated March 20, 1996 ("Amendment No. 2").

[6] Amex Rule 902C(d) provides, among other things, that Morgan Stanley does not guarantee the accuracy or completeness of the Indexes or any data included therein, nor does Morgan Stanley make any warranty, either express or implied, as to the results to be obtained by any person or entity from the use of the Indexes or any data included therein.

[7] *See infra* Section II.D entitled "Calculation of the Indexes" for a description of this calculation method.

[9] *See* Amendment No. 2, *supra* note 5.

[10] In certain circumstances, each Index will be rebalanced prior to the end of a calendar year. *See infra* Section II.E. (Maintenance of the Indexes).

[11] *See* Amendment No. 1, *supra* note 3.

[12] *See* Amendment No. 2, *supra* Note 5.

[13] Telephone conversation between Clifford J. Weber, Managing Director, New Products Development, Amex, and James T. McHale, Attorney, OMS, Division, Commission, on March 19, 1996.

criteria, or other similar event (each a "Replacement List").[14] The Amex will publicly distribute the Replacement Lists as soon as practicable following receipt from Morgan Stanley.

Stocks on each Replacement List will be selected and ranked by Morgan Stanley based on a number of criteria, including conformity to the eligibility requirements described above [15] and to Exchange Rule 915 for component securities not currently the subject of standardized options trading and Rule 916 for components which are currently the subject of standardized options trading.[16] Rules 915 and 916, respectively, set forth the criteria for the initial and continued listing of standardized options on equity securities. The replacement stocks will be categorized by Morgan Stanley by industry within the healthcare sector and ranked within their category based on the aforementioned criteria. The replacement stock for a security being removed from an Index will be selected solely by the Amex from the Replacement List based on industry category and liquidity.[17] In the event no replacement stocks are available that meet the eligibility criteria and pass Morgan Stanley's selection process, then the security leaving the Index will be removed without replacement and the divisor adjusted to ensure Index continuity. It is expected that each Index will remain at the current number of components; however, if the number of components in an Index shall increase or decrease by more than one third, the Exchange must obtain additional approval from the Commission pursuant to Section 19(b) of the Act.

In addition, Morgan Stanley will advise the Exchange regarding the handling of unusual corporate actions which may arise from time to time. Routine corporate actions (*e.g.*, stock splits, routine spinoffs, etc.) which require straightforward index divisor adjustments will be handled by the Exchange's staff without consultation with Morgan Stanley. All stock replacements and unusual divisor adjustments caused by the occurrence of extraordinary events such as dissolution, merger, bankruptcy, non-routine spinoffs, or extraordinary dividends will be made by Exchange staff in consultation with Morgan Stanley, although the Amex ultimately will select the actual replacement stock from the Replacement List without Morgan Stanley's assistance. All stock replacements and the handling of non-routine corporate actions will be announced at least ten business days in advance of such effective change, whenever practicable. As with all options currently trading on the Amex, the Exchange will make this information available to the public through the dissemination of an information circular.

F. Expiration and Settlement

The Index value for purposes of settling outstanding Index options and Index LEAPS contracts upon expiration will be calculated based upon the regular way opening sale prices for each of an Index's component stocks in their primary market on the last trading day prior to expiration. In the case of National Market securities traded through Nasdaq, the first reported sale price will be used. Once all of the component stocks have opened for trading, the value of each Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used to calculate each Index. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of an Index, the Amex will wait until the end of the trading day on expiration Friday.[18]

G. Contract Specifications

The proposed options on the Indexes will be cash-settled, European-style options.[19] Standard options trading hours for narrow-based index options (9:30 a.m. to 4:10 p.m. New York time) will apply to the contracts. The options on the Index will expire on the Saturday following the third Friday of the expiration month. The last trading day for an expiring option series will normally be the second to the last business day before expiration (normally a Thursday). The Exchange intends to list option series with expirations in the three near-term calendar months and the two additional calendar months in three month intervals in the March cycle. The Exchange also intends to list longer term option series having up to 36 months to expiration. The Exchange proposes to list near-the-money (i.e. strike prices within ten points above or below the current index value) option series on any of the Indexes at 2½ point strike price intervals when the value of that Index is below 200 points.

H. Listing of Long-Term Options on the Full Value or the Reduced Value of the Indexes

The proposal provides that the Exchange may list longer term index options series having up to 36 months to expiration on the full value of the Indexes. Alternatively, the Exchange may list long-term reduced-value put and call options based on 1/10th of the full value of the Indexes. In either event, the interval between expiration months for either a full value or reduced value long-term option will not be less than six months. The reduced-value Index LEAPS will also have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures.

I. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Indexes are Stock Index Options under Amex Rule 901C(a) and Stock Index Industry Groups under Rule 900C(b)(1), the proposal provides that Exchange rules that are applicable to the trading of narrow-based index options will apply to the trading of options on the Indexes. Specifically, Exchange rules governing margin requirements,[20] position and exercise limits,[21] and trading halt procedures [22] that are applicable to the trading of narrow-based index options will apply to options traded on the Indexes. Position limits on long-term reduced-value Index options will be equivalent to the position limits for regular (full value) Index options and would be aggregated with such options. For aggregation purposes, ten reduced value contracts will equal one full value contract (for example, if the position limit for the full value options is 12,000 contracts on the same side of the market, then the position limit for the reduced value options will be 120,000 contracts on the same aside of the market).

J. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in options on the Indexes. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group ("ISG") Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Indexes.[23]

Morgan Stanley has also adopted special procedures to prevent the potential misuse of material, non-public information by the research, sales, and trading divisions of the firm in connection with the maintenance of the Indexes.[24] As discussed above, the Amex will publicly disseminate each Replacement List by issuing information circulars so that investors will know in advance which securities will be considered as replacements for the Index.[25]

In additional, Morgan Stanley will have a limited role in the stock replacement selection and substitution process. First, when a stock in an Index no longer meets the published criteria as determined following a quarterly review of the components by the Exchange, the Amex will determine, without consultation with Morgan Stanley, which security from the applicable Replacement List will be selected for addition to the Index. Second, The Amex will also make adjustments as a result of stock splits, routine spin-offs, and otherwise, without consultation with Morgan Stanley. Finally, even in those situations where the Amex consults with Morgan Stanley, upon the occurrence of certain events, the actual replacement sock will be selected solely by Amex from the stocks on the replacement list.

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[26] Specifically, the Commission finds that the trading of options on the Indexes, including full-value and reduced-value Index LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with an additional means to hedge exposure to market risk associated with stocks in the various healthcare subsectors.[27]

The trading of options on the Indexes and reduced-value Indexes, however, raises several issues relating to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the Amex adequately has assessed these issues.

A. Index Design and Structure

The Commission believes it is appropriate for the Exchange to designate each of the Indexes as narrow-based for purposes of index options training. The indexes are each comprised of a limited number of stocks intended to track discrete subsectors of the healthcare sector of the stock market. Accordingly, the Commission believes it is appropriate for the Amex to apply its rules governing narrow-based index options to trading in the proposed Index options.[28]

The Commission also believes that the liquid markets, large capitalizations, and relative weighings of the Indexes' component stocks significantly minimize the potential for manipulation of the Index. First, the stocks that comprise each index are actively traded. Average month trading volume in the component stocks of the Indexes for the period between June 1, 1995 and December 1, 1995 ranged from 95,000 to 995,000 shares for the Providers Index, 170,000 to 1,700,000 shares for the Payors Index, and 124,000 to 2,800,000 shares for the Product Companies Index. Second, the market capitalizations of the stocks in the Indexes are very large, ranging from $494 million to $23 billion in the Providers Index, $622 million to $10 billion in the Payors Index, and $1.6 billion to $56 billion in the Product Companies Index. Third, because the indexes are equal dollar-weighted, no one particular stock or group of stocks dominates the index. Specifically, as of December 1, 1995, no one stock accounted for more than 12.13% of the total value of the Providers Index, 12.47% of the total value of the Payors Index, and 6.38% of the total value of the Product Companies Index. Fourth, the Indexes will be maintained so that in addition to the other maintenance criteria discussed above, at each quarterly review and rebalancing (annual or otherwise), at least 90% of the Indexes numerical value and at least 80% of the total number of component securities will be composed of securities eligible for standardized options trading. Fifth, Morgan Stanley and the Amex will be required to ensure that each component of each Index is subject to last sale reporting requirements in the U.S. pursuant to Rule 11aA3–1 of the Act. This will further reduce the potential for manipulation of the value of the Indexes. Finally, the Commission believes that the existing mechanisms to monitor trading activity in the component stocks of the Indexes, or options on those stocks or the Indexes will help deter as well as detect any illegal activity.

---

[14] *See* Letter from Carol Shahmoon, Counsel, Morgan Stanley, to Michael Walinskas, Branch Chief, OMS, Division, Commission, dated March 20, 1996 ("Morgan Stanley Letter").

[15] *See supra* Section II.C entitled "Eligibility Standards for the Inclusion of Component Stocks in the Indexes."

[16] *See* Amendment No. 2, *supra* Note 5.

[17] The Amex will ensure that at the time of selection it will only select securities that continue to meet the eligibility requirements discussed above.

[18] For purposes of the daily dissemination of the Indexes value, if a stock included in an Index has not opened for trading, the Amex will use the closing value of that stock in its primary market on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[19] A European-style option can be exercised only during a specified period before the option expires.

[20] Pursuant to Amex Rule 462(d)(2)(D)(iv), the margin requirements for each of the proposed Index options will be: (1) for each short options position, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value; and (2) for long options positions, 100% of the options premium paid.

[21] Pursuant to Amex Rules 904C and 905C, respectively, the position and exercise limits for each of the proposed Index options will be 12,000 contracts, unless the Exchange determines, pursuant to Rules 904C and 905C, that a lower limit is warranted.

[22] Pursuant to Amex Rule 918C, the trading of options on each of the Indexes will be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of an Index's value are halted or suspended.

[23] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990. The members of the ISG are: the Amex; the Boston Stock Exchange, Inc.; the Chicago Board Options Exchange, Inc.; the Chicago Stock Exchange, Inc.; the National Association of Securities Dealers, Inc.; the NYSE; the Pacific Stock Exchange, Inc.; and the Philadelphia Stock Exchange, Inc. Because of potential opportunities for trading abuses involving stock index futures, stock options, and the underlying stock, and the need for greater sharing of surveillance information for these potential intermarket trading abuses, the major stock index futures exchanges (*e.g.*, the Chicago Mercantile Exchange and the Chicago Board of Trade) joined the ISG as affiliate members in 1990.

[24] *See* Morgan Stanley Letter, *supra* note 14.

[25] *Id.*

[26] 15 U.S.C. § 78f(b)(5).

[27] Pursuant to Section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivate instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be out weighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks representing companies in the healthcare sector in the U.S. stock markets.

[28] *See supra* Section II.I (Position and Exercise Limits, Margin Requirements, and Trading Halts).

In addition, even though the Indexes are only scheduled to be rebalanced annually, the Commission believes that the Amex and Morgan Stanley have developed several composition and maintenance criteria for the Indexes that will minimize the possibility that the Indexes could be manipulated through trading in less actively traded securities or securities with smaller prices or floats. First, if at any time during the year the top five components in an Index, by weight, account for more than sixty percent of the weight of the Index, the Exchange will rebalance the Index following the close of trading on Expiration Friday in the next month in the March cycle. These rebalancing requirements will serve to ensure that any "overweight" stock [29] will be brought back into line with the other stocks, thus ensuring that less capitalized stocks do not become excessively weighted in the Index.

Second, after each quarterly review and each rebalancing (annual or otherwise), at least 90% of an Index's numerical value and at least 80% of the total number of component securities will be comprised of stocks that are eligible for standardized options trading. The Commission believes that this requirement will ensure that the Indexes will be almost entirely made up of stocks with large public floats that are actively traded, thus reducing the likelihood that the Indexes could be easily manipulated by abusive trading in the smaller stocks contained in the Indexes.

Third, at each quarterly review of the Indexes, a component may only remain in an Index if it satisfies the remaining maintenance requirements which include market capitalization and minimum trading volume requirements.[30] These requirements are similar to the continued listing requirements for options on individual equity securities and should ensure the Indexes are comprised of active and liquid securities.[31]

Fourth, because the Indexes are narrow-based, the applicable position and exercise limits (currently 12,000) and margin requirements will further reduce the susceptibility of the Indexes to manipulation. Lastly, Morgan Stanley will only add stocks to a Replacement List that are representative of the healthcare sector and, as discussed above,[32] satisfy the inclusion criteria.

The Commission notes that certain concerns are raised when a broker-dealer, such as Morgan Stanley, is involved in the development and maintenance of a stock index that underlies an exchange-traded derivative product. For several reasons, however, the Commission believes that the Amex has adequately addressed this concern with respect to options on the Indexes.

First, the values of the Indexes are to be calculated and disseminated by the Amex so that unless a party independently calculates the Indexes' values, neither Morgan Stanley nor any other party will be in receipt of the values prior to the public dissemination of the Indexes' values. Second, routine corporate actions (*e.g.*, stock splits, routine spinoffs, etc.) will be handled by the Amex without consultation with Morgan Stanley. Third, although stock replacements and unusual divisor adjustments caused by the occurrence of extraordinary events, such as dissolution, merger, bankruptcy, non-routine spinoffs, or extraordinary dividends, will be made by Exchange staff in consultation with Morgan Stanley, Amex alone ultimately will select the actual replacement stock from the Replacement List without Morgan Stanley's assistance. Such replacement will be announced publicly at least 10 business days in advance of the effective change by the Amex through the dissemination of an information circular, whenever practicable. Fourth, the Commission believes that the procedures Morgan Stanley has established to detect and prevent material non-public information concerning the Indexes from being improperly used by the person or persons responsible for compiling the Replacement Lists, as well as other persons within Morgan Stanley, as discussed above,[33] adequately serve to minimize the susceptibility to manipulation of the Indexes, the securities in the Indexes, and securities added to and deleted from any Replacement List. In summary, the Commission believes that the procedures outlined above help to ensure that Morgan Stanley will not have any informational advantages concerning modifications to the composition of the Indexes due to its limited role in consulting with Amex on the maintenance of the Indexes under certain circumstances.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as options on the Indexes (including full-value and reduced value LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things that: (1) the special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because LEAPS and regular options on the Indexes will be subject to the same regulatory regime as the other standardized options currently traded on the Amex, the Commission believes that adequate safeguards are in place to ensure the protection of investors in options on the Indexes. Finally, the Amex has stated that it will distribute information circulars to members following rebalancings and prior to component changes to notify members of changes in the composition of the Indexes. Additionally, the Amex will publicly disseminate each Replacement List by means of information circulars. The Commission believes this should help to protect investors and avoid investor confusion.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[34] In this regard, the Amex, NYSE, and National Association of Securities Dealers, Inc. are all members of the ISG, which provides for the exchange of all necessary surveillance information.[35]

[29] A stock would be "overweight" if its weight in the Index were greater than the average weight of all of the stocks in the Index. This would occur, for example, if the price of a component stock significantly increased relative to the other stocks in the Index during a particular quarter and prior to the rebalancing.

[30] *See supra* Section II.E (Maintenance of the Indexes).

[31] *See* Amex Rule 916.

[32] *See supra* Section II.C (Eligibility Standards for the Inclusion of Component Stocks in the Indexes).

[33] *See* Morgan Stanley Letter, *supra* note 14.

[34] *See* Securities Exchange Act Release No. 31243 (September 28, 1992), 57 FR 45849 (October 5, 1992).

[35] *See supra* note 23.

D. Market Impact

The Commission believes that the listing and trading of options on the Indexes, including full-value and reduced-value Index LEAPS, on the Amex will not adversely impact the underlying securities markets.[36] First, as described above, due to the "equal dollar-weighting" methodology, no one stock or group of stocks dominates the Indexes. Second, because at each quarterly review and each rebalancing of the Indexes, at least 90% of an Index's numerical value and at least 80% of the total number of component securities must be accounted for by stocks that are eligible for standardized options trading, the component stocks generally will be actively-traded, highly-capitalized stocks. Third, the currently applicable 12,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the options on the Indexes will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring options on the Indexes (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is reasonable and consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for stocks underlying options on the Index.[37]

The Commission finds good cause for approving Amendment No. 2 to the proposal prior to the thirtieth day after the date of publication of the notice of filing thereof in the **Federal Register**. Specifically, Amendment No. 2 merely clarifies that for each of the Indexes, both eligibility standards and maintenance criteria require that upon annual rebalancing, at least 90% of each Index's numerical value and 80% of the total number of component securities must meet the then current criteria for standardized options trading set forth in either Rule 915 for component securities not currently the subject of standardized options trading or Rule 916 components which are currently the subject of standardized options trading. Moreover, Amendment No. 2 provides that Morgan Stanley will select and rank any stocks to be included in each Replacement List based on a number of criteria, including conformity to the same eligibility standards and maintenance criteria set forth in Rules 915 and 916. The Commission believes that clarifying the applicable eligibility standards and maintenance criteria for the Indexes' component securities is consistent with maintaining a fair and orderly market and reduces the likelihood of investor confusion.

Based on the above, the Commission finds good cause for approving Amendment No. 2 to the proposed rule change on an accelerated basis and believes that the proposal, as amended, is consistent with Sections 6(b)(5) and 19(b)(2) of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment No. 2. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to the File No. SR–Amex–95–53 and should be submitted by April 19, 1996.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[38] that the proposed rule change (SR–Amex–95–53), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[39]

Self-Regulatory Organizations; Order Approving Proposed Rule Changes and Notice of Filing and Order Granting Accelerated Approval of Related Amendments by the Chicago Board Options Exchange, Inc., the American Stock Exchange, Inc. and the Philadelphia Stock Exchange, Inc., and Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Changes by the Pacific Stock Exchange, Inc., and the New York Stock Exchange, Inc., Relating to Listing Standards for Options on Securities Issued in a Reorganization Transaction Pursuant to a Public Offering or a Rights Distribution

March 22, 1996.

I. Introduction

On October 19, November 29, December 19, 1995, February 16, and March 1, 1996 the Chicago Board Options Exchange, Inc. ("CBOE"), the American Stock Exchange, Inc. ("Amex"), the Philadelphia Stock Exchange, Inc. ("Phlx"), the Pacific Stock Exchange, Inc. ("PSE") and the New York Stock Exchange, Inc. ("NYSE") (collectively the "Exchanges"), respectively, submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] proposed rule changes to adopt listing standards for options on securities issued in a reorganization transaction pursuant to a public offering or a rights distribution.

Notices of the CBOE, Amex, and Phlx proposals were published for comment in the **Federal Register** on December 6, 1995, December 11, 1995, and December 29, 1995, respectively.[3] No comments were received on the proposals. The CBOE submitted to the Commission Amendment Nos. 1 and 2 to its proposal

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

on January 30, and February 5, 1996, respectively.[4] The Phlx and Amex submitted to the Commission Amendment No. 1 to their proposals on February 21, and March 21, 1996, respectively.[5] This order approves the proposed rule changes, as amended, by the CBOE, Amex, and Phlx, and the proposed rule changes by the NYSE, and PSE, on an accelerated basis.

II. Background

The Exchanges currently maintain uniform standards regarding the approval for listing of underlying securities for options trading.[6] Specifically, to be the subject of options trading, the underlying security must meet the following guidelines: (1) Trading volume in all markets of at least 2.4 million shares in the preceding twelve months ("Volume Test"); (2) market price per share of at least $7.50 for the majority of business days during the three calendar month period preceding the date of selection ("Price Test"); (3) a minimum public ownership of 7 million shares ("Public Ownership Requirement");[7] and (4) a minimum of 2,000 holders ("Holder Requirement").[8]

An exchange must determine that a security satisfies the above requirements, as of the date it is selected for options trading ("selection date"), which is the date the exchange files for certification of the listing of the option with The Options Clearing Corporation ("OCC"). Depending upon the interest and response from other options exchanges, the exchange may generally begin options trading from three to five business days after the selection date.

The Exchanges have adopted maintenance criteria for withdrawal of approval of an underlying security subject to options trading.[9] A security previously approved for options transactions shall be deemed not to meet the guidelines for continued listing if (1) trading volume in all markets is less than 1.8 million shares in the preceding twelve months ("Maintenance Volume Test"); (2) market price per share closes below $5.00 on a majority of business days during the preceding six calendar months ("Maintenance Price Test");[10] (3) public ownership amounts to fewer than 6.3 million shares ("Maintenance Public Ownership Requirement"); or (4) there are fewer than 1,600 holders ("Maintenance Holders Requirement").[11]

Both the initial and maintenance listing criteria are intended to ensure, among other things, that options are only traded on stocks with adequate depth and liquidity so that the options and their underlying components are not readily susceptible to manipulation.

The five options exchanges recently amended their rules to facilitate the earlier listing of options on securities issued in certain corporate restructuring transactions.[12] The amended rules apply to securities ("Restructure Security") issued by a public company to existing shareholders, with existing publicly traded shares subject to options trading, in connection with certain "restructuring transactions."[13]

The amended rules facilitates the earlier listing of options on a Restructure Security by permitting an exchange to determine whether a Restructure Security satisfies the Volume Test and Price Test by reference to the trading volume and market price history of an outstanding equity security ("Original Security") previously issued by the issuer of the Restructure Security, or affiliate thereof.

In addition, the amended rules provide specific criteria for evaluating the distribution of shares of a Restructure Security for purposes of meeting the Public Ownership and Holder Requirements. To the extent that the initial options listing requirements are satisfied based upon these "lookback" provisions to the Original Security and the other provisions of the proposal, then an exchange will permit options trading to begin on the ex-date for the restructuring transaction.[14]

In order to utilize the amended rules, the Restructure Security must first satisfy one of four alternate conditions. The first three alternate conditions are intended to ensure that the trading volume and market price history of the Original Security represent a reasonable surrogate for determining the likely future trading volume and price data of the Restructure Security. Under these conditions either, (a) the aggregate market value of the Restructure Security, (b) the aggregate book value of the assets attributed to the business represented by the Restructure Security (minimum $50 million) or (c) the revenues attributed to the business represented by the Restructure Security (minimum $50 million) must exceed one of two stated percentages of the same measure for the Original Security.[15] The threshold percentages will be 25% if the applicable measure determined with respect of the Original Security represents an interest in the combined enterprise prior to the restructuring transaction, and 33⅓% if the applicable measure determined with respect of the Original Security represents an interest in the remainder of the enterprise after the restructuring transaction ("Percentage Tests"). The fourth alternate condition is that the aggregate market value represented by the Restructure Security be at least $500 million ("Aggreate Market Value Test"). This condition is based on the Exchanges' view that even if a Restructure Security does not meet the comparative tests outlined above, a Restructure Security with an aggregate market value of $500 million, by virtue of its absolute size, represents a substantial portion of the Original Security, and thus should qualify for the "lookback" provision.

If any one of the four conditions set forth above is satisfied, a Restructure Security will qualify for the "lookback" provision. Under the "lookback" provision, a Restructure Security may be eligible for options trading immediately upon its issuance provided the following requirements are satisifed. First, the Restructure Security must satisfy the Volume and Price Tests. An exchange may be permitted to determine whether a Restructure Security satisfies the Volume and Price Tests by reference to the trading volume and market price history of the Original Security. The trading volume and market price history of the Original Security that occurs *prior to the restructuring ex-date* can be used for these calculations (emphasis added). Volume and price data may be derived from "when issued" trading in the Restructure Security. However, once an exchange uses "when issued" volume or prices for the Restructure Security to satisfy the relevant guidelines, it may not use the Original Security for that purpose on any subsequent trading day. In addition, both the trading volume and market price history of the Original Security must be used, if either is so used.

Additionally, an exchange must determine whether a Restructure Security will satisfy the Public Ownership and Holder Requirements. This determination will either be based on facts and circumstances that will exist on the intended date for listing the option, or based on assumptions that are permitted under the proposal. Because the shares of the Restructure Security are to be issued or distributed to the shareholders of the issuer of the Original Security, these requirements may be satisfied based upon the exchange's knowledge of the existing number of outstanding shares and holders of the Original Security.

Moreover if a Restructure Security is to be listed on an exchange or in an automatic quotation system that subjects it to an initial listing requirement of no less than 2,000 holders, then the options exchange may assume that the Holder Requirement will be satisfied. Similarly, if a Restructure Security is to be listed on an exchange or in an automatic quotation system subject to an initial listing requirement of no less than public ownership of 7 million shares, then the options exchange may assume that Public Ownership Requirement will be satisfied. Additionally, if an exchange determines that at least 40 million shares of a Restructure Security will be issued and outstanding in a restructuring transaction, then it may assume that the Restructure Security will satisfy both the Public Ownership, and Holder Requirements.

An exchange, however, shall not rely on the above assumptions if, after reasonable investigation, it determines that either the public ownership of shares or the holder requirement, in fact, will not be satisfied on the intended date for listing the option. Additionally, other exchanges will have the opportunity to challenge the certification by demonstrating, among other things, that the Restructure Security will not meet the initial listing criteria with respect to public ownership and holders.

Finally, the Exchanges adopted a similar "lookback" provision for the Maintenance Volume Test and the Maintenance Price Test. Specifically, for purposes of satisfying these requirements, the trading volume and market price history of the Original Security, as well as any "when issued" trading in the Restructure Security, can be used for such calculations, provided that they are only used for determining price and volume history for the period prior to commencement of trading in the Restructure Security.

III. Description of the Proposals

The purpose of the proposed rule changes is to amend the Exchanges' special listing standards[16] that apply to options on equity securities issued in certain restructuring transactions to include securities issued pursuant to a public offering or a rights distribution that is part of a restructuring transaction.

As recently approved by the Commission, the Exchanges' accelerated listing criteria for options on Restructure Securities does not extend to restructuring transactions involving the issuance of shares of a Restructure Security in a public offering or a rights distribution.[17]

The Exchanges note that when shares of a Restructure Security are issued in a public offering or pursuant to a rights distribution, it cannot automatically be assumed that the shareholder population of the Restructure Security and the Original Security will be the same. Instead, the shareholders of a Restructure Security issued in a public offering will be those persons who subscribed for and purchased the security in the offering, and the shareholders of a Restructure Security issued in a rights distribution will be those persons who received rights via such an offering, or purchased such rights and elected to exercise them. Even in the case of a distribution of nontransferable rights to shareholders of the Original Security, not all such shareholders may choose to exercise their rights. As a result, it cannot be assumed that the Restructure Security will necessarily satisfy listing criteria pertaining to minimum number of holders, minimum public ownership of shares, and trading volume simply because the Original Security satisfied these criteria.

The Exchanges believe, however, that it is appropriate and desirable to be able to list options overlying securities issued in reorganizations involving public offerings or rights distributions without significant delay, provided there are reasonable assurances that the Restructure Securities satisfy applicable options listing standards. That is, shareholders of an Original Security who utilize options to manage the risks of their stock positions may well find themselves to be shareholders of both the Original Security and the Restructure Security following a reorganization because they chose to purchase the Restructure Security in a public offering or to exercise rights in order to maintain the same investment

---

[4] The CBOE submitted Amendment Nos. 1 and 2 to clarify the initial market price requirements, and the maintenance trading volume requirements for shares of a Restructure Security issued pursuant to a public offering or rights distribution, as described more fully herein. *See* Letters from Michael Meyer, Attorney, Schiff Hardin & Waite, to Sharon Lawson, Senior Special Counsel, Office of Market Supervision ("OMS"), Division of Market Regulation ("Market Regulation"), Commission, dated January 30, 1996 ("CBOE Amendment No. 1"); and to John Ayanian, Attorney, OMS, Market Regulation, Commission, dated February 5, 1996 ("CBOE Amendment No. 2").

[5] The Phlx and Amex submitted identical amendments to reflect the changes set forth in CBOE's Amendment Nos. 1 and 2. As indicated above, these amendments clarify the initial market price requirements, and the maintenance trading volume requirements for shares of a Restructure Security issued pursuant to a public offering or rights distribution, as described more fully herein. *See* Letter from Michele Weisbaum, Associate General Counsel, Phlx, to Michael Walinskas, Branch Chief, OMS, Market Regulation, Commission, dated February 21, 1996 ("Phlx Amendment No. 1"), and Letter from Howard A. Baker, Senior Vice President, Derivative Securities, Amex, to John Ayanian, Attorney, OMS, Market Regulation, Commission, dated March 21, 1996 ("Amex Amendment No. 1").

[6] *See* Amex rule 915; CBOE Rule 5.3; PSE Rule 3.6; Phlx Rule 1009; and NYSE Rule 715.

[7] Shares that are owned by persons required to report their stock holdings under Section 16(a) of the Act (*i.e.*, directors, officers, and 10% beneficial owners) are excluded from this calculation.

[8] In addition to satisfying price, volume, public ownership, and holder requirements, for a Restructure Security to meet initial listing requirements, it must also comply with all requirements set forth by the Exchanges in their options eligibility rules. For example, the security must be registered, and listed on a national securities exchange, or traded through the facilities of a national securities association and reported as a "national market system" ("NMS") security as set forth in Rule 11Aa3–1 under the Act, and the issuer must be in compliance with any applicable requirements of the Act.

[9] *See* Amex Rule 916; CBOE Rule 5.4; PSE Rule 3.7; Phlx Rule 1010; and NYSE Rule 716.

[10] Additional criteria permits the underlying security under certain circumstances to trade as low as $3.00 for a temporary period of time. *See* Id.

[11] In addition to satisfying the maintenance criteria for market price and trading volume, for a Restructure Security to meet maintenance requirements for an underlying security subject to options trading, it must also comply with all other requirements set forth by the Exchanges in their options eligibility rules.

[12] *See* Securities Exchange Act Release No. 36020 (July 24, 1995), 60 FR 39029 (July 31, 1995) (order approving SR–CBOE–95–11; SR–Amex–95–07; SR–Phlx–95–12; and SR–PSE–95–04); *See also* Securities Exchange Act Release No. 36029 (July 27, 1995), 60 FR 40637 (August 9, 1995) (order approving SR–NYSE–95–07) ("Restructuring Transactions Approval Orders").

[13] A "restructuring transaction" is defined as a spin-off, reorganization, recapitalization, restructuring or similar corporate transaction.

[14] Option contracts may not be initially listed for trading in respect of a Restructure Security, whose shares are issued by the Original Security to its existing shareholders, until the ex-date. The ex-date occurs at such time when shares of the Restructure Security become issued and outstanding and are the subject of trading that are not on a "when issued" basis or in any other way contingent on the issuance or distribution of the shares.

[15] Aggregate market values will be based on share prices that are either (a) all closing prices in the primary market on the last business day preceding the selection date or (b) all opening prices in the primary market on the selection date. The aggregate market value of the Restructure Security may be determined from "when issued" prices, if available.

Asset values and revenues will be derived from the later of (a) the most recent annual financial statements or (b) the most recent interim financial statements of the respective issuers covering a period of not less than three months. Such financial statements may be audited or unaudited and may be pro forma.

[16] *See* CBOE Rule 5.3, Interpretation and Policy .05; Amex Rule 915, Commentary .05; Phlx Rule 1010, Commentary .05; PSE Rule 3.6, Commentary .05; and NYSE Rule 715, Supplementary Material .50.

[17] As stated above, the special listing standards adopted by the Exchanges currently apply to a Restructure Security, whose shares are issued by a public company to its existing shareholders, with existing public traded shares subject to options trading on an exchange, in connection with certain restructuring transactions. *See* Restructuring Transactions Approved Orders, *supra* note 10.

position they had prior to the reorganization. Such holders may want to continue to use options to manage the risks of their combined stock position after the reorganization, but they can do so only if options on the Restructure Security are available. The Exchanges believe that it is important to avoid any undue delay in the introduction of options trading in such a Restructure Security in circumstances where there is sound reason to believe that the Restructure Security will in fact satisfy options listing standards.

Accordingly, the Exchanges have proposed certain special listing criteria to address the attendant concerns. As with the options listing standards for shares of a Restructure Security issue to shareholders of the Original Security in certain restructuring transactions, an exchange will be able to assume the satisfaction of the Public Ownership and Holder Requirements in public offerings and rights distributions, if the Restructure Security is listed on an exchange or an automatic quotation system subject to equivalent listing requirements or at least 40,000,000 shares of the Restructure Security are issued and outstanding. Moreover, after due diligence, an exchange must have no reason to believe that the Restructure Security does not satisfy these requirements.

Additionally, the closing prices of the Restructure Security on each of the five or more consecutive "regular way" trading days prior to the selection date must be at least $7.50 per share.[18] In addition to this requirement, the Price Test must also be separately met. Satisfaction of the Price Test may be based on the market price history of the Restructure Security from the ex-date for the restructuring transaction to the selection date, and the market price history of the Original Security prior to the ex-date for restructuring transaction.[19] In the event the Restructure Security has a closing price that is less than $7.50 on any of the trading days preceding its selection date, or an opening price that is less than $7.50 on its selection date, the Restructure Security itself will have to satisfy the Price Test. This would require the Restructure Security to close at or above $7.50 on a majority of trading days over a period of three months before it can be certified as eligible for options trading. In order to rely, in part, on the market price history of the Original Security to satisfy the Price Test, the Restructure Security must still meet the Percentage Tests or the Aggregate Market Value Test as outlined above in Section II. Finally, trading volume in the Restructure Security itself, without reliance on the Original Security, must be at least 2,400,000 shares during a period of twelve months or less up to the time the security is so selected.

For any Restructure Security issued in a public offering or a rights distribution that satisfies these requirements, the effect of the proposed rule changes will be to permit its certification for options trading to take place as early as on the sixth day after trading in the Restructure Security commences.

Finally, the Maintenance Volume Test approved in the Restructuring Transactions Approval Orders is proposed to be amended to provide that in the case of a Restructure Security issued in a public offering or pursuant to a rights offering and approved for options trading on an accelerated basis, the Maintenance Volume Test may not be satisfied on the basis of the trading volume history of the Original Security, but instead it must be satisfied solely on the basis of the trading volume history of the Restructure Security.[20]

IV. Commission Findings and Conclusions

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular with the requirements of Section 6(b)(5),[21] in that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public interest.

The Commission believes that it is necessary for securities to meet certain minimum standards regarding both the quality of the issuer and the quality of the market for a particular security to become options eligible. These standards are imposed to ensure that those issuers upon whose securities options are to be traded are financially sound companies whose trading volume, market price, number of holders, and public ownership of shares are substantial enough to ensure adequate depth and liquidity to sustain options trading that is not readily susceptible to manipulation. The Commission also recognizes that under current equity options listing criteria, investors may be precluded for a significant period from employing an adequate hedging strategy involving options on any newly acquired Restructure Security acquired pursuant to a public offering or rights distribution in connection with a restructuring transaction.

Accordingly, to determine whether the earlier listing of options overlying a Restructure Security issued pursuant to a public offering or rights distribution is reasonable, the Commission must balance the benefits of providing adequate hedging strategies to shareholders of the Restructure Security, and the risks of approving certain securities for options trading before such securities can conclusively be determined to satisfy the options eligibility criteria.[22] The Commission believes that the proposed limited exception to established equity options listing procedures where a public offering or rights distribution is solely related to a restructuring of an Original Security, and the Original Security is already the subject of options trading, strikes such a reasonable balance.

As discussed in more detail below, the Commission believes that the conditions of the new rule will help to ensure that only those securities that are most likely to have adequate depth and liquidity will be eligible for options trading prior to the establishment of a recognized trading history. Additionally, by facilitating the earlier listing of options on a Restructure Security issued pursuant to a public offering or rights distribution, the Commission believes that investors should be able to better hedge the risk of their newly acquired stock position in the Restructure Security.[23]

Despite the benefits of the proposal, the Commission believes that the proposal should only apply to restructuring transactions that involve financially sound and sufficiently large companies. The Commission believes that the Exchanges have adequately addressed this concern by requiring the Restructure Security to either satisfy certain comparative tests (comparing the Restructure Security, or its related business with that of the Original Security, or its related business,[24] or meet a very high aggregate market value standard ($500 million).[25]

The Commission believes that if one of the comparative tests or the aggregate market value standard is satisfied, the Restructure Security should qualify for the "lookback" provision. Under the "lookback" provision, a Restructure Security will be able to satisfy the Price Test if the market price history of the Restructure Security, together with the market price history of the Original Security occurring prior to the ex-date, meet the initial listing requirements for market price of the Restructure Security. The Commission believes that the additional requirement under the Exchanges' proposed rules that the closing price of the Restructure Security on each of the five or more consecutive "regular way" trading days prior to the selection date must be at least $7.50 per share provides an exchange with a reasonable sample price history of the Restructure Security before selection is permitted.

The Commission also believes that it is appropriate for an exchange to count "when issued" trading in the Restructure Security when determining if the Restructure Security will satisfy the Price Test set forth in the initial options listing requirements. However, once an exchange begins to use "when issued" volume or price history for the Restructure Security to satisfy the Price Test, it may not use the Original Security for such purposes on any subsequent trading day. For example, if in order to satisfy the Price Test for a Restructure Security for which the ex-date is April 1, 1996, and the selection date for the Restructure Security is April 8, 1996, an exchange may elect to base its determination on the market price of the Original Security from October 9, 1995 through March 1, 1996, the market price is the when-issued market for the Restructure Security from March 7, 1996 through March 31, 1996, and the "regular way" trading market price of the Restructure Security from April 1 through April 8, 1996, in determining whether options covering the Restructure Security may be certified for options trading on the April 8, 1996 selection date. An exchange, however, would be permitted to use the price history of the Original Security throughout the period from October 9, 1995 through March 31, 1996, provided that it did not rely on any when-issued market price history during that period.

The Commission notes that an exchange will not use trading history relating to the Original Security after the ex-date to meet the initial options listing requirements for the option contracts overlying the Restructure Security. Additionally, the condition that option contracts overlying a Restructure Security will not be initially listed for trading until such time as shares of the Restructure Security are issued and outstanding and are the subject of "regular way" trading for at least 5 trading days will serve to (1) ensure that options will only be traded on a Restructure Security when it is certain the security is actually issued and outstanding, and (2) provide an opportunity to better determine if the Holder and Public Ownership Requirements have been met.

The Commission notes that the Exchanges may not apply the "lookback" provision to satisfy the Volume Test for a Restructure Security issued pursuant to a public offering or rights distribution. The trading volume in the Restructure Security must be at least 2,400,000 shares during a period of twelve months or less up to the time the security is so selected. The Commission believes that this requirement will ensure that there is adequate liquidity in the Restructure Security, issued pursuant to a public offering or rights distribution, to qualify for options trading.

In addition to satisfying the Volume and Price Tests, a Restructure Security must also meet certain distribution requirements before an exchange can deem such security to be options eligible. Specifically, the Restructure Security must have 2,000 holders, and 7 million shares must be owned by persons not required to report their stock holdings under Section 16(a) of the Act to be options eligible. The proposal provides that an exchange may make certain limited assumptions to determine the Public Ownership and Holder Requirements. First, if a Restructure Security is to be listed on an exchange or in an automatic quotation system that has, and applies to the Restructure Security, an initial listing requirement that the issuer have no less than 2,000 holders, the Commission believes that it is reasonable for an exchange to assume that its comparable option listing requirement will be satisfied. Second, if a Restructure Security is to be listed on an exchange or in an automatic quotation system that has, and applies to the Restructure Security, an initial listing requirement of no less than public ownership of 7 million shares, the Commission believes that it is reasonable for an exchange to assume that its comparable option listing requirement will be satisfied.

The Commission notes that currently no exchange or automatic quotation system has a public ownership initial stock listing standard that is as stringent as those required under the options eligibility requirements. Moreover, a stock exchange may now be able to list stocks pursuant to alternate listing standards. For example, the Commission has recently approved alternate listing standards for companies listed on the New York Stock Exchange ("NYSE"), including, among other things, the distribution of shares.[26] Under these alternate listing standards, the NYSE is currently allowed to list certain companies with 500 shareholders that meet heightened requirements in other areas in lieu of its 2,200 total shareholder requirements. Therefore, the Exchanges should be careful to precisely determine which listing standards are being applied to the listing of the Restructure Security prior to making a determination as to whether the Restructure Security meets the corresponding options listing criteria.

Additionally, current options listing criteria for securities issued pursuant to restructuring transactions provide that if at least 40 million shares of a Restructure Security will be issued and outstanding in a restructuring transaction, an exchange may assume that the Restructure Security will satisfy both the public ownership of shares and holder requirements. The Commission believes this is appropriate because it appears unlikely that a Restructure Security with at least 40 million issued and outstanding shares, will have fewer than 2,000 holders or less than 7 million shares owned by persons not required to report their stock holdings under Section 16(a) of the Act.

The Commission believes that concerns associated with the ability of an exchange to make important listing decisions based on assumptions rather than confirmed facts are alleviated by the crucial provision that an exchange shall not rely on the above assumptions if, after a reasonable investigation, it determines that either the public ownership of shares or the holder requirement, in fact, will not be satisfied on the intended date for listing the option. At the very least, an exchange

---

[18] This requires that the Restructure Security must have actually been issued and traded for at least 5 consecutive trading days before it can be selected for options trading.

[19] *See* CBOE Amendment No. 1, *supra* note 4; *see also* Amex Amendment No. 1, and Phlx Amendment No. 1, *supra* note 5.

[20] *See* CBOE Amendment No. 1, *supra* note 4; *see also* Amex Amendment No. 1, and Phlx Amendment No. 1, *supra* note 5.

[21] 15 U.S.C. 78f(b)(5).

[22] *See supra* Section II.

[23] Although the proposals do not specifically address it, the Commission understands that the application of the proposals is limited solely to those instances where options are listed on the Original Security.

[24] The Commission notes that the comparative asset values and revenues, when used to determine whether the above-mentioned conditions are satisfied, shall be derived "from the later of the most recent annual or most recently available comparable interim *(not less than three months)* financial statements." This provision means that the interim financial statements must cover a period of not less than three months.

[25] *See* Restructuring Transactions Approval Orders, *supra* note 12.

[26] *See* Paragraph 102.01 of the NYSE's Listed Company Manual. *See also* Securities Exchange Act Release No. 35571 (April 5, 1995), 60 FR 18649 (April 12, 1995) (order approving proposed rule change relating to domestic listing standards).

should investigate the basis for its assumptions regarding the public ownership of shares and number of shareholders just prior to selecting the option and just prior to trading the option, utilizing a worst case analysis in making its assumptions that the Restructure Security will meet these listing standards.

In addition, other exchanges will continue to have the opportunity to challenge the certification by demonstrating that the Restructure Security will not meet the initial listing criteria with respect to public ownership and holders. The Commission believes that this provision provides an important check and should help to ensure that no unqualified securities are listed for options trading.

The Commission also believes that it is appropriate for an exchange to apply the "lookback" provision, to determine if a Restructure Security will satisfy the Maintenance Price Test. The Commission believes that it is appropriate to use the market price history of the Original Security, as well as any "when issued" trading in the Restructure Security for such calculations, provided that they are only used for determining price history for the period prior to commencement of trading in the Restructure Security.

The Commission notes that because the Maintenance Price Test is calculated on a rolling forward basis, "when issued" trading history for the Restructure Security or trading history for the Original Security prior to the ex-date may be used for maintenance calculations for no more than six months after the ex-date for the Restructure Security. For example, in order to satisfy the Maintenance Price Test for a Restructure Security on April 1, 1996, with an ex-date of February 1, 1996, an exchange may elect to base its determination on the trading price of the Original Security from October 1, 1995 through January 15, 1996, the trading price in the when-issued market for the Restructure Security from January 16, 1996 through January 31, 1996, but must use the "regular way" trading price in the Restructure Security from February 1, 1996 through April 1, 1996.

The Commission believes that it is appropriate not to rely on the trading volume of the Original Security in satisfying the Maintenance Volume Test, because the trading volume of the Restructure Security must solely satisfy the initial listing requirements for trading volume before it is eligible for options trading.

The Commission finds good cause for approving the proposed rule change by the PSE and the NYSE prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Specifically, the Commission notes that the PSE's and NYSE's proposed rule changes are substantively similar to those proposed by the CBOE, Amex, and Phlx. The PSE and NYSE rule change proposals raises no issues that are not raised by the other exchanges. Additionally, the Commission notes that the CBOE, Amex, and Phlx proposals were subject to a full notice and comment period, and no comments were received. Accordingly, the Commission believes that it is consistent with Section 6(b)(5) of the Act to approve PSE's and NYSE's proposed rule changes on an accelerated basis.

The Commission also finds good cause for approving CBOE Amendment Nos. 1 and 2, Amex Amendment No. 1, and Phlx Amendment No. 1, all comprising the same substantive changes to their respective proposals, prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Specifically, the amendments clarify the initial market price requirements,[27] and the maintenance trading volume requirements[28] for shares of a Restructure Security issued pursuant to a public offering or rights distribution. Because the amendments accurately reflect the intent of the rule as originally proposed, and merely provide clarifying language, the Commission does not believe that the amendments raise any new or unique regulatory issues. Accordingly, the Commission believes that it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve the foregoing amendments to CBOE's, Amex's, and Phlx's proposed rule changes on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning the PSE and NYSE proposals; CBOE Amendment Nos. 1 and 2; Amex Amendment No. 1; and Phlx Amendment No. 1. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal offices of the Exchanges. All submissions should refer to SR–CBOE–95–58; SR–Amex–95–47; SR–Phlx–95–90; SR–PSE–96–05; and SR–NYSE–96–03 and should be submitted by April 19, 1996.

[27] *See supra* note 19 and accompanying text.

[28] *See supra* note 20 and accompanying text.

V. Conclusion

Based on the above findings, the Commission believes the proposals are consistent with Section 6(b)(5) of the Act by facilitating transactions in securities while at the same time ensuring continued protection of investors. The new accelerated listing procedures only apply where a public offering or rights distribution is solely related to a restructuring of the Original Security, and the Original Security is already subject to options trading. This fact, along with the other strict conditions of the rule should help to identify for accelerated options eligibility only those Restructure Securities that will have adequate depth and liquidity to support options trading. At the same time it will provide investors with a better opportunity to hedge their positions in both the Original and the Restructure Security.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[29] that the proposed rule changes (SR–CBOE–95–58; SR–Amex–95–47; Phlx–95–90; SR–PSE–96–05; and SR–NYSE–96–03), as amended, are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[30]

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Order Approving Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to the Mutual Fund Quotation Service

March 22, 1996.

On February 5, 1996, the National Association of Securities Dealers, Inc. ("SEC" or "Commission") the proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder.[2] The proposed rule change revises the fee structure for the Mutual Fund Quotation Service ("MFQS" or "Service") and updates the name of the Service in the NASD Rules. Notice of the propose the rule change, together with the substance of the proposal, was issued by Commission release (Securities Exchange Act Release No. 36840, February 13, 1996) and by publication in the **Federal Register** (61 FR 6674, February 21, 1996). No comment letters were received. The Commission is approving the proposed rule change.

I. Background

The purpose of the proposed rule change is to revise the fee structure for the Service to account for significant enhancements and to reflect more accurately the value of the Service in today's market. The Service facilitates the public dissemination of daily price information for mutual funds and money market funds through the broadcast media and the newspapers. After the market close each day, mutual fund companies or their agents calculate the net asset value ("NAV"), and in some cases the dividend, capital gain, and other pertinent information for each fund. This information is submitted to the NASD by computer, which in turn disseminates it out to the media in a static batch transmission at approximately 5:40 p.m. Depending on the size and number of shareholders, funds may quality for inclusion in either the News Media List or the Supplemental List.

II. The terms of Substance of the Proposed Rule Change

The proposed rule change amends Part VIII and Part XIV of Schedule D to the NASD B-Laws.[3] Under the proposed rule change, new mutual funds will be assessed a one-time application processing fee of $250 per fund. In addition, the fee to include a fund in the News Media List will increase from $150 to $275 per year. The fee to include a fund in the Supplemental List will increase from $100 to $200 per year.

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4.

[3] Pursuant to a new rule numbering system for the NASD Manual anticipated to be effective no later than May 1, 1996, the rules that are the subject of this proposed rule change will become Rule 7090 (regarding fee structure), and Rule 6800 (regarding description of the Service). See Exchange Act Release No. 36698 (January 11, 1996), 61 FR 1419 (January 19, 1996) (order approving new rule numbering system).

III. Discussion

The Commission believes that the proposed rule change is consistent with the provisions of Section 15A(b)(5) of the Act, which requires that the rules of a national securities association provide for the equitable allocation of reasonable dues, fees, and other charges among members and issues and other persons using any facility or system which the association operates or controls. The current fees have remained unchanged over a ten year period since inception of the Service, although the number of funds and shareholder accounts have increased more than three-fold. In addition, the one-time application fee for new funds is intended to defray the costs incurred in processing applications.

The fee increases are necessary to provide benefits to mutual funds, their agents, and the media. Several enhancements to the Service, including the establishment of a system of rolling dissemination of prices, will improve the distribution to the media of price information in a timely fashion. Rolling dissemination of prices will allow mutual funds and their agents to enter real-time updates throughout the day which will decrease rushed end-of-day transmissions of price information. The media will have more time to prepare its daily fund tables for inclusion in newspapers because the media will be receiving fund NAVs when they are available. Furthermore, the public that has increased its reliance on daily price information will benefit from real-time updates of price information which reduce the risk that the media will not receive any price information for publication. If a transmission problem occurs between 4:00 p.m. and 5:40 p.m., the media already will have received some fund information for publication, instead of relying on a single batch transmission at 5:40 p.m., as in the case today.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change SR–NASD–96–05 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

[Release No. 34–37015; File No. SR–NYSE–96–02]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment No. 1 Relating to Voting of Proxies by Member Firms for Holders of Auction Rate Preferred Securities

March 22, 1996.

I. Introduction

On February 1, 1996, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change that would allow the Exchange's member firms, under certain conditions, to vote the shares of auction rate preferred securities[3] that they hold on behalf of their customers, notwithstanding the failure of the beneficial holders to provide instructions regarding the voting of such shares.

The proposed rule change was published for comment in Securities Exchange Act Release No. 36813 (February 6, 1996), 61 FR 5592 (February 13, 1996). One comment letter was received on the proposal.[4] The NYSE filed Amendment No. 1 with the Commission on March 18, 1996.[5] This order approves the proposal, including Amendment No. 1 on an accelerated basis.

II. Description

Auction rate preferred securities are preferred securities with dividend rates that are established periodically by auction or remarketing at specified reset periods. At the auction date, which typically runs every seven days but in some instances can be one to five years, the investors receive their entire investment along with accrued dividends, and may, if they so chose, participate in the repurchase of shares at

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The proposed rule change defines an auction rate preferred security as a preferred security pursuant to which the dividend rate is established periodically by auction or remarketing at specified reset periods.

[4] See Letter from Dorothy M. Donohue, Assistant Counsel, Investment Company Institute, to Jonathan G. Katz, Secretary, SEC, dated March 5, 1996.

[5] Amendment No. 1 made clarifying changes to the text of the rule proposal. See Letter dated March 13, 1996, from James E. Buck, Senior Vice President and Secretary, NYSE, to Glen Barrentine, Team Leader, SEC.

the new dividend rate for the ensuing rate period.

Because of the short-term nature of these securities, auction rate preferred shareholders generally have little economic interest in the performance of the issuer and its governance structure. As a result, the Exchange has represented that corporate issuers of these securities often find it difficult to obtain a quorum of auction rate preferred shareholders when such a requirement exists. Such failure blocks the approval of matters that require such a quorum.

The proposed rule change would allow member firms to vote the shares of auction rate preferred securities with auction reset periods of less than one year, on non-routine items,[6] in proportion to those votes cast by beneficial holders of each class of such securities (or of each series where an item must be voted upon separately by each series), as long as:

(i) The issuer has transmitted proxy soliciting material to the beneficial owner or its designee;[7]

(ii) It has not received voting instructions from the beneficial owner or its designee within the time period specified in the proxy material;

(iii) At least 30% of the outstanding shares of the same class or series (where a series vote is required) has been voted by preferred security holders;

(iv) Less than 10% of the outstanding shares of the same class or series (where a series vote is required) has been voted by preferred security holders against the proposal;[8]

(v) For any proposal as to which both the common and the preferred holders vote as a single class, proportional voting would not be allowed unless common shareholders have also approved the item;

(vi) A majority of the independent directors of the issuer's board of directors have approved the item; and

(vii) Adequate disclosure of proportional voting has been provided.

The proposed rule change will insert a new Rule 452.12 into the Exchange's Rules of the Board of Governors as well as an identical Paragraph 402.08(C) into the Exchange's Listed Company Manual.[9]

III. Summary of Comments

The Commission received one comment letter from the Investment Company Institute (the "Comment Letter").[10] The Comment Letter supported the proposed amendment and urged the Commission to approve it promptly. It did note its belief, however, that the term "issue," as used in conditions (3) and (4) of the proposed rule, was ambiguous.[11] The Comment Letter stated its understanding that the term "issue" was intended to refer to all of the outstanding preferred shares of an issuer rather than the separate series of the issuer's preferred shares and recommended that it be defined in the proposed rules in such manner or that such understanding be reflected in the Commission's release adopting the proposed amendment.

In response, the NYSE submitted Amendment No. 1 amending conditions (3) and (4) of the proposed rules. These provisions set forth conditions that must be satisfied before a member organization may vote auction rate preferred securities. As proposed to be amended by Amendment No. 1, these provisions would prohibit a member firm from voting the shares of auction rate preferred securities that it held on behalf of its customers unless at lest 30% of the outstanding shares of each class or each series, where a series vote is required, vote and less than 10% of each such class or series vote against the proposal.

IV. Discussion

After careful consideration, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public.

The Commission has reviewed carefully the Exchange's proposal to amend its rules to allow member firms, under very limited conditions, to vote on non-routine matters the auction rate preferred securities that they hold on behalf of their customers, notwithstanding the failure of the beneficial holders to provide instructions regarding the voting of such shares. The Commission believes that such proposal adequately addresses the particular needs of issuers of such securities to be able to obtain a quorum of preferred shareholders, while, at the same time, protecting the rights of the holders of such shares.

Under the Exchange's proposal, member firms would be allowed to vote auction rate preferred securities that are held on behalf of their customers in proportion to the voting instructions received from holders of the same class (or of the same series where the item must be voted upon separately by each series) only under very limited circumstances. These circumstances would include a condition that the securities must have reset periods of one year or less, which serves to limit this provision to those securities that, because of their short-term nature, leave shareholders with little economic interest in the performance of the issuer. Further, the issuer must have transmitted proxy those securities that, because of their short-term nature, leave shareholders with little economic interest in the performance of the issuer. Further, the issuer must have transmitted proxy soliciting material to the beneficial owner or its designee in accordance with NYSE Rule 451. This condition ensures that beneficial holders will continue to have the choice of voting their shares if they so desire and the information necessary to allow them to make an informed voting decision.[13] The shareholder also must receive adequate disclosure of the member firm's ability to vote such shares in the absence of the beneficial holder exercising such right.

Moreover, under the proposal a member firm's right to vote such shares would be limited to proposals that have received the vote of at least 30% of the outstanding shares of each class or series (where a series vote is required) of the auction rate preferred shares. This will ensure that the member firm's proportional vote mirrors the vote of a significant portion of the total outstanding auction rate preferred shares. In addition, the member firm would be prohibited from voting where 10% or more of the outstanding shares of the same class or series (where a series vote is required) voted against the proposal and, in the case of a proposal that requires both the common and the preferred holders to vote as a single class, where the proposal does not receive the separate approval of the common shareholders.[14] These provisions effectively limit the member firm's proportional vote to matters that are strongly supported by those auction rate preferred holders who do vote and, where necessary, approved by the common shareholders. Finally, to further ensure fairness, the member firm may only vote on matters that have been approved by a majority of an issuer's independent directors.

The Commission believes that these conditions protect the rights of the holders of auction rate preferred securities by sufficiently limiting the right of member firms to vote, on non-routine items, the shares of such securities that they hold on behalf of their customers. At the same time, the Exchange's proposal should meet its objective of assisting issuers in obtaining approval of matters that are overwhelmingly supported by auction rate preferred shareholders who do vote.

Moreover, the Commission believes that the amended language adopted by the Exchange with regard to subsections (iii) and (iv) of the proposed rule change is preferable to the alternative offered in the Comment Letter. The Exchange's approach, which applies the 30% and 10% thresholds to the same class or series (where a series vote is required) instead of to all of the outstanding preferred shares, offers greater protection to the voting interests of holders of each class or series, as applicable.

The Commission finds good cause for approving Amendment No. 1 prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**. Amendment No. 1 made clarifying, technical changes to the text of the rule, and did not propose new substantive provisions to the proposed rule change. Accordingly, the Commission believes that consistent with Section 19(b)(2), good cause exists to accelerate approval of Amendment No. 1.

V. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rules change that are filed with the Commission, and all written communications relating to Amendment No. 1 between the Commission and any persons, other than those that may be withheld from the public in for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available at the principal office of the NYSE. All submissions should refer to File No. SR–NYSE–96–02 and should be submitted by April 19, 1996.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[15] that the proposed rule change (SR–NYSE–96–02), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[16]

Jonathan G. Katz,

Secretary.

[FR Doc. 96–7643 Filed 3–29–96; 8:45 am]

BILLING CODE 8010–01–M

[6] Voting by member firms on routine items is governed by NYSE Rule 452.10, which allows member firms to vote without customer instructions on routine items, provided that the member has transmitted proxy soliciting material to the beneficial owner in accordance with NYSE Rule 451 and the member has not received voting instructions from the beneficial owner by the date specified in the statement accompanying such material.

[7] The transmittal of proxy soliciting material to the beneficial owner must be undertaken in accordance with NYSE Rule 451.

[8] Because the 10% threshold is based upon the outstanding shares of a class or series rather than the shares actually voted, the proportion of negative votes among the shares actually voted is likely to be significantly higher than the 10% threshold. For example, where only 30% of the outstanding shares of a class vote, a negative vote of at least 33% of the shares of such class that actually vote would be necessary to exceed the 10% threshold. However, even a situation where the proportion of negative votes approached the 10% threshold, the measure will have been approved by a substantial majority of the outstanding shares voting.

[9] The proposed rule change also renumbers existing Exchange Rules 452.12 through 452.16 without change to Rules 452.13 through 452.17 and Listed Company Manual Paragraphs 402.08 (C) through (G) without change to 402.08 (D) through (H).

[10] *See* letter from Dorothy M. Donohue, Assistant Counsel, Investment Company Institute, to Jonathan G. Katz, Secretary, SEC, dated March 5, 1996 ("Comment Letter").

[11] These provisions set forth conditions that must be satisfied before a member organization may vote auction rate preferred securities and, as originally proposed, required that at least 30% of the outstanding issue be voted by beneficial holders and that less than 10% of the issue voted against the proposal.

[13] Of course, where the beneficial shareholder actually does vote his or her shares, the proposed rules would prohibit the member firm from proportionally voting such shares.

[14] As to any proposal that requires the common and preferred holders to vote as a single class, the above provisions, if read in combination, could be understood as conditioning the member firm's right to vote on the requirement that less than 10% of the outstanding shares of such combined class not vote against the proposal. The Exchange has informed the Commission, however, that it would interpret the 10% threshold as applying only to the outstanding preferred shares such that a member would not be prohibited from voting if 10% or more of the outstanding shares of a combined class of common and preferred voted against the proposal so long as less than 10% of the preferred shares did not vote against the proposal. The Exchange has further represented that it intends to notify its members of this interpretation though an Interpretation Memo. Telephone conversation between John Longobardi, Managing Director, NYSE, and Glen Barrentine, SEC, dated March 21, 1996.

[16] 17 CFR 200.30–3(a)(12).

[Release No. 34–37016; International Series Release No. 956; File No. SR–NYSE–96–04]

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change by the New York Stock Exchange, Inc. Relating to an Amendment of NYSE

March 22, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on March 11, 1996, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the NYSE. The Commission is approving the proposal on an accelerated basis, in addition to publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of an amendment to NYSE Rule 104 to facilitate trading in Investment Company Units ("Units"),[2] including CountryBaskets.[3]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specificed in Item IV below. The self-regualtory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Exchange proposes to amend its Rule 104 to facilitate specialist market

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] NYSE Listed Company Manual Section 703.16 defines a Unit as a security that represents an interest in a registered investment company that could be organized as a unit investment trust, an open-end management investment company, or a similar entity.

[3] "CountryBasket," "CountryBaskets" and "CB" are trademarks of Deutsche Bank Securities Corporation).

making in Units, including CountryBaskets. Trading in CountryBaskets is expected to begin on March 25, 1996.[4]

Currently, Rule 104 requires that specialists obtain the approval of an Exchange Floor Official when effecting a destabilizing transaction on a direct plus or direct minus tick. The Exchange proposes to amend Rule 104 by adding new Supplementary Material .10(7) to provide that the requirement to obtain Floor Official approval for transactions on a direct plus tick or a direct minus tick for a specialist's own account contained in Rule 104 Supplementary Material .10(5)(i)(A), (B), (C) and (6)(i)(A) will not apply to transactions that are effected for the purpose of bringing the price of a Unit into parity with the value of the portfolio on which it is based, or the net asset value of the Unit.

Direct destabilizing transactions that are leading, rather than following, the underlying component portfolio would continue to require Floor Official approval. Specialists would remain subject to all other requirements of Rule 104 with respect to their affirmative and negative obligations to maintain a fair and orderly market.

The Exchange believes that its proposal is consistent with the Act in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The NYSE has requested that the proposed rule change be given accelerated effectiveness pursuant to Section 19(b)(2) of the Act because trading in CountryBaskets is expected to begin on March 25, 1996. The Exchange believes that approval of the proposal should enhance the ability of specialists to make markets in such securities.

(B) Self-Regulatory Organization's Statement on Burdeon on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[4] CountryBasket securities represent an interest in a registered investment company that will hold securities that are component stocks of nine different indices. The nine CountryBaskets are Australia, France, Germany, Hong Kong, Italy, Japan, South Africa, the United Kingdom and the United States.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments on the proposed rule change were neither solicited or received.

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5)[5] that the rules of an exchange be designed to promote just and equitable principles of trade, prevent fraudulent and manipulative acts, and, in general, protect investors and the public interest.

The Commission believes that the Exchange's proposal to add Supplemental Material .10(7) to its Rule 104 to facilitate specialist market making in Units, including CountryBaskets, is consistent with the Act. The Exchange's proposal is limited to "parity" transactions on direct destabilizing ticks to bring Units, including CountryBaskets, into line with the value of their corresponding underlying component portfolio. Moreover, the only change being effected by the proposals is that such transactions would not require the Floor Official approval currently mandated by Rule 104. As discussed below, such transactions must still comply with all of the other requirements of NYSE Rule 104.

The Commission believes that it is appropriate to allow such transactions without Floor Official approval, given that the derivatives nature of Units in effect renders them equity securities that have a pricing and trading relationship linked to the portfolio upon which they are based. Hence, upon change in the underlying portfolio, a Units specialist may determine that it needs to engage in a "parity" transactions to bring Units into line with the value of the corresponding underlying portfolio. The requirement to secure Floor Official approval could delay the specialist from effecting such transactions, during which time the value of the portfolio could continue to move. The Commission believes, therefore, that it is reasonable for the Exchange to remove the need for Floor Official approval to address this situation. Direct destabilizing transactions that are leading, rather than following,the underlying portfolio would continue to require Floor Official approval.

The Commission notes that the Exchange's proposal does not relieve Units specialists from the general requirement of NYSE Rule 104 that they effect transactions that are reasonably necessary for them to maintain a fair and orderly market in Units. Units specialists also will remain subject to the specific obligations imp;imposed on them by rule 104. Thus, consistent wit the maintenance of a fair and orderly market, transactions for a specialists own account should be such that they maintain rice continuity with reasonable depth,and minimize the effects of temporary disparities between supply and demand.[6] Similarly, a specialist's quotation made for transactions on his own account should bear a proper relation to preceding transactions and anticipated succeeding transactions.[7] Finally, Unit specialist transactions will be subject to the Exchange's rules governing the auction market principles of priority. Parity, and precedence of orders.[8]

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**. As discussed above, the Exchange's proposal is narrowly circumscribed to address certain situations that may arise in connection with specialist market making in Units, specifically CountryBaskets. Moreover, accelerated approval will allow specialists to avail themselves of the proposed provision from the inception of trading, expected to be March 25, 1996. Accordingly, the Commission believes that it is consistent with Section 6(b)(5) and 19(b)(2) of the Act to approve the proposed rule change on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR–NYSE–96–04 and should be submitted by April 19, 1996.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change Relating to the Bid Test Exemption

March 21, 1996.

I. Introduction

On January 2, 1996, the Philadelphia Stock Exchange, Inc. "Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposal to extend its market maker bid test exemption. The proposed rule change was published for comment in the **Federal Register** on February 7, 1996.[3] On March 20, 1996, the Phlx filed Amendment No. 1 to its proposal.[4] No comments were received on the proposed rule change. This order approves the proposal.

II. Description of the Proposal

The Phlx proposes to amend its Rule 1072, Reporting Requirements Applicable to Short Sales in NASD/NM Securities, which establishes specific criteria exempting Phlx specialists and Registered Option Traders ("ROTs") from the National Association of Securities Dealers, Inc. ("NASD") "bid test" applicable to Nasdaq National Market ("NM") securities.[5] Specifically, the Phlx proposes to extend its market maker exemption to: (1) permit a ROT to facilitate an off-floor options or combination order hedged contemporaneously with a short sale in a designated NM security, with prior Floor Official approval and the filing of a written report; and (2) allow the exemption to apply to a company that is involved in a publicly announced merger or acquisition ("M&A") with an NM security. The Exchange has represented that its proposed exemptions are similar to rule provisions of other options exchanges.[6]

In 1994, the NASD adopted a bid test rule applicable to NM securities traded through Nasdaq prohibiting short sales of NM securities at or below the current inside bid when that bid is below the previous inside bid.[7] An exemption from this rule exists for option market makers hedging positions with the underlying securites of that option; qualifying short sales are referred to as "exempt hedge transactions." Pursuant to this market maker exemption, the Phlx adopted Rule 1072 establishing specific criteria for a short sale to qualify as an "exempt hedge transaction" in "designated" NM issues.[8] Generally, option specialists may designate as exempt short sales in NM securites underlying their specialist equity options, and index options if at least 10% of the value of the index is comprised of NM securites. A ROT only may designate as exempt short sales in NM securites underlying no more than 20 of the options or index options to which the ROT has been assignod.

Facilitating Orders

Proposed Phlx Rule 1072(c)(2)(ii)(A) would permit a ROT to facilitate an off-floor options order and contemporaneously hedge the resulting option position with a short sale in applicable NM securites as if such securities were designated securities pursuant to the Rule.[9] To ensure that the transaction qualifies for the proposed provision, a ROT must file a written report with the Market Surveillance Department of the Exchange, indicating Floor Official approval. Such ROT also must retain a copy of the report to demonstrate that the transaction was bid test exempt.

M&A Transactions

Proposed Phlx Rule 1072(c)(2)(ii)(B) would extend the bid test exemption to include a short sale in an M&A security effected by a qualified Exchange options market maker to hedge, and which in fact serves to hedge, an existing or prospective position in an Exchange-listed option overlying a designated NM security of another company that is a party to the M&A.[10] The M&A exemption only would be available to securities involved in an M&A that is publicly announced.

As applied to the Phlx specialist, the proposed exemption would apply to short sales of a company that is party to an M&A with a company whose NM security underlies a specialty stock option (or qualified index option). As applied to a Phlx ROT, the exemption would extend to a company that is party to an M&A with a company whose NM security underlies an option designated by such ROT.

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the

[8] Securities Exchange Act Release No. 34032 (September 2, 1994), 59 FR 46999. In general, an "exempt hedge transaction" is a short sale in an NM security that is effected to hedge, and in fact serves to hedge, an existing offsetting options position or an offsetting options position that was created in one or more transactions contemporaneous with the short sale. Phlx Rule 1072(c)(2)(i).

The other options exchanges adopted rules similar to Phlx Rule 1072. *See* CBOE Rule 15.10, NYSE Rule 759A, Amex Rule 957, and PSE Rule 4.19. Securities Exchange Act Release No. 34632.

[9] The exemption would apply to option-only orders. Thus, the exemption would not apply to combination orders that contain a stock component. Amendment No. 1, *supra* note 4.

[10] M&A securities are securities of a company that is a party or prospective party to a publicly announced merger or acquisition with an issuer of an NM security that underlies an Exchange listed option.

requirements of Section 6(b)(5)[11] that the rules of an exchange be designed to promote just and equitable principles of trade, prevent fraudulent and manipulative acts, and, in general, protect investors and the public interest. The Commission approved the NASD's short sale rule proposal on June 29, 1994,[12] and in so doing stated that the short sale rule, together with the market maker exemption, is a reasonable approach to regulating short sales of Nasdaq/NM securities. The Commission believes that the Exchange's proposal is consistent with the NASD's bid test rule and addresses the limitations established by the NASD concerning the applicability of the market maker exemption.

Proposed Phlx Rule 1072(c)(2)(ii)(A) will allow a ROT, with prior Floor Official approval, to facilitate an off-floor options order, and contemporaneously hedge the resulting options position with a short sale in an applicable Nasdaq/NM security as if such security were a designated Nasdaq/NM security. The exemption would not apply to orders that contain a stock component.[13] The ROT must file a report describing the transaction with the Exchange's Market Surveillance Department and must retain a copy of the report to demonstrate the transaction was bid test exempt. The Commission believes that this provision is consistent with the NASD's interpretation regarding hedging activities associated with the facilitation of customer transactions in options and that the procedures for reporting a transaction under the provision will ensure adequate monitoring.[14]

Proposed Phlx Rule 1072(c)(2)(ii)(B) would extend the market maker exemption to the stock of a company that is involved in a publicly announced M&A with a company whose stock is a designated Nasdaq/NM security. The Commission believes that when a designated Nasdaq/NM security becomes involved in an M&A, options specialists and ROTs may need to hedge positions in options overlying the designated Nasdaq/NM security by buying or selling the securities of the other company involved in the M&A, whether or not the other company's stock has listed overlying options. Indeed, where there are no options on the other company's stock, buying or selling that company's stock at times may be the only feasible way for an options specialist or ROT to hedge positions in options on the designated Nasdaq/NM security, given the risk arbitrage relationship that is likely to exist between the two stocks. Therefore, the Commission believes that by allowing options specialists and ROTs to sell short, for hedging purposes, shares of a company that is involved in an M&A with a company whose stock is a designated Nasdaq/NM security, and to designate such sales as bid test exempt, the Exchange's proposal will enhance the ability of its specialists and ROTs to perform their functions, thereby contributing to the liquidity of the market for options, as well as to the liquidity of the market for the stocks of both companies.

The Commission notes that the proposed extension of the market maker exemption from the short sale rule is limited to publicly announced M&As. Moreover, options specialists and ROTs may avail themselves of the M&A extension to the exemption only when the short sales are made to hedge existing or prospective positions in options on a security of another company involved in the M&A, the options positions are or will be in a class of options for which the options specialist or ROT is registered, and the short sales are or will be "exempt hedge transactions" as defined in the Exchange's rules.

The Commission finds good cause for approving Amendment No. 1 prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 1 clarifies that the Exchange's proposed exemption for facilitating off-floor options orders does not extend to orders with a stock component. The Commission believes that this change does not raise new or unique regulatory issues, as it is consistent with a similar provision previously approved by the Commission.[15] Therefore, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act[16] to approve Amendment No. 1 to the proposal on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–Phlx–95–69 and should be submitted by April 19, 1996.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[17] that the proposed rule change (SR–Phx–95–69), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[18]

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to the Bid Test Exemption

March 21, 1996.

I. Introduction

On January 2, 1996, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposal to extend its market maker bid test exemption. The proposed rule change was published for comment in the **Federal Register** on February 7, 1996.[3] No comments were received on the proposed rule change. This order approves the proposal.

II. Description of the Proposal

The Phlx proposes to amend its Rule 1072, Reporting Requirements Applicable to Short Sales in NASD/NM Securities, to permit affiliated Registered Option Traders ("ROTs") to trade for each other's accounts pursuant to the market maker exemption contained therein. Rule 1072 establishes specific criteria exempting Phlx specialists and ROTs from the National Association of Securities Dealers, Inc.'s ("NASD") "bid test" applicable to Nasdaq/National Market ("NM") securities.[4]

In 1994, the NASD adopted a bid test rule applicable to NM securities traded through Nasdaq prohibiting short sales of NM securities at or below the current inside bid when that bid is below the previous inside bid.[5] An exemption from this rule exists for option market makers hedging positions with the underlying securities of that option; qualifying short sales are referred to as "exempt hedge transactions." Pursuant to this market maker exemption, the Phlx adopted Rule 1072 establishing specific criteria for a short sale to qualify as an "exempt hedge transaction" in "designated" NM issues.[6] Generally, option specialists may designate as exempt short sales in NM securities underlying their specialist equity options, and index options if at least 10% of the value of the index is comprised of NM securities. A ROT only may designate as exempt short sales in NM securities underlying no more than 20 of the options or index options to which the ROT has been assigned.

Proposed Phlx Rule 1072(c)(2)(iii)(A) would allow a ROT to effect bid test exempt short sales in a Nasdaq/NM security which that ROT has not designated as qualifying for the exemption, provided that the security is a designated Nasdaq/NM security of another ROT of the same member organization, and further provided that such other ROT is not also present or represented by a Floor Broker in the same trading crowd at the time of the bid test exempt sale. The Exchange notes that this amendment is similar to a CBOE provision that permits nominees of a market maker organization to qualify for the exemption.[7]

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5)[8] that the rules of an exchange be designed to promote just and equitable principles of trade, prevent fraudulent and manipulative acts, and, in general, protect investors and the public interest. The Commission approved the NASD's short sale rule on June 29, 1994,[9] and in so doing stated that the short sale rule, together with the market maker exemption, is a reasonable approach to regulating short sales of Nasdaq/NM securities. The Commission believes that the Exchange's proposal is consistent with the NASD's bid test rule and addresses the limitations established by the NASD concerning the applicability of the market maker exemption.

Proposed Phlx Rule 1072(c)(2)(iii)(A) will give a member organization more flexibility to manage its market making obligations by allowing a ROT of such organization to effect short sales of securities as bid test exempt even though the ROT has not designated such securities as bid test exemption eligible, Provided that the securities have been designated bid test exempt eligible by another nominee of the same member organization, and further provided that the bid test exempt eligible ROT is not present on the trading floor. The Commission believes this is a reasonable provision designed to address instances where a ROT is absent from the trading floor due to illness, or personal or other business. The Commission further believes that this provision is consistent with the intent of the market maker exemption to the short sale rule, in that the exemption continues to be limited to those Nasdaq/NM securities which are used to hedge options transactions in the primary classes in which the member organization makes markets.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[10] that the proposed rule change (SR–Phlx–95–79) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Jonathan G. Katz,

Secretary.

SOCIAL SECURITY ADMINISTRATION

Agency Information Collection Activities: Proposed Collection Request

Normally on Fridays, the Social Security Administration publishes a list of information collection packages that will require submission to the Office of Management and Budget (OMB) for clearance in compliance with Pub. L. 104–13 effective October 1, 1995, The Paperwork Reduction Act of 1995. Since the last list was published in the **Federal Register** on March 15, 1996, the information collections listed below have been proposed or will require extension of the current OMB approvals:

(Call the SSA Reports Clearance Officer on (410) 965–4142 for a copy of the form(s) or package(s), or write to her at the address listed below the information collections)

1. Application for a Social Security Card—0960–0066. The information collected on form SS–5 is used by the Social Security Administration to assign Social Security Numbers so that individuals may obtain employment, report earnings, open bank accounts, pay taxes, apply for benefits and for other purposes. The affected public consists of individuals who apply for Social Security Numbers.

Number of Respondents: 20,000,000.

Frequency of Response: 1.

Average Burden Per Response: 8 minute.

Estimated Annual Burden: 2,666,667 hours.

2. Statement Regarding Date of Birth and Citizenship—0960–0016. The information collected on form SSA–702 is used by the Social Security Administration in conjunction with other evidence to establish a claimant's age or citizenship when better proofs are not available. The affected public consists of individuals who have

[10] 15 U.S.C. 78s(b)(2) (1988).

[11] 17 CFR 200.30-3(a)(12) (1993).

knowledge of the birth and citizenship of an applicant.

Number of Respondents: 18,000.
Frequency of Response: 1.
Average Burden Per Response: 10 minutes.
Estimated Annual Burden: 3,000.

3. Application for Mother's or Father's Insurance Benefits—0960–0003. The information collected on form SSA–5 is used by the Social Security Administration to determine an applicant's eligibility to mother's or father's insurance benefits. The affected public comprises individuals who wish to file an application for such benefits.

Number of Respondents: 180,000.
Frequency of Response: 1.
Average Burden Per Response: 15 minutes.
Estimated Annual Burden: 45,000 hours.

4. Marriage Certification—0960–0009. The information collected on form SSA–3 is needed to provide evidence of an alleged marriage. Social Security uses the information to update records of marital status of an individual. The affected public comprises persons who apply for Social Security benefits and allege a current marriage.

Number of Respondents: 20,000.
Frequency of Response: 1.
Average Burden Per Response: 5 minutes.
Estimated Annual Burden: 16,667 hours.

5. Report on Individual with Childhood Impairment—0960–0084. The information collected by SSA–1323 is used to determine the dates and results of psychometric testing and how the impairment affects the individual's progress in school. The affected public comprises public and private school officials and agencies which provide medical treatment to the applicant or claimant for benefits.

Number of Respondents: 7,000.
Average Burden Per Response: 20 minutes.
Estimated Annual Burden: 2,333.

6. Report on Individual with Mental Impairment—0960–0058. The information collected on form SSA–824 is used to determine a claimant's physical and mental status prior to making a disability determination. The affected public consists of treating physicians, medical directors, medical record libraries, and other health professionals.

Number of Respondents: 50,000.
Average Burden Per Response: 36 minutes.
Estimated Annual Burden: 30,000.

7. Claimant's Recent Medical Treatment—0960–0292. The information collected on form HA–4631 is used by the Social Security Administration to provide an updated medical history for a disability claimant who requests a hearing. The respondents are claimants for disability benefits who have requested a hearing and do not have updated medical evidence in file.

Number of Respondents: 211,006.
Frequency of Response: 1.
Average Burden Per Response: 10 minutes.
Estimated Annual Burden: 35,168.

8. Request for Review of Hearing Decision/Order—0960–0277. The information collected on form HA–520 is needed in order to afford claimants their statutory right under the Social Security Act to request review of a hearing decision. The data will be used to determine the course of action appropriate to resolve each issue. The affected public are claimants denied or dissatisfied with a decision made regarding their claim.

Number of Respondents: 87,632.
Frequency of Response: 1.
Average Burden Per Response: 10 minutes.
Estimated Annual Burden: 14,605.

9. Claimant's Work Background—0960–0300. The information collected on form HA–4633 is used by the Social Security Administration in cases in which claimants for disability benefits have requested a hearing on the decision regarding their claim. A completed form provides an updated summary of a claimant's past relevant work and helps the Administrative Law Judge to better decide whether or not the claimant is disabled. The respondents are claimants who have requested a hearing and whose relevant work background is not in file.

Number of Respondents: 200,958.
Frequency of Response: 1.
Average Burden Per Response: 15 minutes.
Estimated Annual Burden: 50,240.

10. Medical Use Report, 20 CFR 416.268–0960–0552. The information required by this regulation is used by the Social Security Administration to determine if an individual is entitled to special Supplemental Security Income (SSI) payments. The respondents are SSI recipients whose payments were stopped based on earnings.

Number of Respondents: 25,000.
Frequency of Response: 1.
Average Burden Per Response: 3 minutes.
Estimated Annual Burden: 1,250.

Written comments and recommendations regarding these information collections should be sent within 60 days from the date of this publication, directly to the SSA Reports Clearance Officer at the following address: Social Security Administration, DCFAM, Attn: Charlotte S. Whitenight, 6401 Security Blvd., 1–A–21 Operations Bldg., Baltimore, MD 21235.

In addition to your comments on the accuracy of the agency's burden estimate, we are soliciting comments on the need for the information; its practical utility; ways to enhance its quality, utility and clarity; and on ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology.

Dated: March 21, 1996.

Charlotte Whitenight,

Reports Clearance Officer, Social Security Administration.

BILLING CODE 4190–29–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Intent To Prepare Environmental Impact Statement, Ft. Lauderdale-Hollywood International Airport, Ft. Lauderdale, FL

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of Intent.

SUMMARY: The Federal Aviation Administration (FAA) is issuing this notice to advertise to the public that an Environmental Impact Statement (EIS) will be prepared and considered for the proposed extension of Runway 9R–27L to 9,000 feet and widening to 150 feet at Ft. Lauderdale-Hollywood International Airport.

FOR FURTHER INFORMATION CONTACT: Mr. Bart Vernace, Federal Aviation Administration, Orlando Airports district Office, 9677 tradeport Drive, Suite 130, Orlando, Florida 32827–5397, (407) 648–6583, extension 27.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA, in cooperation with Broward County, Florida, will prepare an Environmental Impact Statement (EIS) for a proposed project to lengthen and widen Runway 9R–27L at the Ft. Lauderdale-Hollywood International Airport (FLL) to 9,000 feet x 150 feet for air carrier aircraft use. The existing runway (5,276 feet x 100 feet) accommodates general aviation and commuter aircraft, but the Airport Master Plan (AMP) accepted on April 19, 1995, indicated that significant future airfield congestion and aircraft delay could be anticipated without some modification to the existing airfield facilities.

Extension of the existing parallel and connecting taxiways is also proposed. The proposed project would entail construction activity on airport property (i.e., site preparation, drainage, paving, marking, lighting, fencing, NAVAIDS, obstruction clearing, environmental mitigation, and other associated work required for the runway extension).

The extended runway is planned as a precision instrument runway (PIR) with a CAT I approach to both Runway 27L and Runway 9R. The runway will have approach slopes of 50:1 to Runway 27L and 50:1 to Runway 9R with a primary surface width of 1,000 feet.

The EIS will include evaluation of a no-build alternative and other reasonable alternatives that may be identified during the agency and public scoping meetings. The proposed runway extension would provide sufficient airfield capacity and flexibility at FLL to accommodate expected aircraft demand through the year 2012. The increased capacity provided by the proposed project would result in a significant decrease in average aircraft delay times from the projected no-build conditions.

Increased use of the extended runway by air carrier aircraft will result in changes in runway use. The EIS will determine any noise impacts associated with changes in runway use. In addition to noise impacts, the EIS will determine any impacts on air and water quality, wetlands, ecological resources, floodplains, historic resources, hazardous wastes, coastal zone management, socioeconomics and economic factors.

PUBLIC SCOPING: To ensure that the full range of issues related to the proposed project are addressed and that all significant issues are identified, comments and suggestions are invited from all interested parties. An agency scoping meeting and a general public scoping meeting to identify significant issues will be held on May 1, 1996, in Ft. Lauderdale, Florida.

The agency scoping meeting will be held at 10:00 a.m. at Terminal 2 Conference Room, Fort Lauderdale-Hollywood International Airport, 200 Terminal Drive, Fort Lauderdale, Florida 33315. The Public scoping meeting will be conducted between 6:00 p.m. and 8:00 p.m. at Saint Jerome Activity Center, 2601 Southwest 9th Avenue, Fort Lauderdale, Florida 33315.

Written comments may be mailed to the Informational contact listed above within 30 days following the scoping meeting.

Questions may be directed to the individual names above under the heading, **FOR FURTHER INFORMATION CONTACT:**

Issued in Orlando, Florida, March 22, 1996.

Charles E. Blair, Manager,

Orlando Airports District Office.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of the FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before April 18, 1996.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–200), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, D.C. 20591.

Comments may also be sent electronically to the following internet address: nprmcmts@mail.hq.faa.gov.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–200), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, D.C. 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Mr. D. Michael Smith, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–7470.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Petitions for Exemption

Docket No.: 28439.
Petitioner: USA Jet Airlines, Inc.
Sections of the FAR Affected: 14 CFR 121.139(a)
Description of Relief Sought: To permit USA Jet Airlines, Inc., (USA Jet) to carry facsimile machines abroad its aircraft in lieu of appropriate parts of its maintenance manual. These facsimile machines would enable USA Jet employees to receive aircraft maintenance technical data via facsimile from Maintenance Control, which is located at the air carrier's main base, when the aircraft is away from that base.

Docket No.: 28485.
Petitioner: Polar Air Cargo.
Sections of the FAR Affected: 14 CFR 121.583(a)(8).
Description of Relief Sought: To permit Polar Cargo to transport employee dependents to any destination without complying with certain passenger-carrying requirements of part 121, without the dependent being accompanied by an employee, and without regard as to whether the employee is traveling on company business.

Dispositions of Petitions

Docket No.: 127CE.
Petitioner: Beech Aircraft Corporation.
Sections of the FAR Affected: 14 CFR 23.807(d)(1)(i).
Description of Relief Sought/Disposition: To permit type certification of the Beech Model B300 and B300C airplanes with one emergency exit in the cabin opposite the main entrance door, which will not comply with § 23.807(d)(1)(i). The Beech Model B300 and B300C are twin turbopropeller engine, fifteen passenger airplanes, certificated in the commuter category. *GRANT, March 5, 1996, Exemption No. 6405.*

Docket No.: 13199.
Petitioner: American Airlines.
Sections of the FAR Affected: 14 CFR 61.55(b)(2); 61.56(c)(1); 61.57 (c) and (d); 61.63 (c)(2) and (d)(2) and (3); 61.65 (c), (e)(2) and (3), and (g); 61.67(d)(2); 61.157 (d)(1) and (2) and (e)(1) and (2); 61.191(c); and appendix A, part 61.
Description of Relief Sought/Disposition: To extend Exemption No. 4652, as amended, which permits American Airlines to use FAA-approved simulators to meet certain flight

experience requirements of part 61. *GRANT, February 27, 1996, Exemption No. 4652E.*

Docket No.: 23921.
Petitioner: FlightSafety International.
Sections of the FAR Affected: 14 CFR 61.55(b)(2); 61.56(c)(1); 61.57 (c) and (d); 61.58 (c)(1) and (d); 61.63 (c)(2) and (d)(2) and (3); 61.65 (c), (e)(2) and (3), and (g); 61.67(d)(2); 61.157 (d)(1) and (2) and (e)(1) and (2); 61.191(c); and appendix A, part 61.
Description of Relief Sought/ Disposition: To extend Exemption No. 5317, as amended, which permits FlightSafety International to use FAA-approved simulators to meet certain flight experience requirements of part 61. *GRANT, February 27, 1996, Exemption No. 5317E.*

Docket No.: 25483.
Petitioner: Air Transport Association of America.
*Sections of the FAR Affected:*14 CFR part 43, 45.11 (a) and (d), and 91.417(d).
Description of Relief Sought/ Disposition: To extend Exemption No. 4902, as amended, which allows all aircraft operating under parts 121 and 127 and all aircraft operating in commuter air carrier operations (as defined in part 135 and SFAR 38–4) under an FAA-approved continuous airworthiness maintenance program, to be operated without complying with the requirements pertaining to (1) the location of aircraft identification plates and (2) the carriage of FAA Form 337 as evidence of installation approval for fuel tank installation in the passenger or baggage compartment. *GRANT, February 28, 1996, Exemption No. 4902E.*

Docket No.: 25940.
Petitioner: Air Transportation.
Sections of the FAR Affected: 14 CFR 43.3(g).
Description of Relief Sought/ Disposition: To extend and amend Exemption No. 5149, as amended, which permits Mr. Charles N. Saulisberry, as pilot and owner of Air Transportation, to remove and reinstall the passenger seats in your Cessna 182–C aircraft, which is used in operations conducted under part 135. The amendment shows the replacement of the Cessna 182–C with a Cessna 182–Q. *GRANT, February 28, 1996, Exemption No. 5149C.*

Docket No.: 28374.
Petitioner: Gulf Air Taxi, Inc.
Sections of the FAR Affected: 14 CFR 43.3(g).
Description of Relief Sought/ Disposition: To permit appropriately trained pilots employed by Gulf Air Taxi, Inc., (Gulf Air) to remove and reinstall the passenger seats in its aircraft that are type certificated for nine of fewer passenger seats and used in operations conducted by Gulf Air under part 135. *GRANT, March 1, 1996, Exemption No. 6404.*

Docket No.: 28428.
Petitioner: Mr. Nellis C. Dye.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought/ Disposition: To permit Mr. Nellis to act as a pilot in operations conducted under part 121 after reaching his 60th birthday. *DENIAL, February 27, 1996, Exemption No. 6403.*

Docket No.: 28433.
Petitioner: Premair Airlines, Inc.
Sections of the FAR Affected: 14 CFR 119.2(b).
Description of Relief Sought/ Disposition: To permit Premair Airlines, Inc., (PAI) to complete its initial certification process and be issued an air carrier certificate and operations specifications that would permit PAI to conduct its operations in accordance with part 135 rather than in accordance with part 121. *DENIAL, February 27, 1996, Exemption No. 6402.*

BILLING CODE 4910–13–M

RTCA, Inc., Special Committee 185; Aeronautical Spectrum Planning Issues

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92–463, 5 U.S.C., Appendix 2), notice is hereby given for a Special Committee 185 meeting to be held on April 16–18, starting at 9:00 a.m. The meeting will be held at RTCA, 1140 Connecticut Avenue NW., Suite 1020, Washington, DC 20036.

The agenda will be as follows: (1) Administrative Remarks; (2) Introductions; (3) Approval of the Agenda; (4) Review and Approval of the Summary of the Previous Meeting; (5) Review Draft Version 7 of SC–185 Report; (6) Develop Conclusions and Recommendations; (7) Other Business; (8) Date and Place of Next Meeting.

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1140 Connecticut Avenue, N.W., Suite 1020, Washington, DC 20036; (202) 833–9339 (phone) or (202)–833–9434 (fax). Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on March 25, 1996.

Janice L. Peters,
Designated Official.

BILLING CODE 4910–13–M

Federal Highway Administration

[FHWA Docket No. MC–96–13]

Commercial Driver's License Program; Temporary Waiver For Trekking International Overland Expedition

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of petition; request for comments.

SUMMARY: The FHWA is requesting public comment on a petition submitted by Trekking International on January 24, 1996, for relief from the requirements of the commercial driver's license (CDL) regulations (49 CFR Part 383). The FHWA is considering whether it should grant a waiver from the CDL testing and licensing standards to drivers participating in the Overland Expedition. The Overland Expedition consists of four Iveco 330.30 ANW 6x6 trucks which are being driven from Rome, Italy, to New York City, by foreign licensed employees of the Petitioner. The requested waiver would be temporary, ending with the shipment of the four vehicles to Italy on or before June 1, 1996. The FHWA requests public comment on whether, if granted, the requested waiver would be contrary to the public interest or diminish the safe operation of commercial motor vehicles.

DATES: Comments must be received on or before April 8, 1996.

ADDRESSES: All signed, written comments should refer to the docket number that appears at the top of this document and should be submitted to the Federal Highway Administration, Room 4232, Office of Chief Counsel, HCC–10, 400 Seventh Street SW., Washington, DC 20590–0001. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal holidays. Commenters who want to be notified that the FHWA received their comments should include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Redmond, Office of Motor Carrier Research and Standards, (202) 366–4001, or Mr. Raymond W. Cuprill, Office of the Chief Counsel, HCC–20, (202) 366–0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

The Commercial Driver's License (CDL) regulations, issued pursuant to the Commercial Motor Vehicle Safety Act of 1986 (Title XII, Pub. L. 99–570, 100 Stat. 3207) (49 U.S.C. 31301 *et seq.*), are found at 49 CFR Part 383 (1995). Section 383.23 of the regulations sets forth the general rule that no person shall operate a commercial motor vehicle (CMV) unless such person: (1) has taken and passed a knowledge test and, if applicable, a driving test, which meets Federal standards, and (2) possesses a CDL, which is evidence of having passed the required tests. These Federal standards ensure that drivers of a CMV: (1) have a single driver's license and a single driving record, (2) are tested for the knowledge and skills needed to drive a vehicle representative of the vehicle that they will be licensed to drive, and (3) are disqualified from driving a CMV when convicted of certain criminal or traffic violations.

The term "commercial motor vehicle" is defined to include, a motor vehicle:

(1) With a gross combination weight rating of 26,001 or more pounds inclusive of a towed unit with a gross vehicle weight rating (GVWR) of more than 10,000 pounds; or

(2) With a GVWR of 26,001 or more pounds; or

(3) Designed to transport 16 or more passengers, including the driver; or

(4) Used in the transportation of quantities of hazardous materials which require the vehicle to be placarded under the Hazardous Materials Transportation Regulations (49 CFR part 172, subpart F). 49 CFR 383.5 (1995).

CDL Waivers

Section 12012 of the Commercial Motor Vehicle Safety Act of 1985 (49 U.S.C. 31315) authorizes the Secretary of Transportation to waive any class of drivers or vehicles from any or all of the provisions of the Act or the implementing regulations if the Secretary determines that the waiver is not contrary to the public interest and does not diminish the safe operation of commercial motor vehicles. The regulatory procedures governing the issuance of waivers are found at 49 CFR 383.7 (1995).

The FHWA has granted a CDL waiver to military personnel operating military vehicles and has authorized the States to waive certain farmers, firefighters and operators of emergency equipment in implementing the CDL regulations. See 53 FR 37313, September 26, 1988. The agency also authorized the States to waive, at their option, employees of farm-related service industries (custom harvesters, retail outlets and suppliers, agri-chemical businesses, and livestock feeders) from the CDL knowledge and skill testing requirements, and issue these employees restricted CDLs for a seasonal period or periods not to exceed a total of 180 days in any 12-month period, subject to certain conditions. See 57 FR 13650, April 17, 1992. More recently, the FHWA authorized the States to, at their option, waive part-time drivers for the pyrotechnics industry from the CDL endorsement tests for hazardous materials, when the drivers are transporting less than 500 pounds of fireworks, classified as DOT Class 1.3G explosives, during the period from June 30 through July 6 of each year. See 60 FR 34188, June 30, 1995.

Petition

Trekking International of Milan, Italy, through its North American coordinator, Circumpolar Expeditions of Anchorage, Alaska, has petitioned the FHWA to grant a CDL waiver to drivers involved in the Overland Expedition. The goal of the Overland Expedition is to drive four (4) Iveco 330.30 ANW 6x6 trucks 15,000 miles from Rome, Italy, to New York City, New York, over land via the Russian Far East, the Bering Strait and Alaska, a feat never before accomplished. In addition to being the first trucks driven from Europe to North America, the Expedition will demonstrate the quality of Iveco trucks and serve to mark the 20th Anniversary of the Iveco Truck Division of the Fiat Group. The Expedition will be entering the United States shortly and will be operating the vehicles in North America through April of 1996. Once the Expedition is completed, the trucks will be shipped back to Italy. The Petitioner expects the vehicles to be shipped on or before June 1, 1996. None of these vehicles are being imported into the United States.

The Petitioner asserts that the requested waiver would be temporary and only be applicable to those foreign employees driving the four vehicles that are participating in the Expedition. These employees are professional operators of commercial motor vehicles licensed in Italy and have from 15 to 20 years of driving experience. The Petitioner has submitted a copy of the Roadway Code of Italy, Law No. 285 dated April 30, 1992, which provides the requirements applicable to these commercial operators. A copy of this law and a provided translated summary is available in the docket for examination by the public. The following Italian licensed commercial

drivers will be participating in the expedition:

Name	License No.	Issued	Classification
Gregorio Camevale	1300267	8/7/95	ABCDE.
Carlo Marocco	1291175	9/4/95	ABCDE.
Erhard Mayer	A26995	8/28/95	ABCDE.
Vicenzo Leone	1291174	9/11/95	ABCDE.
Emilio Altamore	1247556	9/4/95	ABCDE.
Francesco Miranda	1247557	9/4/95	ABCDE.

The Petitioner has agreed to comply with other applicable Federal Motor Carrier Safety Regulations (FMCSRs), including financial responsibility, vehicle marking, driver physical qualification, vehicle inspection and hours of service requirements.

Request for Public Comment and Proposed Waiver

The FHWA is requesting public comment as to whether the grant of the requested temporary waiver from the CDL requirements would be contrary to the public interest or would diminish the safe operation of CMVs. Commenters are invited to address whether the waivers should be subject to conditions, such as the following conditions being considered by the FHWA.

Waiver Conditions

(1) Drivers covered—the waiver would cover foreign drivers employed by the Petitioner, listed above, while participating in the Overland Expedition. The drivers would be required to hold a valid Italian commercial driver's license to operate the vehicles listed in condition #3.

(2) Duration—the waiver from the CDL requirements would only be valid through June 1, 1996.

(3) Vehicles—the waiver would be limited to the operation of the four vehicles participating in the Overland Expedition and identified with the following vehicle identification numbers and license plates:

a. WJMH3GMSM09015805 (plate no. A658095)
b. WJMH3GMSM09015766 (plate no. A658096)
c. WJMH3GMSM09015814 (plate no. A658097)
d. WJMH3GMSM09015669 (plate no. A658098)

(4) Compliance with FMCSRs—Drivers covered by the waiver would be required to comply with other applicable requirements of the Federal Motor Carrier Safety Regulations, including financial responsibility, vehicle marking, driver physical qualification, vehicle inspection and hours of service requirements.

Commenters are strongly encouraged to provide any facts or views pertaining to the requested waiver.

Authority: Title XII of Pub. L. 99–570, 100 Stat. 3207; 49 U.S.C. 31301 *et seq.*; 49 U.S.C. 31315; 49 CFR 1.48; 49 CFR 383.7; 23 U.S.C. 315.

Issued on: March 25, 1996.

Rodney E. Slater,

Federal Highway Administrator.

BILLING CODE 4910–22–P

National Highway Traffic Safety Administration

[Docket No. 95–20; Notice 3]

Child Safety Seats; Agreement Between General Motors and U.S. Department of Transportation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice; Request for Certifications.

SUMMARY: This notice, the third of its kind, describes an agreement between General Motors (GM) and the U.S. Department of Transportation (DOT), under which GM has agreed to donate funds to one or more qualified national organizations for the purchase and distribution of child safety seats. Organizations that wish to receive such funds are required to certify in writing that they are qualified, in accordance with criteria established in the agreement. To qualify, organizations must demonstrate that they are national in scope, and they must submit a plan showing they are prepared to purchase and distribute child safety seats within 120 days of their receipt of the funds. They must also meet other requirements. Organizations are strongly encouraged to form partnerships and work collaboratively for the purpose of applying for funds. If organizations plan to work collaboratively, they should submit a single combined certification.

This notice requests that organizations submit certifications and it describes the criteria they must meet and the information they must submit with their certifications to be eligible to receive these funds. Similar notices were published in the **Federal Register** on March 31 and June 29, 1995. As a result of the March 31 notice, six organizations were determined by NHTSA to be qualified and were selected by GM to receive a total of $2 million for the purchase and distribution of child safety seats. As a result of the June 29 notice, six organizations were determined by NHTSA to be qualified and three were selected by GM to receive a total of $2 million for the purchase and distribution of child safety seats.

As a result of today's notice, one or more organizations will be determined by NHTSA to be qualified and will be selected by GM to receive additional donations for the purchase and distribution of child safety seats under the settlement agreement. It is expected that these organizations will receive a total of $2 million.

DATES: Certifications must be received no later than June 27, 1996.

ADDRESSES: Certifications should be submitted to: Office of Occupant Protection, NTS–11, Room 5118, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Ms. Cheryl Neverman, National Organizations Division, NTS–11, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Telephone (202) 366–2683.

SUPPLEMENTARY INFORMATION:

DOT/GM Settlement Agreement

On December 2, 1994, Secretary of Transportation Federico Peña announced that DOT and GM had agreed in principle to a resolution of the investigation by the National Highway Traffic Safety Administration (NHTSA) into an alleged defect related to motor vehicle safety in certain 1970–1991 GM C/K pickup trucks. The terms of the resolution were finalized in a separate agreement that was executed between GM and DOT on March 7, 1995.

Under the terms of the agreement, GM agreed to provide funds over a period of five years to support highway safety research and programs that will prevent motor vehicle deaths and injuries.

In the area of child safety, GM agreed to donate $8,000,000 to qualified organizations for the purchase and distribution of child safety seats. The agreement provided that, of this amount, $4,000,000 will be donated during the first year after the date of the agreement (approximately $1,000,000 each quarter) and $4,000,000 will be donated over the next four years (at approximately the rate at which DOT expends funds for the development and support of child safety seat loaner and give-away programs during that period). The seats will be directed to underserved low income and special needs populations.

The agreement between GM and DOT provides:

> DOT shall identify, on an ongoing basis so as to facilitate timely GM donations, qualified organizations which DOT in its sole discretion deems appropriate to receive donations from GM for the purchase and distribution of child safety seats. GM, in its sole discretion, shall select from the list of qualified organizations provided by DOT, the organization(s) to which it will donate funds, and shall decide the exact amount of funds that each such organization will receive.

The agreement provides further that any organization that is interested in being identified as a "qualified organization" must certify to DOT in writing that it will meet a number of criteria set forth in the agreement.

NHTSA estimates that these funds will allow for the purchase and distribution of between 125,000 and 200,000 child safety seats for needy families which, in turn, will save at least 50 lives and prevent approximately 6,000 injuries.

Child Safety

There are approximately 25 million young children under the age of eight years old who need the protection of child safety seats. One-fourth of these children come from families that are below the poverty level.

As many as 3 million children in low-income families do not have access to adequate child safety seats. An additional 3 million children or more have access to child safety seats but, for a variety of reasons, are not being secured in these seats properly. Additionally, children with special transportation needs, such as children with disabilities, often require uniquely designed child safety seats that are too expensive for most families of low or average income to afford.

For these and other reasons, millions of children ride each day either unprotected or inadequately protected by child safety seats. A disproportionate number of these children are from low income or rural families or from culturally diverse populations.

To increase child safety seat usage, child safety seats must be made more readily available, particularly to underserved low income and special needs families. These families must also be motivated to use child safety seats and educated about their proper usage.

An effective child safety seat program can reach, and have a major positive impact on, large numbers of children as well as their families. To be most effective, however, the program must ensure that seats are distributed primarily to the populations most at risk, including underserved low income and special needs families. If programs do not target these populations, the seats could be provided instead to families that could otherwise afford to purchase them, with little net benefit.

Previous Notices

On March 31 and June 29, 1995, NHTSA published notices in the **Federal Register** describing the agreement between GM and DOT and requesting that organizations interested in receiving funds certify in writing that they are qualified. NHTSA received over 20 certifications in response to the March 31 notice and 8 certifications in response to the June 29 notice.

Copies of the March 31 and June 29 notices and the certifications received in response have been placed in NHTSA's Technical Reference Division (TRD), Docket Section, under Docket Number 95–20; Notices 1 and 2. Individuals that wish to order a copy of these materials may do so by calling or writing to the TRD at Room 5108, 400 Seventh St., SW, Washington, DC 20590 (telephone number 202–366–2768) and referencing this docket number(s). A fee may be charged, based on the volume of material that is requested.

The certifications that NHTSA received in response to the notices were reviewed by evaluation panels of experienced NHTSA personnel, who determined whether the certifications met each of the required criteria and evaluated the certifications based on the evaluation factors specified in the notice.

The panel that reviewed the certifications responsive to the March 31 notice determined that six organizations were qualified to receive donations from GM: National SAFE KIDS Campaign, National Safety Council (NSC), International Association of Chiefs of Police (IACP), National Easter Seal Society, Safe America Foundation/Operation Baby Buckle, and the State and Territorial Injury Prevention Directors Association (STIPDA).

GM decided that each of these organizations would receive donations for the purchase and distribution of child safety seats under the settlement agreement. GM donated $1.5 million to SAFE KIDS to coordinate a major child safety seat program with three other qualified organizations (NSC, IACP and STIPDA), and specified that half of the child safety seats purchased by SAFE KIDS will be divided equally among NSC, IACP and STIPDA, to be distributed through their channels. GM also donated $400,000 to the National Easter Seal Society for its unique program that reaches "special needs" infants and children and $100,000 to Operation Baby Buckle for the distribution of seats and its active public education and car safety seat awareness programs.

The panel that reviewed the certifications responsive to the June 29 notice determined that six organizations were qualified to receive donations from GM.

GM decided that three of these organizations would receive donations for the purchase and distribution of child safety seats under the settlement agreement. GM donated $800,000 to National SAFE KIDS Campaign, which formed a coalition with National Head Start Association and the National Association of Community Health Centers, to reach a group even more diverse than during the first phase of the program. GM donated $800,000 to SAFE TEAM, USA, which forged an alliance that includes the Safe America Foundation, the National Safety Council, the Native American Injury Prevention Network, the National Association of Community Action Agencies, the National Coalition of Hispanic Health and Human Services Organizations and the International Association of Chiefs of Police. GM stated that it expected this alliance to reach deep into many communities. The alliance also proposed a unique fund-raising activity to provide even more child safety seats than could ordinarily be purchased with these funds. GM also donated $400,000 to the National Easter Seal Society, which added the National Shriners Hospitals to its distribution plan for a greater distribution program during the second phase. GM stated that

this organization has demonstrated its capability to deliver child safety seats in a timely manner to "special needs" infants and children.

Today's Notice

Today's notice describes the criteria that an organization must meet, and the information it must submit with its certification, to be identified by DOT as a "qualified organization." Certifications must be received no later than 90 days after the date of publication of today's notice in the **Federal Register**.

NHTSA will convene a panel of experienced agency personnel to evaluate the certifications submitted. The members of the panel will determine whether the certifications meet each of the required criteria and will evaluate the certifications based on the evaluation factors specified in this notice. When the panel completes its review of the certifications, it will prepare a list of organizations it has determined to be qualified to receive donations for the purchase and distribution of child safety seats. NHTSA will provide the list to GM and place the list in the public docket.

This list of organizations will be used by GM during the second year of the agreement. As explained earlier, the settlement agreement provided that GM would donate $4,000,000 during the first year after the date of the agreement and $4,000,000 over the next four years (at approximately the rate at which DOT expends funds for the development and support of child safety seat loaner and give-away programs during that period). Based on NHTSA's projected expenditures for FY 1996, it is expected that GM will donate approximately $2 million for the purchase and distribution of child safety seats during the second year of the agreement.

Next (and Final) Notice

Within approximately one year from the date of publication of today's notice, NHTSA plans to publish a fourth (and final) notice in the **Federal Register** requesting certifications from organizations that wish to receive donations after the second year. Any organization that wishes to be included on the fourth (and final) list, whether or not the organization was included on a previous list, will be required to submit a certification. NHTSA reserves the right to request in the fourth notice the submission of additional information, not identified in today's **Federal Register** notice, from organizations seeking to be included on that list.

Based on its review of the certifications received in response to the fourth **Federal Register** notice, NHTSA will prepare a revised list of organizations that have been determined to be qualified and appropriate to receive remaining donations from GM. It is expected that the fourth list will be used for the final $2 million of the total $8 million GM agreed to donate for the purchase and distribution of child safety seats under the settlement agreement.

Certification Criteria Established in Settlement Agreement

As explained earlier in this notice, the settlement agreement between GM and DOT provided that DOT would identify, on an ongoing basis, qualified organizations to be considered to receive GM donations, and GM would select recipients of donations from DOT's list of qualified organizations. In order to be considered for inclusion on the list as a "qualified organization," the agreement provided that an organization must certify in writing that it shall meet eleven separate criteria. Listed below are descriptions of these criteria and the information that organizations must submit in their certifications to demonstrate compliance with them. (Following this section of the notice, in a section entitled "Certification Procedure," this notice describes the procedure organizations must follow to be considered for inclusion on the list as a "qualified organization" and includes a summary of the documents and additional information organizations must submit.)

(1) Work Through Affiliates

The organization must certify in writing that it shall:

work, through its state or local affiliates, with agencies such as children's hospitals and health agencies to identify families who could not otherwise afford seats or who have special needs

Organizations must be national in scope and have established and effective affiliate relationships at the state or local level capable of carrying out the effort. Organizations can satisfy this criterion by showing that they will work through their own state or local affiliates (e.g., units or chapters specifically organized to carry out the organization's mission) or with other affiliates (e.g., state or locally-based child safety-related agencies or organizations, such as children's hospitals or fire and rescue agencies), and by showing that they have commitments from these state or local affiliates.

Organizations that wish to participate in this program, and are state or locally-based rather than national in scope, are encouraged to affiliate with a national organization that plans to submit a certification or to encourage a national organization with which they are already affiliated to submit a certification.

Through these affiliates, organizations must have a network that will enable them to identify families of target populations who have not been reached through traditional channels, including families who could not otherwise afford seats or who have special needs, and to distribute seats and provide education to these families.

Organizations must submit information regarding their structure and a designation of geographic locations of state and local affiliates that are expected to be involved in the effort. Organizations must also submit information regarding the organizations and agencies with which they will be affiliated for purposes of this program. In addition, organizations must describe their relationships with affiliates, including the role that affiliates will play, and they must demonstrate that they have commitments from affiliates (such as by submitting letters of commitment).

(2) Existing Program or Trained Staff

The organization must certify in writing that it shall:

have an existing loaner or give-away child safety seat program or have staff trained in child passenger safety issues

Organizations must have experience, either directly or through their affiliates, with a loaner or give-away program or staff trained in child passenger safety issues. Alternatively, organizations may collaborate with organizations that have such experience or trained staff, either directly or through their affiliates. National organizations that have the ability to reach underserved populations, but do not have experience with a child safety seat program or trained staff, for example, are strongly encouraged to collaborate with one or more national organizations that do. The experience or training is necessary to ensure that organizations, and their affiliates, are able to operate child safety seat programs, and to meet the deadlines and requirements established in the agreement for distributing seats and providing education to the recipients of the seats.

Organizations must describe their existing loaner or give-away child safety seat programs and their experience in providing education on the use of child safety seats. They must also describe existing loaner or give-away programs and experience in providing education of agencies or organizations that are affiliated with them or with which they have collaborative relationships.

Organizations must identify the number of current trained staff (of the organization, its affiliates and its collaborators) and provide a description of training conducted or taken by the staff and the dates of last training. If organizations have staff who have not been trained, but who are capable of being trained in child passenger safety issues, the organizations should describe their plans for training the staff.

If organizations plan to work collaboratively, they should submit a single combined certification. The certification must include letters of commitment from all collaborators.

Organizations are advised that NHTSA has trained hundreds of individuals throughout the country in child passenger safety issues. If organizations are interested in receiving assistance from individuals who have received NHTSA training, they should contact one of NHTSA's ten regional offices, or the Governor's Highway Safety Representative in their State. Organizations must keep in mind, however, that they must be prepared to purchase and distribute child safety seats within 120 days of their receipt of the funds. Accordingly, their staff must be trained within the 120-day period.

(3) Low-income or Special Needs Across Broad Geographic Area

The organization must certify in writing that it shall:

distribute the seats to low-income families and/or families with special needs across a broad geographical area throughout the United States

The intent of this provision is to assure that underserved children from culturally diverse populations throughout the United States receive the benefits of the program. Qualified organizations need not distribute seats in every state. However, as stated previously, they must have a program that is national in scope and reaches their target populations throughout the United States.

Organizations must submit their mission statements, a description of the method they will use to identify underserved low income or special needs families, and a list of the geographic locations that would be targeted for receipt of the seats. They must demonstrate the ability to identify underserved low income and special needs families, and the ability to distribute seats to these families at the community level throughout the United States.

(4) Mix of Child Safety Seats

The organization must certify in writing that it shall:

comply with NHTSA guidelines with respect to the approximate mix of child safety seats (e.g., infant, toddler, booster, special needs)

Children of differing ages and transportation needs require different types of child safety seats. The intent of this provision is to assure that the children who are recipients under this program receive seats that meet their needs. The provision is also intended to assure that organizations purchase the correct mix of seats for their target population.

Organizations will need to identify the ages and transportation needs of the intended recipients and the types of seats needed to properly fit the target group. For example, an organization targeting special needs children may need very specialized seats, while a program targeting older children may need convertible toddler and booster child restraint devices.

Organizations must specify the maximum number of seats they are capable of distributing to local agencies (their affiliates) within 120 days of their receipt of the funds and the amount of funding they are requesting from GM to purchase and distribute this number of seats. Organizations must specify the proposed mix and types of seats needed to serve the age and needs of the populations to be targeted (i.e., 25% booster seats, 50% toddler seats, 20% infant seats and 5% special needs seats), and must describe the method used to derive the mix. They should indicate whether the mix would change if they receive less funding than the full amount requested.

Organizations should also indicate whether they plan to operate a loaner or a give-away program and what fees, if any, they intend to charge. Both types of programs are acceptable. Any fees charged to recipients must be nominal, and any income from these fees must be used for the purchase and distribution of additional child safety seats under the agreement.

(5) Within 120 Days

The organization must certify in writing that it shall:

distribute all of the seats purchased with the funds provided by GM to the local agencies within 120 days of the receipt of the funds

Organizations are required, under the agreement, to purchase and distribute all of the seats to local agencies (their affiliates) within 120 days of receipt of the funds. To satisfy this criterion, organizations must clearly demonstrate the ability to meet this requirement.

As stated previously, organizations must submit a plan describing how they will accomplish the purchase and distribution of seats to local agencies (their affiliates) within the 120-day period. The plan must describe how the organization will reach a broad geographical area, how it will identify the low income and special needs families to be served by this program, and it must include a proposed schedule for the purchase and distribution of seats. The plan must clearly demonstrate that the organization is able and prepared to purchase and distribute child safety seats to local agencies (their affiliates) within 120 days of their receipt of the funds and that, if their staff is not already experienced or trained, that they will be trained within the 120-day period.

Organizations that were selected by GM to receive donations for the purchase and distribution of child safety seats under the settlement agreement as a result of the **Federal Register** notices published on March 31 or June 29, 1995, must also describe the progress they have made, including the schedule they have followed, the number of seats they have distributed to local agencies (their affiliates) and the number of seats that have been provided to recipients, by geographic location.

Organizations must also demonstrate that the distribution and education efforts funded under this program will either create new initiatives or complement (rather than duplicate) existing initiatives, in the geographic areas to be served. In other words, these distribution and education efforts should take place in communities that have either been underserved or not been reached. In addition, organizations must ensure that their efforts do not conflict with activities already planned or underway. This may be demonstrated by including in the plan, a description of new or complementary initiatives that are planned and either letters of support from the organizations that are (or would be) responsible for child safety seat programs in the geographic areas to be served (such as state highway safety offices and state public health agencies) or a description of the organization's plans to coordinate with these responsible organizations.

(6) Educate Recipients

The organization must certify in writing that it shall:

educate recipients of the seats as to methods of proper installation and use

While the distribution of child safety seats is vitally important, and can save

many children's lives, the effectiveness of those seats in preventing injury and death increases significantly when recipients are trained in and follow proper use and installation instructions. Organizations are required, under the agreement, to provide education to the recipients of the seats regarding the proper installation and use of child safety seats. Education is most effective if it is provided at the time that the seats are being distributed to recipients, and if it includes a number of components, such as conducting a hands-on demonstration, showing a video and having recipients demonstrate that they understand how to properly install and use their child safety seats.

Organizations must describe the specific means they, their affiliates or their collaborators will use to educate families about the proper installation and use of child safety seats.

To assist in this effort, NHTSA will make resources, including materials and technical assistance, available to the selected organizations.

(7) Administrative Expenses

The organization must certify in writing that it shall:

not use more than 10 percent of the funds provided by GM for administrative expenses related to distribution of the seats

Organizations shall use no more than 10 percent of the funds provided by GM for administrative expenses related to the distribution of the seats. Examples of administrative expenses include operational overhead such as secretarial support, telephone expenses, and time of paid staff to help develop the plans for these efforts.

As stated previously, organizations are strongly encouraged to work collaboratively for the purpose of applying for funds. If organizations plan to work collaboratively, they should submit a single combined certification. Any such certification submitted for a group of organizations working collaboratively, must include a statement that provides that the organizations have reached agreement regarding the manner in which funds that may be used for administrative expenses will be allocated among the organizations. The actual agreement need not be provided. No additional information is required to be submitted at this time in support of this element of the certification.

(8) Added to Existing Funds and No Diversions

The organization must certify in writing that it shall:

add the GM-provided funds to the total of its existing funds spent on the distribution of child safety seats to low-income families and not divert any funds currently budgeted to such activities to other activities

Organizations shall add the GM-provided funds to the total of their existing funds, if any, spent on the distribution of child safety seats to low income and special needs families and not divert any funds currently budgeted to such activities, if any, to other activities. In other words, the funds provided by GM must represent new and additional resources, and may not be used to replace other funds, if any, that otherwise would have been used for the distribution of child safety seats to low-income families and their related education activities. No additional information is required to be submitted at this time in support of this element of the certification.

(9) Third-party Audit

The organization must certify in writing that it shall:

allow the activities conducted pursuant to this program to be audited by such third party as selected by DOT

Organizations shall allow the activities conducted pursuant to this program to be audited by such third party as may be selected by DOT. Organizations shall also maintain adequate records to allow an audit to be conducted. No additional information is required to be submitted at this time in support of this element of the certification.

(10) Enforceable Commitments and Promises

The organization must certify in writing that it shall:

acknowledge and agree that such commitments and promises shall be enforceable

Organizations shall acknowledge and agree that the commitments and promises they make shall be enforceable through legal process or other appropriate means. No additional information is required to be submitted at this time in support of this element of the certification.

(11) No Assumption of Responsibility

The organization must certify in writing that it shall:

acknowledge and agree that GM does not assume or bear any responsibility for the organization's commitments, the selection of the safety seats actually purchased or distributed, or the education of recipients of the seats as to proper use

Organizations shall acknowledge and agree that GM does not assume or bear any responsibility for the organization's commitments, the selection of the safety seats actually purchased or distributed, or the education of recipients of the seats as to proper use. No additional information is required to be submitted at this time in support of this element of the certification.

Certification Procedures

To be considered, certifications must be received no later than 90 days after the date on which today's notice is published in the **Federal Register**. Certifications should be submitted to Office of Occupant Protection, NTS–11, Room 5118, 400 Seventh Street, S.W., Washington, D.C. 20590.

Organizations are strongly encouraged to work collaboratively for the purpose of applying for funds. If organizations plan to work collaboratively, they should submit a single combined certification.

Certifications must address each of the criteria described in detail above, in the section of this notice entitled "Certification Criteria Established in Settlement Agreement," and must include each of the following:

(1) Certification Statement

A written statement, signed by an authorized official of the organization, certifying that the organization shall:

(i) work, through its state or local affiliates, with agencies such as children's hospitals and health agencies to identify families who could not otherwise afford seats or who have special needs; (ii) have an existing loaner or give-away child safety seat program or have staff trained in child passenger safety issues; (iii) distribute the seats to low-income families and/or families with special needs across a broad geographical area throughout the United States; (iv) comply with NHTSA guidelines with respect to the approximate mix of child safety seats (e.g., infant, toddler, booster, special needs); (v) distribute all of the seats purchased with the funds provided by GM to the local agencies within 120 days of the receipt of the funds; (vi) educate recipients of the seats as to methods of proper installation and use; (vii) not use more than 10 percent of the funds provided by GM for administrative expenses related to distribution of the seats; (viii) add the GM-provided funds to the total of its existing funds spent on the distribution of child safety seats to low-income families and not divert any funds currently budgeted to such activities to other activities; (ix) allow the activities conducted pursuant to this program to be audited by such third party as selected by DOT; (x) acknowledge and agree that such commitments and promises shall be enforceable; and (xi) acknowledge and agree that GM does not assume or bear any responsibility for the organization's commitments, the selection of the safety seats actually purchased or distributed, or the education of recipients of the seats as to proper use.

(2) Plan

A plan describing how the organization will accomplish the purchase and distribution of seats to local agencies (their affiliates) within 120 days of receipt of the funds, how the organization will reach a broad geographical area, and how it will identify the low income and special needs families to be served by this program. It must include a proposed schedule for the purchase and distribution of seats, a description of new or complementary initiatives that are planned and either letters of support from the organizations that are (or would be) responsible for child safety seat programs in the geographic areas to be served (such as state highway safety offices and state public health agencies) or a description of the organization's plans to coordinate with these responsible organizations.

The plan must clearly demonstrate that the organization is able and prepared to purchase and distribute child safety seats to local agencies (their affiliates) within 120 days of their receipt of the funds and that, if their staff is not already experienced or trained, that they will be trained within the 120-day period.

Organizations that were selected by GM to receive donations for the purchase and distribution of child safety seats under the settlement agreement as a result of the **Federal Register** notices published on March 31 or June 29, 1995, must also describe the progress they have made since they received their donations, including the schedule they have followed, the number of seats they have distributed to local agencies (their affiliates) and the number of seats that have been provided to recipients, by geographic location.

(3) Additional Information

The following additional information to ensure that the organization is capable of meeting the objectives of the agreement:

- Information regarding the organization's structure and a designation of geographic locations of state and local affiliates to be involved in the effort;
- Information regarding the organizations and agencies with which the organization will be affiliated for purposes of this program;
- A description of their relationships with affiliates, including the role that affiliates will play, and either letters or some other demonstration of commitment from their affiliates;
- A description of the organization's, its affiliates' or its collaborators': existing loaner or give-away programs; experience in providing education on the use of child safety seats; the number of trained staff; a description of training conducted or taken; and the dates of last training;
- If organizations have staff who have not been trained, but who are capable of being trained in child passenger safety issues, a description of their plans for training the staff and an indication that the training will be completed within 120 days of receipt of the funds;
- If organizations plan to work collaboratively, letters of commitment from all collaborators and a statement that provides that the organizations have reached agreement regarding the manner in which funds that may be used for administrative expenses will be allocated among the organizations (the actual agreement need not be provided);
- A mission statement of the organization;
- The method to be used to identify underserved low income or special needs families;
- A list of the geographic locations that would be targeted for receipt of the seats;
- The maximum number of seats the organization is capable of distributing to local agencies (their affiliates) within 120 days of its receipt of the funds; the amount of funding the organization is requesting from GM to purchase and distribute this number of seats; the proposed mix and types of seats needed to serve the age and needs of the populations to be targeted (i.e., 25% booster seats, 50% toddler seats, 20% infant seats and 5% special needs seats); the method used to derive the mix; and, if applicable, any change in mix if the organization receives less funding than the full amount requested;
- An indication of whether the organization plans to operate a loaner or a give-away program; an identification of the fees, if any, they intend to charge; and a statement that any income from these fees will be used for the purchase and distribution of additional child safety seats under the agreement; and
- A description of the specific means to be used by the organization, its affiliates or its collaborators to educate families about the proper installation and use of child safety seats.

Organizations must submit one original and two copies of their certifications. Certifications shall be subject to 18 U.S.C. § 1001, which prohibits the making of false statements. Organizations are requested to submit four additional copies to facilitate the review process, but there is no requirement or obligation to do so.

Organizations that would like to be notified upon receipt of their certifications should enclose a self-addressed stamped postcard in the envelope with their certifications. Upon receiving the certifications, the postcard will be returned by mail.

Evaluation Factors

Certifications will be reviewed by an evaluation panel of experienced agency personnel. The panel will determine whether the certifications meet each of the required criteria and will evaluate the certifications based on the following factors:

1. Understanding of the requirements of the agreement and soundness of approach as shown by the organization's plan and certification.

2. The ability to purchase and distribute child safety seats to local agencies (their affiliates) within 120 days of their receipt of the funds as shown by the organization's plan and certification.

3. The ability to identify underserved low income and special needs families.

4. The ability to distribute child safety seats to these target populations at the community level throughout the United States.

- The experience of the organization, its affiliates or its collaborators, in distributing child safety seats
- The breadth and diversity of the underserved population the organization, its affiliates or its collaborators can effectively reach

5. The ability to provide education to recipients.

- The experience of the organization, its affiliates or its collaborators, in providing education on the use of child safety seats
- The level of training of the staff of the organization, its affiliates or its collaborators

6. The ability to conduct a distribution and education program that either creates new initiatives, or complements (rather than duplicates) existing initiatives, in the geographic areas to be served.

Issued on: March 25, 1996.

James Hedlund,

Associate Administrator for Traffic Safety Programs.

BILLING CODE 4910–60–M

Surface Transportation Board [1]

[Ex Parte No. 482]

Exemption of Demurrage From Regulation

AGENCY: Surface Transportation Board.

ACTION: Withdrawal of antitrust immunity.

SUMMARY: Pursuant to a notice of proposed rulemaking, served April 21, 1992, the Board is withdrawing antitrust immunity for the collective consideration of demurrage charges. The Board concludes that this action constitutes the best means to achieve the goals of the ICC Termination Act of 1995 and the Staggers Rail Act of 1980 (Pub. L. No. 96–448, 94 Stat. 1895) as they concern demurrage, while safeguarding the interests of shippers and receivers subject to market dominant carriers. Two alternative proposals suggested by the ICC are not being adopted.

DATES: This decision is effective on April 28, 1996.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: DC News & Data, Inc., Room 2229, 1201 Constitution Avenue, N.W., Washington, DC 20423. Telephone: (202) 289–4357. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Authority: 49 U.S.C. 10706.

Decided: March 20, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

BILLING CODE 4915–00–P

Surface Transportation Board [1]

[Docket No. AB–33 (Sub-No. 90X)]

Union Pacific Railroad Company—Abandonment Exemption—in Sutter County, CA (Yuba City Branch)

AGENCY: Surface Transportation Board, DOT.

ACTION: Notice of exemption and Interim Trail Use or Abandonment.

SUMMARY: The Board, under 49 U.S.C. 10505, exempts from the prior approval requirements of 49 U.S.C. 10903–04 the abandonment by Union Pacific Railroad Company (UP) of a 5.20-mile portion of its Yuba City Branch extending from milepost 0.00 near Colusa Jct. to the end of the line at milepost 5.20 near Sutter, in Sutter County, CA, subject to trail use, public use, environmental, and standard labor protective conditions.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 28, 1996. Formal expressions of intent to file an offer of financial assistance [2] under 49 CFR 1152.27(c)(2) must be filed by April 8, 1996; petitions to stay must be filed by April 15, 1996; and petitions to reopen must be filed by April 23, 1996.

ADDRESSES: An original and 10 copies of all pleadings, referring to Docket No. AB–33 (Sub-No. 90X), must be filed with the Office of the Secretary, Case Control Branch, Surface Transportation Board, 1201 Constitution Avenue, N.W., Washington, DC 20423. In addition, a copy of all pleadings must be served on Joseph D. Anthofer, 1416 Dodge Street, Room 830, Omaha, NE 68179–0830.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

March 18, 1996

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Special Request: In order to conduct the survey described below in April 1996, the Department of Treasury is requesting Office of Management and Budget (OMB) review and approve this information collection by March 22, 1996. To obtain a copy of this survey, please contact the IRS Clearance Officer at the address listed below.

Internal Revenue Service (IRS)

OMB Number: 1545–1432.

Project Number: PC:V 96–004–G.

Type of Review: Revision.

Title: Customer Satisfaction Survey for Librarians.

Description: The Bank, Post Office, and Library (BPOL) Program is one area that must continue to provide quality service to taxpayers while cutting operating costs. This program uses banks, post offices and libraries as distribution sites for tax forms and related materials. Since BPOL locations provide materials for so many people, thoughtful consideration should be used to identify which areas of the program will be impacted by these budget cuts. Any decisions made should take into account our customers' (the taxpayers') needs and opinions as to which areas of the program are most important and provide the best service. IRS feels that this information can be obtained by surveying librarians.

Respondents: Business or other for-profit.

Estimated Number of Respondents: 2,000.

Estimated Burden Hours Per Respondent: 6 minutes.

Frequency of Response: Other.

Estimated Total Reporting Burden: 200 hours.

Clearance Officer: Garrick Shear (202) 622–3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, N.W., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Submission to OMB for Review; Comment Request

March 22, 1996.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Internal Revenue Service (IRS)

OMB Number: New.

Form Number: IRS Form W–7.

Type of Review: New collection.

Title: Application for IRS Individual Taxpayer Identification Number.

Description: Proposed regulations under Internal Revenue Code (IRC) section 6109 introduce a new type of taxpayer identifying number called the "IRS individual taxpayer identification number" (ITIN). Individuals who currently do not have, and are not eligible to obtain, social security numbers can apply for this number on Form W–7. Taxpayers may use this number when required to furnish a taxpayer identifying number under regulations. An ITIN is intended for tax use only.

Respondents: Individuals or households.

Estimated Number of Respondents: 500,000.

Estimated Burden Hours Per Respondent:

Learning about the law or the form—11 minutes.

Preparing the form—28 minutes.

Copying, assembling, sending the form to the IRS—20 minutes.

Frequency of Response: Other (individuals file once to get an ITIN).

Estimated Total Reporting Burden: 495,000 hours.

Clearance Officer: Garrick Shear (202) 622–3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4830–01–P

Bureau of Alcohol, Tobacco and Firearms

Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Bureau of Alcohol, Tobacco and Firearms within the Department of the Treasury is soliciting comments concerning the Requisition For Forms or Publications and Requisition For Firearms/ Explosives Forms.

DATES: Written comments should be received on or before May 28, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Bureau of Alcohol, Tobacco and Firearms, Linda Barnes, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Linda Barnes, Document Services Branch, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

SUPPLEMENTARY INFORMATION:

Title: Requisition For Forms or Publications and Requisition For Firearms/Explosives Forms.

OMB Number: 1512–0001.

Form Number: ATF F 1600.1 and ATF F 1600.8.

Abstract: These forms are used by the general public to request or order forms or publications from the ATF Distribution Center. These forms notify ATF of the quantity required by the respondent and provide a guide as to annual usage of ATF forms or publications by the general public.

Current Actions: There are no changes to this information collection and it is being submitted for extension purposes only.

Type of Review: Extension.

Affected Public: Business or other for-profit, individuals or households.

Estimated Number of Respondents: 30,000.

Estimated Time Per Respondent: 3 minutes.

Estimated Total Annual Burden Hours: 1725.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Also, ATF requests information regarding any monetary expenses you may incur while completing these forms.

Dated: March 22, 1996.

Bradley A. Buckles,

Acting Director.

[FR Doc. 96–7693 Filed 3–28–96; 8:45 am]

BILLING CODE 4815–31–P

Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Bureau of Alcohol, Tobacco and Firearms within the Department of the Treasury is soliciting comments concerning the Transportation In Bond, and Notice of Puerto Rican Cigars, Cigarettes, Cigarette Papers, or Cigarette Tubes.

DATES: Written comments should be received on or before May 28, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Bureau of Alcohol, Tobacco and Firearms, Linda Barnes, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Cliff Mullen, Wine, Beer & Spirits Regulations Branch, 650 Massachusetts Avenue, NW., (202) 927–8181.

SUPPLEMENTARY INFORMATION:

Title: Transportation In Bond, and Notice of Release of Puerto Rican Cigars, Cigarettes, Cigarette Papers, or Cigarette Tubes.

OMB Number: 1512–0167.

Form Number: ATF F 3072 (5210.14).

Abstract: ATF F 3072 (5210.14) is used to document the shipment of taxable tobacco products brought into the United States in bond from Puerto Rico. The form documents certification by ATF to account for the tax liability as well as any adjustments assessed to the bonded licensee. The form also describes the shipment and identification of the licensee who receives the products.

Current Actions: There are no changes to this information collection and it is being submitted for extension purposes only.

Type of Review: Extension.

Affected Public: Business or other for-profit.

Estimated Number of Respondents: 50.

Estimated Time Per Respondent: 12 minutes.

Estimated Total Annual Burden Hours: 200.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Also, ATF requests information regarding any monetary expenses you may incur while completing this form.

Dated: March 22, 1996.

Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Bureau of Alcohol, Tobacco and Firearms within the Department of the Treasury is soliciting comments concerning the Special Tax Registration and Return (Alcohol & Tobacco) and the Special Tax Registration and Return (National Firearms Act).

DATES: Written comments should be received on or before May 28, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Bureau of Alcohol, Tobacco and Firearms, Linda Barnes, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Wanda Williams Burggraff, Tax Compliance Branch, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8220.

SUPPLEMENTARY INFORMATION:

Title: Special Tax Registration and Return (Alcohol & Tobacco) and Special Tax Registration and Return (National Firearms Act).

OMB Number: 1512–0472.

Form Number: ATF F 5630.5 and ATF F 5630.7.

Abstract: ATF F 5630.5 and ATF F 5630.7 are completed by persons engaged in certain alcohol, tobacco and firearms related businesses, respectively. Both forms are used to register and/or pay a special occupational tax, as required by statute. Upon receipt of the tax, a special tax stamp is issued..

Current Actions: There are no changes to this information collection and it is being submitted for extension purposes only.

Type of Review: Extension.

Affected Public: Business or other for-profit, individuals or households, and not-for-profit institutions.

Estimated Number of Respondents: 90,700.

Estimated Time Per Respondent: 48 minutes.

Estimated Total Annual Burden Hours: 72,778.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the infomation shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Also, ATF requests information regarding any monetary expenses you may incur while completing these forms.

BILLING CODE 4810–31–P

Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Bureau of Alcohol, Tobacco and Firearms within the Department of the Treasury is soliciting comments concerning the Letterhead Request For Information In Regard To Federal Firearms Dealer's Records (Dealer's Records of Aquisition, Disposition and Supporting Data).

DATES: Written comments should be received on or before May 28, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Bureau of Alcohol, Tobacco and Firearms, Linda Barnes, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Dottie Morales, Firearms & Explosives Operations Branch, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8310.

SUPPLEMENTARY INFORMATION:

Title: Letterhead Request For Information In Regard To Federal Firearms Dealer's Records (Dealer's Records of Aquisition, Disposition and Supporting Data).

OMB Number: 1512–0493.

Form Number: ATF F 5300.3.

Abstract: ATF F 5300.3 gives the user a simplified format to list the required information ATF needs to perform its functions in regard to the law. The respondent saves time because the questions are simple and a return address is supplied. The form is used to maintain a current status of firearms licensees.

Current Actions: There are no changes to this information collection and it is being submitted for extension purposes only.

Type of Review: Extension.

Affected Public: Business or other for-profit, Individuals or households.

Estimated Number of Respondents: 28,000.

Estimated Time Per Respondent: 5 minutes.

Estimated Total Annual Burden Hours: 2,380.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Also, ATF requests information regarding any monetary expenses you may incur while completing this form.

BILLING CODE 4810–31–P

Customs Service

List of Foreign Entities Violating Textile Transshipment and Country of Origin Rules

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General Notice.

SUMMARY: This document notifies the public of foreign entities which have been issued a penalty claim under section 592 of the Tariff Act, for certain violations of the customs laws. This list is authorized to be published by section 333 of the Uruguay Round Agreements Act.

FOR FURTHER INFORMATION CONTACT: For information regarding any of the operational aspects, contact Michael Compeau, Branch Chief, Seizures and Penalties Division, at 202–927–0762. For information regarding any of the legal aspects, contact Lars-Erik Hjelm, Office of Chief Counsel, at 202–927–6900.

SUPPLEMENTARY INFORMATION:

Background

Section 333 of the Uruguay Round Agreements Act (URAA)(Public Law 103–465, 108 Stat. 4809)(signed December 12, 1994), entitled Textile Transshipments, amended Part V of title IV of the Tariff Act of 1930 by creating a section 592A (19 U.S.C. 1592A), which authorizes the Secretary of the Treasury to publish in the **Federal Register**, on a biannual basis, a list of the names of any producers, manufacturers, suppliers, sellers, exporters, or other persons located outside the Customs territory of the United States, when these entities have been issued a penalty claim under section 592 of the Tariff Act, for certain violations of the customs laws, provided that certain conditions are satisfied.

The violations of the Customs laws referred to above are the following: (1) Using documentation, or providing documentation subsequently used by the importer of record, which indicates a false or fraudulent country of origin or source of textile or apparel products; (2) Using counterfeit visas, licenses, permits, bills of lading, or similar documentation, or providing counterfeit visas, licenses, permits, bills of lading, or similar documentation that is subsequently used by the importer of record, with respect to the entry into the customs territory of the United States of textile or apparel products; (3) Manufacturing, producing, supplying, or selling textile or apparel products which are falsely or fraudulently labeled as to country of origin or source; and (4) Engaging in practices which aid or abet the transshipment, through a country other than the country of origin, of textile or apparel products in a manner which conceals the true origin of the textile or apparel products or permits the evasion of quotas on, or voluntary restraint agreements with respect to, imports of textile or apparel products.

If a penalty claim has been issued with respect to any of the above violations, and no petition in response to the claim has been filed, the name of the party to whom the penalty claim was issued will appear on the list. If a petition, supplemental petition or second supplemental petition for relief from the penalty claim is submitted under 19 U.S.C. 1618, in accord with the time periods established by §§ 171.32 and 171.33, Customs Regulations (19 CFR 171.32, 171.33) and the petition is subsequently denied or the penalty is mitigated, and no further petition, if allowed, is received within 30 days of the denial or allowance of mitigation, then the administrative action shall be deemed to be final and administrative remedies will be deemed to be exhausted. Consequently, the name of the party to whom the penalty claim was issued will appear on the list. However, provision is made for an appeal to the Secretary of the Treasury by the person named on the list, for the removal of its name from the list. If the Secretary finds that such person or entity has not committed any of the enumerated violations for a period of not less than 3 years after the date on which the person or entity's name was published, the name will be removed from the list as of the next publication of the list.

Reasonable Care Required

Section 592A also requires any importer of record entering, introducing, or attempting to introduce into the commerce of the United States textile or apparel products that were either directly or indirectly produced, manufactured, supplied, sold, exported, or transported by such named person to show, to the satisfaction of the Secretary, that such importer has exercised reasonable care to ensure that the textile or apparel products are accompanied by documentation, packaging, and labeling that are accurate as to its origin. Reliance solely upon information regarding the imported product from a person named on the list is clearly not the exercise of reasonable care. Thus, the textile and apparel importers who have some commercial relationship with one or more of the listed parties must exercise a degree of reasonable care in ensuring that the documentation covering the imported merchandise, as well as its packaging and labeling, is accurate as to the country of origin of the merchandise. This degree of reasonable care must rely on more than information supplied by the named party.

In meeting the reasonable care standard when importing textile or apparel products and when dealing with a party named on the list published pursuant to section 592A of the Tariff Act of 1930, an importer should consider the following questions in attempting to ensure that the documentation, packaging, and labeling is accurate as to the country of origin of the imported merchandise. The list of questions is not exhaustive but is illustrative.

(1) Has the importer had a prior relationship with the named party?

(2) Has the importer had any detentions and/or seizures of textile or apparel products that were directly or indirectly produced, supplied, or transported by the named party?

(3) Has the importer visited the company's premises and ascertained that the company has the capacity to produce the merchandise?

(4) Where a claim of substantial transformation is made, has the importer ascertained that the named party actually substantially transforms the merchandise?

(5) Is the named party operating from the same country as is represented by that party on the documentation, packaging or labeling?

(6) Have quotas for the imported merchandise closed or are they nearing closing from the main producer countries for this commodity?

(7) What is the history of this country regarding this commodity?

(8) Have you asked questions of your supplier regarding the origin of the product?

(9) Where the importation is accompanied by a visa, permit, or license, has the importer verified with the supplier or manufacturer that the visa, permit, and/or license is both valid and accurate as to its origin? Has the importer scrutinized the visa, permit or license as to any irregularities that would call its authenticity into question?

The law authorizes a biannual publication of the names of the foreign entities. On September 28, 1995, Customs published a Notice in the **Federal Register** (60 FR 50239) which identified 9 entities which fell within the purview of section 592A of the Tariff Act of 1930.

592A List

For the period ending March 31, 1996, Customs has identified 8 (eight) foreign entities that fall within the purview of section 592A of the Tariff Act of 1930. This list reflects the removal of 5 names from the list published in September 1995, and the addition of 4 new entities. The parties on the current list were assessed a penalty claim under 19 U.S.C. 1592, for one or more of the four above-described violations. The

administrative penalty action was concluded against the parties by one of the actions noted above as having terminated the administrative process.

The names and addresses of the 8 foreign parties which have been assessed penalties by Customs for violations of section 592 are listed below pursuant to section 592A. This list supersedes any previously published list.

Bestraight Limited, Room 5K, World Tech Centre, 95 How Ming Street, Kwun Tong, Kowloon, Hong Kong.
Cotton Breeze International, 13/1578 Govindpuri, New Delhi, India.
Hangzhou Tongda Textile Group, Room 918, Hangzhou Mansion, No. 1 Wulin Square, Hangzhou, China.
Hanin Garment Factory, 31 Tai Yau Street, Kowloon, Hong Kong.
Hip Hing Thread Company, No. 10, 6/F Building A, 221 Texaco Road, Waikai Industtrial Centre, Tsuen Wan, N.T. Hong Kong.
Poshak International, H–83 South Extension, Part-I (Back Side), New Delhi, India.
United Fashions, C–7 Rajouri Garden, New Delhi, India.
Yunnan Provincial Textiles Import & Export, 576 Beijing Road Kunming, Yun Nan, China.

Any of the above parties may petition to have its name removed from the list. Such petitions, to include any documentation that the petitioner deems pertinent to the petition, should be forwarded to the Assistant Commissioner, Office of Field Operations, United States Customs Service, 1301 Constitution Avenue, Washington, D.C. 20229.

Additional Foreign Entities

In the September, 1995 **Federal Register** notice, Customs also solicited information regarding the whereabouts of 40 foreign entities, which were identified by name and known address, concerning alleged violations of section 592. Persons with knowledge of the whereabouts of those 40 entities were requested to contact the Assistant Commissioner, Office of Field Operations, United States Customs Service, 1301 Constitution Avenue, Washington, D.C. 20229.

As a result of information received in response to the solicitation, 6 names were removed from the list. In this document, a new list is being published which contains the names and last known address of 37 entities. This reflects the removal of 6 names from the previous list and the addition of 3 new entities to the list.

Customs is soliciting information regarding the whereabouts of the following 37 foreign entities concerning alleged violations of section 592. Their name and last known address are listed below:

Bahadur International, 250 Naraw Industrial Area, New Delhi, India.
Madan Exports, E–106 Krishna Nagar, New Delhi, India.
Gulnar Fashion Export, 14 Hari Nagar, Ashram, New Delhi, India.
Janardhan Exports, E–106 Krishna Nagar, New Delhi, India.
Morrin International, E–106 Krishna Nagar, New Delhi, India.

BILLING CODE 4820–02–P

Internal Revenue Service

Proposed Collection; Comment Request for Forms 8804, 8805, and 8813

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8804, Annual Return for Partnership Withholding Tax (Section 1446), Form 8805, Foreign Partner's Information Statement of Section 1446 Withholding Tax, and Form 8813, Partnership Withholding Tax Payment (Section 1446).

DATES: Written comments should be received on or before May 28, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Form 8804, Annual Return for Partnership Withholding Tax (Section 1446), Form 8805, Foreign Partner's Information Statement of Section 1446 Withholding Tax, and Form 8813, Partnership Withholding Tax Payment (Section 1446).

OMB Number: 1545–1119.

Form Number: Forms 8804, 8805, and 8813.

Abstract: Internal Revenue Code section 1446 requires U.S. partnerships to pay a withholding tax if they have effectively connected taxable income that is allocable to foreign partners. The partnerships use Form 8813 to make payments of withholding tax to the IRS. They use Forms 8804 and 8805 to make annual reports to provide the IRS and affected partners with information to assure proper withholding, crediting to partners' accounts, and compliance.

Current Actions: There are no changes being made to the forms at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations and individuals or households.

Estimated Number of Respondents: 5,000.

Estimated Time per Respondent: 24 hr., 14 min.

Estimated Total Annual Burden Hours: 121,150.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Approved: March 22, 1996.

Garrick R. Shear,

IRS Reports Clearance Officer.

[FR Doc. 96–7767 Filed 3–28–96; 8:45 am]

BILLING CODE 4830–01–P

Proposed Collection; Comment Request for Form 8815

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8815, Exclusion of Interest From Series EE U.S. Savings Bonds Issued After 1989.

DATES: Written comments should be received on or before May 28, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Exclusion of Interest From Series EE U.S. Savings Bonds Issued After 1989.

OMB Number: 1545–1173.

Form Number: Form 8815.

Abstract: If an individual redeems series EE U.S. savings bonds issued after 1989 and pays qualified higher education expenses during the year, the interest on the bonds may be excludable from income. Form 8815 is used by the individual to figure the amount of savings bond interest that is excludable.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 25,000.

Estimated Time per Respondent: 2 hr., 1 min.

Estimated Total Annual Burden Hours: 50,420.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Approved: March 22, 1996.

BILLING CODE 4830–01–P

Proposed Collection; Comment Request for Form 2441

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 2441, Child and Dependent Care Expenses.

DATES: Written comments should be received on or before May 26, 1996 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Martha R. Brinson, (202) 622–3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Child and Dependent Care Expenses.

OMB Number: 1545–0068.

Form Number: Form 2441.

Abstract: Internal Revenue Code section 21 allows a credit for certain child and dependent care expenses to be claimed on Form 1040 (reduced by employer-provided day care excluded under Code section 129). Form 2441 is used to verify that the credit and exclusion are properly figured, and that day care provider information is reported.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 4,421,940.

Estimated Time per Respondent: 2 hr. 30 min.

Estimated Total Annual Burden Hours: 11,054,850.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Approved: March 21, 1996.

BILLING CODE 4830–01–P

Renewable Electricity Production Credit, Publication of Inflation Adjustment Factor and Reference Prices for Calendar Year 1996

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Publication of inflation adjustment factor and reference prices for calendar year 1996 as required by section 45(d)(2)(A) (26 U.S.C. 45(d)(2)(A)).

SUMMARY: The 1996 inflation adjustment factor and reference prices are used in determining the availability of the renewable electricity production credit under section 45(a).

DATES: The 1996 inflation adjustment factor and reference prices apply to calendar year 1996 sales of kilowatt hours of electricity produced in the United States or a possession thereof from qualified energy resources.

INFLATION ADJUSTMENT FACTOR: The inflation adjustment factor for calendar year 1996 is 1.0750.

REFERENCE PRICES: The reference prices for calendar year 1996 are 5.5¢ per kilowatt hour for facilities producing electricity from wind and 0¢ per kilowatt hour for facilities producing electricity from closed-loop biomass. The reference price for electricity produced from closed-loop biomass, as defined in section 45(c)(2), is based on a determination under section 45(d)(2)(C) that in calendar year 1995 there were no sales of electricity generated from closed-loop biomass energy resources under contracts entered into after December 31, 1989.

Because the 1996 reference prices for electricity produced from wind and closed-loop biomass energy resources do not exceed 8¢ multiplied by the inflation adjustment factor, the phaseout of the credit provided in section 45(b)(1) does not apply to electricity sold during calendar year 1996.

CREDIT AMOUNT: As required by section 45(b)(2), the 1.5¢ amount in section 45(a)(1) is adjusted by multiplying such amount by the inflation adjustment factor for the calendar year in which the sale occurs. If any amount as increased under the preceding sentence is not a multiple of 0.1¢, such amount is rounded to the nearest multiple of 0.1¢. Under the calculation required by section 45(b)(2), the renewable electricity production credit for calendar year 1996 under section 45(a) is 1.6¢ per kilowatt hour on the sale of electricity produced from closed-loop biomass and wind energy resources.

FOR FURTHER INFORMATION CONTACT: David A. Selig, IRS, CC:DOM:P&SI:5, 1111 Constitution Ave., NW., Washington, D.C. 20224, (202) 622–3040 (not a toll-free call).

Judith C. Dunn,

Associate Chief Counsel (Domestic).

DEPARTMENT OF VETERANS AFFAIRS

Medical Research Service Cooperative Studies Evaluation Committee; Notice of Meeting

The Department of Veterans Affairs gives notice under Public Law 92–463 (Federal Advisory Committee Act), as amended, by section 5(c) of Public Law 94–409, that a meeting of the Medical Research Service Cooperative Studies Evaluation Committee will be held at the Ramada Hotel (Old Town) Alexandria, VA 22314, April 23–24, 1996. The session on April 23 is scheduled to begin at 7:30 a.m. and end at 5 p.m. and on April 24 from 7:30 a.m. to 3 p.m. The meeting will be for the purpose of reviewing five new protocols for multi-hospital clinical trial: one on treatment of seizures in the elderly, one on treatment of cirrhosis in patients with alcoholic liver disease; one on comparison of three procedures for bleeding esophageal varices; one on naltrexone treatment of alcoholism; and one on specialized medication and revascularization therapy and progress of two on-going cooperative studies, one on risk factors for colon cancer and one on genetic study on schizophrenia.

The Committee advises the Director, Medical Research Service, through the Chief of Cooperative Studies Program on the relevance and feasibility of the studies, the adequacy of the protocols, and the scientific validity and propriety of technical details, including protection of human subjects.

The meeting will be open to the public up to the seating capacity of the room from 7:30 a.m. to 8 a.m. on both days to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. Ping Huang, Coordinator, Medical Research Service, Cooperative Studies Evaluation Committee, Department of Veterans Affairs, Washington, DC, (202) 565–7154, prior to the meeting.

The meeting will be closed from 8 a.m. to 5 p.m. on April 23, 1996, and from 8 a.m. to 3 p.m. on April 24, 1996, for consideration of specific proposal in accordance with provisions set forth in section 10(d) of Public Law 92–463, as amended by section 5(c) of Public Law 94–409, and 5 U.S.C. 552b (c)(6). During this portion of the meeting, discussions and recommendations will deal with qualifications of personnel conducting the studies, staff and consultant critiques of research protocols, and similar documents, and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dated: March 22, 1996.

By direction of the Secretary.

Heyward Bannister,

Committee Management Officer.

Department of Health and Human Services

Public Health Service

Announcement of Availability of Grants for General Family Planning Training Projects; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Announcement of Availability of Grants for General Family Planning Training Projects

AGENCY: Office of Family Planning, OPA, PHS.

ACTION: Notice.

SUMMARY: The Office of Family Planning (OFP) of the Office of Population Affairs requests applications for grants under the Family Planning Service Training Program authorized under section 1003 of the Public Health Service (PHS) Act (42 U.S.C. 300a–1(a)). Funds are available to train family planning personnel in order to maintain the high level of performance of family planning services projects funded under Title X of the PHS Act. Training will be provided under this announcement at general training centers in three of the Department of Health and Human Services' (DHHS) regions.

DATES: To receive consideration, applications must be received by the Grants Management Office no later than May 28, 1996. Applications will be considered as meeting the deadline if they are either (1) received on or before the deadline date, or (2) postmarked on or before the deadline date and received in time for submission to the review committee. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks will not be accepted as proof of timely mailing. Applications which are postmarked or delivered to the Grants Management Office later than May 28, 1996 will be judged late and will not be accepted for review. Applications which do not conform to the requirements of the program announcement or meet the applicable requirements of 42 CFR part 59, subpart C, will not be accepted for review. Applicants will be notified, and applications will be returned.

ADDRESSES: Requests for application kits may be faxed to (301) 594–5980. Application kits may also be obtained from and applications must be submitted to the Office of Population Affairs, Grants Management Office, 4350 East-West Highway, Suite 200, West Tower, Bethesda, MD 20814.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Moskosky, Office of Family Planning at (301) 594–4008 is available for assistance on scientific, technical and program aspects, or Ms. Diane J. Osterhus, Grants Management Officer at (301) 594–4012 is available for business management issues. Staff are available to answer questions and provide limited technical assistance in the preparation of grant applications.

SUPPLEMENTARY INFORMATION: Title X of the PHS Act, 42 U.S.C. 300, *et seq.*, authorizes the Secretary of Health and Human Services to award grants for projects to provide training for family planning service personnel. (Catalog of Federal Domestic Assistance Number 93.260). This notice announces the availability of approximately $700,000 in funding and solicits applications for three general training projects to assist in the establishment and operation of regional training centers for Regions I, V, and VII. Grants will be funded within certain ranges, as set out below. The funding ranges for the regions are determined based on the assessment of the Deputy Assistant Secretary for Population Affairs (DASPA) of the regions' relative need for training funds; funding of individual grants within each funding range will be based on the DASPA's assessment of such factors as the training needs within the region and the cost and availability of personnel for training.

The training projects are as follows:

One general training grant for DHHS Region I (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont). A funding range of $181,500–$200,600 is available for this grant.

One general training grant for DHHS Region V (Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin). A funding range of $315,400–$348,600 is available for this grant.

One general training grant for DHHS Region VII (Iowa, Kansas, Missouri, Nebraska). A funding range of $168,400–$186,100 is available for this grant.

Statutory and Regulatory Background

Title X of the PHS Act, enacted by Public Law 91–572, authorizes grants for projects to provide family planning services to persons from low-income families and others. Section 1001 of the Act, as amended, authorizes grants "to assist in the establishment and operation of voluntary family planning projects which shall offer a broad range of acceptable and effective family planning methods and services (including natural family planning methods, infertility services and services for adolescents)." Section 1003 of the Act, as amended, authorizes the Secretary to make grants to entities to provide the training for personnel to carry out the family planning services programs.

The regulations set out at 42 CFR part 59, subpart C, govern grants for family planning services training. Prospective applicants should refer to the regulations in their entirety.

Role and Operation of the Training Program

Under the regulations, "training" means job-specific skill development. Continuing education activities that are innovative or non-traditional are encouraged. The development or use of self-paced, self-instructional or other training materials which utilize technological advancements in the learning field are also acceptable.

The purpose of the general training program is to provide short-term training, continuing education, inservice education and staff development for personnel in order to improve or maintain at a high level the performance of Title X family planning services providers.

Successful applicants will be required to work closely with a network of other PHS agencies, including the central and regional office staffs, Title X service delivery providers, and regional training advisory committees which provide representation from all service grantees. Successful applicants will be required to review and consider policy and program goals of the Title X family planning program, solicit advice from the regional training advisory committee, and consult with Title X service delivery providers about training priorities, course content, and curriculum. Because of outcomes from the community planning process and emphasis on community involvement, successful applicants should also stress mechanisms that solicit input from the "customer," both clinician and client.

In developing curricula and training programs, general training programs supported under this announcement should be sensitive to the importance of supporting the program priorities of the Title X services program, which include:

- Increased outreach to individuals not likely to seek services, including homeless persons, disabled persons, substance abusers and adolescents;
- Expansion of comprehensiveness of reproductive health services, including STD and cancer screening and prevention, increased involvement of male partners, HIV prevention, education and counseling, and substance abuse screening and referral;
- Increased emphasis on services to adolescents, including more community education, emphasis on postponement of sexual activity, and more accessible provision of contraceptive counseling and contraception;
- Elimination of disincentives to providing long-acting, highly effective contraceptives, serving high risk (and high-unit cost) clients, and providing nonrevenue-generating services, such as community education and prevention services; and
- Increased emphasis on training and retention of Women's Health nurse practitioners, particularly minority nurse practitioners and nurse practitioners serving disadvantaged and medically underserved communities.

Applicants must be prepared to focus training on emerging issues, such as managed care, new concepts in communication and increased emphasis on public information and education. The DHHS project officer or designee may periodically direct the training grantee to make adjustments in the training agenda. The applicant must demonstrate the ability to be flexible in terms of scheduling training that responds to emerging issues as directed by the DHHS project officer or designee. All training events shall be approved (in advance) by the DHHS project officer or designee.

Successful applicants will be responsible for the overall management of a general training program within the geographic area for which the grant is made. This responsibility includes:

- Developing an annual training plan which demonstrates flexibility in responding to emerging focus areas, and which reflects national and regional goals and the training needs of local Title X service providers;
- Developing criteria for selection of staff or consultants who will conduct training, including prerequisite qualifications. Such criteria should reflect a sensitivity to the unique types of training that will be needed to address emerging issues;
- Developing a process to identify the appropriateness of training offerings for the various levels of Title X services grantee personnel;
- Maintaining data on the regional training program sufficient to allow evaluation by central and regional offices, and self-evaluation by the training grantees;
- Developing and implementing an annual training schedule which includes measurable objectives for sessions, and which confers continuing education units to participants where appropriate;
- Making available at cost all materials developed with Title X funds to other federally-funded projects upon request;
- Attending at least one training meeting called by Central Office annually.

Application Requirements

Applications must be submitted on the forms supplied (PHS–5161–1) (OMB Approval No. 0937–0189) and in the manner prescribed in the application kits available from the Office of Grants Management. Applicants are required to submit an application signed by an individual authorized to act for the applicant agency or organization and to assume for the organization the obligations imposed by the terms and conditions of the grant award. Applicants are required to submit an original application and two copies.

Accepted applications will be subjected to a competitive review process. The results of this review will assist the DASPA in considering competing applications and in making the final funding decisions.

Any public or private nonprofit organizations or agency is eligible to apply for a grant. It is not required that an entity applying for a grant be physically located in the region to be served by the proposed project. Awards will be made only to those organization or agencies which have demonstrated the capability of providing the proposed services, and which have met all applicable requirements.

A copy of the legislation and regulations governing this program will be sent to applicants as part of the application kit package. Applicants should use the legislation, regulations and information included in this announcement to guide them in developing their applications. Applications should be limited to 50 doubled-spaced pages, not including appendices providing curriculum vitae or statements of organizational capabilities.

Application Consideration and Assessment

Eligible competing grant applications will be reviewed by a multidisciplinary panel of independent reviewers and assessed according to the following criteria:

1. The extent to which the proposed training program will enhance the delivery of services to Title X clients, particularly persons from low-income families. (15 points)

2. The extent to which the proposed training program has the potential to fulfill the training needs of the family planning services grantees in the areas to be served, which may include among other things:

a. Development of a capability within family planning services projects to provide pre- and in-service training to their own staffs;

b. Improvement of the family planning service delivery skills of family planning and health services personnel; and

c. Improvement in the utilization and career development of paraprofessional and paramedical manpower in family planning services.

Total consideration for a, b, and c. (15 points)

3. The extent to which the training program proposes appropriate strategies to improve the provision of family planning services in rural areas and Health Professional Shortage Areas (HPSAs). (10 points)

4. The capacity of the applicant to make rapid and effective use of the training grant. (10 points)

5. The administrative and management capability and competence of the project staff and applicant organization. (15 points)

6. The ability of the applicant to be flexible in making timely adjustments to the training agenda in order to meet emerging family planning needs, as directed by the DHHS project officer or designee. (20 points)

7. The degree to which the project plan adequately provides for the requirements set forth in 42 CFR 59.205, including the applicant's presentation of the project's objectives, the methods for achieving project objectives, the ability to involve providers and the regional office, and the results or benefits expected. (15 points)

In making grant award decisions, the DASPA will fund those projects which will, in her judgment, best promote the purposes of section 1003 of the Act, within the limits of funds available for such projects.

Grants will be approved for project periods of up to 3 years. Grants are funded in annual increments (budget periods). Funding for all approved budget periods beyond the first year of the grant is contingent upon satisfactory progress of the project, efficient and effective use of grant funds provided, and availability of funds.

Review Under Executive Order 12372

Applicants under this announcement are subject to the review requirements of Executive Order 12372, Intergovernmental Review of Department of Health and Human Services Programs and Activities, as implemented by 45 CFR part 100. As soon as possible, the applicant should discuss the project with the State Single point of Contact (SPOC) for each state in

the area to be served. The application kit contains the currently available listing of the SPOCs which have elected to be informed of the submission of applications. For those States not represented on the listing, further inquiries should be made by the applicant regarding the submission of the relevant SPOC. The SPOC's comment(s) should be forwarded to the Office of Population Affairs, Grants Management Office, 4350 East-West Highway, Suite 200, West Tower, Bethesda, MD 20814. Such comments must be received by the Office of Population Affairs by May 28, 1996 to be considered.

When final funding decisions have been made, each applicant will be notified by letter of the outcome. The official document notifying an applicant that a project application has been approved for funding is the Notice of Grant Award, which specifies to the grantee the amount of money awarded, the purposes of the grant, and terms and conditions of the grant award.

Dated: March 20, 1996.

Felicia H. Stewart,

Deputy Assistant Secretary for Population Affairs.

Part III

Department of Defense
General Services Administration
National Aeronautics and Space Administration

48 CFR Part 31
Federal Acquisition Regulation;
Contractor Overhead Certification;
Proposed Rule

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 31

[FAR Case 92–613]

RIN 9000–AG85

Federal Acquisition Regulation; Contractor Overhead Certification

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council (CAAC) and the Defense Acquisition Regulations Council (DARC) are considering revisions to the Federal Acquisition Regulation to clarify the allowability of certain costs. This regulatory action was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

DATES: Comments should be submitted on or before May 28, 1996, to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat, (VRS), 18th & F Streets NW., Room 4037, Washington, DC 20405.

Please cite FAR case 92–613 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy F. Olson at (202) 501–3221 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405; telephone: (202) 501–4755. Please cite FAR case 92–613.

SUPPLEMENTARY INFORMATION:

A. Background

The General Accounting Office (GAO), in its report GAO/NSIAD–93–79, "CONTRACT PRICING: Unallowable Costs Charged to Defense Contracts," dated November 20, 1992, reported many instances where contractors had proposed costs for gifts and entertainment that appeared to be questionable. Some of those costs appeared to be unallowable under the existing cost principles and others, while not specifically unallowable, appeared to be unreasonable. GAO recommended that FAR 31.205–1, 31–205–13, and 31.205–14 be revised to eliminate confusion as to which cost principle was controlling. The December 1992 OMB SWAT summary report on civilian agency contracting practices also recommended these cost principles be made more explicit.

This proposed rule removes from paragraph (f)(5) of the cost principle at FAR 31.205–1, Public relations and advertising costs, the parenthetical reference to other cost principles to eliminate any confusion as to which cost principle governs. Other recommendations made by GAO and the OMB SWAT concerning further revisions to the cost principles have now been overtaken by the implementation of the Federal Acquisition Streamlining Act of 1994 (FASA), Public Law 103–355. These include revisions to FAR 31.205–13 and 31.205–14, which were published as final in the **Federal Register** at 60 FR 42648, August 16, 1995, under FAR Case 94–750, Entertainment, Gift, and Recreation Costs for Contractor Employees. FAR Case 94–750 implements section 2192 of FASA. Revisions to FAR Parts 42 and 52, requiring contractors to certify that indirect cost rate proposals do not contain unallowable costs, were published as a final rule in the **Federal Register** at 60 FR 42663, August 16, 1995, under FAR Case 94–752, Contractor Overhead Certification, which implements section 2151 of FASA.

B. Regulatory Flexibility Act

This proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most contracts awarded to small businesses are awarded through sealed bidding on a firm fixed-price basis. The cost principles apply only where contracts are based on cost or pricing data. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. Comments from small entities concerning the affected FAR subpart will be considered in accordance with section 610 of the Act. Such comments must be submitted separately and should cite 5 U.S.C. 601, et seq., (FAR case 92–613), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, et seq. 5 CFR 1320.7(j)(1) provides an exclusion for certifications when they entail no burden other than necessary to identify the respondent, the date, the respondent's address and the nature of the instrument.

List of Subjects in 48 CFR Part 31

Government procurement.

Dated: March 25, 1996.

Edward C. Loeb,

Director, Federal Acquisition Policy Division.

Therefore, it is proposed that 48 CFR part 31 be amended as set forth below:

1. The authority citation for 48 CFR part 31 continues to read as follows:

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

31.205–1 [Amended]

2. Section 31.205–1(f)(5) is amended by removing the parenthetical.

Part IV

Department of Housing and Urban Development

NOFA for the Traditional Indian Housing Development Program for Fiscal Year 1996; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4001–N–01]

Office of the Assistant Secretary for Public and Indian Housing; NOFA for the Traditional Indian Housing Development Program for Fiscal Year 1996

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of funding availability (NOFA) for Fiscal Year 1996.

SUMMARY: This notice announces the availability of approximately $160,000,000 in Fiscal Year (FY) 1996 funding for the development of new Indian Housing (IH) units and provides the applicable criteria, processing requirements and action timetable. All Indian housing authorities (IHAs) which have not been determined to be administratively incapable, in accordance with 24 CFR 950.135, are invited to submit applications for Indian Housing developments in accordance with the requirements of this NOFA.

Note: The Congress has not yet enacted a U.S. Department of Housing and Urban Development and Independent Agencies Appropriations Act for Fiscal Year 1996. However, HUD is publishing this notice in order to give potential applicants adequate time to prepare applications. The estimate of the amount of funds available for this program is based on the anticipated level of funding for FY 1996. HUD is not bound by the estimate set forth in this notice.

DATES: Applications must be physically received by the area Office of Native American Programs (ONAP), within whose jurisdiction the applicant is located, on or before 3:00 p.m., ONAP local time, April 13, 1996. The applicant shall submit its application(s) for new housing units on Form HUD–52730 with all supporting documentation required by Appendix 2, and for demolition or disposition in accordance with 24 CFR part 950, subpart M.

FOR FURTHER INFORMATION CONTACT: Applicants may contact the appropriate area ONAP for further information. Refer to Appendix 1, for a complete list of ONAPs and telephone numbers.

SUPPLEMENTARY INFORMATION:

Background Information

Paperwork Reduction Act Statement

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the information collection requirements contained in these application procedures for development funds were reviewed by the Office of Management and Budget and assigned OMB control number 2577–0130. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid control number.

Changes from FY 1995 NOFA

The Indian Housing Development NOFA for FY 1996 is essentially the same document published for the FY 1995 funding cycle with the following substantive changes:

A. Funding for replacement units. In prior year NOFAs, funding to replace units approved for demolition/disposition was set aside from the national allocation of new Indian Housing Development funds. Under this NOFA, funds are being withheld sufficient to fund replacement of units approved for demolition/disposition prior to FY 1996. For units approved for demolition/disposition in FY 1996, replacement housing may be funded by each area ONAP utilizing funds assigned to the area ONAP for new Indian Housing units.

B. IHAs impacted by the rescission of new Indian Housing Development funds in FY 1995. IHAs that lost units/funds due to the rescission of new Indian Housing Development funds in FY 1995 who are eligible to submit applications for funding in FY 1996 may submit an additional application(s) to replace the lost units/funds. An additional rating factor has been added which is applicable for those IHA's which lost funds/units due to the rescission.

C. Special provisions for state created IHAs for non-Federally recognized tribes. Application requirements applicable to state created IHAs for non-Federally recognized tribes have been included to highlight the corresponding regulatory requirement at 24 CFR 950.225(a)(3).

D. Treatment of minor technical deficiencies. To reduce workload requirements for IHAs, ONAPs will not request correction of minor technical deficiencies in applications until after completion of the rating and ranking. Only IHAs within a reasonable funding range will be requested to correct minor technical deficiencies.

E. Rating criterion for length of time since the last new Indian Housing Development grant award. This rating criterion has been simplified to provide each application with two points per year for each year since the last grant award through FY 1994.

F. Limit on awards to new IHAs. To assist new IHAs in establishing administration without overtaxing the organization, new IHAs are limited to submitting one application, either for mutual help or low rent units for a maximum of 15 units.

G. Submission of cooperation agreements. To avoid unnecessary work for IHAs that do not rank within the funding range, the timing of the submission of cooperation agreements is changed to after funding decisions are made. Where required, valid cooperation agreement(s) must be submitted to the area ONAP before an Annual Contributions Contract is executed and a Development Cost Budget is approved which exceed the requirements for planning funds as specified at 24 CFR 950.229(a)(1).

I. New Development

A. Authority. 1. Statutory Authority. Sections 5 and 6, U.S. Housing Act of 1937 (42 U.S.C. 1437c, 1437d), as amended; Section 23 U.S. Housing Act of 1937, as amended by section 554, Cranston-Gonzalez National Affordable Housing Act; section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d).

2. Indian Housing Regulations. Indian Housing Development regulations are published at 24 CFR part 950.

3. 24 CFR Part 135. Economic Opportunities for Low and Very Low Income Persons. All applicants are herein notified that the provisions of section 3 of the Housing and Urban Development Act of 1968, as amended, and the regulations in 24 CFR part 135 are applicable to funding awards made under this NOFA. One of the purposes of the assistance is to give, to the greatest extent feasible, and consistent with existing Federal, state, and local laws and regulations, job training, employment, contracting and other economic opportunities to section 3 residents and section 3 business concerns. IHAs and tribes that receive HUD assistance described in this part shall comply with the procedures and requirements of this part to the maximum extent consistent with, but not in derogation of, compliance with section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b).

B. Development Allocation Amount. The Indian Housing Development funds for FY 1996 total approximately $160,000,000.

Note: The Congress has not yet enacted a U.S. Department of Housing and Urban Development and Independent Agencies Appropriations Act for Fiscal Year 1996. However, HUD is publishing this notice in order to give potential applicants adequate time to prepare applications. The estimate of the amount of funds available for this program is based on the anticipated level of funding for FY 1996. HUD is not bound by the estimate set forth in this notice.

Each of the ONAP jurisdictions has been designated as the smallest practical area for the allocation of assistance. Funds available for new units will be assigned to the ONAPs consistent with 24 CFR 791.403.

Up to $2,971,674 of the available Indian Housing Development funds will be made available by the Department in order to provide funds needed to replace units approved for demolition/disposition in FY 1995 or prior years. Any portion of the $2,971,674 withheld for pre-FY 1996 replacement units that is not designated for demolition/disposition replacements by July 1, 1996, as well as any amounts of actual recaptures that are realized and reallotted to the program, will be made available to the six ONAPs on the same basis as the amounts allocated for new units.

Replacement units for demolition/disposition approved in FY 1996 may be funded from assignments for new Indian Housing units provided to the area ONAP within whose jurisdiction such Indian housing authority resides. Funding of replacement units is not subject to the competition announced by this NOFA.

The competitive process described in this NOFA will be used to select IHA applications to be funded for new Indian Housing units. Departmental compliance with the metropolitan/non-metropolitan provisions of section 213(d) of the Housing and Community Development Act of 1974 may require the selection of lower rated metropolitan applications over higher rated non-metropolitan applications. Based upon an assumed appropriation of $160,000,000, the table below indicates the grant authority available for new units in FY 1996 for the six ONAPs, inclusive of funds needed to meet off-site sewer and water requirements.

ONAP location	Funds assigned
Eastern/Woodlands	$22,069,860
Southern Plains	23,164,348
Northern Plains	18,051,820
Southwest	48,802,519
Northwest	14,248,750
Alaska	30,691,029
Total	157,028,326

C. Eligibility for New Housing Units. 1. Eligible applicants. All IHAs which meet the eligibility criteria specified at 24 CFR 950.207 are invited to submit applications for new Indian Housing units. All IHAs that have developments assisted under the U. S. Housing Act of 1937, as amended, and meet the requirements of 24 CFR part 950 subpart M, may apply for funds for demolition or disposition, whether eligible for new units or not. Such applications are not limited to the application due date specified in this NOFA.

2. Applications. IHAs may submit one application per program type (mutual help and low rent). Umbrella IHAs may submit one application per program type for each member tribe. An umbrella IHA is one that serves two or more Federally recognized tribes or Alaska native villages. New IHAs or existing umbrella IHAs with new, previously unserviced member tribes may submit one application for a maximum of 15 units (either mutual help or low rent).

3. Impact of funds rescinded in FY 1995. IHAs which lost funds/units as a result of the *Emergency Supplemental Appropriations for Additional Disaster Assistance, Anti-Terrorism Initiatives, for Assistance in the Recovery From the Tragedy That Occurred at Oklahoma City, and Rescissions Act, 1995,* (Pub. L. 104–19, approved July 27, 1995) may submit an application (or one per program type, if appropriate) in addition to the applications allowed under paragraph 2 above if the funds rescinded were equal to or greater than 80 percent of the cost of a typical 3 bedroom unit as specified in Notice PIH 95–46 (HUD) for the IHA's total development cost area(s). Umbrella IHAs may submit an application (or one per program type, if appropriate) for each member tribe impacted by the FY 1995 rescission. Project terminations and funding reductions in FY 1995 for projects that failed to reach construction start within 30 months after initial grant approval (see 24 CFR 950.210(c)) will not be considered for funding under the provisions of this paragraph. Funds requested for applications under this category will be adjusted to the amount required to fund the number of units nearest the amount rescinded.

4. State created IHAs for non-Federally recognized tribes. To be considered responsive to this NOFA and to be included in the rating and ranking of applications, state created IHAs for non-Federally recognized tribes must identify the general locality where the proposed units will be developed and certify that the proposed area of development is within the area of operation of the IHA. Area of operation is defined as a land area with defined geographical boundaries, which has a significant concentration of Indian families who are:

(i) Not eligible to be served by a public housing authority or other tribally created IHA; and

(ii) Have a bona fide historic presence or connection with the land, as recognized by the Federal Government or a state.

D. Development Award Application Process. 1. Application Due Date. An IHA may submit an application(s) for a project at any time after the publication date of this NOFA, to the ONAP having jurisdiction over the IHA applicant on or before 3:00 p.m., ONAP local time, May 13, 1996, for new Indian Housing units. The application(s) shall be submitted on Form HUD–52730 and shall be accompanied by all the legal and administrative attachments required by the form and the items specified in Appendix 2. A facsimile of the application will NOT constitute physical delivery.

The application deadline is firm as to date and hour. HUD will treat as ineligible for consideration any application that is received after the application deadline. Applicants should make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery related problems.

2. Application Kit. An application kit and applicable forms may be obtained from any ONAP listed in Appendix 1.

3. Submittal of Complete Application. Completed applications must be submitted to the ONAP, within whose jurisdiction the IHA applicant is located, at the address/location listed in Appendix 1.

4. Action on Application. When the application is received by HUD, a written notification will be provided to the IHA showing the date and time the application was received in the ONAP. The ONAP will review each application for completeness and legal sufficiency. Applications that contain insufficient information to allow the ONAP to rate and rank the application will be considered non-responsive and will be returned to the IHA. After completion of this review, the ONAP will rate and rank all remaining applications received from eligible applicants. The ranking will result in an ordered listing of applicants (see E.2. below). After completion of the rating and ranking, the ONAP may request, in writing, items missing from responsive applications from applicants who appear to be within 110 percent of the funding range. IHAs notified to provide information missing from the application have 14 days from the date of such notification to submit such information to the ONAP before the application is considered non-responsive and is removed from funding consideration.

E. Rating Factors and Selection Criteria. 1. Rating and Ranking. Rating

and ranking of applications from IHAs for new Indian Housing units will be done in accordance with 24 CFR 950.225. Applications from new IHAs, or, in the case of an umbrella IHA that has added a new tribe, the application from the new tribe, will receive 100 points. If an IHA that serves more than one tribal government, or, in the case of Alaska, more than one village, submits applications for housing units in several of the communities, each application will be treated separately, for purposes of the number of points awarded. Newly created IHAs for tribes which have previously received housing units under an umbrella IHA shall not be awarded 100 points but scored as an established IHA utilizing the best available data relevant to the tribe's housing program. For each ONAP jurisdiction, the rankings will be based on awarding points to each application for the following categories in accordance with the table of maximum points available per category by ONAP jurisdictional area (see h. below):

a. *The relative unmet IHA need* for housing units compared to the other eligible applications for that program type [i.e., low rent (LR) or mutual help (MH)], based on IHA waiting lists and the total number of units in management and in the development pipeline. There should be a separate waiting list for each program type. This need will be measured for each program type by dividing the number of families on the waiting list, by the IHA's total number of units in management and under development. If the result of this division is greater than 1.00, the maximum points for this category shall be awarded. Otherwise, the result of this division shall be multiplied by the maximum possible points available. If the IHA has 500 or more families on the waiting list, it is awarded the maximum points available for the category. If questions arise regarding the veracity of information on a waiting list, an ONAP may request an applicant to submit documentation supporting waiting list numbers, or may visit the IHA and review documentation maintained by the IHA.

b. *The relative IHA occupancy rate compared to the occupancy rates of other eligible IHA applications for that program type.* The occupancy rate for an IHA shall be derived from the most recent data entered in the HUD Management Information Retrieval System (MIRS) national data base, which reports total units available and total units occupied based on information supplied by IHAs on forms submitted periodically to HUD. For all IHA projects in management, the total number of units occupied is divided by the total number of units available, multiplied by 100. This occupancy rate for an IHA will then be divided by the highest occupancy rate of any IHA (never to exceed 97%, in any event), and this ratio shall be multiplied by the maximum points available for the category to calculate an IHA's points for this category. An existing IHA that is applying for a previously unfunded program type will be awarded a score equal to the highest rated score for this factor in the ONAP jurisdiction competition. A newly created IHA for a tribe which previously received housing units under an umbrella IHA shall be awarded a score based on the units within such tribe's jurisdiction whether or not such units have been transferred to the newly created IHA.

c. *Length of time since the last new Indian Housing Development grant was approved.* Two points will be awarded for each year since the last grant award up to and including FY 1994, up to the maximum points available under this category. A newly created IHA for a tribe which previously received housing units under an umbrella IHA shall be awarded a score based on the last new Indian Housing Development grant approved within such tribe's jurisdiction. Units received for demolition or disposition purposes will not be counted for rating and ranking purposes for new Indian Housing units in FY 1996.

d. *Current IHA development and physical improvements activity.* This factor evaluates the IHA's performance during the past 24 months in developing new housing or maintaining/improving current housing. The ONAP will evaluate the IHA's performance in these areas and will award points based upon but not limited to:

(1) Compliance with the requirements specified under 24 CFR 950.207(b);

(2) Compliance with CompGrant/ modernization implementation schedules;

(3) Effectiveness of maintenance policies and procedures in protecting physical assets of the IHA;

(4) Effectiveness of the IHA's development and physical improvements contract administration.

The ONAP will prepare written support for the number of points awarded which will be available to the IHA upon request. The ONAP shall take into consideration any unforeseen events such as natural disasters or other factors that may have precluded the IHA from meeting the criteria for this factor. The maximum points available for this category are listed in the table under h. below. A newly created IHA for a tribe which previously received housing units under an umbrella IHA shall be awarded a score based on the IHA's plan for developing and maintaining the units.

e. *IHAs impacted by the FY 1995 rescission.* Each application submitted under the provisions of I.C.3. of this part shall be awarded 35 points.

f. *A bonus* of up to 5 points will be awarded to any application where the applicant clearly demonstrates:

(1) Pre-planning of site selection and coordination with other funding agencies, utility companies, and tribal departments, or

(2) That the applicant has identified and selected sites for the development which result in savings of not less than 5 percent of the proposed development cost from using existing utility systems, pre-developed subdivision sites, or other items documented by the applicant.

(3) Innovative approaches to development or financing which will significantly reduce the delivery time of housing or expand the number of houses developed without reducing quality.

g. *Computation.* Scores for ranking shall be carried out to two decimal places (xx.xx).

h. *Points available for each rating category.* The following table reflects the maximum points available for each category for each of the ONAP jurisdictional areas:

	Points awarded for rating factors			
	(a) Need	(b) Occupancy	(c) Time	(d) Workload
Eastern/Woodlands	30	30	20	20
Southern Plains	35	10	25	30
Northern Plains	30	20	20	30
Southwest	40	20	20	20
Northwest	10	10	20	60
Alaska	40	20	20	20

2. Selection Criteria. a. *The ranking process will produce an ordered list* of IHA applications by ONAP jurisdiction that may receive funding. The order is established by the total number of points the application received in the rating process. If any funds remain after the initial funding cycle within the ONAP jurisdiction, the funds will be provided to more fully fund applications that were reduced due to the Maximum Units Award table shown in paragraph b below.

b. *The number of units awarded* shall be based upon the following table to ensure a more equitable distribution and meaningful competition based on need. Exceptions to the maximum number of units awarded based on the table shall be made and approved by the ONAP Administrator upon proper justification. Examples of justifications for varying from the table include equalization of units awarded to IHAs with similar scores or adjustments to assure the award of reasonably sized projects to all IHAs above a minimum score determined by the ONAP.

Waiting list by program type	Eastern/ Woodlands	Southern Plains	Northern Plains	Southwest	Northwest	Alaska
1,000 and above	200	300	20	240	35	300
750 to 999	150	200	20	160	30	200
500 to 749	100	150	20	120	25	150
400 to 499	60	100	20	80	20	100
300 to 399	50	80	20	60	15	80
200 to 299	40	50	20	40	10	60
199 and fewer	25	40	20	25	5	20

c. *Tie breaker.* In the case of ties, priority will be given to the application that has the highest scoring under the *Current IHA development and physical improvements activity* rating criterion (I.E.1.d.).

3. Replacement Housing. IHA applications for demolition or disposition may require a commitment for replacement housing units on a one for one replacement to comply with requirements of Section 18 of the U.S. Housing Act, as amended. IHAs are to process requests for demolition or disposition in accordance with 24 CFR part 905, subpart M.

II. Other Matters

A. HUD Reform Act. 1. Required Disclosures by Applicants.

a. *Disclosures.* All applicants are required to disclose information with respect to any additional funds that can reasonably be expected to be received by them as assistance in excess of $200,000 (in the aggregate) during the Fiscal Year that will be related to the project. Disclosure must be made relative to any related assistance from the Federal instrumentalities (other than HUD), a state, or a unit of general local government that is expected to be made available with respect to the project for which the applicant is seeking assistance. The assistance shall include but not be limited to any loan, grant, guarantee, insurance, payment, rebate, subsidy, credit, tax benefit, or any other form of direct or indirect assistance.

b. *Updates.* The IHA applicant shall update this disclosure within 30 days of any substantial change. This update is required during the period when an application is pending or assistance is being provided.

2. Prohibited Disclosures by HUD Employees. HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants. HUD employees involved in the review of applications and in the making of funding decisions are limited by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants or employees who have ethics related questions should contact the HUD Office of Ethics (202) 708–3815. (This is not a toll-free number.) For HUD employees who have specific program questions, such as whether particular subject matter can be discussed with persons outside HUD, the employee should contact the appropriate Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

B. Lobbying. Section 319 of the Department of the Interior and Related Agencies Appropriations Act hereafter referred to as the "Byrd Amendment," prohibits grantees from using any federally appropriated funds to influence federal employees, members of Congress, and congressional staff regarding specific grants or contracts. The Department has determined that the requirements of the Byrd Amendment do not apply to IHAs established by a tribal government exercising its sovereign powers with respect to expenditures specifically permitted by other Federal law. The Byrd Amendment requires all IHAs established under state law to submit the following documents for applications for grants exceeding $100,000.

1. Certification. A certification that no federally appropriated funds will be used for lobbying purposes. The certification shall be submitted on the Form entitled "Certification for

Contracts, Grants, Loans and Cooperative Agreements."

2. Disclosure Document. A document disclosing any lobbying activities (on Standard Form—LLL, "Disclosure of Lobbying Activities") where any funds other than federally appropriated funds will be or have been used to influence federal employees, members of Congress, and congressional staff regarding specific grants or contracts.

C. Conversions. During the first 24 months after Program Reservation, project conversion between program type (LR or MH) may only be considered where:

1. An IHA submitted projects for mutual help (MH) and low rent (LR), each scored high enough to be funded, and the IHA has the waiting list to support the conversion, or

2. If only one application was submitted and approved, the application upon re-ranking in the other program has to score at least 0.01 higher than the number of points achieved by the highest rated application from any IHA which was not funded. If neither circumstance exists, the request to convert will not be approved.

D. Errors in Ranking and Rating Fiscal Year 1995. 1. Errors made by an ONAP during the 1995 fiscal year rating and ranking that resulted in a change of rank order detrimental to an IHA may be corrected as follows:

a. The ONAP will construct a hypothetical distribution that would have existed if the error had not been made, and

b. The ONAP will determine what the unit award/funding would have been for the IHA subject to the funds that were available at the time.

2. Remedial action will be taken for errors made by an ONAP as follows:

a. The ONAP will deduct any funds needed from the FY 1996 fair share assigned to that ONAP before any FY 1996 rating and rankings are completed.

b. A correction of an error for an IHA will not adversely affect the IHA participation in the FY 1996 rating and ranking process. The IHA's application will be rated and ranked on the same basis as other applications and as if no error was made.

E. Environment. A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection during business hours in the Office of the Rules Docket Clerk, Office of General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, S.W. Washington, D.C. 20410. For individual development projects, the IHA must comply with the environmental review procedures in 24 CFR part 58, including the limitation in section 58.22 on committing or expending funds before environmental clearance, in accordance with 24 CFR 950.247.

F. Other Federal requirements. In order to be eligible for funding, activities must be in compliance with Section 504 of the Rehabilitation Act of 1973 and implementing regulations at 24 CFR 8 and the Americans with Disabilities Act of 1990 (ADA) and implementing regulations for Title II of the ADA issued by the Department of Justice at 28 CFR part 35.

Dated: March 22, 1996.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

APPENDIX 1

Tribes & IHAs location	ONAP addresses
East of the Mississippi River (including all of Minnesota) and Iowa: Mohammed Rahmah	Eastern/Woodlands Office of Native American Programs, 5P, Metcalfe Federal Building, 77 West Jackson Boulevard, Chicago, Illinois 60604–3507, (312) 353–1282 or (800) 735–3239, TDD Numbers: 1–800–927–9275 or 312–886–3741.
Louisiana, Missouri, Kansas, Oklahoma, and Texas except for Isleta del Sur: Sherri Hunt.	Southern Plains Office of Native American Programs, 6.IPI 500 W. Main, Suite 400, Oklahoma City, Oklahoma 73102, (405) 553–7428, TDD Numbers: (405) 231–4181 or (405) 231–4891.
Colorado, Montana, Nebraska, North Dakota, South Dakota and Wyoming: Ann Roman.	Northern Plains Office of Native American Programs, 8P, First Interstate Tower North, 633 17th Street, Denver, Co 80202–3607, (303) 672–5462, TDD Number: (303) 672–5248.

New Mexico and Isleta del Sur in Texas: Sharon Booth	Albuquerque Division of Native American Programs, 9EPIDI, Albuquerque Plaza, 201 3rd Street, N.W. Suite 1830, Albuquerque, New Mexico 87102–3368, (505) 766–1372, TDD Number: None.
Idaho, Oregon and Washington: Dan Gough	Northwest Office of Native American Programs, 10PI, 909 First Avenue, Suite 300, Seattle, Washington 98104–1000, (206) 220–5270, TDD Number: (206) 220–5185.
Alaska: Donna Hartley	Alaska Office of Native American Programs, 10.1PI, 949 East 36th Avenue, Suite 401, Anchorage, Alaska 99508–4399, (907) 271–4633, TDD Number: (907) 271–4328.

Appendix 2—New Indian Housing Development Application Submission Checklist

Note: Certain submission requirements listed on the following checklist are included on the application form HUD–52730. It is the responsibility of the IHA to assure that all submission requirements of the checklist are met whether through the application form or by separate submittal:

1. Application Form HUD–52730:
—Complete application on Form HUD–52730 (5/94).
—Attach all exhibits and tables as required.

2. IHA Resolution(s): each application must be accompanied by an IHA Resolution which contains the following:
—A statement that authorizes the submission of the application for units.
—A statement explaining how solid waste disposal for the proposed development will be addressed.
—A statement regarding the planned access to public utility services and a listing of any official commitment(s) for these utility services for the development.
—The IHA Resolution must advise HUD of any persons with a pecuniary interest in the proposed development. Persons with a pecuniary interest in the development shall include but not be limited to any developers, contractors, and consultants involved in the application, planning, construction, or implementation of the development. (During the period when an application is pending or assistance is being provided, the applicant shall update the disclosure required within thirty days of any substantial change.)

3. Certifications: Each application must contain the following certifications provided by the Executive Director on IHA letterhead, in addition to the certifications included on Form HUD–52730 (5/94):
—Certification Regarding Drug-Free Workplace Requirements as directed by 24 CFR 24.630(b).
—Certification that the IHA has complied with all requirements of 24 CFR Part 135, which implements Section 3 of the HUD Act of 1968, as amended.

4. Letters: Each IHA application must be accompanied by a letter of support signed by the CEO of the general local government indicating:
—Support for the proposed application and development.
—Support for the IHA's intent to apply for planning funds for the development.
—Where applicable, assurance to HUD that access road needs will be identified by Tribal Resolution (with BIA concurrence) and entered on the BIA Indian Reservation Roads prioritization schedule used by BIA for resource allocation (25 CFR part 170: 57 BIAM 4 and Supplement 4).
—Acknowledgement that there is a need for the housing assistance applied for that is not being met by private enterprise.
—Assurance that there are, or will be available, public facilities and services adequate to serve the proposed housing. (If available, Tribal support is evidenced by attached letters from various organizations that will provide utilities and services to the proposed housing units.)

5. Supporting Documentation: Each application must be accompanied by the following supporting documentation:
—Disclosure of additional assistance from other sources that will be used in association with the project for which the applicant is seeking assistance.
—Statement specifying the number of eligible applicant families by program type (LR or MH). The statement must be supported by a sufficient number of current applications from eligible families maintained by the IHA.

6. Items That Should be Submitted, If Not Previously Submitted:
—Certified Copy of the Transcript of Proceedings containing the IHA Resolution pursuant to which the Application is being made.
—IHA Organization Transcript or General Certificate.
—Tribal Ordinance.

7. Optional Items:
—Cooperation Agreements. Where the provisions of the necessary local government cooperation are not contained in the ordinance or other enactment creating the IHA, the IHA is required to execute a cooperation agreement(s) for the location involved, which is sufficient to cover the number of units in the application. The cooperation agreement may be submitted with the application but shall be submitted before HUD may enter into an Annual Contributions Contract (or amendment thereto) for funds in excess of planning needs of the project.

8. Force Account. To enable the Field Office of Native American Programs to make an initial determination of the viability of the proposal, there are additional submission requirements for the application, including:
—IHA justification for HUD approval of the force account method, pursuant to 24 CFR 950.215(b).
—IHA or Tribal resolution agreeing to cover any costs in excess of the HUD-approved estimated construction cost.
—Evidence that either the IHA or Tribe has the resources to cover such excess costs.
—An action plan as outlined in HUD Handbook 7450.01 REV–1, Chapter 14, paragraph 14–5. (The Handbook has been rescinded; however, it continues to be used as guidance.)

9. Special submittal requirements for state created IHAs for non-Federally recognized tribes:
—Certification, signed by the Chairman of the IHA Board of Commissioners stating that sites selected or to be selected are within the IHA's area of operation.
—Supporting documentation including maps, state laws and local ordinances, and other relevant information which documents the IHA's area of operation, i.e., defined geographic boundaries which have a significant concentration of Indian families who are not eligible to be served by a public housing authority or tribally created IHA and have a bona fide historic presence or connection with the land, as recognized by the Federal Government or a state.

Part V

Department of Housing and Urban Development

Office of the Secretary

24 CFR Part 7
Equal Employment Opportunity, Policies and Procedures; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary; Equal Employment Opportunity; Policies and Procedures

24 CFR Part 7

[Docket No. FR 3323–F–01]

RIN 2529–AA61

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This final rule streamlines HUD's regulations in 24 CFR part 7 pertaining to equal opportunity policies and procedures, and updates these regulations to reflect current practices. Additionally, this rule makes HUD's equal employment complaint processing consistent with the Equal Employment Opportunity Commission's (EEOC) regulations at 29 CFR part 1614.

EFFECTIVE DATE: April 29, 1996.

FOR FURTHER INFORMATION CONTACT: Mari R. Barr, Director for Equal Employment Opportunity, Office of Departmental Equal Employment Opportunity, Room 4300 L'Enfant Plaza, (202) 708–3633, Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. (This telephone number is not toll-free.) For hearing- or speech-impaired persons this number may be accessed via TDD by contacting the Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Background

This final rule streamlines and updates HUD's regulations in 24 CFR part 7 pertaining to equal opportunity policies and procedures. With the exception of two sections (§§ 7.2, 7.3) these regulations have not been amended since 1971. The rule is revised to reflect the new organization of HUD's Equal Employment Opportunity (EEO) office. Additionally, this rule revises the regulations to parallel EEOC's regulations at 29 CFR part 1614, relating to Federal sector equal employment. It will enable quicker, more efficient processing of complaints and promotes impartial, fair and early resolution of complaints.

The revisions are as follows:

Section 7.1 Policy

This section has been revised by the adding of age and disability as additional bases of discrimination.

Section 7.2 Definition

The definition of a person with a disability, which means the same as handicap under EEOC's regulations at 29 CFR part 1614, has been added.

Section 7.3 Designation

This section replaces the Assistant Secretary for Fair Housing and Equal Opportunity as the Director of Equal Employment Opportunity. The Director of the Office of Departmental Equal Employment Opportunity is designated the Director of Equal Employment Opportunity (EEO).

The Deputy Director of the Office of Departmental Equal Employment Opportunity is designated as the Deputy Director of Equal Employment Opportunity.

This section also states that Equal Employment Opportunity officers shall be designated by the Director of EEO for their respective organizational units.

Section 7.4 Affirmative Employment Programs

The final rule adds a new section which states that the Office of the Secretary, the Assistant to the Deputy Secretary for Field Management, each Assistant Secretary, the General Counsel, the Inspector General, the President of Government National Mortgage Association, the Chief Financial Officer, the Director of Lead-Based Paint Abatement and Poisoning Prevention, and the Director, Office of Federal Housing Enterprise Oversight shall establish, maintain and carry out a plan of affirmative employment to promote equal employment opportunity in every aspect of employment policy and practice. Each plan shall identify instances of under-representation of minorities, women and persons with disabilities, recognize situations or barriers that impede equality of opportunity, and include objectives and action items targeted to eliminate any employment, training, advancement, and retention issues which adversely affect minorities, women and persons with disabilities.

Section 7.10 Responsibilities of the Director and Deputy Director of EEO

The function of selecting equal employment counselors has been added to the functions of the Director and Deputy Director of EEO.

Equal employment counselors previously were designated by EEO officers. The Director or the Deputy Director of EEO only concurred on the designations.

Section 7.11 Responsibilities of EEO Officers.

Each EEO officer has the additional responsibilities of

(1) advising the Director of EEO on all matters pertaining to the implementation of the Department's Equal Employment and Affirmative Employment policies and programs in the respective organizational units;

(2) Publicize to all employees of the organizational unit the name and address of the Director of EEO, the EEO Officer, and the EEO Counselor(s), the EEO Discrimination Complaint Manager, the Affirmative Employment Program (AEP) Manager, the Diversity Program Manager, and the EEO complaint procedures;

(3) Evaluate the performance by the managers and supervisors in the organization unit in carrying out their responsibilities;

(4) Seek a resolution of EEO matters alleging discrimination within their organization brought to their attention;

(5) Designate a high level Affirmative Employment Program (AEP) Manager in Headquarters responsible for the preparation of the AEP plan; the management of the plan; providing advice and guidance to managers and supervisors in removing barriers to Equal Employment Opportunity/ Affirmative Employment (EEO/AE) and in implementing all their EEO/AE responsibilities.

(6) Designate a senior level EEO Discrimination Complaint Manager in Headquarters to manage and direct the organization's EEO responsibilities;

(7) Designate a senior level Diversity Program Manager in Headquarters to manage and direct the organization's Diversity Program and provide resources for Diversity activities for its employees.

Section 7.12 Responsibilities of EEO Counselors

Age and disability discrimination have been added as additional reasons for counseling by EEO counselors.

Section 7.13 Responsibilities of the Assistant Secretary for Administration

This section was revised by adding three new responsibilities. They are as follows:

(1) Prepare and implement plans for recruitment and reports in accordance with the Federal Equal Opportunity Recruitment Program and the Disabled Veterans Affirmative Action Program;

(2) Make reasonable accommodation to the known physical or mental limitations of qualified applicants and employees with disabilities unless the accommodation would impose an undue hardship on the operation of the agency's program; and

(3) Designate a senior level Disability Program Manager to promote EEO/AE

for persons with disabilities; to assure the accessibility of all HUD facilities and programs; and to manage the resources for providing reasonable accommodation.

Section 7.14 Responsibilities of Human Resources Officers

The title of Director of Personnel has been replaced with the new title called Human Resources Officer. Certain responsibilities have been given Human Resources Officers in addition to those of the former Directors of Personnel. They are as follows:

(1) In coordination with the Director of the Training Academy, develop an on-going training program for various levels of administration and supervision, to insure understanding of the Departmental EEO/AE programs, policy and requirements which fosters effective teamwork and high morale, and provide communication with employees on any matter related to equal employment opportunity;

(2) Decide all personnel actions on merit principles in a manner which will demonstrative affirmative equal employment opportunity for the organization;

(3) Ensure the greatest possible utilization and development of the skills and potential ability of all employees;

(4) Track applicant flow and promptly take or recommend appropriate action to overcome any impediment to the achievement of the objectives of the EEO/AE programs; and

(5) Provide recognition to employees, supervisors, managers and units demonstrating superior accomplishment in equal employment opportunity.

Section 7.15 Responsibilities of the Assistant Regional Administrators for Equal Opportunity

This title has been removed from the table of contents.

Section 7.16 Responsibilities of Supervisors.

This title has been removed from the table of contents.

Section 7.17 Responsibilities of Managers and Supervisors

This new section states that responsibilities of managers and supervisors include the following:

(1) Removing barriers to EEO and ensuring that Affirmative Employment objectives are accomplished in their areas of responsibility;

(2) Evaluating subordinate managers and supervisors on their performance of EEO/AE responsibilities;

(3) Encouraging and taking positive steps to ensure respect for and acceptance of minorities, women and persons with disabilities, veterans and other diverse characteristics in the work force;

(4) Providing for the non-discriminatory treatment of all employees and for providing full and fair opportunity for all employees in obtaining employment and career advancement, including support for F.A.I.R., the Upward Mobility Program, the Mentoring Program and the Individual Development Plan;

(5) Encouraging and authorizing staff participation in the various Diversity Program observances;

(6) Being proactive in addressing EEO/AE issues, and for work environments that encourage and support complaint avoidance through sound management and personnel practices;

(7) Resolving complaints of discrimination early in the EEO process either independently, or through the use of alternate dispute resolution techniques, when it is the right thing to do and when it represents a sound business decision; and

(8) Making reasonable accommodation to the religious and disability needs of applicants and employees when those accommodations can be made without undue hardship on the business of the agency.

Section 7.25 Precomplaint Processing

EEOC's regulations, 24 CFR part 1614.105, shall apply concerning precomplaint processing.

Sections 7.30, 7.31, 7.32, 7.33 and 7.34—These sections have been revised to provide more efficient measures of handling EEO complaints.

The following titles have been removed from the table of contents:

§ 7.35—Adjustment of complaints.
§ 7.36—Hearing.
§ 7.38—Avoidance of delay.
§ 7.40—Complaint file.

The following sections have been removed:

§ 7.45—Entitlement.
§ 7.46—Where to appeal.
§ 7.47—Time limit.
§ 7.48—Appellate procedures.
§ 7.49—Appellate review by the Commissioners.

Other Matters

Environmental Impact. The subject matter of this final rule is categorically excluded from HUD's environmental clearance procedures under 24 CFR 50.20(k). It relates to internal administrative procedures whose content does not constitute a development decision or affect the physical condition of project areas or building sites.

Impact on Small Entities. The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)) has reviewed and approved this rule, and in so doing certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule only streamlines and simplifies 24 CFR part 7.

Federalism. The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism,* has determined that the policies contained in this rule will not have substantial direct effects on states or their political subdivisions, or the relationship between the federal government and the states, or on the distribution of power and responsibilities among the various levels of government. The rule's coverage is limited to federal employees.

Family. The General Counsel, as the Designated Official under Executive Order 12606, *The Family,* has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the order. This final rule will make HUD's processing of employment discrimination complaints more efficient.

Justification for Final Rulemaking. The Department has determined that it is unnecessary to subject this rule to public comment. Since this rule is limited to removing obsolete provisions and updating provisions in part 7 to reflect current practices, prior public comment was determined to be unnecessary. Section 10.1 of 24 CFR part 10 states that notice and public procedure can be omitted if the Department determines in a particular case or class of cases that notice and public procedure are impracticable, unnecessary, or contrary to the public interest.

List of Subjects in 24 CFR Part 7

Administrative practice and procedure, Equal employment opportunity, Organization and functions (Government agencies).

Accordingly, 24 CFR part 7 is revised as follows:

PART 7—EQUAL EMPLOYMENT OPPORTUNITY; POLICY AND PROCEDURES

Subpart A—Equal Employment Opportunity Without Regard to Race, Color, Religion, Sex, National Origin, Age, or Disability

General Provisions

Sec.
7.1 Policy.
7.2 Definitions.
7.3 Designations.

Subpart B—[Reserved]

Authority: 42 U.S.C. 3535(d); E.O. 11478, 3 CFR, 1969 Comp. p. 306; 42 U.S.C. 2000e note.

Subpart A—Equal Employment Opportunity Without Regard to Race, Color, Religion, Sex, National Origin, Age, or Disability

General Provisions

§7.1 Policy.

In conformity with the policy expressed in Executive Order 11478 (34 FR 12985, 3 CFR, 1966–1970 Comp., p. 803) and with implementing regulations of the Equal Employment Opportunity Commission, codified under 29 CFR part 1614, it is the policy and the intent of the Department of Housing and Urban Development to provide equality of opportunity in employment in the Department for all persons; to prohibit discrimination because of race, color, religion, sex, national origin, age or disability in all aspects of its personnel policies, program, practices, and operations and in all its working conditions and relationships with employees and applicants for employment; and to promote the full realization of equal opportunity in employment through continuing programs of affirmative employment at every management level within the Department.

§7.2 Definitions.

For purposes of this subpart A—

AE means Affirmative Employment.

EEO means Equal Employment Opportunity.

Organizational unit means the jurisdictional area of the Office of the Secretary, the Assistant to the Deputy Secretary for Field Management, each Assistant Secretary, the General Counsel, the Inspector General, the President of the Government National Mortgage Association, the Chief Financial Officer, the Director of Lead-Based Paint Abatement and Poisoning Prevention, and the Office of Federal Housing Enterprise Oversight.

Person with a disability means the same as handicap under EEOC's regulations at 29 CFR part 1614.

§7.3 Designations.

(a) *Director of Equal Employment Opportunity.* The Director of the Office of Departmental Equal Employment Opportunity is designated the Director of EEO, except that with respect to complaints naming the Director and/or Deputy Director of Departmental EEO as the alleged discriminating official(s) and complaints arising in the Office of Departmental EEO, the Chief of Staff shall be Director of EEO.

(b) *Deputy Director of Equal Employment Opportunity.* The Deputy Director of the Office of Departmental Equal Employment Opportunity is designated as the Deputy Director of Equal Employment Opportunity and acts for the Director of EEO.

(c) *Equal Employment Opportunity Officers.* The Director of Equal Employment Opportunity shall designate appropriate HUD officials to be Equal Employment Opportunity Officers for their respective organizational units.

§7.4 Affirmative employment programs.

The Office of the Secretary, the Assistant to the Deputy Secretary for Field Management, each Assistant Secretary, the General Counsel, the Inspector General, the President of the Government National Mortgage Association, the Chief Financial Officer, the Director of Lead-Based Paint Abatement and Poisoning Prevention, and the Director, Office of Federal Housing Enterprise Oversight shall establish, maintain and carry out a plan of affirmative employment to promote equal opportunity in every aspect of employment policy and practice. Each plan shall identify instances of under-representation of minorities, women and persons with disabilities, recognize situations or barriers that impede equality of opportunity, and include objectives and action items targeted to eliminate any employment, training, advancement, and retention issues which adversely affect minorities, women and persons with disabilities. Each plan must be consistent with 29 CFR part 1614 and the governing Management Directive issued by the Equal Employment Opportunity Commission, and is subject to approval by the Director of Equal Employment Opportunity and shall be developed within the framework of Departmentwide guidelines published by the Director of EEO.

Responsibilities

§7.10 Responsibilities of the Director and Deputy Director of EEO.

The Director and Deputy Director of EEO are assigned the functions of:

(a) Advising the Secretary with respect to the preparation of plans, procedures, regulations, reports, and other matters pertaining to the Government's equal employment opportunity policy and the Department's EEO/AE programs;

(b) In coordination with other officials, developing and maintaining plans, procedures, and regulations necessary to carry out the Department's EEO programs, including a Departmentwide program of affirmative employment developed in coordination with other officials; approving programs of affirmative employment established throughout the Department;

(c) Evaluating from time to time the sufficiency of the Department's EEO/AE programs and reporting thereon to the Secretary with recommendations as to any improvement or correction needed, including remedial or disciplinary action with respect to managerial or supervisory employees who have failed in their responsibility;

(d) Appraising the Department's personnel operations at regular intervals to insure their conformity with the policy of the Government and the Department's equal employment opportunity program;

(e) Making changes in programs and procedures designed to eliminate discriminatory practices and improve the Department's EEO/AE programs;

(f) Selecting EEO Counselors;

(g) Providing for counseling by an EEO Counselor of an aggrieved employee or applicant for employment who believes that he or she has been discriminated against because of race, color, religion, sex, national origin, age or disability and for attempting to resolve on an informal basis or through a formal alternative dispute resolution process, the matter raised by the employee or applicant before a complaint of discrimination may be filed under §7.31;

(h) Providing for the prompt, fair and impartial processing of individual complaints involving issues of discrimination within the Department subject to 29 CFR part 1614;

(i) Making the final decision on discrimination complaints and ordering such corrective measures as may be necessary, including disciplinary action as is warranted by the circumstances when an employee has been found to have engaged in a discriminatory practice; and

(j) Executing settlement agreements to resolve EEO complaints.

§7.11 Responsibilities of the EEO Officers.

Each EEO Officer shall:

(a) Advise the Director of EEO on all matters affecting the implementation of the Department's EEO/AE policies and programs in the organizational unit;

(b) Develop and maintain a program of affirmative employment for the organizational unit and insure that it is carried out in an exemplary manner;

(c) Publicize to all employees of the organizational unit the name and address of the Director of EEO, the EEO Officer, and the EEO Counselor(s), the EEO Discrimination Complaint Manager, the Affirmative Employment Program (AEP) Manager, the Diversity Program Manager, and the EEO complaint procedures;

(d) Inform all supervisors in the organizational unit of the responsibilities and objectives of the EEO Counselors and the EEO complaint process and the importance of cooperating with the Counselors to informally find solutions to problems brought to the officer's attention by employees and applicants;

(e) Evaluate the performance by the managers and supervisors in the organizational unit in carrying out their responsibilities under this subpart and taking appropriate action;

(f) Seek a resolution of EEO matters alleging discrimination within their organization brought to their attention;

(g) Designate a high level Affirmative Employment Program (AEP) Manager in Headquarters responsible for the preparation of the AEP plan; the management of the plan; providing advice and guidance to managers and supervisors in removing barriers to EEO/AE and in implementing all their EEO/AE responsibilities; and reviewing all recruitment and personnel actions taken by managers and supervisors to ensure the achievement of AEP objectives;

(h) Designate a senior level EEO Discrimination Complaint Manager in Headquarters to manage and direct the organization's EEO responsibilities; and

(i) Designate a senior level Diversity Program Manager in Headquarters to manage and direct the organization's Diversity Program and provide resources for Diversity activities for its employees.

§7.12 Responsibilities of the EEO Counselors.

The EEO Counselors are responsible for counseling and attempting resolution of matters brought to the counselor's attention pursuant to §7.26 and 29 CFR part 1614 by any employee or applicant for employment who believes that he or she has been discriminated against because of race, color, religion, sex, national origin, age, or disability.

§7.13 Responsibilities of the Assistant Secretary for Administration.

The Assistant Secretary for Administration shall:

(a) Provide leadership in developing and maintaining personnel management policies, programs, automated systems and procedures which will promote continuing affirmative employment to insure equal opportunity in the recruitment, selection, placement, training, awards, recognition and promotion of employees, including an applicant flow tracking system;

(b) Provide positive assistance and guidance to organizational units and personnel offices to insure the effective implementation of the personnel management policies, programs, automated systems, and procedures on equal employment opportunity;

(c) Participate at the national level with other Government departments and agencies, other employers, and other public and private groups, in cooperative action to improve employment opportunities and community conditions which effect employability;

(d) Prepare and implement plans for recruitment and reports in accordance with the Federal Equal Opportunity Recruitment Program and the Disabled Veterans Affirmative Action Program;

(e) Make reasonable accommodation to the known physical or mental limitations of qualified applicants and employees with disabilities unless the accommodation would impose an undue hardship on the operation of the agency's program; and

(f) Designate a senior level Disability Program Manager to promote EEO/AE for persons with disabilities; to assure the accessibility of all HUD facilities and programs; and to manage the resources for providing reasonable accommodation.

§7.14 Responsibilities of Human Resources Officers.

In conformity with guidelines issued by the Assistant Secretary for Administration, Human Resources Officers shall:

(a) Appraise job structure and employment practices to insure genuine equality of opportunity for all employees to participate fully on the basis of merit in all occupations and levels of responsibility;

(b) Communicate the Department's equal employment opportunity policy and program and its employment needs to all sources of job candidates without regard to race, color, religion, sex, national origin, disability or age and solicit their recruitment assistance on a continuing basis;

(c) As appropriate, provide personnel information to EEO counselors and others who are involved in the decision on a discrimination complaint;

(d) Evaluate hiring methods and practices to insure impartial consideration for all job applicants;

(e) Ensure that new employee orientation programs contain appropriate references to the Department's EEO/AE policies and programs;

(f) Participate in the preparation and distribution of such educational materials as may be necessary to inform adequately all employees of their rights and responsibilities as described in this part, including the Department's directives issued to carry out the Equal Employment Opportunity Program;

(g) In coordination with the Director of the Training Academy, develop an on-going training program for various levels of administration and supervision, to ensure understanding of the Departmental EEO/AE programs, policy and requirements which fosters effective teamwork and high morale, and provide communication with employees on any matter related to equal employment opportunity;

(h) Decide all personnel actions on merit principles in a manner which will demonstrative affirmative equal employment opportunity for the organization;

(i) Ensure the greatest possible utilization and development of the skills and potential ability of all employees;
(j) Track applicant flow and promptly take or recommend appropriate action to overcome any impediment to the achievement of the objectives of the EEO/AE programs; and
(k) Provide recognition to employees, supervisors, managers and units demonstrating superior accomplishment in equal employment opportunity.

§ 7.15 Responsibilities of managers and supervisors.

All managers and supervisors of the Department are responsible for:
(a) Removing barriers to EEO and ensuring that Affirmative Employment objectives are accomplished in their areas of responsibility;
(b) Evaluating subordinate managers and supervisors on their performance of EEO/AE responsibilities;
(c) Encouraging and taking positive steps to ensure respect for and acceptance of minorities, women and persons with disabilities, veterans and others of diverse characteristics in the work force;
(d) Providing for the non-discriminatory treatment of all employees and for providing full and fair opportunity for all employees in obtaining employment and career advancement, including support for F.A.I.R., the Upward Mobility Program, the Mentoring Program and the Individual Development Plan;
(e) Encouraging and authorizing staff participation in the various Diversity Program observances;
(f) Being proactive in addressing EEO/AE issues, and for work environments that encourage and support complaint avoidance through sound management and personnel practices;
(g) Resolving complaints of discrimination early in the EEO process either independently, or through the use of alternate dispute resolution techniques, when it is the right thing to do and when it represents a sound business decision; and
(h) Making reasonable accommodation to the religious and disability needs of applicants and employees when those accommodations can be made without undue hardship on the business of the agency.

§ 7.16 Responsibilities of employees.

All employees of the Department are responsible for:
(a) Being informed as to the Department's EEO/AE programs;
(b) Adopting an attitude of full acceptance of minority, female and disabled group associates, and support of F.A.I.R.;
(c) Providing equality of treatment of, and service to, all citizens with whom they come in contact in carrying out their job responsibilities; and
(d) Providing assistance to supervisors and managers in carrying out their responsibilities in the EEO/AE programs.

Precomplaint Processing

§ 7.25 Precomplaint processing.

The regulations in 29 CFR 1614.105, concerning precomplaint processing shall apply.

Complaints

§ 7.30 Presentation of complaint.

At any stage in the presentation of a complaint, including the counseling stage, the Complainant shall be free from restraint, interference, coercion, discrimination, or reprisal and shall have the right to be accompanied, represented, and advised by a representative of the Complainant's own choosing, except as limited by 29 CFR 1614.605. If the Complainant is an employee of the Department, the employee shall have a reasonable amount of official time to present the complaint if the employee is otherwise in an active duty status. If the Complainant is an employee of the Department and designates another employee of the Department as Complainant's representative, the representative shall be free from restraint, interference, coercion, discrimination, or reprisal, and shall have a reasonable amount of official time, if the representative is otherwise in an active duty status, to present the complaint.

§ 7.31 Who may file a complaint, with whom filed, and time limits.

Any aggrieved person (hereafter referred to as the Complainant) who has observed the provisions of § 7.25 may file a complaint if the matter of discrimination was not resolved to the complainant's satisfaction. The complaint must be filed with the Director of EEO within fifteen (15) days of receipt of the Notice of Right to File a Complaint issued by the EEO Counselor. The Department may accept a complaint only if the Complainant has met the appropriate requirements contained in 29 CFR 1614.605.

§ 7.32 Contents.

(a) The complaint filed should include the following information:
(1) The specific action or personnel matter which is alleged to be discriminatory;
(2) The date the act or matter occurred;
(3) The protected basis or bases on which the alleged discrimination occurred;
(4) Facts and other pertinent information to support the allegation of discrimination; and
(5) The relief desired.
(b) To expedite the processing of complaints of discrimination, the Complainant should use HUD EEO–1 form to file the complaint.

§ 7.33 Acceptability.

The Director of EEO shall determine whether the complaint comes within the purview of the EEO regulations at 29 CFR part 1614 and shall advise the Complainant and Complainant's representative in writing of the acceptance or dismissal of the allegation(s) of the complaint. Should the Director of EEO dismiss the complaint or any allegations contained in the complaint, the written decision to the Complainant shall inform Complainant of the complainant's right to appeal the decision and of the time limit applicable to the right of appeal, if Complainant believes the dismissal improper.

§ 7.34 Processing.

(a) The Director of EEO will process complaints filed under 29 CFR part 1614 for the Department. The Director or the Director's designee has jurisdiction of any case.
(b) The Director of EEO shall provide for the development of a complete and impartial record on which to decide the merits of the allegations accepted for investigation.
(1) The person assigned to develop the factual record for the complaint shall occupy a position in the Department which is not, directly or indirectly, under the jurisdiction of the head of the part of the Department in which the complaint arose, or the person shall develop the record under a contract with the Department.
(2) The Department will develop a complete and impartial factual record, subject to the requirements of 29 CFR part 1614, upon which to make findings on the matters raised in the complaint and accepted for processing.
(3) The Director of EEO will provide the Complainant and the EEO Officer a copy of the record developed.

§ 7.35 Hearing.

(a) The Director of EEO will notify the Complainant of the Complainant's right to request an administrative hearing before the Equal Employment Opportunity Commission or a Final Agency Decision from the Department and the timeframes for executing the right to request an administrative hearing.
(b) The Director of EEO will notify the appropriate EEOC office of Complainant's timely request for a hearing and request the appointment of an administrative judge to conduct the hearing pursuant to 29 CFR 1614.109.

§ 7.36 Decision by Director of EEO.

Following consultation with the General Counsel and the Assistant Secretary for Administration, the Director of EEO shall make the final agency decision for the Department based on the record developed through the processing of the complaint. The decision shall require the remedial and corrective action necessary to ensure that the Department is in compliance with the EEO statutes and to promote the Department's policy of equal employment opportunity.

§ 7.37 Rights of appeal.

The provisions of 29 CFR part 1614, subpart D, shall govern rights of appeal.

§ 7.38 Relationship to other HUD appellate procedures.

(a) An aggrieved individual covered by a collective bargaining agreement that permits allegations of discrimination to be raised in a negotiated grievance procedure can file a complaint under these procedures or a negotiated grievance, but not both. An election to proceed under this part is indicated only by filing of a written complaint. An election to proceed under a negotiated grievance procedure is indicated by the filing of a timely grievance.
(b) An aggrieved individual alleging discrimination on the basis of race, color, religion, sex, national origin, age or disability related to or stemming from an action that can be appealed to the Merit Systems Protection Board (MSPB) can file a complaint under these procedures, or an appeal with the MSPB, but not both. Whichever is filed first, the complaint or the appeal, is considered an election to proceed in that forum.

Subpart B—[Reserved]

Dated: March 20, 1996.

Henry G. Cisneros,

Secretary.

ENERGY DEPARTMENT
Debarment and suspension (procurement) and governmentwide debarment and suspension (nonprocurement); drug-free workplace requirements; comments due by 4-2-96; published 2-2-96
National Environmental Policy Act; implementation; comments due by 4-5-96; published 2-20-96

ENVIRONMENTAL PROTECTION AGENCY
Air pollutants, hazardous; national emission standards:
Synthetic organic chemical manufacturing industry and other processes subject to equipment leaks negotiated regulation; comments due by 4-1-96; published 2-29-96
Air programs:
Stratospheric ozone protection–
Motor vehicle air conditioners servicing; comments due by 4-5-96; published 3-6-96
Refrigerant recycling; comments due by 4-1-96; published 2-29-96
Refrigerant recycling; comments due by 4-1-96; published 2-29-96
Refrigerant recycling; comments due by 4-1-96; published 2-29-96
Air quality implementation plans; approval and promulgation; various States:
California; comments due by 4-1-96; published 3-1-96
Kentucky; comments due by 4-5-96; published 3-6-96
Maryland; comments due by 4-1-96; published 3-1-96
Michigan; comments due by 4-1-96; published 3-1-96
Missouri; comments due by 4-1-96; published 2-29-96
Oklahoma; comments due by 4-1-96; published 2-29-96
Hazardous waste program authorizations:
Washington; comments due by 4-1-96; published 2-29-96
Pesticides; tolerances in food, animal feeds, and raw agricultural commodities:
Prosulfuron; comments due by 4-5-96; published 3-6-96
Sethoxydim; comments due by 4-1-96; published 2-29-96
Superfund program:
National oil and hazardous substances contingency plan–
National priorities list update; comments due by 4-1-96; published 3-1-96
Water pollution control:
Clean Water Act–
Pollutant analysis; test procedures guidelines; comments due by 4-2-96; published 1-26-96
Ocean dumping; bioassay testing requirements; comments due by 4-1-96; published 2-29-96

FEDERAL COMMUNICATIONS COMMISSION
Common carrier services:
Open video systems; implementation; comments due by 4-1-96; published 3-14-96
Satellite communications–
Fixed-satellite service in 13.75-14.0 GHz band; comments due by 4-1-96; published 3-6-96
Telecommunications Act; implementation–
Equipment standards; dispute resolution; comments due by 4-1-96; published 3-12-96
Radio broadcasting:
Arecibo Coordination Zone, PR; designation; comments due by 4-1-96; published 3-15-96
Radio stations; table of assignments:
California; comments due by 4-5-96; published 2-20-96
Delaware; comments due by 4-5-96; published 2-20-96
New York et al.; comments due by 4-5-96; published 2-20-96

Oregon; comments due by 4-5-96; published 2-20-96
Texas; comments due by 4-5-96; published 2-20-96

FEDERAL RESERVE SYSTEM
Truth in lending (Regulation Z):
Consumer protection; adequacy determination; comments due by 4-1-96; published 1-30-96

FEDERAL TRADE COMMISSION
Trade regulation rules:
Waist belts, leather content; misbranding and deception; comments due by 4-4-96; published 3-5-96

HEALTH AND HUMAN SERVICES DEPARTMENT
Food and Drug Administration
Chlorofluorocarbon propellants in self-pressurized containers:
Sterile aerosol talc; addition to list of essential uses; comments due by 4-1-96; published 3-1-96
Food additives:
Folic acid (Folacin); comments due by 4-4-96; published 3-5-96
Food for human consumption:
Food additives–
Sucrose esterified with medium and long chain fatty acids (olestra); comments due by 4-1-96; published 3-21-96
Food labeling–
Folate and neural tube defects; health claims and label statements; comments due by 4-4-96; published 3-5-96
Health claims, oats and coronary heart disease; comments due by 4-3-96; published 1-4-96

INTERIOR DEPARTMENT
Fish and Wildlife Service
Endangered and threatened species:
California condors, captive-reared; comments due by 4-1-96; published 2-29-96
